*The mission of the Office of the State Auditor is to improve government for the people of Colorado.*

February 11, 2014

Members of the Legislative Audit Committee:

Included herein is the report of the Statewide Single Audit of the State of Colorado for the Fiscal Year Ended June 30, 2013. The audit was conducted under the authority of Section 2-3-103, C.R.S., which authorizes the State Auditor to conduct audits of all state departments, institutions, and agencies.

The purpose of this report is to present the results of the Statewide Single Audit for the year ended June 30, 2013. The report includes our reports on compliance and other matters and internal control over financial reporting in accordance with *Government Auditing Standards* and requirements related to the federal Office of Management and Budget's *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*, and our audit opinion on the Schedule of Expenditures of Federal Awards. This report also contains our findings, conclusions, and recommendations, and the responses of the respective state agencies and institutions. Our opinion on the State's financial statements is presented in the State's Comprehensive Annual Financial Report for Fiscal Year 2013, which is available under separate cover.

This report may not include all of the findings and recommendations related to audits performed of state institutions and agencies. Some findings and recommendations are issued under separate report covers. However, in accordance with the federal Single Audit Act, this report includes all findings and questioned costs related to federal awards that came to our attention through either the Statewide Single Audit or other audits.

We Set the Standard for Good Government

# STATEWIDE SINGLE AUDIT FISCAL YEAR ENDED JUNE 30, 2013 Report Summary

Dianne E. Ray, CPA  
State Auditor

State of Colorado

## AUTHORITY, PURPOSE, AND SCOPE

This audit was conducted under the authority of Section 2-3-103, C.R.S., which authorizes the State Auditor to conduct audits of all departments, institutions, and agencies of state government. The audit was conducted in accordance with auditing standards generally accepted in the United States of America and with *Government Auditing Standards* issued by the Comptroller General of the United States. We performed our audit work during the period from February through December 2013.

The purpose of this audit was to:

- Express an opinion on the State's financial statements for the Fiscal Year Ended June 30, 2013.
- Express an opinion on the State's Schedule of Expenditures of Federal Awards for the Fiscal Year Ended June 30, 2013.
- Review internal accounting and administrative control procedures, as required by generally accepted auditing standards and *Government Auditing Standards*.
- Evaluate compliance with applicable state and federal laws, rules, and regulations.
- Evaluate progress in implementing prior years' audit recommendations.

## OVERVIEW OF FINDINGS AND AUDITOR'S OPINIONS

This report presents our financial and compliance audit of the State of Colorado for Fiscal Year 2013. The report may not include all findings and recommendations from separately issued reports on audits of state departments, institutions, and agencies. However, in accordance with the federal Single Audit Act, this report includes all findings and questioned costs related to federal awards that came to our attention through our audit.

We made 78 recommendations to state agencies and higher education institutions.

### FINANCIAL STATEMENT FINDINGS

- The State's financial statements covered \$32.1 billion in total assets and \$25.3 billion in total expenditures.
- We have issued an **unqualified opinion** on the State's financial statements for the Fiscal Year Ended June 30, 2013. That means the State's financial statements presented fairly, in all material respects, the State's financial position, results of all financial operations, and cash flows in conformance with generally accepted accounting principles.
- We identified **17 internal control weaknesses** related to compliance with internal control over financial reporting and other matters.

### FEDERAL PROGRAM FINDINGS

The State expended approximately \$10.4 billion in federal funds in Fiscal Year 2013. The four largest federal programs were:

- Medicaid: \$2.6 billion
- Student Financial Assistance: \$1.5 billion
- Unemployment Insurance: \$1.1 billion
- Supplemental Nutrition Assistance Program: \$887 million
- We identified **60 internal control issues** related to the State's compliance with requirements applicable to major federal programs.
- We identified nearly **\$145,000 in questioned costs** related to federal awards granted to the State.

For further information about this report, contact the Office of the State Auditor  
303.869.2800 - [www.state.co.us/auditor](http://www.state.co.us/auditor)

# FINANCIAL STATEMENT FINDINGS

This section summarizes our report on the State’s compliance with internal control over financial reporting and on compliance and other matters based on an audit of financial statements performed in accordance with *Government Auditing Standards*.

## Internal Controls Over Financial Activity and Financial Reporting

State agencies are responsible for having adequate internal controls in place to ensure compliance with laws and regulations and with management’s objectives. In addition, State agencies are responsible for reporting financial activity accurately, timely, and completely. As part of our audit, we reviewed the agencies’ and institutions’ internal control processes, including policies and procedures, related to financial reporting and tested a sample of financial transactions to ensure that internal controls were adequate and that financial activity was reported properly. We identified the need for improvements for the following State Agencies:

- **History Colorado:** History Colorado has not implemented adequate internal controls to ensure the proper preparation of accounting entries, timely reconciliations, year- end reporting, and segregation of duties. In addition, it does not have adequate internal written procedures in place for recording periodic transactions, such as debt service payments and reimbursements. This is considered a material weakness for the Department.
- **Department of Human Services:** The Department did not have strong internal controls over the County Financial Management System and payroll. These are both considered significant deficiencies.
- **Department of Labor and Employment:** Our fiscal year audit identified three issues at the Department. Specifically, we identified the following significant deficiencies:
  - The Department did not submit all of its exhibits and other reporting information timely to either the Office of the State Controller (OSC) and/or the auditors.
  - The Department lacks sufficient internal controls over its fiscal year-end calculation of earned, but unpaid, Unemployment Insurance benefits and federal grant revenue and receivables.
  - Department staff lacks understanding of the appropriate accounting for debt related transactions and did not seek additional guidance from the OSC or other State agencies for assistance. In addition, the Department’s internal control process to identify, prepare, review and approve debt-related year-end adjustments was ineffective as these adjustments were recorded incorrectly and not identified during the supervisory review process.

Professional standards define the following three levels of internal control weaknesses that must be reported. Prior to each recommendation in this report, we have indicated the classification of the finding.

A *material weakness* is the most serious level of internal control weakness. A material weakness is a deficiency, or combination of deficiencies, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and corrected, on a timely basis.

A *significant deficiency* is a moderate level of internal control weakness. A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

A *deficiency in internal control* is the least serious level of internal control weakness. A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. Deficiencies in internal control generally are reported to agencies in separate management letters and, therefore, would not be included in this report.

- **Department of Revenue:** The Department does not have any formal written procedures describing the process to make changes to GenTax, the State’s primary tax collections information system, for income tax credit review thresholds, the details of what are appropriate and allowable threshold changes, and documentation of proper approval of the changes. Additionally, GenTax users making changes and authorizing approvals of these credit thresholds are not properly segregated. In addition, the Department does not consistently retain supporting documentation of evidence of review of the daily Large Refund Reports. These issues are considered significant deficiencies.
- **Department of State:** The Department does not have adequate internal controls in place to ensure its staff adheres to State Fiscal Rules, State Procurement Rules, and State Fiscal Procedures. We identified this as a significant deficiency.

## **Internal Controls Over Information Technology Systems**

State agencies, often in cooperation with the Governor’s Office of Information Technology (OIT), are responsible for implementing, maintaining, and adequately securing the state’s computer systems. During our Fiscal Year 2013 audit, we determined that some state agencies’ computer systems did not comply with information technology-related auditing standards and/or the Colorado Information Security Policies. Specifically, we identified problems with a total of four computer systems at three agencies, resulting in four audit recommendations to the applicable agencies and/or OIT. The following bullets describe notable examples of these issues:

- The OIT did not implement all necessary controls related to access management and logging access over the GenTax system.
- The OIT has not implemented controls related to improving access control management, conducting system hardening, and improving disaster recovery over the KRONOS information system. KRONOS is a timekeeping and leave tracking system.
- The Department of Health Care Policy and Financing has not fully implemented user access controls over the Medicaid Management Information System (MMIS) to ensure compliance with state information security policies and industry best practices to effectively manage access to the MMIS application.
- The Department of Revenue and OIT did not fully implement controls related to access management and system hardening for the Colorado State Titling and Registration System (CSTARS), which is the primary information system for automating and tracking motor vehicle registrations and titles.

Our opinion on the financial statements is presented in the State’s Comprehensive Annual Financial Report for Fiscal Year 2013, which is available electronically from the Office of the State Controller’s website at <https://www.colorado.gov/pacific/osc/cafr>.

## **FEDERAL PROGRAM FINDINGS**

This section summarizes our report on the State’s compliance with requirements applicable to major federal programs and internal control over compliance in accordance with the federal Office of Management and Budget’s (OMB) *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. We planned and performed the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements that could have a direct and material effect on a major federal program occurred. As part of our audit, we determined the State’s compliance with federal regulations and grant requirements,

such as activities allowed or unallowed, allowable costs, cash management, eligibility, reporting, and subrecipient monitoring

## Internal Controls Over Federal Programs

The following table shows the breakout of types of internal control weaknesses over compliance with federal requirements that we identified during Fiscal Year 2013. Prior to each recommendation in this report, we have indicated the classification of the finding.

**Federal Compliance  
Internal Control Weaknesses  
Fiscal Year 2013**

A *material weakness* is the most serious level of internal control weakness. A material weakness is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

A *significant deficiency* is a moderate level of internal control weakness. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over compliance with a compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

A *deficiency in internal control* is the least serious level of internal control weakness. A deficiency in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a compliance requirement of a federal program on a timely basis.

## Compliance with Federal Program Requirements and Federal Reporting

Various state departments administer federal programs in Colorado and are required to comply with federal program requirements. We identified problems with several departments' compliance with those requirements. In the following bullets, we first discuss federal compliance issues at two departments—the Department of Human Services and the Department of Health Care Policy and Financing—that administer the State's largest federal programs that provide health care and human services benefits. We also describe federal compliance problems at four other state agencies that administer federal programs.

- **Department of Human Services:** The Department was not in compliance with federal requirements for four out of the six programs tested during our Fiscal Year 2013 audit. In addition, we identified errors in the Low-Income Energy Assistance Program (LEAP) based on testwork performed related to a prior audit recommendation. Specifically, we identified the following examples of federal compliance issues with the Department's administration of its federal programs:
  - **Supplemental Nutrition Assistance Program (SNAP):** The Department's SNAP Quality Assurance annual reports, for Federal Fiscal Years 2010 through 2012, state that the program's error rate for eligible cases was above the national average in two of the three fiscal years.

While the national error rate improved over the three-year period, the program's error rate worsened over the same time period. We identified this as a material weakness.

- **Temporary Assistance for Needy Families Program:** The Department did not properly monitor or provide adequate guidance and training to counties regarding case file documentation; data consistency; timely processing of eligibility; benefit calculations; improper payments; and Income, Eligibility, and Verification System information. We identified this as a material weakness for the program.
  - **Vocational Rehabilitation Program:** The Department has pervasive problems in its administration of this program that raise questions about its oversight, system of internal controls, and culture of accountability. We identified problems in each area we reviewed, resulting in 20 audit findings. Overall, the Department has not established effective program management practices to ensure that it carries out both its responsibilities under federal and state laws and its duty to taxpayers. We noted a material weakness overall for the program.
  - **Colorado Child Care Assistance Program:** The Department did not properly monitor or provide adequate training regarding eligibility and case management procedures. Furthermore, the Department lacks a process, such as a standard report, to identify case files that have been closed by a county but left "open" in the Child Care Automated Tracking System. We identified this as a significant deficiency for the program.
- **Department of Health Care Policy and Financing:** Our Fiscal Year 2013 audit did not identify any problems related to eligibility determinations for the Medicaid program. However, we did identify a significant deficiency in eligibility determinations for the Children's Basic Health Plan (CBHP) program, in which case file documentation was lacking or missing entirely from the reviewed case files. We found additional issues, classified as significant deficiencies for both the Medicaid and CBHP programs, such as the Department's reporting under the Federal Funding Accountability and Transparency Act (Transparency Act) and inadequately documented procedures for the Medicaid Eligibility Quality Control program.
  - **Department of Local Affairs:** The Department did not comply with the federal Housing and Urban Development's Section 8 Housing Choice Voucher Program's reporting requirements, by not filing accurate reports in a timely manner, and not completing timely roll forwards of equity. We identified this as a significant deficiency.
  - **Department of Public Health and Environment:** The Department was not in compliance with federal requirements for two out of four programs tested during our Fiscal Year 2013 audit. Specifically, we identified the following federal compliance issues with the Department's administration of its federal programs and consider both as significant deficiencies:
    - **HIV Care Formula Grants:** The Department does not have policies or procedures in place to require the maintenance of documentation for supervisory reviews for HIV Care eligibility determinations.
    - **Superfund Program:** The standard contract used by the Superfund program included suspension and debarment language related to the entity, but not to its principals. Further, the Department did not use any of the other acceptable methods of verification for the principals.
  - **Department of Education:** The Department was not in compliance with federal reporting related to the Transparency Act for the School Improvement Grant program. We identified this as a significant deficiency.

- **Governor’s Office:** The Office does not have adequate internal controls in place over, and is not in compliance with, federal suspension and debarment regulations for the Weatherization Assistance Program. We identified this as a significant deficiency.

## Summary of Progress in Implementing Prior Recommendations

This report includes an assessment of our disposition of audit recommendations reported in the previous Statewide Single Audit Reports. Prior years’ recommendations that were implemented in Fiscal Year 2012 or earlier are not included.

<b>Outstanding Statewide Single Audit Report Recommendations by Fiscal Year</b>

# Summary of Auditor's Results

---

## Financial Statements

Type of auditor's report issued: Unqualified

Internal control over financial reporting:

Material weaknesses identified?  Yes  No

Significant deficiencies identified that are not considered to be material weaknesses?  Yes  No

Noncompliance material to financial statements noted?  Yes  No

## Federal Awards

Internal control over major programs:

Material weaknesses identified?  Yes  No

Significant deficiencies identified that are not considered to be material weaknesses?  Yes  No

Type of auditor's report issued on compliance for major programs: Qualified

Unqualified for all major programs except for the following major programs, which were qualified:

- Supplemental Nutrition Assistance Program Cluster
- Housing Voucher Cluster
- Student Aid Financial Cluster
- Rehabilitation Services-Vocational Rehabilitation Grants to States
- School Improvement Grants Cluster
- Temporary Assistance for Needy Families Cluster
- Research and Development Cluster
- Medicaid Cluster

Any audit findings disclosed that are required to be reported in accordance with Section 510(a) of OMB *Circular A-133*?

Yes  No

Identification of major programs:

<b>CFDA Number</b>	<b>Name of Federal Program or Cluster</b>
10.551, 10.561	Supplemental Nutrition Assistance Program, State Administrative Matching Grants for the Supplemental Nutrition Assistance Program (SNAP Cluster)
10.557	Special Supplemental Nutrition Program for Women, Infants, and Children
14.871, 14.879	Section 8 Housing Choice Vouchers, Mainstream Vouchers, Family Unification Program (Housing Voucher Cluster)
17.225	Unemployment Insurance
20.205, 20.219	Highway Planning and Construction, Recreational Trails Program (Highway Planning & Construction Cluster)
64.015	Veterans State Nursing Home Care
66.802	Superfund State, Political Subdivision, and Indian Tribe Site-Specific Cooperative Agreements
81.042	Weatherization Assistance for Low-Income Persons
84.126	Rehabilitation Services - Vocational Rehabilitation Grants to States
84.367	Improving Teacher Quality State Grants
84.377, 84.388	School Improvement Grants; School Improvement Grants, Recovery Act (School Improvement Grants Cluster)
93.283	Centers for Disease Control and Prevention - Investigations and Technical Assistance

93.558, 93.714	Temporary Assistance for Needy Families, ARRA - Emergency Contingency Fund for Temporary Assistance for Needy Families (TANF) State Program (TANF Cluster)
93.575, 93.596	Child Care and Development Block Grant, Child Care Mandatory and Matching Funds of the Child Care and Development Fund (CCDF Cluster)
93.658	Foster Care - Title IV-E
93.720, 93.775, 93.777, 93.778	ARRA – Survey and Certification Ambulatory Surgical Center Healthcare Associated Infection (ASC-HAI) Prevention Initiative, State Medicaid Fraud Control Units, State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare, Medical Assistance Program (Medicaid Cluster)
93.767	Children’s Health Insurance Program
93.917	HIV Care Formula Grants
Various	Research and Development Cluster
Various	Student Financial Aid Cluster

Dollar threshold used to distinguish  
between type A and B programs: \$24.9 million

<b>Rec. No.</b>	<b>Page No.</b>	<b>Recommendation Summary</b>	<b>Agency Response</b>	<b>Implementation Date</b>
<b>Financial Statement Findings</b>				
2013-1	II – 6	The Governor’s Office of Information Technology (OIT) should improve GenTax account management controls by (a) maintaining an accurate list of support staff with access to the GenTax system and data. This list should be made available to Department of Revenue staff who are required to approve and monitor system access; (b) requiring that all support staff be made aware of, and follow all the policies regarding access to the GenTax system, including both state policies and Internal Revenue Service guidelines. In addition, support accounts that can potentially access Federal Tax Information should be reviewed and monitored on a regular basis to verify that policies are followed; (c) reviewing the administrative accounts in Active Directory, and enforcing segregated normal and administrative accounts where possible; and (d) establishing and following procedures to ensure that all access to the GenTax database be audited, or logged. In addition, the access and auditing settings should be reviewed on a regular basis to confirm that policy requirements are being implemented appropriately.	Agree	March 2014

<b>Rec. No.</b>	<b>Page No.</b>	<b>Recommendation Summary</b>	<b>Agency Response</b>	<b>Implementation Date</b>
2013-5	II – 22	<p>History Colorado should improve its internal controls over financial reporting by (a) instituting the appropriate type and level of training for management and staff to ensure they possess adequate technical knowledge of the State’s accounting policies and are able to accurately enter complex accounting transactions into the State’s accounting system. History Colorado should also ensure that the training provided includes the requirements applicable for financial reporting outlined in State Fiscal Rules and the State’s Fiscal Procedures Manual; (b) developing and implementing written procedures for entering accounting transactions, including those that occur periodically, into the State’s accounting system in a timely and accurate manner. These procedures should ensure that transactions are adequately prepared and reviewed for accuracy before they are entered into the State’s accounting system; and (c) performing a monthly reconciliation of all bank accounts to ensure the balances contained on all statements agree with amounts reported in the State’s accounting system. Adjustments should be made on a monthly basis to ensure the State’s accounting system reflects the correct bank account balance throughout the fiscal year.</p> <p>(Classification of Finding: Material Weakness.)</p>	Agree	July 2014
2013-6	II – 28	<p>The Department of Human Services should ensure that the financial data recorded in the Colorado Financial Reporting System (COFRS), the State’s accounting system, related to counties’ administration of public assistance programs are accurate and complete by continuing to perform its monthly reconciliation between the County Financial Management System (CFMS) and COFRS and investigating and resolving the remaining \$2.2 million discrepancy between CFMS and COFRS.</p> <p>(Classification of Finding: Significant Deficiency.)</p>	Agree	May 2015

Rec. No.	Page No.	Recommendation Summary	Agency Response	Implementation Date
2013-52	III – 148	<p>The Department of Human Services (Department) should improve controls over service authorizations and payments for the Vocational Rehabilitation Program (Program) by (a) establishing and implementing policies and procedures requiring that the Program only authorize services that are needed to address participants’ barriers to employment based on their documented disabilities and impairments; (b) establishing and implementing procedures that ensure staff authorize services before they are provided, obtain and document appropriate supervisory approvals, pay only the amounts that have been authorized, and maintain Service Authorization forms in the case files; (c) developing and implementing comprehensive written policies and procedures over the Program’s payment process that includes requirements for maintaining documentation that supports the payment amount and purpose, ensuring service authorizations match the payments made, and approving and verifying the receipt of services and goods. In addition, the policies and procedures should define the lowest available usual and customary rates, specify clear restrictions and parameters for purchases, and include written guidance for staff to follow when reviewing and approving payments; (d) using the federal or state mileage reimbursement rate as specified by State Fiscal Rules when calculating a participant’s mileage reimbursement; (e) adequately segregating staff duties within the payment process. Specifically, the Department should ensure that individuals who authorize and approve services and goods are segregated from the processing of payments and do not directly receive vendor or participant receipts or invoices. The Department should also ensure direct reports are not approving payments for their supervisors; (f) establishing and implementing processes to monitor service authorizations and associated payments to ensure that services are authorized before the participant receives the services and that payments for services do not exceed the amounts authorized. This should include a post-payment review procedure that reviews a sample of payments at least annually and mechanisms for revising policies and procedures as necessary based on patterns of errors identified during the annual review; and (g) training Program staff on accounting controls and payment policies and procedures.</p>	Agree	<ul style="list-style-type: none"> <li>a. July 2014</li> <li>b. April 2014</li> <li>c. July 2014</li> <li>d. December 2013</li> <li>e. April 2014</li> <li>f. July 2014</li> <li>g. July 2014</li> </ul>

<b>Rec. No.</b>	<b>Page No.</b>	<b>Recommendation Summary</b>	<b>Agency Response</b>	<b>Implementation Date</b>
2013-55	III – 167	The Department of Human Services should improve Vocational Rehabilitation Program (Program) controls and processes for using comparable services and benefits to cover, in whole or part, the costs of Program services, as required by federal regulations by (a) implementing written policies and procedures for identifying and maintaining updated information on available comparable services and benefits for the range of services that the Program provides and ensuring the information is accessible to all applicable field office staff; (b) establishing a target time frame in written policy for field office staff’s search for comparable services and benefits and staff’s assistance to participants with the application for services through other programs; (c) clarifying policies to indicate that when a participant refuses to use comparable services and benefits, the participant shall be responsible for the costs of the services. The policy should address Program staff’s related documentation requirements; and (d) providing training to field office staff on federal and Division of Vocational Rehabilitation requirements and processes for identifying and documenting comparable services and benefits. This training should include working with staff within other agencies with similar program services to obtain information on the comparable services and benefits that may be available to Program participants and processes for assisting participants in the application process for comparable services and benefits.	Agree	July 2014

# Office of the Governor

---

The Office of the Governor (Office) is responsible for carrying out the directives of the Governor of the State of Colorado. According to the Fiscal Year 2013-14 State of Colorado Appropriations Report, the Office is comprised of the following:

- Office of the Governor
- Office of the Lieutenant Governor
- Office of State Planning and Budgeting
- Economic Development Programs
- Office of Information Technology

In Fiscal Year 2013, the Office was appropriated a total of approximately \$206.4 million in federal and state funds and 1,036.1 full-time-equivalent (FTE) staff positions. The following charts on the next two pages show the Office's Fiscal Year 2013 appropriations by funding source and FTE, respectively:

We identified three overall areas in which the Office could make improvements to its operations. All three recommendations are related to financial controls and are addressed to the Office of Information Technology. Two of these recommendations are directed solely to the Office of Information Technology (OIT) and are included in this chapter, while the remaining recommendation is directed to both OIT and the Department of Revenue and is found in the Department of Revenue's chapter.

## GenTax Account Management

GenTax is the State's primary information system for processing taxes collected by the State, including estate, sales, severance, business, individual, and corporate income taxes. The GenTax system is a custom off-the-shelf (COTS) tax processing application. The Department of Revenue (DOR), as the business owner of the application, and the Governor's Office of Information Technology (OIT), which provides primary IT support services to manage and maintain GenTax, implemented the system in phases over several years. As of August 2012, DOR and OIT fully implemented all phases of the system, and all tax types are being processed through GenTax. OIT provides the primary support for the GenTax system by assigning OIT staff roles within the system. These roles may include application, database, and/or network level support and typically include

administrative or super user level privileges. Additional services are provided by the vendor and other third party contractors in support of the application and the system architecture. During Fiscal Year 2013, the system was responsible for collecting over \$12.5 billion in revenue and paying out \$941.8 million in refunds. Because the GenTax system contains Federal Tax Information, the system must adhere to the federal Internal Revenue Service (IRS) policies. DOR is audited by the IRS every 3 years. The most recent IRS audit report was produced in May 2012. The IRS is next scheduled to audit GenTax in Calendar Year 2015.

### **What was the purpose of the audit work?**

Our audit work was designed to determine whether the IT control activities related to GenTax, individually or in combination with others, were properly designed, in place, and operating effectively to prevent, or detect and correct, material misstatements in financial transactions, account balances, or disclosures relevant to DOR's tax collection and reporting activities.

### **What audit work was performed?**

We reviewed and tested the relevant general computer controls related to GenTax. General computer controls tested during the audit included controls related to computer operations (including backups and disaster recovery) and logical access. Using agency-provided lists of GenTax accounts, SQL Server accounts, and Active Directory accounts, along with various system-generated reports, we analyzed support accounts used to manage GenTax. Support accounts are accounts used by technical staff, and these accounts typically have privileged or administrative access to supporting systems. In the case of GenTax, the supporting systems are Active Directory and SQL Server. Therefore, these "support accounts" do not have the ability to access the GenTax system directly, but can view or modify underlying data within the GenTax system. In addition, we interviewed key personnel and requested policies and procedures currently in place to manage logical access. We then tested the provided information for compliance with State Information Security and IRS policies.

### **What problem did the audit work identify and how were results measured?**

We identified four issues related to logical access for support staff that have elevated privileges within GenTax or other systems that support the GenTax application. The following section details the issues that exist and the related Colorado Information Security Policy (CISP), IRS Guidelines, or industry best practice that applies (in italics):

- **Management of Database Administrator access.** The GenTax data is housed in SQL Server, and is managed by database administrators (DBAs). These DBAs provide back-end support for the GenTax application. The list of DBAs supplied by the agency was inaccurate. We found that, of the seven DBAs reported to us, only two were found to have access to the database on SQL Server. Furthermore, there were three additional DBAs with access that were not included on the list provided. *Access to returns and return information (including tapes, cartridges, or other removable media) must be limited to only those employees, officers and contractors who are authorized access by law or regulation and whose official duties require such access. The physical and systemic barriers to unauthorized access should be reviewed and reported. (IRS Publication 1075 section 6.3.3)*
  
- **Management of administrative accounts.** Colorado Information Security Policies require that system administrators have two separate accounts – one account with administrative privileges that allows them to do their support work (such as database maintenance or managing Active Directory groups), and another account that is more restrictive. The restrictive account is to be used by staff when they are conducting regular work functions, such as checking e-mail, using the internet, or other work-related applications. The purpose of these bifurcated accounts is to reduce the risk of an OIT’s staffer’s work account becoming compromised. During our testing, we found that OIT has assigned 15 staff to provide Active Directory network support for GenTax. Active Directory administrators manage the underlying network, which allows users to access the GenTax application and perform various advanced system functions. Of the 15 staff with Active Directory administrative access, 13 had only one account, which included the more privileged administrative access. In addition, though two staff members had two accounts (one with “-admin” as part of the name), both accounts are privileged. *Privileged accounts are not to be used for non-administrative uses if possible. System administrators are to use their individual access accounts when making changes to systems to ensure accountability. (P-CISP-008 section 7.2.5.5)*
  
- **Unused administrative accounts.** We found 14 support accounts in multiple areas that had not been used for over 90 days. Specifically, we found three accounts with access to the SQL Server (read only), three GenTax accounts, and eight Active Directory administrator accounts that had not logged into the system for over 90 days. The range of their last login was from 118 to 755 days, with two accounts that had never been used. We found that four of the 14 accounts belonged to OIT while the other 10 accounts belonged to subcontractors that provide specialized IT

support for the GenTax application. *Passwords shall be systematically disabled after 90 days of inactivity to reduce the risk of compromise through guessing, password cracking or other attack and penetration methods. (IRS Publication 1075 exhibit 8 control 05)*

- **Logging of back-end database access.** The IRS requires that all access to Federal Tax Information (FTI), such as that found in tax filings, be logged. This includes logging of any access, whether it is through the front-end application (GenTax) or through the back-end database (SQL). All access must be logged, even if it is read-only access. We found 31 accounts that allowed support staff to view data in the SQL database. Of the 31 accounts with direct access to the GenTax database, 11 support staff accounts and 3 Department accounts did not have auditing enabled, which means they did not have their activity logged, as required by IRS guidelines. All 14 accounts were read only accounts. *Audit logs must enable tracking activities taking place on the system. Within the application, auditing must be enabled to the extent necessary to capture access, modification, deletion and movement of FTI by each unique user. This auditing requirement also applies to data tables or databases embedded in or residing outside of the application. (IRS Publication 1075 section 9.3)*

### **Why did the problem occur?**

OIT failed to implement all necessary controls to manage administrative support accounts for the GenTax application and supporting systems. First, OIT lacks a review process for SQL Server and Active Directory administrator accounts and account settings. Although there is a review process for GenTax accounts, it has not been effective in identifying accounts belonging to support services staff that are inactive for long periods of time. Second, OIT support staff were not aware of IRS policies that are stricter than the State's policies. OIT support staff followed a general practice that allowed longer inactivity for support accounts than allowed by IRS policies. Third, according to the agency, an additional Active Directory group was authorized and given read-only access to the production SQL Server, but this group did not have auditing enabled because procedures had not been established or followed to ensure implementation of the policy requirement.

### **Why does this problem matter?**

In combination, these deficiencies increase the risk of system compromise and threaten the confidentiality and integrity of GenTax. Additionally, because the system contains FTI, failing to follow IRS guidelines could result in DOR losing access to FTI.

(Classification of Finding: Significant Deficiency.)

**Recommendation No. 2013-1:**

The Governor's Office of Information Technology (OIT) should improve GenTax account management controls by:

- a. Maintaining an accurate list of support staff with access to the GenTax system and data. This list should be made available to Department of Revenue staff who are required to approve and monitor system access.
- b. Requiring that all support staff be made aware of, and follow all the policies regarding access to the GenTax system, including both state policies and Internal Revenue Service guidelines. In addition, support accounts that can potentially access Federal Tax Information should be reviewed and monitored on a regular basis to verify that policies are followed.
- c. Reviewing the administrative accounts in Active Directory, and enforcing segregated normal and administrative accounts where possible.
- d. Establishing and following procedures to ensure that all access to the GenTax database be audited, or logged. In addition, the access and auditing settings should be reviewed on a regular basis to confirm that policy requirements are being implemented appropriately.

**Governor's Office of Information Technology Response:**

Agree. Implementation date: March 2014.

- a. OIT support staff will produce a system-generated report from GenTax which contains the names of all support staff who have access to the GenTax system. The report will be reviewed for accuracy by OIT and then provided to the Department of Revenue internal audit staff for their monthly user access review.

OIT and the Department of Revenue require that all staff with access to the Department of Revenue network and the Gen Tax system complete an annual security awareness training, Federal Tax Information Disclosure Awareness Training and an internal anti-fraud training. The next annual training is scheduled to be completed by March 31, 2014. The OIT access control group performs a monthly audit of all inactive accounts for Active Directory and the Department

of Revenue's internal auditor and a manager's group perform a monthly review of access to GenTax. Finally, the Department of Revenue's IRS liaison reviews and monitors all accounts that have access to Federal Tax Information.

- b. OIT will review all administrative accounts that are related to the Department of Revenue's Active Directory domain and require segregated normal and administrative accounts where possible.
- c. Procedures to ensure that all access to the GenTax database be audited, or logged will be implemented and an annual review of the audit settings will be implemented to confirm that policy requirements are being implemented appropriately.

---

## **KRONOS Information System**

KRONOS is a third-party timekeeping and leave tracking web-based system that can be accessed over the Internet. KRONOS is critical for ensuring that employees are paid correctly and timely, and that personnel costs are accurately allocated to federal grants. The State has used KRONOS since 2001. The authority to manage the system is currently shared between the Department of Personnel & Administration (DPA) and OIT, although OIT primarily operates and manages the system centrally. The State uses two licensed copies of KRONOS. One of these copies supports six departments, including DPA, OIT, the Departments of Labor and Employment, Natural Resources, Public Health and Environment, and State. The second copy of KRONOS, used by the Department of Human Services, is operated and maintained by a third-party vendor. Our review focused on the license supporting the six state departments that includes about 6,400 user accounts.

### **What was the purpose of the audit work?**

Our audit work sought to determine the implementation status of our Fiscal Year 2011 recommendation related to internal controls over KRONOS. The work performed in Fiscal Year 2011 was designed to determine whether IT control activities related to KRONOS, individually or in combination with others, were properly designed, in place, and operating effectively to prevent, or detect and correct, material misstatements in financial transactions, account balances, or disclosures relevant to DPA's employee timekeeping and leaving tracking records.

In Fiscal Year 2011, we recommended that OIT improve KRONOS access control management, conduct system hardening, and improve disaster recovery

procedures. OIT agreed to implement this recommendation, which contained 11 subparts.

### **What audit work was performed?**

We interviewed staff from OIT to determine OIT's progress in implementing our Fiscal Year 2011 recommendation related to KRONOS IT controls. Additionally, we reviewed supporting documentation provided by OIT concerning the implementation or partial implementation of two of the subparts during Fiscal Year 2013.

### **What problems did the audit work identify and what do standards require?**

Based on our interviews with staff, and review of supporting documentation provided by OIT, we determined during our Fiscal Year 2013 audit that OIT had implemented two subparts but had not fully implemented the remaining nine of 11 subparts contained in the Fiscal Year 2011 recommendation. Of the nine subparts, eight subparts were not fully implemented and one subpart was partially implemented.

We identified the following specific problems related to access management, system hardening, and disaster recovery. The following sections detail the problems that continue to exist and the related Colorado Information Security Policy (CISP) or industry best practice that applies (in italics):

#### **Access Management**

- Current password parameters at the application level do not comply with Colorado Information Security Policies. While OIT has improved the strength of the password configuration since Fiscal Year 2011 by requiring that KRONOS passwords be at least eight characters in length, be changed every 60 days, and not be easily repeated (passwords can be recycled after six password changes), the password configuration does not require complexity as specified by Colorado Information Security policies. *All users must have strong passwords that have eight characters, be enabled for complexity (i.e., include capital letters, special characters, numbers, etc.), and expire every 90 days. (P-CISP-008).*
- The security configurations both within the KRONOS application and the operating system hosting the application do not lock out users after three failed login attempts, and the session-locking mechanism is set to 25 minutes. We identified this issue in Fiscal Year 2011, and OIT reported during Fiscal Year 2013 that it has not taken any steps to address the issues

we identified in this area. *All systems should be set to automatically lock user accounts for a period of time after three failed login attempts, and session-locking mechanisms should be configured to lock users after 15 minutes of inactivity (P-CISP-007).*

- KRONOS was not configured to log unsuccessful access attempts at the operating system level. Logging unsuccessful login attempts is critical in helping information security staff when investigating possible security breaches. We identified this issue in Fiscal Year 2011 and OIT reported during Fiscal Year 2013 that it has not taken any steps to address the issues we identified in this area. *All systems must record successful and failed access attempts. System and application logs for critical systems are to be maintained for a period of at least 1 year for forensics purposes (P-CISP-007, P-CISP-008)*
- Terminated users are not always being removed in a timely manner. Failure to remove users in a timely manner can leave the system vulnerable to access by unauthorized users. In Fiscal Year 2011, we recommended that OIT implement a practice to periodically review user accounts to ensure that access to KRONOS be removed for terminated employees. Conducting such a periodic review is standard within the state, and is mandated by Colorado Information Security policies. OIT reported during Fiscal Year 2013 that it has not taken any steps to address the issue we identified. *All agencies should develop procedures to ensure that all access credentials are revoked, retrieved, or changed, or otherwise become accessible to the terminated staff member (P-CISP-008).*
- Generic accounts exist which means the accounts cannot be linked to a specific individual. Generic accounts make it difficult, even impossible, to track changes made in a system back to the user who made the change. We identified this issue in Fiscal Year 2011 and recommended that OIT follow Colorado Information Security policies and ensure that all IDs, be associated with a unique and specific individual user or owner. OIT reported during our Fiscal Year 2013 audit it has not taken any steps to address the issues we identified. *All systems require implementation of unique user names for authentication (P-CISP-007).*
- System administrators accessed the KRONOS servers at both the operating system and database levels through 10 shared IDs. Shared IDs do not allow a user's activities to be traced and, hence, prevent accountability. We identified this issue in Fiscal Year 2011 and recommended that OIT implement controls to prevent users from sharing IDs, especially users with administrative privileges. OIT reported during our Fiscal Year 2013 audit it has not taken steps to correct the problem of shared administrative IDs for the KRONOS system. *Users must not share passwords, and in the*

*event passwords need to be shared, appropriate logging mechanisms—also called audit logging—should be in place to provide traceability of users who access the system (P-CISP-008).*

- User access forms have not been retained by OIT, which prevented us from verifying that user access has been approved by management. Without collection and retention of user access forms it is difficult to ascertain if a particular user is authorized to have access to the system or not. In Fiscal Year 2011, we recommended that OIT retain all necessary KRONOS authorization documentation, and OIT agreed with this recommendation. OIT reported during our Fiscal Year 2013 audit it had not taken steps to correct this problem. *All users must have a written record of IT system access requests, changes, terminations, and transfers, which should be maintained for one year after the term of employment. In addition, all users must acknowledge the relevant policies by signing a statement of compliance prior to gaining access to the systems (P-CISP-007, P-CISP-008).*

## **System Hardening**

- The KRONOS operating system had not been properly hardened. Hardening systems help to prevent malicious attackers from exploiting unused accounts, tools, or utilities to gain access to a system. Given the sensitive nature of these weaknesses, we provided the specific deficiencies identified to DPA and OIT under separate cover during our Fiscal Year 2011 audit. OIT could not provide any evidence that system hardening on the KRONOS system had occurred during our Fiscal Year 2013 audit. *System hardening is the process of minimizing security vulnerabilities by configuring the system in such a manner as to reduce the possibility of unauthorized access or other malicious activity. System hardening should be implemented according to standards consistent with best practices as recommend by vendors and industry sources such as the National Institute for Standards and Technology or the National Security Agency. (P-CISP-007).*

## **Disaster Recovery**

- A disaster recovery plan had not been developed for KRONOS, which DPA considers to be a mission critical system. Disaster Recovery plans help to restore a system in the event of a disaster or other event that renders the system inaccessible or unusable. In Fiscal Year 2011, we recommended that OIT develop a disaster recovery plan. OIT reported during our Fiscal Year 2013 audit that no such plan for KRONOS had been developed. *A disaster recovery plan should be documented,*

*distributed, tested, and maintained, and all stakeholders should be trained on their roles and responsibilities and procedures they should follow in the event of a disaster (P-CISP-004).*

### **Why did the problem occur?**

OIT failed to design and implement the IT control activities required by Colorado Information Security Policies. Furthermore, OIT reports that lack of resources coupled with system limitations in some situations have prevented the implementation of the recommendations.

### **Why does this problem matter?**

In combination, these deficiencies increase the risk of system compromise and threaten the confidentiality, integrity, and availability of KRONOS and the data it contains and processes.

(Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-2:**

The Governor's Office of Information Technology (OIT) should work with the Department of Personnel & Administration (as needed) to improve KRONOS's general computer controls by:

- a. Implementing strong password parameters at the application level that comply with Colorado Information Security Policies.
- b. Modifying KRONOS security configurations to lock users out of the system after three failed login attempts and lock the users' session after 15 minutes of inactivity.
- c. Generating, reviewing, and retaining critical operating system level and application activity logs (i.e. audit logs) to identify and investigate anomalous activity, and successful and unsuccessful login attempts.
- d. Reviewing the current user listing to immediately remove terminated users and, on an ongoing basis, implementing regular reviews of user access to ensure that user access is appropriate and needed and that terminated users are removed in a timely manner.
- e. Ensuring each KRONOS user ID is associated with an identified and documented owner, and that IDs are not shared.

- f. Ensuring that users submit user access request forms that are authorized by the appropriate supervisor, and retaining those forms, as required by policy.
- g. Hardening system configuration settings for KRONOS, as recommended under separate cover in Fiscal Year 2011.
- h. Documenting and testing a disaster recovery plan that incorporates all components listed in Colorado Information Security Policies.
- i. Providing direction to non-OIT KRONOS administrators at user departments to ensure awareness of and compliance with Colorado Information Security Policies related to the above findings.

### **Governor's Office of Information Technology Response:**

- a. Agree. Implementation date: March 2014 or upon the funding and completion of the upgrade of KRONOS in September 2015.

KRONOS has a system limitation that prevents passwords from being in full compliance with Colorado Information Security Policies. The Department of Personnel & Administration and the Governor's Office of Information Technology are working jointly to request funding through the Fiscal Year 2015 decision item process that will allow for an upgraded KRONOS system. An upgraded KRONOS system will be fully compliant with the Colorado Information Security Policies. In the meantime, the Office of Information Technology's Office of Information Security will work with KRONOS technical staff to document the policy variance and formally approve the variance until such time as the KRONOS system is upgraded. The Office of Information Technology anticipates that an approval for the variance will be in place by March 2014.

- b. Agree. Implementation date: March 2014 or upon the funding and completion of the upgrade of KRONOS in September 2015.

KRONOS has a system limitation that prevents the system from having the ability to lock users out of the system after three failed login attempts or from locking users' sessions after 15 minutes of inactivity. The Department of Personnel & Administration and the Governor's Office of Information Technology are working jointly to request funding through the Fiscal Year 2015 decision item process that will allow for an upgraded KRONOS system. An upgraded KRONOS

system will be fully compliant with the Colorado Information Security Policies. In the meantime, the Office of Information Technology's Office of Information Security will work with KRONOS technical staff to document the policy variance and formally approve the variance until such time as the KRONOS system is upgraded. The Office of Information Technology anticipates that an approval for the variance will be in place by March 2014.

- c. Agree. Implementation date: March 2014 or upon the funding and completion of the upgrade of KRONOS in September 2015.

KRONOS has a system limitation that prevents the system from having the ability to generate audit logs and from being in full compliance with Colorado Information Security Policies. The Department of Personnel & Administration and the Governor's Office of Information Technology are working jointly to request funding through the Fiscal Year 2015 decision item process that will allow for an upgraded KRONOS system. An upgraded KRONOS system will be fully compliant with the Colorado Information Security Policies. In the meantime, the Office of Information Technology's Office of Information Security will work with KRONOS technical staff to document the policy variance and formally approve the variance until such time as the KRONOS system is upgraded. The Office of Information Technology anticipates that an approval for the variance will be in place by March 2014.

- d. Agree. Implementation date: December 2013.

OIT KRONOS support staff have reviewed the list of terminated users provided by the OSA, and removed access where appropriate. An interface with CPPS has been put in place which allows KRONOS support staff to import the CPPS terminated employee list and remove the KRONOS license for all employees who show as terminated in the CPPS system. This process is performed nightly.

- e. Agree. Implementation date: March 2014.

OIT KRONOS support staff will review all of the shared user identifications (ID) and ensure that all IDs are assigned to only one appropriate staff member.

- f. Partially Agree. Implementation date: December 2013.

User access for KRONOS has been delegated to a human resources representative at each department that uses KRONOS. The human

resources representative is responsible for setting up access for users and a part of this process is ensuring that each user has a signed KRONOS access form. All forms are retained by the respective human resources representative. The OIT human resources unit follows this process and retains all pertinent forms for OIT employees. OIT will continue to ensure that its own human resources unit follows all applicable policies and procedures.

***Auditor's Addendum:***

***We have considered the Department's response to this recommendation and maintain that the recommendation remains valid.***

- g. Agree. Implementation date: March 2014 or upon the funding and completion of the upgrade of KRONOS in September 2015.

OIT KRONOS support staff will work with the Office of Information Security to identify all vulnerabilities, determine which vulnerabilities are critical and require immediate remediation, and perform a risk assessment on all other vulnerabilities. The Office of Information Security will work with KRONOS support staff to document any vulnerabilities that are not critical and cannot be remediated and formally approve the security variance until such time as the KRONOS system is upgraded.

- h. Agree. Implementation date: September 2015.

OIT will have a disaster recovery plan in place by September 2015.

- i. Agree. Implementation date: March 2014.

OIT is in the process of updating the Colorado Information Security Policies that govern management of user access. Once the policies are approved by the CISO, the Office of Information Security will ensure that all KRONOS administrator staff are both made aware of and trained on the new policies.

---

## Office of the Governor

### Prior Recommendations Significant Deficiencies not Remediated by the Department As of June 30, 2013

The following recommendations relating to deficiencies in internal control classified as significant deficiencies were communicated to the Office of the Governor in the previous year and have not yet been remediated as of June 30, 2013, because the implementation dates are in a subsequent fiscal year. These recommendations can be found in the original report and Section IV. Prior Recommendations of this report.

Current Rec. No.	Prior Single Audit Report and Rec. No.	Recommendation/ Classification	Implementation Date Provided by the Department
2013-3	2012-1	Information Technology Service Agreement <i>Significant Deficiency</i>	December 2013
2013-4	2012-3	Management of Critical State Firewalls <i>Significant Deficiency</i>	December 2013

# History Colorado

---

History Colorado (formerly known as Colorado Historical Society), founded in 1879, is an educational institution of the State and acts as a trustee for the State in collecting, preserving, exhibiting, and interpreting collections and properties of state historical significance. History Colorado maintains museums and historical sites throughout Colorado, and provides assistance to local and regional historical societies and museums. It also distributes gaming revenue to gaming cities, and through a state-wide grant program for historic preservation.

History Colorado was appropriated \$31.2 million, and 131.4 full-time-equivalent (FTE) staff for Fiscal Year 2013. The funds consisted of \$29.3 million in cash funds, \$1.0 million in general funds, and \$0.9 million in federal funds. The following chart shows the breakdown of appropriations for History Colorado by source for Fiscal Year 2013.

## **Accuracy of Financial Reporting**

History Colorado's financial staff is responsible for all financial reporting for the agency. This includes the accurate and timely entry of transactions related to the agency's semi-annual debt payments into the Colorado Financial Reporting System (COFRS), the State's accounting system.

Information entered by History Colorado staff into COFRS is compiled on exhibits and aggregated with similar data from other agencies to comprise the State's Comprehensive Annual Financial Report (CAFR). The accurate and timely submission of COFRS transactions and fiscal year-end exhibits submitted to the Office of the State Controller (OSC) is important because this information is reported in the State's CAFR.

During Fiscal Year 2010, History Colorado and the Judicial Department issued \$344.9 million of Certificates of Participation (COPs) to construct the History Colorado Center and the Ralph L. Carr Justice Complex. The Trustee collects payments for principal and interest from both agencies according to the amortization schedule. Through the Department of Treasury, History Colorado authorizes an electronic transfer of the principal and interest payment to the Trustee for their portion, and then records the transaction into COFRS.

The Colorado Historical Foundation is a private nonprofit organization created to support history and preservation projects in the State. The Foundation provides services associated with gifts, grants, and donated funds for the benefit of History Colorado. The Colorado Historical Foundation holds gifts, grants, donated funds, and endowments until funds are needed and requested by History Colorado. Upon request, the Colorado Historical Foundation reimburses History Colorado for expenditures associated with the purpose of the funds.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine whether History Colorado provided accurate information in a timely manner to the OSC for Fiscal Year 2013 financial reporting. This included a review of financial information to determine whether the Department entered accurate and complete information into COFRS and provided accurate fiscal year-end exhibits to the OSC.

## **What audit work was performed and how were the results measured?**

We examined a total of 45 transactions and 22 exhibits related to the recording of receipts, federal and non-federal expenditures, and fund balances incurred during Fiscal Year 2013 for accuracy and timeliness. We examined these transactions and exhibits to ensure that History Colorado staff prepared them in accordance with governmental accounting standards and the State's Fiscal Procedures Manual. In addition, we followed up on the prior year audit recommendation to improve internal controls over financial reporting to determine whether History Colorado had taken appropriate corrective action.

State statute (Section 24-17-102, C.R.S.) requires departments to institute and maintain a system of administrative controls to provide for adequate authorization and record-keeping procedures to provide effective accounting control over state assets, liabilities, revenues, and expenditures. The State's Fiscal Procedures Manual prepared by the OSC states that each agency is responsible for accurate, timely, and complete year-end accounting information. In addition, State Fiscal Rule 1-8 requires departments to have controls in place to reasonably ensure that financial transactions are accurate, reliable, and conform to State Fiscal Rules. This includes the timely preparation and review of bank account reconciliations and revenues and expenditures transactions. Further, each agency is required to attest to the OSC that the agency properly reviewed year-end account balances and other financial information.

Finally, we reviewed the curriculum of the courses attended by entity personnel during the year to address the prior-year recommendation of ensuring the entity provides adequate training for personnel who prepare accounting entries and year-end exhibits.

## **What problem did the audit work identify?**

We found that eight (18 percent) of the 45 accounting transactions that were selected for testing had at least one error. Of the eight accounting transactions containing an error, five had more than one error. In addition, we found an error with five (23 percent) of the 22 exhibits we tested. Four of these five exhibits with errors were Exhibit H's, which are used to record post year-end corrections to accounting entries. These errors are summarized in the following six areas:

- **Recording of debt service payments.** We found that the expenditure related to one of two debt service payments on Series 2009A and 2009B COPs made during Fiscal Year 2013 was recorded twice into COFRS, resulting in an overstatement of expenditures totaling more than \$2.6 million. COP principal payment was overstated by approximately \$1.3

million, and COP interest expenditures were also overstated by approximately \$1.3 million. Further, both expenditure entries contained errors. The Department submitted two unsupported complex accounting entries in an attempt to correct the overstatement, but those entries were also incorrect and caused multiple line items (i.e. cash, accounts receivable, COP principal expenditures, and transfers) in the capital projects fund to be materially misstated. History Colorado staff submitted two additional unsupported exhibits to record adjusting entries but those exhibits also failed to address the overstatement of expenditures.

- **Lack of timely entries into COFRS.** We found that the transactions recording the debt service payments were not entered into COFRS in a timely manner. COP principal and interest due in August 2012 was recorded 9 months late in May 2013 and, erroneously, a second time in July 2013. Additionally, COP interest due in February 2013 was recorded 3 months late in May 2013.
- **Lack of timely reconciliations.** During our prior year audit, we found that History Colorado was not performing timely bank reconciliations for eight accounts held by the Trustee. These accounts held a total of approximately \$1.1 million at June 30, 2013. In its response to our recommendation, History Colorado indicated that these bank account reconciliations would be conducted on a monthly basis for Fiscal Year 2013. However, we discovered that no bank account reconciliations were performed for any month during Fiscal Year 2013. As a result, the Trustee account in COFRS was understated by approximately \$785,000 at June 30, 2013. History Colorado recorded an adjustment to the Trustee account in COFRS at fiscal year end to increase the balance to the amount reported on the Trustee bank statement.
- **Improper recording of revenues and expenditures.** History Colorado recorded approximately \$118,000 of construction expenditures and the related reimbursement from the Colorado Historical Foundation in the incorrect fiscal year. While the transaction was recorded into COFRS in August 2012 during Fiscal Year 2013, the related expenditure occurred 7 months earlier in January 2012 during Fiscal Year 2012. Although the expenditure occurred in January 2012, History Colorado did not request reimbursement from the Colorado Historical Foundation until May 2012. History Colorado subsequently corrected the misstatement after the audit team informed them of the error.
- **Fiscal year-end fund balance reporting.** One exhibit that was submitted to adjust the categorization of fiscal year-end fund balances for the Limited Gaming Fund and State Museum Cash Fund incorrectly classified

the fund balances as “restricted” when they should have been classified as “committed” under governmental accounting standards. In addition, the exhibit incorrectly included a fund for which the adjustment was not applicable. Required fund balance corrections made by History Colorado for the two funds were approximately \$41.5 million and \$6.0 million, respectively.

- **Fiscal year-end reporting of federal receipts and expenditures.** Federal receipts and expenditures reported on an exhibit submitted to the OSC for five of 10 (50 percent) federal grants did not agree to the related revenue and expenditure amounts reported in COFRS. Of the five grants, one grant had differences for both receipts and expenditures. Specifically, the differences in receipts on three of five grants amounted to \$15,000, \$15,000, and \$319. The differences in expenditures on three of five grants amounted to \$10,471, \$646, and \$6. Although these differences were immaterial, they caused inefficiencies in fiscal year-end reporting because the exhibit had to be resubmitted.

### **Why did the problem occur?**

First, History Colorado does not have adequate internal written procedures in place for recording periodic transactions, such as debt service payments and reimbursements; instead, staff relies on unwritten historical practices and methodologies. Second, History Colorado did not fully address the prior year recommendation related to deficiencies in internal control by instituting a process for effective supervisory review of manual journal entries and year-end exhibits, not performing monthly bank reconciliations, and not ensuring that accounting staff was provided with adequate, appropriate training during the fiscal year. Specifically, we did not find adequate evidence of supervisory review of accounting transactions in all instances, and the courses attended by management and staff resulting from our prior-year finding did not address the training needed by personnel who prepare accounting entries and year-end exhibits. Third, History Colorado staff did not demonstrate the level of expertise needed to record complex accounting entries in an accurate and timely manner. For example, management and staff incorrectly interpreted sections of the State’s Fiscal Procedures Manual, and did not follow State Fiscal Rules related to accounting documents and financial transactions in all instances. This lack of expertise is also the result of inadequate training of staff on the State’s Fiscal Procedure Manual and State Fiscal Rules.

### **Why does this problem matter?**

Strong internal controls over financial activity are essential for preventing errors in financial reporting as well as quickly detecting and correcting errors that do

occur. History Colorado's failure to institute strong internal controls, including the performance of monthly bank account reconciliations and supervisory reviews of the recording of debt service payments, resulted in correcting entries to the Fiscal Year 2013 financial statements and a prior-period adjustment to the Fiscal Year 2012 financial statements. Furthermore, had the misstatements not been detected during the course of our audit and subsequently corrected by History Colorado, the result would have been a material misstatement of the State's CAFR for Fiscal Year 2013. Additionally, having to revise and resubmit COFRS entries and exhibits at the OSC's direction because of errors made by History Colorado management and staff further increases the possibility of misstatement to the statewide financial statements.

Errors discovered during our audit of History Colorado during Fiscal Year 2013 are similar to History Colorado's errors noted in the Fiscal Year 2012 Statewide Single Audit Report. Failing to address deficiencies in internal control in a timely manner increases the risk that accounting errors and inaccurate reporting of financial information will continue to occur in future years.

(Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-5:**

History Colorado should improve its internal controls over financial reporting by:

- a. Instituting the appropriate type and level of training for management and staff to ensure they possess adequate technical knowledge of the State's accounting policies and are able to accurately enter complex accounting transactions into the State's accounting system. History Colorado should also ensure that the training provided includes the requirements applicable for financial reporting outlined in State Fiscal Rules and the State's Fiscal Procedures Manual.
- b. Developing and implementing written procedures for entering accounting transactions, including those that occur periodically, into the State's accounting system in a timely and accurate manner. These procedures should ensure that transactions are adequately prepared and reviewed for accuracy before they are entered into the State's accounting system.
- c. Performing a monthly reconciliation of all bank accounts to ensure the balances contained on all statements agree with amounts reported in the State's accounting system. Adjustments should be made on a monthly basis to ensure the State's accounting system reflects the correct bank account balance throughout the fiscal year.

## History Colorado Response:

Agree. Implementation date: July 2014.

- a. Steps are presently underway to assess, update and revise job descriptions, procedures and internal controls in order to align History Colorado's financial processes with its growing business needs. History Colorado is presently hiring a Controller/Chief Accountant emphasizing technical knowledge of the State's accounting policies and financial systems. Finance Department staff members are being re-assessed to determine training needs. At a minimum, History Colorado will schedule available and appropriate training that address fiscal requirements outlined in the State Fiscal Rules and the State's Fiscal Procedures Manual. Training objectives will also be written as goals in the performance plans of Finance Department staff for Fiscal Year 2015. Accounting desk procedures are being reviewed and updated to ensure accuracy, timeliness and consistency. These actions are an agency priority in Fiscal Year 2013-14 and reviewed/updated on an ongoing basis as required. Position descriptions will be reviewed by the new Controller to ensure that current and future staff members have the appropriate accounting knowledge and skills to meet the complex requirements of the agency and of the State's accounting system.
- b. The Accounting Department will be reviewing and developing record-keeping, supervisory approvals, cross training and individual desk procedures with the business objective to ensure written procedures provide consistency with accounting procedures for internal control and documentation to achieve more understanding of History Colorado's financial processes. Accounting staff will review proper accounting theory in order to ensure that accurate accounting entries have been created and prepared for approval. The Finance division will make use of organizational charts and position descriptions to ensure proper segregation of duties. Quarter closing balances will be reviewed by Finance division staff acting in an internal audit capacity. Accounting Department staff will focus on monthly closings to ensure quarterly reports are accurate and year-end exhibits match the State's accounting system. Written procedures will require that all journal entries prepared by staff will be reviewed by the Controller for approval prior to final entry into the State's accounting system. The review will include verifying the purpose of the journal entry, ensuring the correct accounts are used, and understanding the effect the journal entry has on the financial statements. To ensure the accuracy of accounting transactions, the Controller will coordinate with the Office

of the State Controller as needed. The Controller will approve all exhibits once prepared after review with the Finance division.

- c. All trustee and local regional museum bank accounts were reviewed to understand transaction details. Staff is reviewing the effects of the posted Exhibit H's to ensure accounts are balanced by the 2014 fiscal year-end. Bank account reconciliations will be conducted on a monthly basis by the Accounting staff and they will be reconciled before each month is closed. If adjusting journal entries are required, they will be made prior to closing, and balances will be re-checked again after the monthly close to ensure that they are correct at the beginning of the next period. The Controller will review and approve the monthly reconciliations and any necessary journal entries in coordination with the Office of the State Controller as needed.
-

---

# Department of Human Services

---

The Department of Human Services (Department) is solely responsible, according to statute (Section 26-1-111 (1), C.R.S.), for administering, managing, and overseeing the delivery of the State's public assistance and welfare programs throughout Colorado. Most of these programs are administered through local county departments of human/social services. The Department also manages and directly administers programs in the areas of developmental disabilities, mental health, nursing homes, and youth corrections. In Fiscal Year 2013, the Department was appropriated nearly \$2.1 billion and approximately 4,873 full-time-equivalent (FTE) staff.

The following charts show the appropriations by funding source and FTE by major areas, respectively, within the Department for Fiscal Year 2013.

We identified 27 overall areas in which the Department could make improvements to its operations—two related to financial controls and 25 related to federal awards. Our findings and recommendations related to federal awards appear in the Department’s chapter in Section III. Federal Awards Findings.

## Reconciliation of Administrative Costs Owed to Counties

The Department oversees Colorado’s 64 county departments of human/social services to operate both federally and state-funded public assistance programs. The Department reimburses the counties for the administrative costs they incur from delivering assistance programs at the county level. The counties maintain financial information related to their administration of these programs in the Department’s County Financial Management System (CFMS), which accumulates expenditure data and calculates the net reimbursements owed to the counties from both state and federal funding sources. At the end of each month, information in CFMS is uploaded to the Colorado Financial Reporting System (COFRS), the State’s accounting system, and the transactions are recorded in the appropriate COFRS account to reflect amounts expended by and owed to the counties.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to assess the Department's internal controls over the county reimbursement data in CFMS and COFRS. As part of our audit work, we reviewed the Department's progress in implementing our Fiscal Year 2012 audit recommendation related to reconciling CFMS and COFRS, which has been noted as an area of weakness for the Department since our Fiscal Year 2007 audit. We recommended that the Department ensure that the financial data recorded in COFRS related to counties' administration of public assistance programs are accurate and complete through the reconciliation process. The Department agreed with our recommendation at that time and reported that they had formed a new task force to work on reconciliations between CFMS and COFRS data.

### **What audit work was performed and how were the results of the audit work measured?**

We reviewed the Department's internal controls over data in CFMS, including amounts reported in CFMS as being owed by the Department to counties. We also reviewed the new reconciliation process between CFMS and COFRS that the Department implemented during Fiscal Year 2013 to address issues identified in the prior year recommendation, and assessed the Department's progress towards implementing the prior year recommendation.

State statute (Section 24-17-102, C.R.S.) requires departments to institute and maintain a system of administrative controls to provide for adequate authorization and record-keeping procedures to provide effective accounting control over state assets, liabilities, revenues, and expenditures. State Fiscal Rule 1-8 requires departments to have controls in place to reasonably ensure that financial transactions are accurate, reliable, and conform to state fiscal rules.

In addition, each fiscal year, the Department is required to submit a certification letter to the Office of the State Controller (OSC) certifying that, as of the end of the fiscal year, Department staff have completed a review of the Department's financial balances in COFRS and that those account balances, when combined with adjustments submitted to the OSC, are materially correct and properly classified in accordance with generally accepted accounting principles and standards promulgated by the Governmental Accounting Standards Board.

### **What problem did the audit work identify?**

At the end of our Fiscal Year 2012 audit, the Department reported a discrepancy of about \$500,000 between CFMS and COFRS, which we noted in our Fiscal

Year 2012 recommendation; during our Fiscal Year 2013 audit, the Department reported that the \$500,000 was incorrect and the unreconciled balance should have been reported as approximately \$9.0 million at the end of Fiscal Year 2012.

During Fiscal Year 2013, the Department assigned one individual to complete and another individual to review a monthly reconciliation between CFMS and COFRS. The Department completed reconciliations monthly for all of Fiscal Year 2013 and investigated and resolved all current year discrepancies, but has not completed the reconciliations for prior years. Through this reconciliation process, the Department resolved approximately \$6.8 million of the \$9.0 million discrepancy from Fiscal Year 2012. However, a discrepancy of about \$2.2 million between CFMS and COFRS remained as of June 30, 2013, which relates to transactions prior to Fiscal Year 2013.

### **Why did the problem occur?**

The Department's new monthly reconciliation process is an effective control for investigating and resolving discrepancies between CFMS and COFRS data on a going-forward basis. However, since the Department did not perform effective monthly reconciliations between CFMS and COFRS data prior to Fiscal Year 2013, the Department's reconciliation process has not been able to identify why a \$2.2 million discrepancy remains or how far back it dates.

### **Why does this problem matter?**

Until the Department is able to resolve all discrepancies between CFMS and COFRS and make necessary adjustments, the Department cannot ensure the accuracy of its liabilities and related reimbursements to the counties.

(Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-6:**

The Department of Human Services should ensure that the financial data recorded in the Colorado Financial Reporting System (COFRS), the State's accounting system, related to counties' administration of public assistance programs are accurate and complete by continuing to perform its monthly reconciliation between the County Financial Management System (CFMS) and COFRS and investigating and resolving the remaining \$2.2 million discrepancy between CFMS and COFRS.

## **Department of Human Services Response:**

Agree. Implementation date: May 2015.

The Department will continue performing the monthly reconciliation between CFMS and COFRS and working back through the prior years to resolve the cumulative \$2.2 million discrepancy. The Department will reconcile Fiscal Year 2012 discrepancies by December 31, 2014. The reconciliations are time intensive and the availability of records may be reduced for older years, diminishing the return on effort. If all, or a major portion, of the cumulative discrepancy has not been identified by the target date of May 31, 2015, the Department will then reassess whether to continue the historical reconciliations or write off the remaining discrepancy.

---

## **Controls over Payroll**

During Fiscal Year 2013, the Department spent more than \$239 million on salaries and wages and had nearly 4,873 full-time-equivalent employees. The Department's payroll and human resources staff across the various divisions work together to ensure that employees are paid appropriately through the Colorado Personnel Payroll System (CPPS), and that payroll amounts are accurately reflected on the COFRS. Payment amounts from CPPS are batched into accounting entries into COFRS. Payroll staff are responsible for performing monthly and biweekly reconciliations of expected to actual payroll for each employee and making financial adjustments to COFRS when appropriate. Human resources staff are responsible for entering information into CPPS, such as salary adjustments or other changes reported on a tracking form called a Personnel Action Form.

Employees record their time in the Department's timekeeping system, on either a monthly or a biweekly basis depending on how often the employee is paid. On this same basis, supervisors and timekeepers are responsible for approving time sheets in the Department's timekeeping system for the pay period.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine whether Department controls over the payroll process were functioning properly and whether payroll adjustments were appropriate.

## **What audit work was performed and how were results measured?**

We reviewed a sample of 60 payroll adjustments from biweekly payroll reconciliations for Fiscal Year 2013 to determine whether Department staff calculated the adjustments correctly and whether each of the adjustments had proper supporting documentation. In addition, we reviewed the corresponding time sheets for each adjustment to determine whether Department staff certified their time within the required time frames specified in Department policy.

Department policy states that when Department staff calculate an employee's hourly pay rate using a monthly salary, the amount calculated is rounded to three decimal places. In addition, Department staff should calculate the total working hours available in a month by using eight hour days for each working day of the month.

State guidelines state that when an employee's work hours fall within 4:00 pm and 6:00 am, the Department pays the employee shift as a premium added to their base salary.

According to Department policy, each employee's time sheet is required to be printed and signed by both the employee and the supervisor within 20 calendar days of the close of the timekeeping system. The timekeeping system closes a few days prior to payroll processing for biweekly pay periods and a few days after payroll processing for monthly pay periods. The signatures certify that the information on the time sheet is complete and accurate.

The Department's Personnel Action Form requires that an employee's current position is listed on the form.

## **What problem did the audit work identify?**

In 16 (27 percent) of the 60 adjustments tested, we identified at least one error. Specifically, we found the following:

- Four of the payroll adjustments were calculated incorrectly, resulting in either an overpayment or underpayment to the employee. The amount of the errors ranged from less than \$1 to approximately \$48. Specifically, for two adjustments, Department staff did not round to three decimal points when calculating the hourly rate. For one adjustment, Department staff did not pay the employee shift pay which resulted in an underpayment of about \$17. Finally, for another adjustment, Department staff used the incorrect number of working hours for the month when calculating the adjustment. The Department subsequently corrected the \$17 and the \$48 errors.

- Thirteen time sheets were not signed and certified in accordance with Department policy. Specifically, eleven timesheets were not signed and certified by either the employee or their supervisor. In addition, two timesheets were not signed within the required time frames either by the employee or the supervisor. The dates on these timesheets ranged from five to six days late.
- One of the Personnel Action Forms noted the incorrect position of Custodian II for an employee that is a Custodian III.

### **Why did the problem occur?**

The problems we identified were caused by Department staff and supervisors not properly following Department policies and procedures related to reviewing payroll adjustments; entering payroll information into CPPS; and signing, certifying, and maintaining all employee time sheets. In addition, Department staff are not ensuring that Personnel Action Forms are completed accurately in order to ensure that information in CPPS is properly supported.

### **Why does this problem matter?**

Although the problems identified in our sample did not significantly affect the amounts paid to the employees, payroll is an inherently high-risk area. The lack of adequate controls over and supervision of the payroll process indicates an environment in which errors and irregularities could occur and not be detected in a timely manner, which could result in more significant problems related to employees' pay.

(Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-7:**

The Department of Human Services (Department) should improve controls over payroll and ensure the enforcement of policies and procedures by:

- a. Reviewing payroll adjustments to ensure that they are calculated correctly.
- b. Ensuring that time sheets are certified within the time frames specified in Department policy and are maintained and available for review.
- c. Ensuring that employees' Personnel Action Forms are completed accurately.

---

## **Department of Human Services Response:**

- a. Agree. Implementation date: December 2013.

The Department has implemented an additional level of review by the payroll supervisor for all payroll adjustments. The review will include verifying that the correct information is being used to calculate the adjustment before the payroll batches are entered.

- b. Agree. Implementation date: December 2014.

The Department will develop web-based training for unit time managers regarding the certification process. The Department will be implementing an updated KRONOS 7.0 system by December 2014 which will include an on-line certification process. This system control will require the employee and supervisor to certify time sheets monthly. The central time managers will be able to monitor the certification process on-line and follow-up as needed to ensure compliance with policies and procedures.

- c. Agree. Implementation date: December 2013.

The Department has implemented a process to ensure all information submitted on a personnel action form is complete and accurate before being sent to payroll. If Human Resources receives an incomplete personnel action form or if the personnel action form contains inaccurate information it will be immediately sent back to the program who submitted it for correction. The program personnel have a 24 hour turn around to get the corrected form submitted to Human Resources. Any deviation from this process will require email documentation of the reason for the deviation along with notification to the supervisor.

---

---

# Department of Labor and Employment

---

The Department of Labor and Employment (Department) is responsible for providing services to employers and job seekers, and enforcing laws concerning labor standards, unemployment insurance, workers' compensation, public safety, and consumer protection.

The Department comprises the following major organizational units:

- Executive Director's Office
- Unemployment Insurance Division
- Division of Employment and Training
- Division of Workers' Compensation
- Division of Oil and Public Safety
- Division of Labor

In Fiscal Year 2013, the Department was appropriated more than \$158.1 million and approximately 1,006 full-time-equivalent staff. Approximately 39 percent of the Department's funding is from cash and reappropriated funds, and the other 61 percent is from federal funds.

The following comments were prepared by the public accounting firm of CliftonLarsonAllen, LLP, which performed Fiscal Year 2013 audit work at the Department.

## **Lack of Timeliness with Exhibits and Other Reports Submitted by the Department**

The Department's accounting section is responsible for all financial reporting for the Department, including the accurate and timely entry and approval of financial transactions into the Colorado Financial Reporting System (COFRS), the State's accounting system. In addition, this section is responsible for preparing and submitting uniform reports, or "exhibits," to the Office of the State Controller (OSC) at the end of each fiscal year.

The Department is also responsible for reporting to the OSC any discrepancies in cash funds on the OSC's "Cash Funds Turnaround Report". A cash fund is established by law for a specific program or purpose. The OSC prepares a

summary report from all departments cash funds activity that is delivered to the Office of State Planning and Budgeting and the Joint Budget Committee.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine if the Department provided timely and accurate information on exhibits to the OSC for inclusion in the State's financial statements for Fiscal Year 2013 and complied with deadlines for submitting the "Cash Funds Turnaround Report" to the OSC.

### **What audit work was performed and how were results measured?**

We reviewed the exhibits for changes in the Tax Payer's Bill of Rights (TABOR) revenue, proposed audit adjustments, and federal assistance the Department prepared and submitted to the OSC for Fiscal Year 2013 to determine whether they were completed accurate and timely. In addition, we reviewed the "Cash Funds Turnaround Report" to determine whether the Department prepared and submitted changes to the report as necessary to the OSC.

The Department is responsible for reporting timely, accurate and complete financial information through exhibits to the OSC for inclusion in the State's financial statements. The exhibits contain financial and related information that aids the OSC in preparing the State's financial statements in accordance with generally accepted accounting principles. Specifically, the Exhibit A1 reports changes in TABOR revenue and Base Fiscal Year Spending and is only required to be submitted to the OSC if there is a change in fiscal year spending. A change in fiscal year spending is either an increase or decrease to revenues which could be due to misclassifications of revenues in prior years, and is reflected in the annual TABOR certification report completed by the Office of the State Auditor. An Exhibit H is used to report errors or changes of financial information to include in the State's financial statements after the close of COFRS. The Exhibit K reports total federal assistance funds received and expended and is submitted by all state agencies that receive federal funds. The Fiscal Procedures Manual outlines specific due dates for submission of each exhibit and the cash funds turn around report to the OSC. During Fiscal Year 2013, the Exhibit A1 was due to the OSC on August 14<sup>th</sup>, the Exhibit K was due September 20<sup>th</sup>, Exhibit Hs were due August 30<sup>th</sup>, and any Exhibit Hs received after August 30<sup>th</sup> are considered audit adjustments, according to the Fiscal Procedures Manual. In addition, the "Cash Funds Turnaround Report" was due August 16<sup>th</sup>.

### **What problem did the audit work identify?**

The Department did not submit all of its exhibits and other reporting information timely. Specifically, we identified the following:

- The Department submitted an Exhibit A1 for over \$26 million to the OSC on September 3, or 20 days after the required due date. Prior to the submission, the OSC contacted the Department inquiring specifically as to whether the Department was going to submit this Exhibit and did not hear from the Department until the Department submitted the Exhibit after the due date. In addition, the Department did not inform the auditors that it had submitted this exhibit even though the auditors had requested copies of all exhibits submitted to the OSC.
- The Department submitted its Exhibit K to the OSC on October 14, or 24 days after the required due date.

The Department submitted its Cash Funds Turnaround Report explanations to the OSC on September 4th, or 18 days after the required due date. In addition, the Department did not respond to several communications after the due date from the OSC when it was contacted regarding when the Department was going to submit its explanations related to the Cash Funds Turnaround Report.

The Department submitted a revised Exhibit H for \$6 million to the OSC on December 5, or 97 days after the required due date of the original submission of the Exhibit H. The original Exhibit H was audited and submitted timely. In addition, the Department submitted the revised Exhibit H without notifying the auditors of this revision.

### **Why did the problem occur?**

Although the Department has procedures for fiscal year-end exhibit preparation and cash funds reporting, it does not have a timely review process to ensure that exhibits or other information are submitted timely. In addition, the Department is not responsive to the OSC or the auditors when it is contacted by either entity regarding an outstanding item.

### **Why does this problem matter?**

Meeting financial reporting deadlines is necessary to ensure complete and accurate financial reporting for the State. In addition, these deadlines are important as they affect the financial statement deadlines and reporting requirements of the OSC.

Timely review processes are necessary to meet deadlines and due dates and to ensure accurate financial reporting. The lack of meeting deadlines can increase the risk of items being reported incorrectly or incompletely.

(Classification of Finding: Significant Deficiency.)

**Recommendation No. 2013-8:**

The Department of Labor and Employment (Department) should strengthen its internal controls to ensure it reviews and submits fiscal year-end exhibits and the Cash Funds Turnaround Report to the Office of the State Controller timely to meet the required due dates. In addition, the Department should respond timely to the Office of the State Controller and the auditors when it is contacted regarding outstanding items.

**Department of Labor and Employment Response:**

Agree. Implementation date: July 2014.

The Department of Labor and Employment (CDLE) will strengthen its internal controls to ensure it reviews and submits fiscal year-end exhibits and schedules to the Office of the State Controller timely to meet the required or approved due dates. CDLE will endeavor to submit all exhibits and schedules timely, accurately, and completely.

In addition, CDLE will continue to improve on the timeliness of necessary exhibit and schedule revisions and submissions to the Office of the State Controller and the communications to the auditors about same.

---

**Unemployment Insurance Liability**

The Department records an estimated liability on COFRS at fiscal year-end for Unemployment Insurance (UI) benefit claims that were incurred in June but will be paid in July. The Department uses information obtained from the Colorado Unemployment Benefits System (CUBS) to calculate the estimate for the UI liability. The Department is responsible for ensuring that the UI liability reflected in its accounting records and reported in the financial statements is materially accurate.

**What was the purpose of the audit work?**

The purpose of the audit work was to review the Department's internal controls over and accuracy of its recorded UI benefit liability as of June 30, 2013.

**What audit work was performed and how were results measured?**

We reviewed the Department's calculation for the UI liability, including the supporting documentation from CUBS, to ensure the amount was reasonable and agreed to the amount the Department recorded on COFRS.

**What problem did the audit work identify?**

The Department did not record the full estimated UI liability at fiscal year-end on COFRS. Specifically, while the Department calculated an estimated liability as of June 30, 2013 of approximately \$17.7 million, the Department only recorded approximately \$9 million of the liability, or \$8.7 million less than the calculated amount. Further, as a result of the Department's additional analysis during December 2013, Department staff determined that amounts recorded as federal grant revenue activity and the related federal receivable for UI benefits were also under-recorded by approximately \$3.5 million.

**Why did the problem occur?**

The Department lacks sufficient internal controls over its fiscal year-end calculation of earned but unpaid UI benefits and federal grant revenue and receivables. Although the Department has an internal supervisory review process of recorded entries related to the UI liability, the review process did not identify the noted errors.

**Why does this problem matter?**

The errors identified resulted in misstatements totaling approximately \$12.9 million. After the errors were identified through the audit process, the Department submitted correcting accounting entries to the Office of the State Controller for the identified errors in December 2013; however, without adequate internal controls over the calculation of UI liabilities, revenues, and receivables at fiscal year-end to ensure errors are identified internally, there is an increased risk that these accounts could be materially misstated on the State's financial statements. In addition, an adequate review process is necessary to ensure that the UI liability is properly recorded. The lack of an adequate review process increases the risk that future misstatements will occur.

(Classification of Finding: Significant Deficiency.)

**Recommendation No. 2013-9:**

The Department of Labor and Employment should improve its internal controls over the calculation of Unemployment Insurance liabilities, receivables, and revenue at fiscal year-end and improve its supervisory review process to ensure that the year-end balances are accurately recorded.

**Department of Labor and Employment Response:**

Agree. Implementation date: July 2014.

The Department of Labor and Employment will improve its internal controls over the calculation of Unemployment Insurance (UI) liabilities, receivables, and revenue at fiscal year-end and improve its supervisory review process to ensure that the year-end balances are accurately recorded. Specifically, the Department will do the following: (1) Write a new control procedure for UI benefit issuance accounts payable activity at 2014 fiscal year end. (2) Execute the new control procedure for UI benefit issuance payable activity at 2014 fiscal year end. (3) Perform the reconciliation and supervisory review procedure before fiscal year end close 2014.

---

**Accounting for Long-Term Debt**

The Department issued debt in the form of Colorado Unemployment Compensation Fund Special Revenue Bonds during Fiscal Year 2012. These bonds consist of Series 2012A maturing on May 15, 2014 and Series 2012B maturing on May 15, 2017. Issuance of the debt was accompanied by the official statement (bond agreement), which defines the debt terms. At the time of issuance, the Department appropriately recorded premiums of about \$9.2 million, debt issuance costs of \$2.3 million, and accrued interest payable of \$0.9 million. The Department began collecting certain assessments from Colorado corporations during Fiscal Year 2013; a portion of these assessments are to be deposited with a trustee to satisfy the Department's future payments on the bonds.

**What was the purpose of the audit work?**

The purpose of the audit work was to assess the Department's internal controls related to the bonds and to ensure the accuracy of the Department's bond-related

balances at June 30, 2013. In addition, we performed testwork to review the Department's progress in implementing its Fiscal Year 2012 recommendation related to ensuring that interest expense is properly stated within the financial statements.

### **What audit work was performed and how were results measured?**

We reviewed the Department's bond-related account balances reported on COFRS, as of June 30, 2013, for consistency with the bond agreement and generally accepted accounting principles. We compared the balances to the bond agreement and other third party support, such as the closing summary provided by the underwriter and monthly statements provided by the trustee.

Generally accepted accounting principles require debt issuance costs and premiums to be capitalized and amortized over the life of the bonds. In addition, a liability for accrued interest payable should be recognized at the end of each reporting period equal to the amount of interest expense incurred but not yet paid.

### **What problem did the audit work identify?**

When reviewing the bond-related balances reported by the Department as of June 30, 2013, we noted the following exceptions:

- **Premium and bond issuance costs.** During Fiscal Year 2013, the Department inappropriately reversed the premium and bond issuance costs of \$9,211,290 and \$2,328,343, respectively, recorded in Fiscal Year 2012 and recorded the net difference of \$6,882,297 as interest payable at June 30, 2013. The Department subsequently submitted a correcting entry to the Office of the State Controller (OSC) after being notified of the errors by the auditors.
- **Amortization of premium and bond issuance costs.** The Department did not amortize either the bond premium or bond issuance costs for Fiscal Year 2013. The Department should have amortized \$4,006,946 in bond premium costs and \$465,669 in bond issuance costs. The Department subsequently submitted a correcting entry to the OSC after being notified of the omission by the auditors.
- **Accrued interest payable.** The Department did not record interest expense and accrued interest payable of \$1,275,380 as of June 30, 2013, to account for the accrued and unpaid interest for the period from May 15, 2013, to June 30, 2013. The Department subsequently submitted a correcting entry to the OSC after being notified of the errors by the auditors.

- **Assessments.** The Department recorded \$11,917,717 in received assessments as “bond proceeds revenue” rather than “other revenue.” In addition, the Department recorded \$2,934,652 of assessments remitted to the bond trustee as Fiscal Year 2013 interest expense; since the assessments will be applied towards future interest on the bonds, classification as a “deposit” or other prepaid balance would have been more appropriate. The Department subsequently submitted a correcting entry to the OSC after being notified of the errors by the auditors.

### **Why did the problem occur?**

The Department’s internal control process to identify, prepare, review and approve debt-related year-end adjustments was ineffective as these adjustments were recorded incorrectly and not identified during the supervisory review process. Further, the Department did not seek additional guidance from the OSC or other State agencies for assistance or additional guidance. In addition, the Department did not implement our Fiscal Year 2012 audit recommendation to institute a reconciliation process of expected-to-actual interest expense incurred throughout the year and at fiscal year-end to ensure that interest expense is properly stated within the financial statements.

### **Why does this problem matter?**

An effective process to identify, prepare, review, and approve debt-related year-end adjustments is critical to reporting balances accurately in accordance with generally accepted accounting principles because the Department’s balances related to debt are material to the State’s financial statements. As a result, any errors made by Department staff when recording debt-related activity may result in material misreporting of the State’s financial statements.

(Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-10:**

The Department of Labor and Employment (Department) should improve the timeliness and effectiveness of its process to identify, prepare, review, and approve debt-related adjustments to ensure the debt is recorded accurately at fiscal year-end by improving its supervisory review process over these types of transactions and seeking additional guidance from the Office of the State Controller relating to these areas as needed. In addition, the Department should institute a reconciliation process of expected-to-actual interest expense incurred

throughout the year and at fiscal year-end to ensure that interest expense is properly stated within the financial statements.

**Department of Labor and Employment Response:**

Agree. Implementation date: January 2014.

The Department will complete its reconciliation and review procedure for bond debt issuance accounts including interest expense prior to fiscal year end close. The Department will improve its supervisory review for bond debt issuance accounts by ensuring that it is performed timely, accurately and completely prior to fiscal year end close, and will seek additional guidance from the OSC, as necessary.

---

# Department of Natural Resources

---

The Department of Natural Resources (Department) is responsible for developing, protecting, and enhancing Colorado's natural resources for the use and enjoyment of the State's present and future residents and visitors. Resources include land, wildlife, outdoor recreation, water, energy, and minerals. The Department comprises the Executive Director's Office, which is responsible for the administration and management of the overall Department, and the following eight divisions, as of June 30, 2013:

- Division of Reclamation, Mining and Safety
- Geological Survey
- Oil and Gas Conservation Commission
- State Board of Land Commissioners
- Division of Parks and Wildlife
- Colorado Water Conservation Board
- Water Resources Division (State Engineer's Office)
- Division of Forestry

The results of our Fiscal Year 2013 audit did not identify errors which would result in recommendations to the Department. However, the following recommendation relating to a deficiency in internal control classified as a significant deficiency was communicated to the Department in the previous year and has not been remediated as of June 30, 2013, because the implementation dates are in a subsequent fiscal year. This recommendation can be found in the original report and Section IV. Prior Recommendations of this report.

<b>Current Rec. No.</b>	<b>Prior Single Audit Report and Rec. No.</b>	<b>Recommendation/ Classification</b>	<b>Implementation Date Provided by the Department</b>
2013-11	2012-13	State Board of Land Commissioners Assets <i>Significant Deficiency</i>	a. December 2013 b. [1] c. December 2013

<sup>[1]</sup> This part of the recommendation has been implemented, partially implemented, or is no longer applicable. See Section IV. Prior Recommendations of this report.

---

# Department of Personnel & Administration

---

The primary function of the Department of Personnel & Administration (Department) is to support the business needs of the Executive Branch of state government. The Department administers the classified personnel system, which includes approximately 30,800 full-time employees across state government (excluding the Department of Higher Education), and provides general support for state agencies. The Department includes the following divisions:

- Executive Director's Office
- Division of Human Resources
- Division of Finance and Procurement
  - Central Collection Services
  - State Purchasing Office
  - COMPASS e-Procurement System
- Office of the State Controller
- Division of Central Services
- State Personnel Board
- Statewide Programs [Office of Administrative Courts, Office of the State Architecture, Colorado State Employee Assistance Program (C-SEAP), and State Archives]

The Department was appropriated total funds of approximately \$164.2 million and 396.9 full-time-equivalent staff for Fiscal Year 2013. Approximately 4 percent of the funding was from general funds, 8 percent was from cash funds, and 88 percent was from reappropriated funds. Reappropriated funds are provided by sources including, but not limited to, vehicle and building rentals; copying, printing, graphic design, and mail services; and user fees from state agencies for the administration of the State's selection, classification, and compensation programs. The chart on the following page shows the operating budget by major administrative sections for Fiscal Year 2013.

## Statewide Indirect Cost Recovery and Reversion

Indirect costs are expenses that are not directly attributable to a specific program or service within the organization. In the State, indirect costs come in two forms: (1) Statewide indirect costs—certain centralized costs, including some costs for services provided to all state agencies by the Department of Personnel and Administration, the State Treasurer, and the various offices within the Governor’s Office, and (2) departmental indirect costs—centralized costs within a department, such as the executive director’s office or human resources office, that relate to services provided to all divisions and programs. Statewide indirect costs are funded at least initially with general funds. When these centralized services are provided to agencies or programs that are funded with cash or federal funds, the portion of the centralized service costs that are attributable to the cash- or federally funded programs must be reimbursed, or “recovered,” from those programs.

The Office of the State Controller (OSC) prepares two allocation plans for recovering indirect costs: the Statewide Cost Allocation Plan (SWCAP), which recovers indirect costs related to federal programs, and the Cost Appropriations/Cash Fees Plan (Cash Fees Plan), which recovers indirect costs from cash funded programs. The Statewide Cost Allocation Plan (SWCAP) is a plan prepared by the OSC according to the federal Office of Management and Budget's (OMB) *Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments (Circular A-87)* now part of the Code of Federal Regulations (2 CFR 225), to identify and allocate all indirect costs to all State departments, including the departments of higher education. The federal Department of Health and Human Services' Division of Cost Allocation (DCA) must approve the State's SWCAP, including the allocation formulas included in the SWCAP, each year. In addition, the DCA requires that each State agency that has federally funded programs prepare a Public Assistance Cost Allocation Plan or Indirect Cost Rate Proposal to allocate the statewide costs from the SWCAP, as well as departmental indirect costs incurred, to its federally-funded programs. A Public Assistance Cost Allocation Plan must be prepared when a department has public assistance programs, such as Temporary Assistance for Needy Families, Medicaid, or Foster Care. An Indirect Cost Rate Proposal is prepared for all other federal programs. The OSC prepares the Cash Fees Plan to recover the indirect costs associated with administering cash funded programs.

Each year, the Joint Budget Committee, in preparation of the annual appropriations bill for operations of State government (Long Bill), identifies the amount of indirect costs that will be allocated to each agency. Each agency that has cash funded or federally funded programs must then recover an amount from those cash and federal programs sufficient to cover the indirect costs incurred by the agency.

Prior to the 2013 Legislative Session, according to State's Fiscal Rule 8-3 issued by the OSC, any indirect recoveries in excess of allocated indirect costs were required to be reverted to the state general fund.

Senate Bill 13-109 established the Indirect Costs Excess Recovery Fund (Fund) and, beginning in Fiscal Year 2013, requires departments to roll forward indirect cost recoveries that exceed the amount of departmental costs incurred in a fiscal year for use in subsequent years. Beginning in Calendar Year 2013, the State Controller must report to the Joint Budget Committee in November of each year the total amount of funds deposited to, spent from, and the balance remaining in the Fund for each agency.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the State departments' processes for the recovery of indirect costs for consistency and to ensure that State departments complied with the requirement to revert excess indirect cost recoveries to the Fund. In addition, the purpose of our testwork was to identify the amounts of indirect costs recovered from federally and cash-funded programs by the State, in total for Fiscal Year 2013.

### **What audit work was performed and how were results measured?**

We sent questionnaires regarding the indirect cost recoveries and reversion processes to a sample of the following eight departments: Education, Health Care Policy and Financing, Human Services, Labor and Employment, Local Affairs, Natural Resources, Public Health and Environment, and Public Safety. We compared and analyzed their responses for consistency.

OMB *Circular A-87*, now part of the Code of Federal Regulations (2 CFR 225), requires state departments and major local units of governments to prepare cost allocation plans and/or indirect cost rate proposals that provide a basis for allocating indirect costs to federal programs. State Fiscal Rule 8-3, requires that all excess indirect cost recoveries be credited to the state general fund, unless otherwise appropriated or directed by law. Senate Bill 13-109 required creation of the Fund and departmental accounts within the fund for the purpose of allowing state departments to use excess amounts collected as payment for indirect costs over multiple fiscal years.

### **What problem did the audit work identify?**

We identified inconsistencies in department processes for recovery and reversion of excess indirect cost across our sampled departments. Specifically, the departments we surveyed did not track their excess indirect cost recoveries consistently on the Colorado Financial Reporting System (COFRS), the State's Accounting System. While all departments indicated that they track indirect cost recoveries on COFRS, each of them used different types of coding and tracking mechanisms on COFRS. In addition, two departments reported that they did not have an appropriated spending amount in the Long Bill for indirect cost recoveries for Fiscal Year 2013.

The OSC was also unable to provide an amount for the total amount of indirect costs the State recovered from cash and federally funded programs for Fiscal Year 2013.

### **Why did the problem occur?**

Currently, there is limited oversight or training by the OSC over the recovery and reversion of excess indirect cost recoveries by the departments. In addition, departments are not required by the OSC to report the amounts of indirect cost recoveries, or their processes for calculating the reversion amounts reported on COFRS. While the OSC provides guidance to departments, in the form of alerts on their website, it does not provide standardized training to departments regarding the indirect cost recovery and reversion processes.

### **Why does this problem matter?**

Due to the inconsistent tracking of indirect costs on COFRS, information regarding indirect costs recovered or reverted each year is not readily available. A consistent and transparent process on indirect cost recovery and reversion across state departments would help the Joint Budget Committee in the preparation of the Long Bill, and in the budgeting and appropriation of indirect costs for state departments. A transparent process regarding the recovery and reversion of indirect costs across state departments would also provide policymakers with accurate information.

(Classification of Finding: Not classified – not an internal control issue.)

---

### **Recommendation No. 2013-12:**

The Office of the State Controller (OSC) should provide oversight, guidance and training to state departments related to the tracking and reporting of indirect costs and to help facilitate the development of processes that are consistent and transparent statewide for the indirect cost recovery and reversion.

### **Office of the State Controller Response:**

Agree. Implementation date: October 31, 2016.

The Office of the State Controller generally believes that consistent processes add value, although for indirect costs this may be difficult to achieve due to the variety of functions and individual needs across departments along with specific grant-level parameters and statutory limitations that exist for some cash fees. With the implementation of CORE as the State's accounting system, the OSC will explore system functionality with departments to determine the feasibility of developing a consistent approach for the indirect recovery process. These efforts will be coordinated with the Office of State Planning and Budgeting, the Joint

Budget Committee, and departmental budget directors. The OSC further agrees that training, guidance and oversight is necessary and reasonable to ensure that Colorado is reimbursed for the administrative support it provides to the cash and federal programs. The OSC currently provides training, guidance, and oversight on a customized as-needed basis, and will investigate opportunities to provide these functions and services on a more standardized basis.

---

## Department of Personnel & Administration

### Prior Recommendations Significant Deficiencies not Remediated by the Department As of June 30, 2013

The following recommendations relating to deficiencies in internal control classified as significant deficiencies were communicated to the Department of Personnel & Administration in the previous year and have not yet been remediated as of June 30, 2013, because the implementation dates are in a subsequent fiscal year. These recommendations can be found in the original report and Section IV. Prior Recommendations of this report.

Current Rec. No.	Prior Single Audit Report and Rec. No.	Recommendation/ Classification	Implementation Date Provided by the Department
2013-13	2012-15	Accounting for Budgeted Appropriations in Required Supplementary Information <i>Significant Deficiency</i>	December 2015
2013-14	2012-16	Colorado Personnel Payroll System <i>Significant Deficiency</i>	a. June 2014 b. [1] c. June 2014 d. December 2014 e. December 2014 f. December 2014 g. December 2014 h. December 2013 i. [1]

<sup>[1]</sup> This part of the recommendation has been implemented, partially implemented, or is no longer applicable. See Section IV. Prior Recommendations of this report.

---

# Department of Revenue

---

The Department of Revenue (Department) is responsible for managing the State's tax system. Tax collections totaled about \$12.4 billion in Fiscal Year 2013. Of this amount, about \$10.1 billion represents collections for the General Fund; the remainder represents collections made on behalf of other government entities, such as local governments and the Highway Users Tax Fund (HUTF). In addition, the Department is responsible for performing various other functions as follows:

- Administering the State Lottery, which grossed more than \$566 million in ticket sales in Fiscal Year 2013. Of this amount, about \$127 million was available for conservation as well as for wildlife, parks, open space, and outdoor recreation projects, including projects funded through Great Outdoors Colorado.
- Acting as a collection agent for city, county, Regional Transportation District (RTD), and special district taxes. The Department collected approximately \$1.2 billion in taxes and fees on behalf of entities such as these.
- Collecting taxes and fees for the HUTF, which is primarily for the benefit of highway maintenance projects in the State. In Fiscal Year 2013, amounts collected for the HUTF totaled approximately \$1.1 billion.
- Regulating the limited stakes gaming activities in Cripple Creek, Black Hawk, and Central City. Adjusted gross proceeds totaled about \$761 million during Fiscal Year 2013, on which the Division of Gaming collected about \$104 million in gaming taxes.
- Enforcing tax, cigarette and tobacco, marijuana, alcoholic beverage, motor vehicle, and emissions inspection laws.

The graph on the next page shows the Department's collections by type of tax for Fiscal Year 2013.

In Fiscal Year 2013, the Department was appropriated total funds of \$288 million and 1,249 full-time-equivalent (FTE) staff. Approximately 25.5 percent of the funding is from general funds, 74.2 percent is from cash and reappropriated funds, and 0.3 percent is from federal funds.

## **Controls over Income Tax Credit Review Thresholds**

The Department is responsible for processing income tax returns. A major component of this process is ensuring the accuracy of income tax credits claimed by the taxpayer. Income tax credits for individuals, corporations, partnerships, and fiduciaries were assigned a review threshold in the Department’s new tax system, known as GenTax. Any income tax credit taken by a taxpayer that exceeds the threshold set in GenTax is automatically flagged by the system for a manual review. When this occurs, Department staff review the tax credit and ensure that the tax credit taken complies with the state and/or federal tax code and, if required, that the proper supporting documents were provided by the taxpayer. If not, Department staff generate a GenTax letter detailing the issue of non compliance with the tax code and send it to the taxpayer prior to denying the credit. The Department staff can change the review thresholds in GenTax for a

variety of reasons. For example, staff reported that they may get approval to raise a threshold in order to manage workloads during the peak tax season, or to lower a threshold in order to examine specific credits in detail. According to Department staff, once a decision to change a threshold in GenTax is made, the threshold amount is required to be updated in GenTax by Department staff, and then document approval by Department staff in GenTax.

### **What was the purpose of the audit work?**

The tax credit review thresholds established in GenTax are a key control for ensuring that income tax credits exceeding specified amounts are subjected to further review by Department staff. The purpose of the audit work was to determine the adequacy of the Department's procedures for establishing, changing, and approving income tax credit review thresholds in GenTax.

### **What audit work was performed and how were results measured?**

State statutes require all state departments to have adequate authorization and recordkeeping procedures to provide effective accounting controls over state assets, liabilities, expenditures, and revenues. During the audit, we tested Department's controls over income tax credit review thresholds. We interviewed Department staff and reviewed available documentation to gain an understanding of the Department's process of establishing, changing and approving income tax credit review thresholds in GenTax. We obtained a listing of changes made to income tax credit review thresholds and reviewed a sample of 21 changes made to individual income tax credit review thresholds in GenTax during Fiscal Year 2013.

### **What problem did the audit work identify?**

We identified the following problems:

**Lack of documentation.** Department staff do not maintain documentation regarding requests to change individual income tax GenTax thresholds, or document the Taxpayer Services Director's approval to change the threshold. According to Department staff, if the Taxpayer Services Director decides that a change to the threshold is needed, then a staff member who has the ability to make threshold changes in GenTax is verbally instructed by the Taxpayer Services Director or the manager to change the threshold.

**Lack of Segregation of Duties.** Based on our review of a sample of 21 out of 62 changes that were made to individual income tax credit thresholds during the fiscal year, we determined that 19 of the 21 (90 percent) thresholds were both changed and approved by one Department staff member.

**Why did the problem occur?**

The Department does not have any formal written procedures describing the process to change GenTax income tax credit review thresholds, the details of what are appropriate and allowable threshold changes, and documentation of proper approval of the changes. Additionally, user roles in relation to changes and approvals of these credit thresholds are not properly segregated in GenTax.

**Why does this problem matter?**

Without formal written procedures and proper segregation of duties for changing and approving individual income tax credit thresholds in GenTax, the Department lacks assurance that the income tax credits are being appropriately flagged for further review as intended, which could lead to an over- or under-assessment of taxpayers' receipts or refunds. Additionally, a lack of adequate documentation, and a lack of segregation of duties exposes the tax credit review thresholds to potential manipulation.

(Classification of Finding: Significant Deficiency.)

---

**Recommendation No. 2013-15:**

The Department of Revenue should improve controls over individual income tax credit review thresholds in GenTax by:

- a. Establishing a formal written procedure regarding allowed threshold changes to income tax credits.
- b. Requiring separation of duties between the person who makes the initial decision to change the tax credit threshold, the person who changes the threshold in GenTax, and the person who approves the changed threshold in GenTax.
- c. Requiring the staff to maintain adequate documentation of the initial decision to change an income tax credit review threshold as well as approval of this decision.

## **Department of Revenue Response:**

Agree. Implementation date: March 2014.

- a. The Department of Revenue agrees with the recommendation and will establish written procedures which delineate how threshold changes to income tax credits are made.
- b. The Department of Revenue will separate the duties described to ensure an adequate segregation of duties. The Department will program GenTax and require department staff to record the initial decision to change the tax credit threshold, the person who changes the threshold and the person who approves the change in the system. The decision to change the threshold will be documented in GenTax, and the actual 2-step change in GenTax (request change and approve change) will be enforced systematically. A new version of the system, which allows for such documentation, is scheduled to be implemented for the Department in the late summer or early fall of 2014. In the meantime, the Department will separately document this process in another environment. The system already tracks approval dates of threshold changes.
- c. The Department of Revenue will program GenTax and require department staff to record the reason for the initial decision for any threshold change in the system. A new version of the system, which allows for such documentation, is scheduled to be implemented for the Department in the late summer or early fall of 2014. In the meantime, the Department will separately document these changes in another environment. The system already tracks approval dates of threshold changes.

---

## **Large Refunds Review**

The Department has a process in place requiring the review of higher-risk refunds, such as refunds of large-dollar amounts. The process consists of two separate layers of review. The first layer of review is performed by staff in the Department's Taxpayer Services (TPS) Division and consists of a review of refunds that are flagged by the Department's internal tax information system, GenTax, based on system edits. The second layer of review is performed by staff outside of the TPS Division who review a system-generated Large Refund Report, which is run on a daily basis from GenTax. The primary purpose of the Large Refund Report review is to identify unusual or inappropriate refund payments.

## **What audit work was performed and how were results measured?**

As part of our Fiscal Year 2013 audit, we reviewed the Department's procedures for reviewing the GenTax Large Refund Report. We also interviewed staff responsible for reviewing the report to gain an understanding of the process. We requested and examined documentation for available staff reviews completed from July 2012 through March 2013. The purpose of our testwork was to determine whether the Department reviews the Large Refund Report on a daily basis, maintains proper supporting documentation, and follows up timely on any errors or anomalies identified in accordance with the Department's policies and procedures.

## **What problem did the audit work identify?**

We found that the Department did not consistently retain supporting documentation of evidence of review of the daily Large Refund Reports during Fiscal Year 2013. Specifically, the Department did not provide supporting documentation such as copies of Large Refund Reports or evidence of review for the 3-month period from December 2012 through February 2013. As a result, the Department could not substantiate that effective and timely reviews were performed during these three months and any errors or anomalies were resolved in a timely manner.

## **Why did the problem occur?**

The Department indicated that the staff member who was performing the reviews of the Large Refund Reports left the Department in November 2012, and the Department temporarily assigned a different staff member to review the reports during December 2012 through March 2013. However, the Department did not appropriately instruct that individual to retain supporting documentation and evidence for the reviews. As a result, the Department did not retain the supporting documentation showing that effective review took place in a timely manner. The Department assigned a new staff person with responsibility for reviewing the Large Refund Reports in March 2013.

## **Why does this problem matter?**

Maintaining supporting documentation and evidence of review are considered elements of an effective internal control process and a good business practice. Without the maintenance of complete review documentation, including evidence of review, the Department is unable to demonstrate that staff are effectively reviewing the Large Refund Report in a timely manner and following up on any errors or anomalies identified in accordance with the Department's policies and procedures. Further, the Department cannot ensure that it will detect or prevent

erroneous or fraudulent activity. This is especially important given the large amount of refunds that are generated by the Department. For example, we noted that a total of approximately \$73 million was identified on the Large Refund Reports generated during December 2012 through February 2013.

(Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-16:**

The Department of Revenue should improve its internal controls related to the large-refund review process by ensuring that current or temporary assigned staff members who perform the daily reviews of the Large Refund Report are appropriately trained to retain supporting documentation and evidence of the review and follow-up and resolve any errors or anomalies identified in a timely manner.

#### **Department of Revenue Response:**

Agree. Implementation Date: March 2013.

The Department agrees that maintaining supporting documentation and evidence of review of this and other internal control activities is important. Although the Office of the State Auditor determined that for a 3-month period the work was not documented, the Department has properly documented the review work in this area since March 2013. In this case, the Department did face challenges with the turnover of key personnel in this area that resulted in a 3-month period where the proper documentation was not maintained.

In addition to the Large Refund Review process, the Department has multiple additional review processes in regard to tax refunds, each with multiple approval levels. These reviews consider other risk factors beyond just the dollar amount of the refund. Refund review remains an important priority for the Department.

---

## **Colorado State Titling and Registration System**

The Colorado State Titling and Registration System (CSTARS) is the Department's primary information system for automating and tracking motor vehicle registrations and titles. The automated database within CSTARS aids the county clerks (or other authorized agents of the State) in processing motor vehicle

registration and title documents, and establishes, operates, and maintains a telecommunications network that provides county clerks with access to information maintained by the Department. CSTARS has been in use since 1983, and the authority to manage the system is currently shared between the Department and the Governor's Office of Information Technology (OIT). During Fiscal Year 2013, approximately \$1.2 billion in revenue from motor vehicle registrations and titles was processed through CSTARS.

### **What was the purpose of the audit work?**

Our audit work sought to determine the implementation status of our Fiscal Year 2010 recommendation related to controls over CSTARS. The initial audit work was performed as a part of the Fiscal Year 2010 Statewide Audit. The work performed in Fiscal Year 2010 was designed to determine whether the IT control activities related to CSTARS, individually or in combination with others, were properly designed, in place, and operating effectively to prevent, or detect and correct, material misstatements in financial transactions, account balances, or disclosures relevant to the Department's vehicle registration and title fees collection and reporting activities.

### **What audit work was performed?**

Our review included determining the Department's progress in implementing our Fiscal Year 2010 recommendation related to CSTARS IT controls. In Fiscal Year 2010, we recommended that the Department implement adequate IT controls for CSTARS related to access management and system hardening. The Department agreed or partially agreed to implement the prior year recommendation, which contained six subparts.

### **What problems did the audit work identify and what do standards require?**

We determined during our Fiscal Year 2013 audit that the Department had not fully implemented five of the six subparts contained in the Fiscal Year 2010 recommendation. Of those five subparts, two subparts were not implemented and three subparts were partially implemented.

The following sections detail the specific problems related to access management and system hardening that continue to exist, and the related Colorado Information Security Policy (CISP) or industry best practice that applies (in italics):

## Access Management

- Current password parameters at the application level do not comply with Colorado Information Security Policies. In Fiscal Year 2010, the password parameters were set such that password length is set to four characters, complexity is not enabled, password history is not maintained—meaning that passwords can be changed to previous passwords—and users are not locked out after three incorrect login attempts. For Fiscal Year 2013, we found that the Department and OIT had made improvements with the CSTARS password parameters. We found that passwords for CSTARS must be at least eight characters in length, and passwords history is maintained—meaning that passwords cannot be easily changed to previous passwords. Additionally, users must change their password every 30 days. However, users are still not locked out after three incorrect login attempts, complexity for password files is not enabled, and the password file is not encrypted. This means that the CSTARS password configuration file still does not comply with Colorado Information Security Policies. *All users must have strong passwords that have eight characters, be enabled for complexity (i.e., include capital letters, special characters, numbers, etc.), expire every 90 days, are logged out after a certain period of inactivity, and are locked after three incorrect log-in attempts. (P-CISP-008)*
- Administrative access to the network that supports CSTARS is not limited to ensure that access is commensurate with users' job responsibilities. Specifically, in Fiscal Year 2010 we found that 23 CSTARS users had inappropriate domain administrator access to the CSTARS network. The Department indicates that administrative accounts have not been reviewed at a system-wide level, and therefore could not provide assurances for Fiscal Year 2013 that administrative access has been sufficiently reviewed to ensure access is commensurate with job responsibilities. *All user access should be periodically audited and accounts that no longer require access should be removed. All user access should be based on the "least privilege" methodology. (P-CISP-008)*
- The Department cannot determine whether county users' access to CSTARS is commensurate with their job responsibilities or whether terminated users' IDs at counties are removed in a timely manner. In Fiscal Year 2010 we found that the Department [for CSTARS] did not enforce the State's requirements that user access request forms be retained or that county users sign the Department's statement of compliance prior to gaining access. For Fiscal Year 2013, the Department reports that there is no system in place, for CSTARS, to manage user access request forms. *All agencies should ensure that user access is based on the "least*

*privilege” methodology and that the access of terminated staff is promptly removed. Additionally, all users must have a written record of IT system access requests, changes, terminations, and transfers that is maintained for one year after the user’s term of employment, and System Access Request Forms are to contain signature blocks for each approver of each system. In addition, all users must acknowledge the Department’s relevant policies by signing a statement of compliance prior to gaining access to the systems. (P-CISP-008)*

- CSTARS is not configured to log and monitor access violation attempts—i.e., unauthorized access attempts and anomalous system activities. In addition, successful log-on attempts are not retained and reviewed. We identified this issue in Fiscal Year 2010, and the Department reports in Fiscal Year 2013 that CSTARS is not logging access according to Colorado Information Security Policies. *All systems must record successful and failed access attempts and retain an audit trail history—an audit history typically covers a period of at least one year, with a minimum of three months available online. All Agencies shall, at a minimum, monitor anomalous system activity. All suspicious activities are to be reported to the Information Security Officer. (P-CISP-008 and P-CISP-007)*

### **System Hardening**

- The operating system supporting CSTARS has not been hardened and reviewed to identify and mitigate security weaknesses. We identified this issue in Fiscal Year 2010, and found during Fiscal Year 2013 that the Department and OIT had purchased new servers and were in the process of developing an approved and hardened standard operating system for CSTARS. However, the Department and OIT had not fully implemented these standard hardened images. *System hardening is the process of minimizing security vulnerabilities by configuring the system in such a manner as to reduce the possibility of unauthorized access or other malicious activity. System hardening should be implemented according to standards consistent with best practices as recommend by vendors and industry sources such as the National Institute for Standards and Technology or the National Security Agency. (P-CISP-007)*

### **Why did the problem occur?**

The Department and OIT failed to design and implement the IT control activities required by Colorado Information Security Policies and necessary to prevent, or detect and correct, material misstatements in financial transactions, account balances, or disclosures relevant to the Department’s motor vehicle registration

and title processing function. Additionally, the Department has not established policies and procedures to guide county users on their roles and responsibilities pertaining to managing and using the CSTARS application. The Department reported that due to resource constraints, it was unable to implement the outstanding Fiscal Year 2010 recommendation subparts.

### **Why does this problem matter?**

In combination, these deficiencies increase the risk of system compromise and threaten the confidentiality, integrity, and availability of CSTARS and the data it contains and processes.

(Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-17:**

The Department of Revenue (Department) and the Governor's Office of Information Technology (OIT) should improve the general IT controls over the Colorado State Titling and Registration System (CSTARS) by:

- a. Implementing strong password parameters at the application level that comply with Colorado Information Security Policies.
- b. Reviewing user access management procedures to ensure that access to the application is commensurate with users' job responsibilities. Additionally, users access request forms should be maintained for the time period specified by Colorado Information Security Policies and users are required to acknowledge the Department's policies and procedures prior to gaining access to CSTARS.
- c. Establishing policies and procedures to provide guidance to county users regarding their roles and responsibilities pertaining to CSTARS. Specifically, the Department and OIT should establish a procedure to ensure that terminated users are removed from the application in a timely manner and users' access reflects their job responsibilities.
- d. Generating, retaining, and reporting system activity logs and coordinating with appropriate personnel to develop a periodic audit log review process to identify anomalous activity, including but not limited to successful and unsuccessful log-in attempts, and attempts to access the system by unauthorized users. The review process should include steps to report anomalous and suspicious activity to the appropriate Information Security Officer for further investigation as needed.
- e. Hardening system configuration settings for CSTARS.

## **Department of Revenue and Governor’s Office of Information Technology Responses:**

The Department of Revenue (DOR) and the Office of Information Technology (OIT) agree with all subparts. Both agencies will work together to implement these recommendations:

- a. Agree. Implementation date: March 2014 or upon the funding and completion of the upgrade of CSTARS September 2017.

CSTARS has a system limitation that prevents passwords from being in full compliance with Colorado Information Security Policies. DOR and the OIT are working jointly to request funding through the Fiscal Year 2014 decision item process that will allow for an upgraded CSTARS system. An upgraded CSTARS system will be fully compliant with the Colorado Information Security Policies. In the meantime OIT’s Office of Information Security will work with CSTARS technical staff to document the policy variance and formally approve the variance until such time as the CSTARS system is upgraded.

- b. Agree. Implementation date: March 2015.

DOR and OIT will create a user functions/tasks matrix to establish best practice procedures for user access. DOR will work with OIT to create a process that will allow for an annual review by the entity authorizing application access to confirm user access is correct and reflects the user job responsibilities. A confirmation sheet will attest to the review and be submitted to the department annually. Programming will be completed for the 2014 calendar year end review and the counties will have until March 2015 to submit their confirmation sheets.

The Access Security form reflects the network access requested for the user and the Statement of Compliance form is signed by the user acknowledging the Department’s policies and procedures. The DOR and the OIT implemented a process in October 2013 whereby these forms are maintained by the OIT Access Control team.

- c. Agree. Implementation date: March 2015.

DOR and OIT will create a user functions/tasks matrix to establish best practice procedures for user access which allows for a segregation of duties when applicable. DOR and OIT will communicate these best practices to county administrators.

Additionally, DOR will work with OIT to create a process that will allow for an annual review by the entity authorizing application access to confirm user access reflects job responsibilities and that terminated users' application access has been removed. A confirmation sheet will attest to the review and be submitted to the department annually. Programming will be completed for the 2014 calendar year end review and the counties will have until March 2015 to submit their confirmation sheet.

- d. Agree. Implementation date: March 2014 or upon the funding and completion of the upgrade of CSTARS September 2017.

CSTARS has a system limitation that prevents the system from being able to generate system activity logs and to be in full compliance with Colorado Information Security Policies. DOR and OIT are working jointly to request funding through the Fiscal Year 2014 decision item process that will allow for an upgraded CSTARS system. An upgraded CSTARS system will be fully compliant with the Colorado Information Security Policies. In the meantime OIT's Office of Information Security will work with CSTARS technical staff to document the policy variance and formally approve the variance until such time as the CSTARS system is upgraded.

- e. Agree. Implementation date: March 2015.

OIT is currently working with hardened server 2008 and Windows 7 operating systems to move the CSTARS application to this new environment. At this point, OIT is scheduled to begin the refresh of the last 25 percent of the county equipment in February 2014 and finish the upgrade of the already refreshed 75 percent of the equipment by December 2014. A March 2015 implementation date allows for any unexpected delays.

---

**This page intentionally left blank**

---

# Department of State

---

The Secretary of State is one of five independently elected constitutional officers of the State. As the chief executive officer of the Department of State (Department), the Secretary of State administers Colorado's elections laws, manages the statewide voter registration database, and administers funds received through the federal Help America Vote Act (HAVA). The Department also regulates charitable solicitations, charitable gaming, and notaries public. As the State's primary record keeper, the Department collects, stores, and provides public access to annual reports, articles of incorporation, liens, and other documents filed according to state laws and the Uniform Commercial Code.

The Department is entirely cash funded, primarily through business filing fees. Additional cash fund sources are the Notary Administration Cash Fund and the Federal Elections Assistance Fund, which supports HAVA. Monies in the Federal Elections Assistance Fund are continuously appropriated and included in the budget for informational purposes only.

The Department was appropriated \$19.9 million and 133 full-time-equivalent (FTE) staff for Fiscal Year 2013. The funds consisted of \$19.9 million in cash funds. The following chart shows the breakdown of appropriations for the Department by administrative section for Fiscal Year 2013.

## **Controls over Procurement Process**

The Department's finance division is responsible for all financial reporting, including the accurate and timely entry and approval of financial transactions on the Colorado Financial Reporting System (COFRS), the State's accounting system. The Department is also responsible for reporting year-end accounting information through "exhibits" to the Office of the State Controller (OSC) for inclusion in the statewide financial statements.

### **What was the purpose of the audit work?**

The purpose of our audit work was to determine whether the Department has adequate internal controls in place over its processing and approval of expenditures.

### **What audit work was performed and how were results measured?**

We reviewed a sample of 25 expenditure accounting transactions plus all five purchases of goods and services in excess of \$100,000 that were made during Fiscal Year 2013 to ensure Department staff processed and approved the expenditures in accordance with State Procurement Rules and State Fiscal Rules.

State Procurement Rule 24-103-201 requires state agencies to use sealed competitive bids to award procurement contracts. However, Rule 24-103-204-03 allows state agencies to use the less complex documented quote process to purchase commodities costing between \$10,000 and \$150,000 and services costing between \$25,000 and \$150,000. A documented quote process is a formal process agencies follow to solicit quotes, review responses, and select vendors for awarding large purchases of commodities and services. The rule also requires that requests for documented quotes must be placed on the Department of Personnel & Administration's (DPA) Bid Information and Distribution System (BIDS) in accordance with State Procurement Rule 24-102-202.5-02. Further, this rule requires BIDS to be the sole source of competitive solicitations for documented quotes except for when the purchaser believes the system will not likely yield adequate competition. In these instances, an agency may solicit bids via both BIDS and additional methods; however, the outside submissions may only be considered after evaluating the BIDS submissions and determining a lack of adequate competition. Additionally, State Procurement Rule 24-102-204-02 requires Department staff to successfully complete training provided by DPA's Division of Finance and Procurement.

State Fiscal Rule 2-2 issued by the State Controller requires the use of a purchase order or a state contract for purchases of goods over \$5,000 and for purchases of services from over \$5,000 to \$100,000. State Fiscal Rule 5-1 sets forth requirements for reimbursement of job-related employee travel expenditures.

Finally, Section 1.4.1 of the State Fiscal Procedures Manual requires capitalization for software purchases exceeding \$5,000.

### **What problem did the audit work identify?**

We identified one or more errors with 9 (36 percent) of the 25 expenditures we tested. In addition, we identified two errors with 1 (20 percent) of the 5 purchases over \$100,000 that we tested. Specifically, we noted the following:

- **Failure to comply with State Procurement Rules.** Six transactions with values ranging from approximately \$26,000 to over \$80,000 did not use the documented quote process via BIDS, and one large purchase with a value in excess of \$319,800 did not use the competitive sealed bid process, as required by State Procurement Rules.
- **Failure to comply with State Fiscal Rules.** Eight transactions and one large purchase did not adhere to various requirements established by State Fiscal Rules, as follows:
  - Four transactions for purchases of services did not use a purchase order or state contract. Three of these transactions were part of a series of 44 related purchases totaling almost \$54,800, paid to a spouse of a Department employee. The fourth transaction was a monthly installment for a purchase totaling approximately \$26,000.
  - One transaction of \$38,000 for the purchase of computer software was not capitalized, although it was over the \$5,000 capitalization threshold.
  - One transaction totaling almost \$3,100 for training expenditures was recorded in the incorrect fiscal year.
  - Two transactions for reimbursement of employee travel expenditures were not made in accordance with State Fiscal Rules, resulting in overpayment to both travelers. Specifically, one transaction resulting in an overpayment of \$159 contained several errors including use of the incorrect per-diem rate, lack of supporting documentation for expenses reimbursed, and reimbursement for meals already included in attendee conference fees. The other transaction resulting in an overpayment of \$18 included meals that were not eligible for reimbursement because the traveler made a single day trip, departing and returning outside of qualifying timelines established for reimbursement. Although

the overpayments are minimal, reimbursements should only be made according to State Fiscal Rules.

- One large software operating license purchase with a value in excess of \$319,800 was not procured with a state contract. Although the Department owns the software, staff was unaware of the need to use a state contract to purchase its annual operating license.

### **Why did the problem occur?**

The Department does not have adequate internal controls in place to ensure its staff adheres to State Fiscal Rules, State Procurement Rules, and State Fiscal Procedures. For example, the Department lacks sufficient written procedures requiring that Department personnel procure items in accordance with formal policy established by DPA. In addition, we noted that only one of the three members of the Department's senior management team charged with the responsibility for making large purchases has attended formal training provided by DPA's Division of Finance and Procurement.

### **Why does this problem matter?**

Compliance with State Fiscal Rules and State Procurement Rules can help ensure fair and equitable treatment of persons who deal with the procurement system of the State, foster effective broad-based competition within the free enterprise system, and provide safeguards for the maintenance of a procurement system of quality and integrity.

(Classification of Finding: Significant Deficiency.)

---

## **Recommendation No. 2013-18:**

The Department of State (Department) should improve its controls over its procurement process by:

- a. Instituting formal policies and procedures to ensure procurements meet requirements established by State Fiscal Rules and State Procurement Rules.
- b. Providing adequate training to all staff members who hold purchasing authority for the Department and taking steps to obtain reimbursement for the travel overpayments identified through the audit.

## **Department of State Response:**

Agree. Implementation date: July 2014.

- a. The Department agrees that formalizing the current processes and procedures will ensure that procurements are conducted in accordance with the State Procurement Code and State Fiscal Rules. The Department will seek guidance from the State Purchasing Office and the State Controller's Office to ensure that policies and procedures comply with the relevant sections of the State Procurement Code and State Fiscal Rules.
- b. Through a retirement and a resignation, the Department now has a deficit of trained personnel. The Department agrees with the audit recommendation and will assign staff and sign them up for the DPA training as soon as possible. The Department will make sure that three employees in the Administration/Finance division and additional employees in operating divisions of the Department have sufficient procurement/contract training, based on procurement training schedules through DPA.

The Department will recover any future overpayments that are identified through an internal audit for travel related expenses. This will be put into our updated travel policies and documented accordingly.

---

# Department of the Treasury

The Department of the Treasury (Treasury) is established by the State Constitution. The Treasurer is an elected official who serves a 4-year term. The Treasury's primary function is to manage the State's pooled investments and implement and monitor the State's cash management procedures. Other duties and responsibilities of the Treasury include:

- Receiving, managing, and disbursing the State's cash
- Safekeeping the State's securities and certificates of deposit
- Managing the State's Unclaimed Property Program, the School District Loan Program, the Elderly Property Tax Deferral Program, and the Colorado Housing and Finance Authority Loan Program

The State's pooled investments are made up of a variety of securities, as shown in the following chart.

In Fiscal Year 2013, the Treasury was appropriated approximately \$479 million and 31.5 full-time-equivalent staff. The majority of the Treasury's funding

(Approximately 99 percent) was for special purpose programs, and the remaining 1 percent was for Treasury operations. The Treasury received approximately 22.8 percent of its funding from the General Fund and 77.2 percent from cash funds.

## Compliance with Colorado Funds Management Act and the Tax Anticipation Note Act

The Colorado Funds Management Act (the Funds Management Act) under Section 24-75-902, C.R.S., allows the State to finance temporary cash flow deficits caused by fluctuations in revenue and expenditures. Under the Funds Management Act, the State Treasurer is authorized to sell Tax and Revenue Anticipation Notes (TRANS) to meet these shortfalls. The Tax Anticipation Note Act under Section 29-15-112 (1), C.R.S., authorizes the State Treasurer to issue tax and revenue anticipation notes for school districts for the purpose of alleviating temporary cash flow deficits of such districts by making interest-free loans to the districts. TRANS are short-term notes payable from anticipated pledged revenue.

Section 24-75-914, C.R.S., requires the Office of the State Auditor to review information relating to TRANS and report this information to the General Assembly. The following table and discussion provide information about the Treasurer’s July 17, 2012 issuance of \$500 million in General Fund Tax and Revenue Anticipation Notes Series 2012 (hereafter referred to as the General Fund Notes), the July 11, 2012, issuance of \$125 million (2012B), and January 3, 2013 issuance of \$160 million (2012C) in Education Loan Program (ELP) Tax and Revenue Anticipation Notes (hereafter referred to as the ELP Notes).

<b>Source:</b> Office of the State Treasurer records.			

## Terms and Price

The maturity dates of the General Fund Notes and the ELP Notes comply with statutory requirements. Specifically, the General Fund Notes and both of the ELP Notes have a maturity date of June 27, 2013. Neither is subject to redemption prior to maturity. The General Fund Notes are required to mature at least three days prior to the end of the fiscal year. The ELP Notes are required to mature on or before August 31 of the fiscal year immediately following the fiscal year in which the notes were issued. In addition, on or before the final day of the fiscal year in which the ELP Notes are issued, there shall be deposited, in one or more special segregated and restricted accounts and pledged irrevocably to the payment of the ELP Notes, an amount sufficient to pay the principal, premium, if any, and interest related to the ELP Notes on their stated maturity date.

Notes in each series are issued at different face interest rates. These are the rates at which interest will be paid on the notes. The average net interest cost to the State differs from the face interest rates because the notes are sold at a premium, which reduces the net interest cost incurred.

## Security and Source of Payment

In accordance with the Funds Management Act, principal and interest on the General Fund Notes are payable solely from any cash income or other cash receipts recorded in the General Fund for Fiscal Year 2013. General Fund cash receipts include those that are subject to appropriation in Fiscal Year 2013 and any pledged revenue, including the following:

- Revenue not yet recorded in the General Fund at the date the notes were issued.
- Any unexpended note proceeds.
- Proceeds of internal borrowing from other state funds recorded in the General Fund.

The State Treasurer records monies reserved to pay the principal and interest of the notes in the Note Payment Account (Account) on the Colorado Financial Reporting System (COFRS), the State's accounting system. The notes were secured by an exclusive first lien on assets in the account. The State Treasurer held in custody the assets in the Note Payment Account.

On June 17, 2013, and at maturity on June 27, 2013, the account balance was sufficient to pay the principal and interest without borrowing from other state funds. If the balance in the Account on June 17, 2013, had been less than the principal and interest of the General Fund Notes due at maturity, the Treasurer

would have been required to deposit into the account all General Fund revenue available at that time, and borrow from other state funds until the balance met the required level.

According to Section 29-15-112 (2) (e) (II), C.R.S., interest on the ELP Notes is payable from the General Fund. Principal on the ELP Notes is payable solely from the receipt of property taxes received by the participating school districts during the period of March through June 2013, which are required to be deposited to the General Fund of each school district. Statutes require the school districts to transfer funds for the entire principal on the ELP Notes into the State Treasury by June 25, 2013. The State Treasurer uses these funds to repay the principal on the ELP Notes. The school districts completed these transfers by June 25, 2013, and the State Treasurer used these funds to repay the principal on the ELP Notes.

If, on June 26, 2013, the balance in the Education Loan Program Notes Repayment Account is less than the principal of the ELP Notes at maturity, the Treasurer must deposit from any funds on hand that are eligible for investment an amount sufficient to fully fund the ELP account.

The amount due at maturity for the General Fund Notes is \$511,191,666.67, consisting of principal of \$500,000,000 and interest of \$11,191,666.67. The amount due at maturity for the 2012B ELP Notes is \$127,402,777.78, consisting of principal of \$125,000,000 and interest of \$2,402,777.78. The amount due at maturity for the 2012C ELP Notes is \$161,450,000.00, consisting of principal of \$160,000,000 and interest of \$1,450,000.00. To ensure the payment of the General Fund and ELP Notes, the Treasurer agreed to deposit pledged revenue into both the General Fund Notes and ELP Notes Repayment Accounts so that the balance on June 17, 2013, and June 26, 2013, respectively, would be no less than the amounts to be repaid. The note agreements also provide remedies for holders of the notes in the event of default.

## **Legal Opinion**

Brownstein Hyatt Farber Schreck, LLP and Kutak Rock LLP, bond counsels, have stated that, in their opinion:

- The State has the power to issue the notes and carry out the provisions of the note agreements.
- The General Fund and ELP Notes are legal, binding, secured obligations of the State.
- Interest on the notes is exempt from taxation by the United States government and by the State of Colorado.

## **Investments**

The Colorado Funds Management Act, the Tax Anticipation Note Act, and the General Fund and ELP Note agreements allow the Treasurer to invest funds in the General Fund and ELP Notes Repayment Accounts in eligible investments until they are needed for note repayment. Interest amounts earned on the investments are credited back to the General Fund, since the General Fund pays interest at closing. The State Treasurer is authorized to invest the funds in a variety of long-term and short-term securities according to 24-36-113, C.R.S. Further, Section 24-75-910, C.R.S., of the Funds Management Act and Section 29-15-112 (3) (b) of the Tax Anticipation Note Act state that the Treasurer may:

- Invest the proceeds of the notes in any securities that are legal investments for the fund from which the notes are payable.
- Deposit the proceeds in any eligible public depository.

## **Purpose of the Issuance and Use of Proceeds**

The General Fund Notes were issued to fund the State's anticipated General Fund cash flow shortfalls during Fiscal Year 2013. The Treasurer deposited the proceeds of the sale of the General Fund Notes in the State's General Fund. Note proceeds were used to alleviate temporary cash flow shortfalls and to finance the State's daily operations in anticipation of taxes and other revenue to be received later in Fiscal Year 2013.

The ELP Notes were issued to fund a portion of the anticipated cash flow shortfalls of the school districts during Fiscal Year 2013. The net proceeds of the sale of the notes were used to make interest-free loans to the school districts in anticipation of the receipt of property tax revenue by the individual districts on and after March 1, 2013, and up to and including June 25, 2013.

## **Additional Information**

The General Fund Notes and the ELP Notes were issued through competitive sales. A competitive sale involves a bid process in which notes are sold to bidders offering the lowest interest rate.

The issuance of both types of notes is subject to the Internal Revenue Service's (IRS) arbitrage requirements. In general, arbitrage is defined as the difference between the interest earned by investing the note proceeds and the interest paid on the borrowing. In addition, if the State meets the IRS safe harbor rules, the State is allowed to earn and keep this arbitrage amount. The IRS safe harbor rules require the State to meet certain spending thresholds related to the note proceeds. In

Fiscal Year 2013, the State met the IRS safe harbor rules. Although these requirements were met, interest earned by investing note proceeds was less than interest paid on the borrowing, and thus no arbitrage was earned or kept. The Office of the State Treasurer is responsible for monitoring compliance with the arbitrage requirements to ensure the State will not be liable for an arbitrage rebate.

## **State Expenses**

The State incurred expenses as a result of the issuance and redemption of the General Fund and ELP Notes. These expenses totaled approximately \$0.5 million. The expenses include:

- Bond legal counsel fees and reimbursement of related expenses incurred by the bond counsel.
- Disclosure counsel fees and expenses.
- Fees paid to rating agencies for services.
- Costs of printing and distributing preliminary and final offering statements and the actual notes.
- Travel costs of state employees associated with note issuance and selection of a financial advisor.
- Redemption costs, consisting of fees and costs paid to agents to destroy the redeemed securities.

## **Subsequent Events**

On July 10, 2013, the State issued \$500 million in General Fund Tax and Revenue Anticipation Notes with a maturity date of June 27, 2014. The notes carry a coupon rate of 1.33 percent and were issued with a premium of \$5.6 million. The total due at maturity includes \$500 million in principal and \$6.4 million in interest.

On July 16, 2013, the State issued \$130 million in Education Loan Program Tax and Revenue Anticipation Notes with a maturity date of June 27, 2014. The notes carry a coupon rate of 1.25 percent and were issued with a premium of \$1.3 million. The total due at maturity includes \$130 million in principal and \$1.5 million in interest.

No recommendation is made in this area.

## Public School Fund

The Public School Fund (Fund), created under Section 22-41-101, C.R.S., is used for the deposit and investment of proceeds from the sale of land granted to the State by the federal government for educational purposes, as well as for other monies as provided by law. Interest and income earned on the Fund are to be distributed to and expended by the State's school districts for the maintenance of the State's schools. In accordance with Section 22-41-104 (2), C.R.S., the State Treasurer has the authority to "effect exchanges or sales" of investments in the Public School Fund, whenever the exchanges or sales will not result in the loss of the Fund's principal.

Section 2-3-103 (5), C.R.S., requires the Office of the State Auditor to annually evaluate the Fund's investments and to report any loss of the Fund's principal to the Legislative Audit Committee. During our Fiscal Year 2013 audit, we obtained confirmations from JPMorgan Chase Bank on the fair value of all investments held in the Fund. We compared the total fair value of the Fund's investments to the cost of the investments as recorded in COFRS and noted that the fair value of the investments exceeds the cost by approximately \$9.7 million. We did not identify any loss of principal to the Fund during Fiscal Year 2013. We also tested a sample of transactions recorded to the Fund during the fiscal year. We agreed the transactions to third-party source documentation and determined that the balance of the investments in COFRS was accurate at fiscal year-end. We noted no exceptions through our testwork.

No recommendation is made in this area.

---

# Department of Education

---

Article IX of the Colorado Constitution places responsibility for the general supervision of the State's public schools with the Colorado State Board of Education (Board). The Board appoints the Commissioner of Education to oversee the Department of Education (Department), which serves as the administrative arm of the Board by providing assistance to 178 local school districts and implementing administrative rules.

During Fiscal Year 2013, the Department spent approximately \$610 million in federal funds. As part of our Fiscal Year 2013 audit, we tested the Department's compliance with federal grant requirements for the following programs:

- Improving Teacher Quality
- School Improvement Grants

In Fiscal Year 2013, the Department's expenditures for these programs were approximately \$28.3 million and \$13.7 million, respectively. Of the \$13.7 million in School Improvement Grant expenditures, \$11.1 million were American Recovery and Reinvestment Act (Recovery Act) funds. The Department is responsible for ensuring that all expenditures for these programs are appropriate and that the State complies with the associated federal program requirements.

Our Fiscal Year 2013, audit identified a material instance of noncompliance for the School Improvement Grant program. The compliance matter identified, and audit recommendation for this program, is described in the following comment below.

The following comment was prepared by the public accounting firm of BKD, LLP, which performed the Fiscal Year 2013 audit work at the Department of Education.

## **School Improvement Grant Reporting**

Recipients (i.e. direct recipients), of federal grants, such as the Department, of federal grants or cooperative agreements who make first-tier subawards to other entities are subject to subaward reporting requirements under the Federal Funding Accountability and Transparency Act (Transparency Act). In this case, first-tier subawards would be those awards made directly from the Department (direct recipient) to the State's school districts (first-tier sub-recipients). The

Transparency Act requires the federal Office of Management and Budget to maintain a single, searchable website into which information on all federal spending awards is entered. During Fiscal Year 2013, the Department passed-thru to subrecipients approximately \$13 million of federal School Improvement Grants funding.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the Department's compliance with required federal reporting related to the Transparency Act.

### **What audit work was performed and how were results measured?**

The audit work consisted of testing all nine of the Department's subaward agreements subject to the Transparency Act requirements by reviewing the data submitted via the Federal Subaward Reporting System (FSRS). Under the Transparency Act, recipients such as the Department are specifically required to report each first-tier subaward, and any modifications made to such existing first-tier subawards that resulted in an original or additional obligation of \$25,000 or more in federal funds. The reporting is to be completed by the end of the month following the month in which the reportable action occurred. The Department awarded all funds in July 2012, and thus was required to complete the Transparency Act reporting by August 31, 2012.

### **What problem did the audit work identify?**

While the Department was registered in the Federal Subaward Reporting System (FSRS), it did not report subaward data related to any of the nine grants it awarded for the School Improvement Grant program, as required.

### **Why did the problem occur?**

During Fiscal Year 2013, the Department experienced staff turnover within the Office of Grants Fiscal, which resulted in job responsibilities being transferred between existing employees. The turnover occurred in October 2012, but the Transparency Act reporting responsibilities were not officially transferred to another employee until June 2013. The Department did not have anyone cross-trained to perform this function during the interim period and because there were no formally documented standard operating procedures or monitoring documents related to Transparency Act reporting requirements, the Department was unaware that the reporting requirement had not been satisfied.

### **Why does this problem matter?**

By not meeting the reporting requirements under the Transparency Act, the Department is in violation of federal requirements and the transparency objective of the Transparency Act cannot be met. This problem also results in incomplete information within FSRS and USAspending.gov relating to the subawards made under this program.

(CFDA Nos. 84.377, 84.388; School Improvement Grants, School Improvement Grants, Recovery Act; Reporting. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-19:**

The Department of Education should improve controls over federal reporting requirements by:

- a. Cross-training Office of Grants Fiscal staff to ensure that when staff turnover or extended absences occur, grant requirement responsibilities can be immediately reassigned and continue to be fulfilled.
- b. Preparing, adopting, and implementing formal standard operating procedures including supervisory monitoring and follow up to ensure information is reported within the required timelines.

### **Department of Education Response:**

- a. Agree. Implementation Date: March 2014.

The Department of Education will train all Office of Grants Fiscal staff on grant requirements ensuring adequate cross training of staff to allow for continuation of monitoring activities in the event of turnover or staff absences.

- b. Agree. Implementation Date: November 2013.

The Department of Education has developed procedures for inputting grant information into the Federal Funding Accountability and Transparency Act Sub-award Reporting System (FSRS). The procedures entail that the required information is updated timely and has the appropriate oversight from supervisors. These procedures will allow us to comply to the extent the FSRS allows.

---

---

# Office of the Governor

---

During Fiscal Year 2013, the Office of the Governor (Office) spent approximately \$35 million in federal funds, including approximately \$18 million in American Recovery and Reinvestment Act (Recovery Act) funds. Specifically, the Colorado Energy Office spent approximately \$12 million in federal funds, including approximately \$5 million in Recovery Act funds. As part of our Fiscal Year 2013 audit, we tested the Office's compliance with federal grant requirements for the Weatherization Assistance Program (Program).

Our Fiscal Year 2013 audit identified one significant deficiency in internal control for the Program. The internal control and compliance matter identified, and the audit recommendation for this program, is described in the following section of this chapter.

## **Weatherization Assistance Program**

The Program is designed to increase the energy efficiency of dwellings owned or occupied by low-income persons, reduce low-income persons' total expenditures on energy, and improve low-income persons' health and safety. During Fiscal Year 2013, the Office spent approximately \$11 million in federal funds for this program.

The following comment was prepared by the public accounting firm of KPMG, LLP, which performed Fiscal Year 2013 audit work at the Office.

## **Suspension and Debarment Verification for the Weatherization Assistance Program**

The Program is subject to federal procurement, suspension, and debarment requirements. Suspension and debarment actions protect the government from doing business with individuals, companies, or recipients who pose a business risk to the government. For example, a contractor may be suspended or debarred from doing business with government agencies because of fraud or poor performance.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine if the Office has adequate internal controls in place over, and is in compliance with, federal suspension and debarment regulations for the Program.

### **What audit work was performed and how were results measured?**

To assess the Office's internal controls over, and compliance with, federal suspension and debarment requirements for the program, we tested the Office's internal controls in place over this area and reviewed the standard contract used by the Program to communicate terms, conditions, and applicable regulations. We also inquired whether the Office verified that the entity and its principals were not suspended or debarred.

Federal suspension and debarment requirements apply to procurement contracts for goods and services that are expected to equal or exceed \$25,000. When the Office enters into such a transaction, federal regulations [Office of Management Budgets' Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement), 2 C.F.R. Section 180] require the Office to verify that the entity and its principals are not suspended, debarred, or otherwise excluded from performing work for government agencies. Principals are persons who have a significant influence over the handling of the federal funds, including owners, managers, and consultants.

States are allowed to use one of the following three methods of verification: checking the Excluded Parties List System maintained by the federal government to ensure the entity and its principals are not on the list; collecting a certification from the contractor that the contractor and its principals are not debarred or suspended; or adding a clause or condition to the contract or award document stating that the contractor certifies, by signing the contract, that neither it nor its principals are presently debarred, suspended, or otherwise excluded.

### **What problem did the audit work identify?**

The standard contract used by the Program included suspension and debarment language related to the entity, but not to its principals. In addition, the Office did not use any of the other acceptable methods of verification for the contracted entities and its principals.

### **Why did the problem occur?**

The Office did not update the standard contract for federal funds used by the Program to include the information related to principals. Additionally, it does not have a policy that requires the Program to perform any of the alternative verification procedures related to the principals of an entity.

### **Why does this problem matter?**

Failure to perform required suspension and debarment verification procedures could result in the Office procuring goods or services from a contractor or principal that has been suspended or debarred, thereby exposing the State to increased business risk. In addition, the Office risks the loss of federal awards if it does not comply with federal requirements.

(CFDA No. 81.042, Weatherization Assistance Program for Low-Income Persons; Procurement, Suspension and Debarment. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-20:**

The Office of the Governor should improve controls over compliance with federal suspension and debarment requirements for the Weatherization Assistance Program by including suspension and debarment language related to both the entities and its principals in all contracts that are covered by these rules. Alternatively, it should design and implement policies to use one of the other acceptable verification procedures for the principals.

### **Office of the Governor Response:**

Agree. Implementation date: January 2014.

The following language regarding suspension and debarment will be included in CEO contracts utilizing federal funding effective immediately (January 2014):

"Grantee represents and warrants that Grantee, or its employees/principals/owners, or authorized subcontractors, are not presently excluded from participation, debarred, suspended, proposed for debarment, declared ineligible, voluntarily excluded, or otherwise ineligible to participate in a federal health care program, as defined in 42 USC §1320a-7b(f), or in any other government payment program by any federal or State of Colorado department or agency. If Grantee or, its Subcontractors or any of their respective employees or authorized agents, is excluded from participation, or becomes otherwise ineligible to participate in any such program during the term of this Grant, Grantee will notify the State in writing within three (3) days after such event. Upon the occurrence of such event, whether or not such notice is given to Grantee, the State, in its sole discretion, reserves the right to immediately cease contracting with Grantee and terminate this Contract without penalty."

# Department of Health Care Policy and Financing

---

The Department of Health Care Policy and Financing (Department or HCPF) is the state agency responsible for developing financing plans and policy for publicly funded health care programs. The principal programs the Department administers are the Medicaid program, which provides health services to eligible needy persons, and the federal Children's Health Insurance Program, which is known in Colorado as the Children's Basic Health Plan (CBHP). CBHP furnishes subsidized health insurance for low-income children aged 18 years or younger who are not eligible for Medicaid. CBHP also subsidizes health insurance for low-income prenatal women who are not eligible for Medicaid.

The Department is responsible for ensuring that all expenditures under the Medicaid and CBHP programs are appropriate, and that the State complies with federal and state program requirements. In Colorado, the responsibility for determining recipient eligibility for Medicaid and CBHP program benefits is shared between local, county and designated Medical Assistance (MA) eligibility sites and the State. For the Medicaid and CBHP programs, individuals and families apply for benefits at their local county departments of human/social services or at designated MA sites. The eligibility sites are responsible for administering the benefits application process, entering the required data for eligibility determination into the Colorado Benefits Management System (CBMS), and approving the eligibility determinations. The Department is responsible for supervising and monitoring the eligibility sites' administration of the Medicaid and CBHP programs. The Department is also responsible for ensuring that only eligible providers receive reimbursement for their costs of providing allowable services on behalf of eligible individuals.

In Fiscal Year 2013, the Department was appropriated nearly \$5.6 billion, of which more than \$2.8 billion were federal funds, approximately \$1.8 billion were general funds, and nearly \$944 million were reappropriated and cash funds. The Department was also appropriated 327.1 full-time-equivalent staff positions.

As part of our Fiscal Year 2013 audit, we tested the Department's compliance with federal grant requirements for the following programs:

- Medicaid
- Children's Basic Health Plan

In Fiscal Year 2013, the Department expended approximately \$5.1 billion on Medicaid services (CFDA No. 93.778), of which \$2.6 billion was federal funds and \$2.5 billion was state and other funding. Total federal expenditures for the Medicaid program included approximately \$49.9 million from American Recovery and Reinvestment Act funds. For the CBHP program (CFDA No. 93.767), the Department paid about \$261.4 million to providers on behalf of eligible clients, of which \$187.3 million was federal funds and \$74.1 million was state and other funding.

Between Fiscal Years 2012 and 2013, as shown in the following table, the Department's average monthly caseload for Medicaid increased by almost 10.2 percent and CBHP increased by nearly 4.1 percent:

<b>Department of Health Care Policy and Financing Average Monthly Caseload Fiscal Years 2011 Through 2013</b>		
<b>Fiscal Year</b>	<b>Average Medicaid Monthly Caseload</b>	<b>Average CBHP Monthly Caseload</b>
2011	560,759	69,008
2012	619,963	76,330
2013	682,995	79,447

**Source:** Department of Health Care Policy and Financing Fiscal Year 2012-13 Medical Premiums Expenditure and Caseload Report

Based on our Fiscal Year 2013, audit we identified errors resulting in recommendations for both programs tested. We identified and reported a total of 11 significant deficiencies related to federal awards. Of these errors identified, 10 are described in this chapter, and one audit recommendation was made jointly to the Department and the Department of Human Services, which is contained within the Department of Human Services' Federal Awards Findings chapter.

## **Medicaid and Children's Basic Health Plan Sample Testing Results**

As part of the financial and compliance audit of the State, the Medicaid program is tested annually, and the CBHP program has been tested annually since Fiscal Year 2006. For the second consecutive year, the Department continued to improve its controls over eligibility determination for the Medicaid program based on our test work. In Fiscal Year 2011, the Department had a material weakness over Medicaid eligibility. This dropped in Fiscal Year 2012 to a significant deficiency over Medicaid eligibility determination and in Fiscal Year 2013, we did not identify any problems related to eligibility determination for the

Medicaid program. We identified significant deficiencies in eligibility determination and other controls for the CBHP program.

The Department also continued preparing for anticipated changes to Medicaid requirements under the federal Affordable Care Act (ACA), which was signed into law in March 2010. The Department has completed or is currently working on 15 initiatives that it is responsible for implementing under the ACA. Examples of the initiatives the Department has been working on during Fiscal Year 2013 are:

- Expanding Medicaid coverage, beginning January 1, 2014, that will make health care coverage accessible to more Colorado residents. This is accomplished through changes in eligibility requirements, such as standardizing the calculation of income used in determining eligibility for some programs available under the Medicaid program.
- Collaborating with the health insurance exchange marketplace to create a streamlined application for medical assistance eligibility. The new eligibility application has been submitted to the federal Centers for Medicare and Medicaid Services for approval.
- Aligning the medical assistance programs and the health insurance exchange marketplace delivery system. When individuals apply for medical and financial assistance in the marketplace, their applications will be routed to have their eligibility determined for Medicaid and CBHP first. If those individuals are found eligible for either program, the enrollment process will begin.

Overall, for the Fiscal Year 2013 audit, we have classified internal control recommendations made to the Department as significant deficiencies for both programs. During our Fiscal Year 2013 eligibility sample testing, we identified known questioned costs for the CBHP program totaling \$21,796.

In addition to describing deficiencies identified during the Fiscal Year 2013 audit, this report details the follow-up testwork we conducted to determine the implementation status of the Department's prior year recommendations. Some prior year recommendations that are reported again as Fiscal Year 2013 recommendations are classified as material weaknesses. However, it is important to note that this level of severity applies to internal control weaknesses that were originally identified in prior years, not new problems identified during the Fiscal Year 2013 audit. The number of outstanding prior year recommendations decreased from 30 recommendations in Fiscal Year 2012 to 27 recommendations in Fiscal Year 2013.

## **Controls over the Children's Basic Health Plan Program Eligibility Determinations**

The Department and counties share responsibility for ensuring that only eligible recipients receive public assistance benefits under CBHP. Individuals and families apply for CBHP eligibility at their local county department of human/social services and at MA sites. At the counties and MA sites, caseworkers collect required documentation and enter applicant data into the CBMS; caseworkers use these data to determine applicants' eligibility for program benefits. The eligibility data in CBMS feed into the Medicaid Management Information System (MMIS), which pays providers for the services that beneficiaries receive.

### **What was the purpose of the audit work?**

The purpose of the audit work was to test the Department's internal controls over all aspects of the eligibility determination process for CBHP as well as to determine compliance with applicable federal and state requirements.

Additionally, we reviewed the Department's progress in implementing our Fiscal Year 2012 audit recommendations to ensure eligibility determinations were accurate and contained required documentation. Specifically, as a result of our Fiscal Year 2012 audit, we recommended at that time that the Department should continue to work with the counties, MA sites, the Governor's Office of Information Technology, and the third-party administrators to ensure the accuracy of eligibility determinations and redeterminations for CBHP.

### **What audit work was performed and how were results measured?**

During our Fiscal Year 2013 audit, we reviewed the Department's internal controls, including CBMS system controls, and tested a random sample of 60 CBHP cases associated with medical payments approved between July 1, 2012, and June 30, 2013. We also reviewed the case files and CBMS data fields related to eligibility determination and redetermination associated with these cases. Our review sought to determine whether the Department ensured that county and MA site caseworkers obtained and maintained in the case files the required documents supporting eligibility determinations, determined eligibility timely, and correctly entered eligibility data into CBMS. We measured the results of our audit work against the following:

- Federal regulations (Case Documentation, 42 C.F.R., pt. 435.913) require the Department to obtain and maintain documentation to support a beneficiary's CBHP eligibility determination. The Department delegates responsibility for obtaining and maintaining case file documentation to

counties and MA sites, which the Department then monitors on an ongoing basis.

### **What problem did the audit work identify?**

Our sample testing identified missing and incomplete case file documentation for 9 (15 percent) of the 60 sampled cases, which indicates the Department has not fully implemented our prior year audit recommendation. Specifically, the Department was unable to provide one CBHP case file selected for testing. In addition, eight case files were missing required case file documentation, such as proof of citizenship or proof of identity. These errors resulted in a total of \$21,796 in known questioned costs for CBHP.

### **Why did the problem occur?**

Department staff reported that there are over 400 eligibility sites that receive and/or process medical applications statewide. Staff further stated the loss of documents were due to the transferring of documents within eligibility sites and from one eligibility site to another, and ongoing business improvements.

### **Why does this problem matter?**

Without the required case file documentation, the counties, MA sites, and ultimately the State cannot substantiate that eligibility determinations and redeterminations for CBHP are accurate, which can result in benefits being paid on behalf of ineligible individuals. The federal government can disallow federal matching funds from paying for program expenditures that do not adhere to regulations, and the State would be required to bear the cost of these errors.

(CFDA No. 93.767; Children's Health Insurance Program; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility Classification of Finding: Significant Deficiency.)

---

## **Recommendation No. 2013-21:**

The Department of Health Care Policy and Financing (Department) should continue to work with the counties and Medical Assistance (MA) sites to ensure that caseworkers maintain the required case file documentation supporting eligibility determinations and redeterminations for individuals who receive public assistance benefits under the Children's Basic Health Plan.

## **Department of Health Care Policy and Financial Response:**

Agree. Implementation Date: Implemented and ongoing.

The Department continues to make tremendous improvements with eligibility determinations for the Medicaid and CBHP programs. Through its ongoing incentives with Medical Eligibility Quality Improvement Plan (MEQIP) and Colorado Eligibility Process Improvement Collaborative (CEPIC), the Department will continue to monitor its eligibility sites' accuracy of eligibility determinations and redeterminations. Sites found to be struggling with the accurate processing of medical applications and/or redeterminations will be provided with individualized technical assistance and trainings to ensure accuracy. Maintaining case file documentation within MEQIP and CEPIC will also be emphasized moving forward. In a process that requires manual and human intervention, errors will always exist. Accuracy rates of 100 percent are difficult to achieve when there are over 400 eligibility sites statewide that receive and/or process medical applications. The Department recognizes this finding continues to occur yearly which is why various processes have been put in place to improve accuracy.

---

## **Medicaid Eligibility Quality Control Reviews**

The Department's Medicaid Eligibility Quality Control (MEQC) unit performs focused reviews on specific Medicaid eligibility populations, such as those receiving long-term care services. The purposes of the reviews are to assess the appropriateness of eligibility determinations, ensure accuracy and timeliness of the determination, and avoid inappropriate payments and client determination delays. During Fiscal Year 2013, the Department completed two focused reviews over the Long-Term Care–Nursing Facility Programs and the Medicaid Savings Program.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the Department's MEQC process and perform tests to ascertain whether it is operating to effectively meet the objectives of the process and is in compliance with the applicable program requirements.

## **What audit work was performed and how were results measured?**

During our Fiscal Year 2013 audit, we reviewed the Department's MEQC procedures and documentation for the two reviews completed. We reviewed both the approved and denied cases final reports for each of the two reviews completed and selected the six eligibility sites with the highest number of findings from each final report. For each finding identified for the selected eligibility sites, we reviewed for reasonableness the Department-prepared eligibility site summary reports and initial findings forms, the eligibility site's responses, Department dispositions, and the eligibility site's corrective action plans. We agreed the total findings on the Department's internal summary report to the number of findings in each eligibility site's summary report. We also agreed all cited findings on the summary reports to the supporting documentation and reviewed the internal MEQC database for pertinent information when necessary. We measured the results of our audit work against the following Department procedures:

- The Department submits its methodology/proposal for each MEQC review to the federal Centers for Medicare & Medicaid Services (CMS) for approval.
- Once the Department's MEQC review methodology/proposal is approved by CMS, the Department's MEQC team requests the data from the eligibility systems unit, and the data unit sends the MEQC team a random sample of both approved and denied case files for review.
- Upon completing the reviews, the Department documents each finding on an initial findings form, then communicates its findings to the eligibility sites through a manually prepared eligibility site summary report. If findings are identified, the eligibility site responds to the Department's findings, including whether the site agrees or disagrees with the findings. If the site disagrees with the findings, supporting documentation must be provided to the Department for further consideration. If the site agrees with the findings, a corrective action plan must be provided to the Department outlining how the findings will be corrected. The Department reviews these plans to determine if they are acceptable and creates a final disposition of findings, including the type of the finding. All findings and correspondence are recorded in the Department's internal MEQC database.
- The findings are recorded in an internal summary report used to compile all findings by type and eligibility site.

- The Department uses the MEQC database and internal summary report to submit a final report to CMS and each eligibility site.

### **What problem did the audit work identify?**

Based on our Fiscal Year 2013 audit test work, while we found that the Department is following its procedures in performing the MEQC reviews as approved by CMS, the Department failed to provide adequate documentation and to accurately record findings. Specifically we found:

- **Inadequate documentation.**
  - We identified 48 instances in which an MEQC finding was either deleted from the Department's database or cleared by the Department after being communicated to the eligibility site, because the Department subsequently determined it should not have been a finding, but the Department could not provide documentation supporting the reasons the findings were deleted or cleared. Further, the Department could not provide documentation that it communicated to the eligibility sites that the findings were subsequently deleted or cleared or the potential impact to the eligibility sites' corrective action plans.
  - We identified seven instances in which the Department could not provide documentation of the eligibility site's response to an assessed finding. Responses are important because they provide an explanation of the issues identified and identify how the eligibility site plans to correct the finding.
- **Inadequate recording of findings.** We compared the initial findings forms, the eligibility site's responses, and the Department's final dispositions of findings, and identified 20 instances in which the Department's eligibility site summary report showed an inaccurate number of findings or the incorrect type of finding.

### **Why did the problem occur?**

According to the Department, the issues we identified occurred due to employee turnover and employees failing to follow MEQC review procedures relating to proper documentation, recording of findings in the Department's database, and preparation of the internal summary report. Based on our review of the Department's processes and procedures, we determined that the Department has a quality control process; however, the process was not consistently performed during Fiscal Year 2013.

**Why does this problem matter?**

If the Department does not consistently perform quality control review procedures, it cannot ensure that the MEQC program is appropriately identifying and communicating issues. Further, without accurately summarized finding reports, the Department cannot demonstrate to CMS that it is performing reviews in accordance with its proposals and it cannot ensure that the eligibility sites effectively address the findings and complete consistent corrective action plans.

(CFDA No. 93.720, 93.775, 93.777, 93.778; Medicaid Cluster; Eligibility. Classification of Finding: Significant Deficiency.)

---

**Recommendation No. 2013-22:**

The Department of Health Care Policy and Financing should improve internal controls over the Medicaid Eligibility Quality Control (MEQC) process to ensure compliance with federal regulations over the Medicaid program, by:

- a. Ensuring MEQC staff adequately document and retain supporting documentation for deleted and cleared findings, as well as information provided by eligibility sites.
- b. Consistently performing a quality review process of the findings noted through the reviews and of the summary reports to ensure that summary reports are accurate prior to the communication of final results to the eligibility sites.

**Department of Health Care Policy and Financing Response:**

Agree. Implementation date: May 2014.

- a. The MEQC policy and procedure will be updated to include documenting and notifying an eligibility site when an error finding has been deleted or cleared, as well as documenting and retaining information provided by the eligibility sites.
- b. During Fiscal Year 2013, MEQC had a specific quality control policy and procedure on reviews and summary reports. MEQC will reference the quality control process mentioned in the quality

control policy and procedure in the overall MEQC policy and procedure, and require that staff consistently follow all policies and procedures.

---

## **Federal Funding Accountability and Transparency Act Reporting for the Medicaid and Children's Basic Health Plan Programs**

The Federal Funding Accountability and Transparency Act (Transparency Act) was created to empower Americans with the ability to hold the government accountable for each spending decision and, as a result, to reduce wasteful spending by the government. The Transparency Act requires that the federal government make information on federal awards available to the public via a single, searchable website ([www.USASpending.gov](http://www.USASpending.gov)). Primary grant recipients, such as the Department, are required to report information about subgrants given to other governments or to non-profit organizations.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine whether the Department has adequate internal controls in place over, and is in compliance with, Transparency Act reporting requirements for the Medicaid and CBHP programs.

### **What audit work was performed and how were results measured?**

To assess the Department's internal controls over, and compliance with, federal requirements, we inquired about the Department's procedures for preparing and submitting Transparency Act reports. We also requested to review reports the Department submitted in Fiscal Year 2013.

In accordance with federal regulations (Reporting Subaward and Executive Compensation Information, 2 C.F.R. pt. 170), a primary grant recipient is required to file a Transparency Act report each time it awards a subgrant equal to or greater than \$25,000. According to the Department, the subawards that fulfilled these criteria totaled nearly \$17.4 million in federal Medicaid funds in Fiscal Year 2013, and approximately \$185,000 in federal CBHP funds. The federal government stipulates which programs are subject to this reporting requirement. The federal Centers for Medicare and Medicaid Services first indicated in August 2011 that the Department was not required to submit Transparency Act reports for Medicaid and CBHP, but then informed the Department in October 2012 that it is required to submit Transparency Act reports for these grants.

### **What problem did the audit work identify?**

The Department did not submit the required Transparency Act reports for the Medicaid and CBHP programs in Fiscal Year 2013.

### **Why did the problem occur?**

After the Department received notification from the federal government in October 2012 that it was required to submit Transparency Act reports for the Medicaid and CBHP programs, the Department failed to develop and implement policies and procedures for staff to follow to prepare and submit the required reports.

### **Why does this problem matter?**

The goals of the Transparency Act can only be achieved if the Department submits required reports for its federal awards.

(CFDA Nos. 93.767, 93.720, 93.775, 93.777, 93.778; Children's Health Insurance Program, Medicaid Cluster; Reporting. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-23:**

The Department of Health Care Policy and Financing should develop and implement policies and procedures to prepare and submit the federally-required reports to ensure it complies with federal requirements related to Transparency Act reports for the Medicaid and the Children's Basic Health Plan programs.

### **Department of Health Care Policy and Financing Response:**

Partially Agree. Implementation date: June 2014.

The Department supports transparency and the goal of the Federal Funding Accountability and Transparency Act (Transparency Act) but is not in agreement with its federal fiscal agent, the Centers for Medicare & Medicaid Services (CMS), on the applicability of the Transparency Act to the Medicaid and Children's Basic Health Plan (CBHP) programs.

The Transparency Act required subaward reporting by the prime recipient (Department) for all "new" federal awards assigned a new Federal Award

Identification Number (FAIN) after October 1, 2010. The Department believes that the Medicaid and CBHP federal awards are not “new” awards but continuously funded federal programs. Because the Department has received conflicting direction from CMS regarding the applicability of the Transparency Act to Medicaid and CBHP, the Department will seek an informal opinion from the Attorney General’s Office. If it is determined that the Transparency Act is applicable to Medicaid and CBHP, the Department will develop and implement a process to ensure compliance with the Transparency Act’s reporting requirements.

***Auditor’s Addendum:***

***We have considered the Department’s response to this recommendation and maintain that the recommendation remains valid.***

---

## **Monitoring of Health and Safety Surveys and Certifications**

Medical providers, such as nursing facilities, intermediate care facilities for individuals with intellectual disabilities (ICF/IIDs), and hospitals providing nursing facility services, must meet minimum standards for certification by the state and/or federal government to be eligible to receive payments for services provided to either Medicare or Medicaid eligible beneficiaries. In Colorado, this responsibility is shared between the Department and the Department of Public Health and Environment (DPHE). The Department has overall responsibility for ensuring that all medical providers receiving Medicaid funding comply with regulatory health and safety standards. The Department has an interagency agreement with DPHE delegating responsibility to conduct the health and safety surveys to DPHE. DPHE is responsible for conducting health and safety inspections, or surveys, for health care entities, including nursing facilities, ICF/IIDs, and hospitals providing nursing facility services, as outlined in agreements with CMS.

DPHE conducts two types of surveys for each facility: (1) a health survey, which determines the quality of services provided to patients, and (2) a life safety survey, which determines the overall safety of environment and building. Once DPHE has completed the surveys, it provides a certification recommendation to CMS, for those facilities that provide services to individuals receiving Medicare and Medicaid benefits, and to the Department, for those facilities that provide services to only Medicaid-eligible individuals.

The Department maintains an internal database to monitor the health and safety surveys conducted by DPHE, for each facility, to ensure they are conducted within prescribed time frames. During Fiscal Year 2013, a total of 227 facilities participated in the Medicaid program.

### **What was the purpose of the audit work?**

The purpose of the audit work was to test the Department's internal controls over and determine compliance with applicable federal and State requirements for the monitoring of DPHE's health and safety surveys for nursing facilities, ICF/IIDs, and hospitals that provide nursing facility services that receive Medicaid reimbursement.

We also reviewed the Department's actions taken to implement our Fiscal Year 2011 audit recommendation related to the Department's oversight of certifications required for nursing facilities, ICF/IIDs, and hospitals that provide nursing facility services. Specifically, we recommended the Department should provide appropriate procedural training to staff responsible for monitoring facilities, ensure a supervisory review is in place that verifies staff follow the Department's procedures for monitoring facilities, and develop and implement procedures to indicate the dates the Department will input into its database and use for monitoring the required time frames for surveys conducted by DPHE. The Department agreed and stated it would implement the recommendation in July 2012.

### **What audit work was performed and how were results measured?**

During our Fiscal Year 2013 audit, we reviewed the Department's internal controls and tested a sample of 25 facilities—19 nursing facilities, five ICF/IIDs, and one hospital—to determine whether the Department was in compliance with federal regulations and its own policies and procedures for monitoring health and safety surveys conducted by DPHE. Specifically, we determined whether the Department maintained documentation to show it was monitoring that facilities have been surveyed within prescribed time frames and recommended for certification by DPHE. We also reviewed the Department's database to ensure these survey dates were maintained in the database and reviewed as required by the Department's procedures. We measured the results of our audit work against the following:

- Federal regulations (Provider Agreement: General Requirements, 42 C.F.R., pt. 442.12(a)) state a Medicaid agency (the Department) may not make Medicaid payments for nursing facility services unless the facility is certified by either CMS or the state survey agency (DPHE).

- Federal regulations and the Centers for Medicare and Medicaid Services' (CMS) State Operations Manual prescribe time frames for conducting the surveys as follows:
  - Nursing facilities must be surveyed every 15 months (Survey Frequency, 42 C.F.R., pt. 488.308).
  - ICF/IIDs must be surveyed every 15 months (Certification Period for ICF/IIDs: General Provisions, 42 C.F.R., pt. 442.109).
  - Hospitals must be surveyed every 18 to 36 months, consistent with the Joint Commission's Accreditation Guide for Critical Access Hospitals. The Joint Commission is the national accreditation organization approved by CMS to conduct certification surveys for hospitals.
  - For all facilities, the surveys' interval begins when the life safety survey has been completed, which is typically conducted after the health survey. For example, in the case of an ICF/IID facility, if the health survey is conducted on January 1, and the life and safety survey is conducted on January 15, the facility must be surveyed and recertified within 15 months, or by no later than April 15 of the following year.
- Department Policies and Procedures. The Department's procedures state the following:
  - Survey dates will be maintained in the Department's database and reviewed quarterly by Department staff to identify any facilities that DPHE has not surveyed within the required time frames. If any facility has not been surveyed within the required time frame, the Department will follow up with DPHE to verify that the surveys are underway for the facility and to determine the status of the surveys.
  - Once the certification is issued by DPHE, Department staff will sign the certification form, indicating they have reviewed it. The Department will maintain a copy of the certification form on file for each facility.

### **What problem did the audit work identify?**

Based on our Fiscal Year 2013 audit test work, we determined the Department is not consistently following its procedures to monitor survey and certification requirements under the Medicaid program and has not implemented the Fiscal Year 2011 audit recommendation. The following shows all the exceptions we noted for the facilities we sampled:

- One nursing facility exceeded the 15-month survey interval by 18 days.
- One ICF/IID facility exceeded the 15-month survey interval by 39 days. In addition, the Department database did not include evidence of staff follow-up with DPHE.
- One hospital exceeded the Joint Commission's accreditation interval of 18 to 36 months by 2 years.
- The most recent certification documentation was not provided by DPHE for three facilities; however, we were able to determine the surveys were completed through discussions with staff at DPHE and a review of DPHE's website containing survey information.
- One facility had no evidence of Department review of the certification form.
- The Department's database did not contain dates for the most current certification for 24 (96 percent) of 25 of the sampled facilities.

### **Why did the problem occur?**

The issues we identified occurred for the following reasons:

- The Department runs a database query on a quarterly basis to verify the certification status of the nursing facilities. Because this is done quarterly, the Department cannot accurately identify past due certifications on a timely basis. In addition, the Department is not using the date when both the life safety and health safety surveys are complete to calculate the survey interval. The Department is using a date on the certification form, which does not necessarily correspond to the date when both surveys are complete.
- The Department is not keeping its records current and not maintaining supporting documentation, therefore, it cannot adequately monitor the certification of the facilities. In addition, the Department is not following

up with DPHE to obtain missing documentation or when intervals are missed.

According to Department staff, the Department's current procedures, including the Department's internal database, do not provide adequate assurance that facility providers have appropriate licensure and certification in place for participation in the Medicaid program. In addition, Department staff indicated that the Medicaid Management Information System is not currently programmed to deny claims for facilities that do not have a current certification in place.

### **Why does this problem matter?**

The Department cannot ensure that Medicaid nursing facilities, ICF/IIDs, and hospitals that provide nursing facility services continue to meet required health and safety standards for providing care to Medicaid beneficiaries, which increases its risk of providing Medicaid funding to ineligible facilities.

(CFDA Nos. 93.720, 93.775, 93.777, 93.778; Medicaid Cluster; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-24:**

The Department of Health Care Policy and Financing should work with the Department of Public Health and Environment (DPHE) to improve internal controls over the monitoring of nursing facilities, intermediate care facilities for the intellectually disabled (ICF/IIDs), and hospitals that provide nursing facility services to ensure payments are only made to certified providers. This should include creating reports to monitor survey dates, maintaining accurate tracking of survey dates, keeping information and documentation current, following up with DPHE for missing documentation, and modifying the Medicaid Management Information System to deny claims for facilities without current certifications in place.

### **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: October 31, 2014.

The Department of Health Care Policy and Financing (HCPF) agrees with the Office of the State Auditor (OSA) that we are responsible for ensuring providers comply with Medicaid health and safety standards. HCPF has

delegated this authority to the Colorado Department of Public Health and Environment (CDPHE). We understand that we are obliged to oversee the work of CDPHE in the performance and integration of information into HCPF's operations to ensure payment is made to only eligible or certified providers. HCPF agrees with OSA that its current business processes are inadequate to meet either objective.

HCPF will improve its oversight of CDPHE by expanding its monitoring processes to encompass performance management, timely notification of provider decertification, and timely reporting to HCPF's Fiscal Agent. HCPF will develop and implement this business process by no later than October 31, 2014.

In 2016, the Department anticipates implementing a data exchange directly between ASPEN (CDPHE's information system) and HCPF's decision support system. The system can provide then reports which can then be utilized by HCPF's claim payment system to suspend or deny provider payments.

---

## Medical Claims Processing

The Department pays providers, including medical providers and providers of medical equipment, for claims submitted to the Department for services and equipment provided to beneficiaries determined eligible for the Medicaid program. The Department processes these claims through its Medicaid Management Information System (MMIS), which is programmed to determine whether claims are allowable for payment based on certain requirements specified in federal and state rules and regulations.

If a claim meets all applicable requirements and is deemed allowable for payment, the information from MMIS is uploaded to the Colorado Financial Reporting System (COFRS), the State's accounting system, for payment to the provider.

### What was the purpose of the audit work?

The purpose of the audit work was to review the Department's progress in implementing our Fiscal Year 2011 audit recommendation related to payments of claims for services and equipment for Medicaid clients. We recommended that the Department improve controls over the processing of medical claims by (a) seeking approval from the State Medical Board on state rules to establish a pricing method for equipment repairs; (b) modifying the State Plan and Department rules as necessary, to include the exemptions from the lower-of-

pricing requirement and submitting the State Plan modifications to the federal government for approval; and (c) denying claims that are not in accordance with state regulations on timely filing requirements and providing guidance when claims extend beyond timely filing deadlines. The Department agreed with all parts of this recommendation.

As part of our Fiscal Year 2011 audit and in response to the recommendation, the Department stated that it would (a) propose state rule changes to the Medical Services Board because it determined changes to the State Plan were not necessary; (b) complete an analysis of claims coding to determine which codes should continue to be exempted from the lower-of-pricing logic and continue discussions with the federal Centers for Medicare and Medicaid Services (CMS) regarding any changes to the State Plan; and (c) continue to research the claim identified in the 2011 recommendation, clarify provider guidance regarding timely filing of claims, and deny claims not made in accordance with this guidance.

During our Fiscal Year 2012 audit, the Department implemented part (a) of the recommendation by obtaining approval from the State Medical Board for changes to state rules to establish a pricing method for equipment repairs. The remaining parts of the 2011 recommendation remained outstanding as of the end of our Fiscal Year 2012 audit.

### **What audit work was performed and how were results measured?**

As part of our Fiscal Year 2013 audit, we interviewed Department staff and obtained supporting documentation to determine whether the remaining parts of the Fiscal Year 2011 recommendation had been implemented. We measured our testing against the following federal and state regulations:

- For claims for medical equipment repairs, states are required by federal regulations (State Plan Requirements, Section 447.201(b), 42 C.F.R.) to describe in their State Plans “the policy and the methods to be used for setting payment rates for each type of service included in the State’s Medicaid program.”
- When claims are submitted for individuals who are eligible for both Medicare and Medicaid services, Medicaid will pay for claims for medical services using a “lower of pricing” methodology. The Department’s State Plan specifies that a Medicaid claim for an individual who is eligible for both Medicare and Medicaid shall be paid the lower of two calculations: (1) the Medicaid rate minus the Medicare payment, which should be paid before Medicaid claims are processed, or (2) the sum of the Medicare co-insurance and deductible.

- Federal regulations (Timely Claims Payments, 42 C.F.R, pt. 447.45(d)) state that the Department must require all Medicaid providers to submit claims to the Department no later than 12 months from the date of service. Department rules (Timely Filing Requirements, Section 8.043.01 and .02(A), 10 C.C.R., 2505-10) require providers to submit all claims for payment to the Department within 120 days of the date of service, or, if delayed by third-party insurers, within 365 days of the date of service. Providers submitting claims delayed by third-party insurers must complete the appropriate third-party sections of the claim form and attach a copy of the third-party payment voucher or letter of denial.

### **What problem did the audit work identify?**

We determined that the Department has not fully implemented parts (b) and (c) of the Fiscal Year 2011 recommendation. Specifically, while the Department completed research on the claim identified in the 2011 recommendation, the Department has not completed an analysis of claims coding in order to determine which codes should continue to be exempt from the lower of pricing logic, and has not completed discussions with CMS to determine whether changes are necessary to the State Plan, in relation to the lower-of-pricing logic. In addition, for those claims that are delayed by third-party insurers, the Department is not denying claims older than 365 days from the date of service as required by federal regulations and Department rules. Although the Department did update provider guidance regarding timely filing, the updates do not appear to agree with Department rules. As stated above, providers must attach a copy of the third-party payment voucher or letter of denial. However, updates made to the Department's General Provider Information and Requirements manual do not specify the attachment of payment or denial of the third-party insurer is required.

### **Why did the problem occur?**

The Department reported that it has halted any further work on implementing the lower-of-pricing logic because it is awaiting the results of a federal Office of Inspector General's report involving claims for Medicare and Medicaid dual-eligible individuals. Further, the Department determined that programming changes to MMIS, as well as process changes, would not be pursued because of the upcoming replacement of MMIS in 2016.

### **Why does this problem matter?**

The Department is responsible for having adequate controls in place over medical claims processing to ensure that claims are paid in accordance with the federally approved State Plan, federal regulations, and Department rules. Payments that are

not made in accordance with these requirements could be subject to federal disallowances and recoveries from the State.

(CFDA Nos. 93.720, 93.775, 93.777, 93.778; Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-25:**

The Department of Health Care Policy and Financing (Department) should improve controls over the processing of medical claims for the Medicaid program by:

- a. Leveraging the results of the federal Office of Inspector General's report to complete its research of claims coding as it applies to the lower-of-pricing logic and work with the federal Centers for Medicare and Medicaid Services to determine whether changes are needed to the State Plan.
- b. Ensuring that claims delayed by third-party insurers are denied if the claim is submitted beyond 365 days from the date of service and ensuring guidance to providers accurately reflects requirements of Department rules. In addition, ensuring the new Medicaid Management Information System is programmed to deny payments delayed by third-part insurers if a claim is submitted beyond 365 days from the date of service.

### **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: December 31, 2014.

- a. The Department does agree to work with the federal Centers for Medicare & Medicaid Services (CMS) to determine whether changes are needed to the State Plan based on the results of the federal Office of Inspector General's (OIG) report as it applies to the lower-of-pricing logic for Medicare cross-over claims. However, the Department is in disagreement related to issues identified by the OIG, and therefore, will not make any changes to the State Plan unless required by CMS. The Department does agree that the pricing logic in the MMIS for Medicare cross-over claims identified in the OIG audit report should be reviewed to verify that coinsurance and deductible amounts are being paid when these types of claims cannot not be

directly priced using the Medicaid pricing logic since the Medicare pricing logic is substantially different.

- b. The Department will review the federal regulations, state regulations, and the Department's provider publications related to this finding and then issue any necessary changes to state regulations and provider publications to clarify the Department's policy. Through the clarification, the Department intends to make the submission of the claims that have been denied by third-party insurers pay properly within federal regulations, while minimizing the need for providers to submit claims on paper. Further, during the requirement sessions for the new Medicaid Management Information System, the Department will include requirements related to this recommendation to enforce the federal and state regulations.

---

## Reclassification of Payments

The Department is responsible for ensuring that CBHP and Medicaid benefit payments are made to providers only for services provided during periods when individuals are eligible for the programs. Individuals can only receive medical assistance through one of these programs; they cannot be eligible for both Medicaid and CBHP at the same time. Specifically, federal and state regulations (Eligibility Screening and Facilitation of Medicaid Enrollment, 42 C.F.R., pt. 457.350, and Section 120.1B, 10 C.C.R., 2505-3, respectively) require that individuals who are eligible for Medicaid must receive medical benefits through the Medicaid program rather than CBHP. Federal regulations (Conditions Relating to Cost Sharing, 42 C.F.R., pts. 447.59 and 457.224) also state that federal funding is not available when the Department pays providers for services on behalf of individuals who are not eligible for the programs, which applies to individuals who should have been on one program rather than the other.

Payments made on behalf of CBHP-eligible individuals are made to providers in the form of monthly contracted amounts, called "capitation payments," while payments on behalf of Medicaid-eligible individuals are made on a fee-for-service basis. Differences between these payment methodologies can result in the Department paying different fee amounts for the same type of service, depending on which program the beneficiary is enrolled in, which makes the recovery and reclassification of payments between the two programs complicated.

**What was the purpose of the audit work?**

The purpose of the audit work was to review the Department's progress in implementing our Fiscal Year 2012 audit recommendation related to the classification of CBHP and Medicaid expenditures. We identified, in prior audits, that the Department had charged payments to the incorrect medical assistance program. We specifically recommended that the Department should seek guidance from the federal oversight agency CMS, regarding the appropriate manner for reclassifying payments between the CBHP and Medicaid programs. Additionally, we recommended that the Department should develop and implement policies and procedures based on the federal guidance received.

**What audit work was performed and how were results measured?**

In its response to our Fiscal Year 2012 recommendation, the Department partially agreed with the recommendation. It agreed to consult with CMS, but indicated that, for a number of reasons, it did not intend to reclassify expenditures between CBHP and Medicaid. However, the Department indicated that its position might change based on its discussion with CMS.

During our Fiscal Year 2013 audit, we interviewed Department staff and obtained supporting documentation to determine whether the Department had contacted CMS and, if so, to find out about the outcome of those discussions and any actions taken by the Department as a result.

**What problem did the audit work identify?**

While we did not identify any instances of Medicaid or CBHP payments made to the incorrect program during our Fiscal Year 2013 audit, we found that the Department has not completed discussions with CMS regarding reclassification of expenditures. Therefore, the Department has not developed and implemented policies and procedures for reclassifying expenditures between the Medicaid and CBHP programs. The Department contacted CMS in September 2012, and CMS responded with specific questions for the Department to answer. As of our testwork in September 2013, a year later, the Department still had not responded to CMS' questions.

**Why did the problem occur?**

Department officials reported that the Department started addressing CMS' questions, but did not complete final responses during Fiscal Year 2013.

### **Why does this problem matter?**

The Department is responsible for correctly classifying provider payments for the CBHP and Medicaid programs and correctly reporting them to CMS. Furthermore, Department expenditures for provider payments under both programs are partially reimbursed by the federal government, but the federal reimbursement rates for the two programs are different. If the Department does not appropriately classify and report the payments made under each program, it could result in the State using more state funds than necessary to fund these expenditures.

(CFDA Nos. 93.767, 93.720, 93.775, 93.777, 93.778; Children's Health Insurance Program, Medicaid Cluster; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Reporting. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-26:**

The Department of Health Care Policy and Financing (Department) should continue working with the federal Centers for Medicare and Medicaid Services regarding the appropriate manner for reclassifying payments between the Children's Basic Health Plan and Medicaid programs. The Department should then develop and implement applicable policies and procedures based on the federal guidance received.

### **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: Within 6 months of receiving CMS guidance.

The Department continues to work with the federal Centers for Medicare & Medicaid Services (CMS) on determining an appropriate process for reclassifying payments between the Children's Basis Health Plan and Medicaid programs. The Department has responded to the original questions from CMS and is waiting for further guidance. Once guidance is provided by CMS, the Department will develop and implement policies and procedures that are applicable when payments are required to be reclassified between the Children's Basic Health Plan and Medicaid programs.

---

## **Personnel Costs for Federal Grant Programs**

The federal Office of Management and Budget's *Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments (Circular A-87)* establishes principles and standards for determining state, local, and Indian Tribal government costs, as applicable, for federal awards carried out through grants, cost reimbursement contracts, and other agreements. The Department is required to meet the criteria established by *Circular A-87* in determining the Department's federally-reimbursable costs, including personnel costs, for the federal programs it administers.

### **What was the purpose of the audit work?**

The purpose of the audit work was to assess the Department's controls over personnel costs associated with its administration of federal grants and compliance with the federal requirements for payroll expenditures under *Circular A-87*.

Additionally, we reviewed the Department's progress in implementing our Fiscal Year 2012 audit recommendation to develop procedures for this area and comply with the related federal requirements. As a result of our Fiscal Year 2012 audit, we recommended that the Department develop and implement procedures to ensure that personnel costs charged to federal grant programs are supported with adequate documentation. Specifically, these procedures should include requirements to maintain required certifications for employees who work on one federal program, and personnel activity reports, quarterly comparisons between estimated and actual budgets, or other equivalent documentation for employees who work on multiple programs.

### **What audit work was performed and how were results measured?**

We inquired whether procedures for charging personnel costs to federal grants were in place during Fiscal Year 2013 for the two largest federal programs it administers: Medicaid Cluster (CFDA Nos. 93.775, 93.777, 93.778, and 93.720) and Children's Basic Health Plan (CFDA No. 93.767).

We also sought to determine if the personnel costs charged to federal grant programs in Fiscal Year 2013 were supported with adequate documentation.

*Circular A-87* requires that, for employees who work on multiple federal grant programs, a distribution of the employee's salaries or wages should be supported by at least monthly personnel activity reports or equivalent documentation of actual time spent on the individual grant programs. *Circular A-87* also allows for

budget estimates or other distribution percentages determined before the services are performed to be used for interim accounting purposes. These amounts must be based on reasonable estimates, costs charged must be adjusted to actual activity at least quarterly, and estimates must be revised to reflect changed circumstances.

For employees who are expected to work solely on a single federal grant program, charges for those employees' salaries and wages should be supported by at least semiannual certifications signed by each of those employees stating that the employees worked solely on that program for the period covered by the certification.

### **What problem did the audit work identify?**

We found that, for its employees assigned to work solely on either Medicaid or CBHP, the Department did not develop and implement procedures to require at least semiannual certifications of actual employee time spent on the two programs, and staff did not complete such certifications in Fiscal Year 2013.

During Fiscal Year 2013, the Department reassigned all staff who had previously worked on both Medicaid and CBHP to work on solely one program, so the Department was no longer required to meet federal requirements related to staff working on multiple federal programs during the year.

We did not note questioned costs for the employees who failed to complete semiannual certifications during the year because it is likely that each employee only worked on the one grant program to which he or she was assigned.

### **Why did the problem occur?**

The Department does not have procedures in place to ensure that federally required certifications are maintained to support personnel costs charged to federal grant programs.

### **Why does this problem matter?**

Lack of adequate internal controls over the charging of personnel costs to federal grants increases the risk that the Department is not in compliance with federal grant requirements, which could result in potential federal sanctions.

(CFDA Nos. 93.767, 93.720, 93.775, 93.777, 93.778; Children's Health Insurance Program, Medicaid Cluster; Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

---

**Recommendation No. 2013-27:**

The Department of Health Care Policy and Financing (Department) should develop and implement procedures to ensure that personnel costs charged to federal grant programs are supported with the federally required certifications.

**Department of Health Care Policy and Financing  
Response:**

Agree. Implementation date: June 2014.

The Department will coordinate with its federal partner, the Centers for Medicare & Medicaid Services (CMS), to create a certification form that complies with the requirements set forth in OMB *Circular A-87*. In addition, the Department will create and implement procedures which require Department staff to complete semi-annual certifications for all federal programs that it administers.

---

**Medicaid Management Information System**

MMIS is the primary data system used by the Department to process claims and payments related to Medicaid and CBHP programs. MMIS is owned by the Department but is managed and operated by the Department's fiscal agent, Xerox State Healthcare (Xerox). In Fiscal Year 2013, the Department processed approximately 39 million claims, totaling \$4.3 billion, through MMIS. Because the information stored in MMIS is of a critical and sensitive nature, access to that information must be protected and limited.

**What was the purpose of the audit work?**

The purpose of our audit work was to test the Department's internal controls over compliance with state information security policies and industry best practices to effectively manage access to the MMIS application. Our audit work sought to determine the implementation status of our Fiscal Year 2009 recommendations related to controls over MMIS. The work performed in Fiscal Year 2008 and Fiscal Year 2009 was designed to determine whether the information technology (IT) control activities related to MMIS, individually or in combination with others, were properly designed, in place, and operating effectively to prevent, or detect and correct, material misstatements in financial transactions, account balances, or disclosures relevant to the Department's claims processing, provider

payments, and other reporting activities. In Fiscal Year 2008 and Fiscal Year 2009, we recommended that the Department implement adequate IT controls for MMIS related to logical access management. The Department agreed to implement the prior year recommendation, which contained five subparts.

### **What audit work was performed?**

The audit work included interviewing Department staff to determine progress made by the Department during Fiscal Year 2013 to implement the outstanding recommendation.

### **What problems did the audit work identify and what do standards require?**

Overall, we found that the Department has implemented two of the five subparts of our Fiscal Year 2009 recommendation, but has failed to implement the three subparts related to logical access controls. We identified the following specific problems related to access management. The following sections detail the specific problems that continue to exist related to access management and the related Colorado Information Security Policy (CISP) or industry best practice that applies (in italics):

- The Department did not identify and evaluate whether MMIS user access profiles, or combination of profiles, are appropriate for different system users. *Agencies are required to have role based access, and to clearly list such role-based access on the Access Request Forms used by management to grant access to systems, (P-CISP-008).*
- Department IT staff did not tightly control MMIS access profiles providing users with escalated system privileges. While Department management have approved these user access privileges, they pose segregation of duties conflicts, which are not being actively monitored by Department staff. *Agencies are required to adhere to the “least privilege” doctrine which requires that users have the least privilege necessary to perform their job duties and responsibilities, (P-CISP-007).*
- The Department does not have a mechanism in place to verify MMIS user access on a periodic basis, as required by State Information Security Policies. This is problematic because it means that terminated users may still have active accounts within the MMIS system. *Agencies are required to develop procedures that ensure lists of terminated users are reconciled with system user accounts, (P-CISP-008).*

### **Why did the problem occur?**

As with our finding in our Fiscal Year 2009 audit, we found that the Department had not prioritized the identified issues or taken the necessary corrective actions to address them. The Department has reported that these issues are being incorporated into a high priority and broader LEAN project to improve the administration of user access for all critical Department systems based on Department job descriptions. To date, the Department has several proposals to implement a process to monitor access to critical Department IT systems, but it has not yet implemented any of the proposals.

### **Why does this problem matter?**

In combination, these deficiencies increase the risk of system compromise and threaten the confidentiality and integrity of data within the MMIS system.

(CFDA Nos 93.767, 93.720, 93.775, 93.777, 93.778; Children's Health Insurance Program, Medicaid Cluster; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-28:**

The Department of Health Care Policy and Financing should improve Medicaid Management Information Systems (MMIS) user access controls by immediately correcting the issues identified through our audit and strengthening access controls to MMIS by:

- a. Evaluating MMIS user access profiles and identifying those profiles, or combinations of profiles, that are appropriate for different system users. This information should be shared with the supervisors of MMIS users.
- b. Ensuring that profiles or profile combinations that provide escalated system privileges are identified and tightly controlled, including the establishment of compensating controls.
- c. Periodically reviewing MMIS user access levels for appropriateness and promptly removing access for terminated users.

## **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: December 2014.

- a. The Department agrees that client and provider information in the MMIS must be protected and appropriate access by Department staff must follow proper controls. It should be noted that Department staff access to the MMIS does not provide the ability for staff to update client information, submit claims, or authorize payment to a provider. The Department staff utilize the MMIS for the retrieval of information on clients, providers, and claims and general access to the system is read-only. The ability to update information in the MMIS is very limited, such as manually enrolling clients into a Managed Care Organization, and is limited to particular staff based on their job function. All access to the MMIS is authorized through proper security controls and Department's Information Security Unit verifies user roles and provides access to the MMIS through a formal request process. At this time, user specific profiles to provide role-based access are not clearly defined and documented. The Department has initiated a LEAN initiative that will define user profiles and will assign the appropriate user profile through the Department's official Position Description Questionnaire (PDQ) that is required for all positions.
- b. New user access, changes to user access, and escalated system privileges to the MMIS are documented and verified through the Department's Information Security Unit. The Department has initiated a LEAN initiative that will define user profiles and will assign the appropriate user profile (including escalated system privileges) through the Department's official Position Description Questionnaire (PDQ) that is required for all positions. Through the LEAN initiative, if a user's access needs to be modified, the appropriate supervisor will need to approve that change through a modification to the PDQ.
- c. The Department has initiated a LEAN initiative that will define user profiles and will assign the appropriate user profile through the Department's official Position Description Questionnaire (PDQ) that is required for all positions. Through the LEAN initiative, if a user's access needs to be terminated or modified, the appropriate supervisor will need to approve that change through a modification to the PDQ. The Department will request that the

appropriate supervisor review periodically (at least annually) that user access to the MMIS is specified correctly in the PDQ during the employee's performance evaluation. Further, Department staff access to the MMIS is only available through an authorized Department LAN access, as access is not web-based. Therefore, when staff are no longer employees of the Department, their MMIS user access is disabled as well as their LAN access, which would prevent access to the MMIS.

---

During Fiscal Year 2013, the Office of the State Auditor conducted audit work that resulted in findings and recommendations addressed separately and jointly to the Department of Health Care Policy and Financing and the Department of Human Services for the *Regional Centers for People with Developmental Disabilities* (November 2013) audit. The findings and recommendations made separately to the Department of Health Care Policy and Financing are presented below. Findings and recommendations made jointly to the two departments are included in the Department of Human Services' Federal Awards Findings chapter starting on page III-255.

## **Regional Centers for People with Developmental Disabilities**

### **Reimbursement Rates for ICF/IID Facilities**

The regional centers receive most of their funding from Medicaid through fee-for-service reimbursements. The regional centers receive reimbursements from HCPF, which administers the State's Medicaid program, differently depending on whether the services were provided by the regional centers' Home and Community-based Services for Persons with Developmental Disabilities (HCBS-DD) waiver-funded group homes or by ICF/IID-licensed facilities. Services provided under the HCBS-DD waiver are reimbursed based on per-unit rates for each type of service provided. All services provided by ICF/IID-licensed facilities are reimbursed using a flat daily rate, which statute says should cover the actual cost of the services provided by these facilities [Section 25.5-6-204(1)(b), C.R.S.]. Clients also contribute a portion of their personal income, if they have any, to cover the cost of care.

HCPF reimburses the regional centers on a monthly basis for services provided in ICF/IID-licensed facilities using *prospective* daily rates that are requested by the Department. Typically, the prospective rate that is effective for a regional center at the beginning of the fiscal year is the same rate that was in effect during the

prior fiscal year. As the fiscal year progresses, the Department typically requests that HCPF update the prospective rate. The Department reported that it considers average daily costs from the prior fiscal year, anticipated programmatic changes, and legislative changes when making these rate-change requests. For example, for Fiscal Year 2013, the prospective rates for both Grand Junction and Wheat Ridge were initially set in March 2012 and then changed twice during the fiscal year, first in October 2012 and again in April 2013. After HCPF approves the Department's rate-change request, HCPF adjusts all the reimbursements that were made during the current fiscal year to reflect the new rate.

Once the fiscal year comes to a close and the actual regional center costs are tabulated, a final *retrospective* rate is determined. HCPF contracts with an accounting firm annually to calculate the actual average daily cost for serving clients under the ICF/IID license at the Wheat Ridge and Grand Junction Regional Centers for the purpose of identifying the retrospective reimbursement rate that should be applied to cover actual costs. The accounting firm calculates this average daily cost using Medicaid cost reports that the regional centers submit to HCPF following the close of the fiscal year. Once the accounting firm performs its calculation, the Department reviews the calculation and submits a rate-change request to HCPF for an adjustment to the reimbursements that occurred during the prior fiscal year.

### **What audit work was performed and what was the purpose?**

The purpose of our analysis was to determine whether the reimbursement rates that the Department requested from HCPF for its two ICF/IID-licensed regional centers, Grand Junction and Wheat Ridge, were sufficient to cover the actual costs of operating those regional centers.

We compared the total revenue that Grand Junction and Wheat Ridge received during Fiscal Years 2008 through 2012 for their ICF/IID facilities to the total costs these regional centers reported to HCPF on Medicaid cost reports for the same years to determine how closely the Medicaid reimbursement rates produced revenue to cover actual costs at the regional centers. We also reviewed the final retrospective reimbursement rates that HCPF applied to Grand Junction and Wheat Ridge's billings for Fiscal Years 2003 through 2012 to determine whether they were the same as the rates that HCPF's contracted accounting firm calculated on the basis of the regional centers' Medicaid cost reports. We interviewed Department staff and reviewed Department documents to ascertain the methods the Department used to calculate both retrospective and prospective reimbursement rates that it requested from HCPF for reimbursements made in Fiscal Years 2010 through 2012. We also interviewed HCPF management to determine its processes for reviewing and approving the rate requests that the Department submits.

## How were the results of the audit work measured?

We measured the results of our audit work against the following criteria:

**Statute requires that Medicaid reimbursements to the regional centers licensed as ICF/IIDs be based on actual costs.** Section 25.5-6-204(1)(b), C.R.S., states that “State-operated [ICF/IIDs] shall be reimbursed based on the actual costs of administration, property, including capital-related assets, and room and board, and the actual costs of providing health care services....” The statute goes on to state that “such costs shall be projected by such facilities and submitted to [HCPF] by July 1 of each year for the ensuing 12-month period. Reimbursement to State-operated [ICF/IIDs] shall be adjusted retrospectively at the close of each 12-month period.”

**HCPF rules specify the retrospective rate must be based on Medicaid-allowable costs and the total resident days.** HCPF rules (10 C.C.R. 2505-10, 8.443.16) echo the statutory language that the reimbursements will be based on the actual costs of administration, property, including capital-related assets, and room and board, and the actual costs of providing health care services. The rules go on to state that “actual costs will be determined on the basis of information on the [Medicaid cost report] and information obtained by [HCPF] or its designee for the purpose of cost auditing... The retrospective per diem rate will be calculated as total allowable costs divided by total resident days.”

Because statute requires the regional centers to be reimbursed based on actual costs for ICF/IID services, we expect the Department to calculate prospective rates and prospective rate changes based on current, comprehensive information about actual costs. Similarly, we expect the Department to request and HCPF to approve retrospective rates that closely align with the actual average daily cost per client calculated by the contracted accounting firm, because the contractor’s rates are supposed to be calculated on the basis of the regional centers’ actual costs, in accordance with state statute and rule. We would also expect that, once HCPF pays the regional centers the retrospective reimbursements, the total revenue that the regional centers receive would roughly equal their total expenses.

## What problem did the audit work identify?

We found the ICF/IID-licensed regional centers were not fully reimbursed for their actual costs in some years between Fiscal Years 2010 and 2012. Specifically, Grand Junction was not reimbursed for its actual ICF/IID costs for Fiscal Years 2011 and 2012, and Wheat Ridge was not reimbursed for its actual costs in Fiscal Year 2010. The following table compares the total revenue that the two ICF/IID-

licensed regional centers received from Medicaid and clients in Fiscal Years 2008 through 2012 to the actual costs that the regional centers reported to HCPF.

<b>Total Revenues Compared to Medicaid-Reimbursable Expenses (In Millions) for the Grand Junction and Wheat Ridge ICF/IID-Licensed Regional Centers Fiscal Years 2008 Through 2012</b>					
<b>Grand Junction ICF/IID</b>

<sup>2</sup> Includes \$587,135 for the Fiscal Year 2012 Provider Fee that Grand Junction paid in Fiscal Year 2013.					
<sup>3</sup> Includes \$1,279,475 for the Fiscal Year 2012 Provider Fee that Wheat Ridge paid in Fiscal Year 2013.					

As shown in the table above (blue highlight), during Fiscal Year 2011, Grand Junction received about \$3.9 million less than it needed to cover actual Medicaid-reimbursable costs for its ICF/IID-licensed facilities. More importantly, after receiving a \$2.03 million retrospective adjustment in the next fiscal year, Grand Junction's total revenues for Fiscal Year 2011 services were still short of actual costs by about \$1.87 million (yellow highlight), or 15 percent. Similarly, during Fiscal Year 2012, Grand Junction received about \$2.76 million less than it needed to cover actual costs. Then, after receiving a \$1.5 million retrospective adjustment in the following fiscal year, Grand Junction's total revenues for Fiscal Year 2012 services were still short of actual costs by about \$1.26 million, or 10 percent. Further, the Wheat Ridge regional center received less revenue during Fiscal Year 2010 than actual Medicaid-reimbursable costs by about \$1.81 million, or 12

percent. Wheat Ridge did not receive a retrospective adjustment in Fiscal Year 2011 to cover this shortfall.

Historically, the Department has used revenue surpluses at one regional center to cover deficits at another, because the appropriation for the regional centers in the annual appropriations bill, or Long Bill, was not broken out by each regional center. For example, in Fiscal Year 2012, Pueblo had a revenue surplus of more than \$2 million, which helped cover Grand Junction's deficit.

### **Why did the problem occur?**

Medicaid did not reimburse Grand Junction's ICF/IID-licensed facilities for actual Medicaid-reimbursable costs in Fiscal Years 2011 and 2012 or Wheat Ridge for its actual costs in Fiscal Year 2010 because the revised prospective reimbursement rates and the retrospective reimbursement rates requested by the Department and approved by HCPF were not determined based on current, accurate, actual cost information as discussed below.

### **Revised Prospective Rates Not Based on Accurate Projections of Current-Year Costs**

We examined the revised prospective rates that HCPF applied for Wheat Ridge in Fiscal Year 2010 and for Grand Junction in Fiscal Years 2011 and 2012 and found that they were not based on accurate projections of current-year costs. In each of these years, HCPF changed the prospective rates after receiving reports of the regional centers' average daily costs per client for the prior fiscal year from its contracted accounting firm. Two of the rate changes were made following requests from the Department, and all three were made between January and May when the Department had access to actual cost data for at least the first 6 months of the fiscal year. However, we identified the following problems with the rate changes:

- **Inaccurate projection of current-year costs.** Wheat Ridge's final prospective rate in Fiscal Year 2010 was based on an inaccurate projection of current-year costs. On May 25, 2010, the Department requested a revised prospective daily reimbursement rate of \$618 for Wheat Ridge based on projected Medicaid-reimbursable costs for the year of about \$11,434,000 and 18,500 total resident days. The Department could not provide us with documentation showing how the total reimbursable costs were calculated or what the actual costs were at the time it requested this revised rate. However, Wheat Ridge's actual costs for Fiscal Year 2010, as reported in its Medicaid cost report following the fiscal year end, were about \$14,818,000, or about 30 percent more than the Department had

projected, and its total resident days were 21,066, or about 14 percent more than the Department had projected.

- **No projection of current-year costs.** Grand Junction's final prospective rate in Fiscal Year 2011 was not based on a projection or analysis of current-year costs but rather was a simple continuation of the retrospective rate for the prior year. After receiving a report of Grand Junction's average daily cost per client for Fiscal Year 2010 from its contracted accounting firm in January 2011, HCPF applied the same rate of \$639.95 both retrospectively for Fiscal Year 2010 and prospectively for Fiscal Year 2011. The Department did not request any adjustments to the prospective rate to ensure that it was sufficient to cover current-year costs. By simply carrying forward the prior retrospective rate, the Department missed an opportunity to adjust the prospective rate to reflect recent changes to Grand Junction's operations. For example, in April 2010, Grand Junction closed a skilled nursing facility unit, which reduced its total ICF/IID capacity by 32 beds. This change was not reflected in the revised prospective rate that HCPF applied for Fiscal Year 2011.
- **Aggregating costs for all regional centers in the current-year projection.** Grand Junction's final prospective rate in Fiscal Year 2012 was based not on a projection of Grand Junction's costs, but rather on a projection of costs and revenue for all three regional centers combined. On March 23, 2012, the Department requested that HCPF apply a revised prospective rate of \$685.50 for Grand Junction for Fiscal Year 2012. Department documents we reviewed showed that this rate was calculated using a method designed to ensure that the aggregated revenue received by all three regional centers during Fiscal Year 2012—inclusive of HCBS-DD waiver revenue—would approximately equal their combined projected costs. While this method attempted to balance overall revenues to costs for the three regional centers, it did not ensure that each *individual* regional center would be reimbursed for its actual costs.

### **Retrospective Rates Not Based on Actual Costs**

If the regional centers receive insufficient revenue throughout the fiscal year to cover actual costs, then statute requires HCPF to apply a retrospective adjustment in the following fiscal year to close the gap. This process involves reversing each of the reimbursement claims that were paid to the regional centers and paying them again at the new retrospective rate. The following table compares the final retrospective ICF/IID reimbursement rates that HCPF applied, at the Department's request, for Grand Junction and Wheat Ridge for Fiscal Years 2008 through 2012 with the actual daily per-client costs calculated by the accounting firm.

<b>Average Daily Costs per ICF/IID Regional Center Client Compared to Final Retrospective Medicaid Reimbursement Rates Fiscal Years 2008 Through 2012</b>					
<b>Grand Junction ICF/IID</b>					
	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Final Retrospective Reimbursement Rate Applied in Subsequent Fiscal Year	\$606.12	\$603.48	\$639.95	\$787.27	\$792.81
Average Daily Cost per Client Calculated by Accounting Firm	606.12	603.48	639.95	920.96	836.91
<b>Difference</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>-\$133.69</b>	<b>-\$44.10</b>
<b>Wheat Ridge ICF/IID</b>					
	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Final Retrospective Reimbursement Rate Applied in Subsequent Fiscal Year	\$512.74	\$642.67	\$640.00	\$603.51	\$606.13
Average Daily Cost per Client Calculated by Accounting Firm	512.74	642.67	703.41	603.52	572.37
<b>Difference</b>	<b>\$0</b>	<b>\$0</b>	<b>-\$63.41</b>	<b>-\$0.01</b>	<b>\$33.76</b>
<b>Source:</b> Office of the State Auditor's analysis of documents and data provided by the Department of Health Care Policy and Financing.					

As shown in the table above (yellow highlights), for Grand Junction, the Department requested and received retrospective reimbursement rates for Fiscal Years 2011 and 2012 that were lower than the cost-based rates calculated by the contracted accounting firm. For Wheat Ridge, the Department requested and received a rate for Fiscal Year 2010 that was similarly lower than the rate calculated by the contracted accounting firm. These are the same years for which we found that the respective regional centers did not receive sufficient revenue to cover their actual costs. Additionally, as shown in the blue-highlighted box, for Fiscal Year 2012, the Department requested and received a rate for Wheat Ridge that was higher than the accounting firm's cost-based rate. The Department reports that it requested this higher rate for Wheat Ridge to cover a provider fee for Fiscal Year 2012 that was not included in the accounting firm's calculation because it was not paid until the following fiscal year.

The table above also shows significant fluctuations in the per-client cost of care at each regional center that are due, in part, to operational and licensing changes. For example, a partial reason Grand Junction's per-client costs in Fiscal Year 2011 increased compared with the prior year is that the number of clients residing at

Grand Junction decreased more rapidly than overall costs when Grand Junction closed its skilled nursing facility unit in April 2010. Also, Wheat Ridge's per-client costs changed significantly between Fiscal Years 2009 and 2010 partly because it converted 10 of its 14 waiver-funded homes to ICF/IID facilities during Fiscal Year 2010; the remaining four homes were converted on the first day of Fiscal Year 2011.

We identified two main reasons for the Department not requesting retrospective reimbursement rates to match regional center costs. First, the Department was pursuing the following priorities in its rate requests that conflicted with the purpose of covering costs:

- **Help HCPF avoid overspending its regional center appropriation.** In May 2011, the Department requested a low retrospective reimbursement rate of \$640 for Wheat Ridge for Fiscal Year 2010 to protect HCPF against overspending its regional center appropriation for Fiscal Year 2011. According to the Department, it did not believe it needed the additional revenue from such an adjustment during the then-current fiscal year to pay current-year expenses, and so it requested a lower retrospective reimbursement rate for Wheat Ridge. However, it is not clear that HCPF would have overspent its appropriation, since HCPF ultimately reverted more than \$741,000 that was budgeted for the regional centers in Fiscal Year 2011.
- **Keep reimbursement rates low.** Grand Junction's daily cost per client of \$920.96 for Fiscal Year 2011 represented an increase of about 44 percent over the prior year. Rather than requesting the full Medicaid reimbursement rate it needed to cover Grand Junction's costs for that year, the Department limited the retrospective rate it requested for Grand Junction to \$787.27, or an increase of 23 percent over the prior year rather than the 44 percent increase it needed to cover costs. The Department calculated this new rate by determining the amount of increase that could be offset by a corresponding reduction in Wheat Ridge's rate, which occurred because Wheat Ridge's daily cost per client had declined between Fiscal Years 2010 and 2011. We recognize that the Department has an interest in keeping the daily costs of care to a minimum. However, artificially capping the retrospective rate so that it does not cover the prior year's actual costs will not result in a lowering of costs—either for the prior year or for the current year.
- **Avoid major shifts in annual revenue totals.** In April 2013, the Department requested that HCPF apply a retrospective reimbursement rate of \$792.81 for Grand Junction for Fiscal Year 2012. Department staff reported that this rate was calculated to ensure that Grand Junction would

receive about the same amount of revenue during the then-current fiscal year as it received during the prior year, inclusive of retrospective rate adjustments. However, our analysis shows that prior-year revenue is not an accurate benchmark of actual costs in either the prior year or the current year.

Second, we found errors in the Department's calculations for the retrospective rates it requested in April 2013 for Fiscal Year 2012. Specifically, during Fiscal Year 2013, the Department determined that it would need to request higher retrospective rates for Fiscal Year 2012 reimbursements to secure enough revenue to cover a reinstated provider fee that the regional centers would have to pay HCPF. This provider fee had been suspended during Fiscal Year 2012. Department staff reported that they calculated the retrospective rates for both Wheat Ridge and Grand Junction for Fiscal Year 2012 so as to provide additional revenue in Fiscal Year 2013 to cover the \$3.7 million in provider fees that the Department needed to pay to HCPF. However, we found no indication that the Department included the provider fee in the rate it requested for Grand Junction. For Wheat Ridge's Fiscal Year 2012 rate, we found the Department included the provider fee but did not calculate the amount it needed to cover the provider fee on the basis of the number of resident days it reported for Fiscal Year 2012. As a result, we estimated that the reimbursement rate the Department requested was about \$0.60 per client per day more than what was needed to cover the amount that HCPF charged for Wheat Ridge's provider fee for Fiscal Year 2012 and therefore generated about \$27,000 more revenue than was needed to pay the provider fee.

In addition to the problems related to the Department's rate requests, we found a problem in the data the regional centers reported in their Medicaid cost reports, which HCPF's contracted accounting firm relies on to calculate the average daily costs per client for the ICF/IID facilities. According to Department staff, the rate that HCPF's contracted accounting firm calculated to reflect Wheat Ridge's average daily cost per client for Fiscal Year 2012 was incorrect because Wheat Ridge had reported extra days on its Medicaid cost report that are not reimbursable by Medicaid, such as time that clients were in the hospital, in jail, or on extended leave with family. The Department corrected for this error when it calculated the retrospective rate for Fiscal Year 2012 that it requested in April 2013, but it did not revise Wheat Ridge's Medicaid cost report to show the correct number of resident days. We reviewed Wheat Ridge's policy on management and reporting of census and statistical information and found that it does not clarify which days should be reported on the Medicaid cost reports.

In general, the concerns we identified in the Department's reimbursement rate calculations indicate a need for the Department to develop a process, which

currently does not exist, for secondary review of the method and calculations used to ensure mathematical accuracy and appropriateness.

Finally, while the Department is ultimately responsible for ensuring the soundness of its rate requests, HCPF also bears responsibility for ensuring that rate requests are fully justified because statute requires HCPF to reimburse the regional centers for actual costs. If the Department requests reimbursement rates that conflict with the average daily costs calculated by HCPF's contracted accounting firm, then HCPF has a responsibility to ensure that the Department applied a sound methodology and calculated its requested rates correctly. HCPF staff reported that, due to its limited resources, HCPF relied on the Department to exercise due diligence in ensuring that the regional centers' costs were fully reimbursed by Medicaid and did not evaluate the Department's methodology in calculating reimbursement rates for the regional centers.

### **Why does this problem matter?**

When the Medicaid reimbursement rates for the two ICF/IID-licensed regional centers are not sufficient to cover the costs of operating those centers, it matters for the following reasons:

- **Unsustainable balancing of revenues.** Currently, the regional centers, taken together, are solvent because revenue shortfalls at one regional center tend to be offset by surpluses at another. For example, for Fiscal Years 2011 and 2012, Pueblo's revenue surpluses helped offset Grand Junction's revenue shortfalls. However, starting in Fiscal Year 2014, the General Assembly has begun breaking out the regional centers' appropriations into separate line items in the Long Bill, which will reduce the Department's flexibility in managing reimbursement rates that do not align with costs. The new budget format allows the Department to transfer no more than 5 percent of the regional centers' total funding among the regional centers without seeking a supplemental appropriation.
- **State General Fund may cover Medicaid-allowable expenses.** By requesting retrospective reimbursement rates that are lower than the actual daily cost per client, the Department risks incurring costs that should be funded by Medicaid but that are not. It is important to ensure that all Medicaid-allowable expenses are being covered by Medicaid dollars, which carry a 50 percent federal match to the State's contribution. For example, if Pueblo had not had a budget surplus in Fiscal Year 2012, then the Department might have needed to use 100 percent State General Fund dollars to cover Grand Junction's \$1.26 million deficit for its Fiscal Year 2012 ICF/IID services.

- **Lack of transparency.** It is important for decision makers and taxpayers to have access to the true cost of services. In response to recent requests for information from the JBC regarding regional center costs, the Department has reported reimbursement rates as reflective of daily costs per client. However, our analysis shows that the reimbursement rates are not reflective of actual daily costs per client.

(CFDA No. 93.778; Medical Assistance Program; Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

(See Recommendation Nos. 2013-70 and 2013-71 to the Department of Human Services on pages III-267 and III-268.)

---

### **Recommendation No. 2013-29:**

The Department of Health Care Policy and Financing should implement a review and approval process for the Medicaid reimbursement rates submitted by the Department of Human Services (Department) that includes comparing the calculations from the contracted accounting firm with the calculations made by the Department to ensure the requested rates align with costs, as required by statute and rule.

### **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: December 2013.

The Department of Health Care Policy and Financing (HCPF) will implement a review and approval process for Medicaid ICF/IID rates submitted by the Department of Human Services. Through this process, the Department of Human Services will determine a prospective interim rate each fiscal year until a final rate becomes available for state-owned ICF/IIDs. The interim rate is the responsibility of Department of Human Services' staff and their determination will be dependent on the most up-to-date cost of operation information. HCPF will perform a review and approve documentation used in the determination of the interim rate. HCPF review will include a comparison of the Department of Human Services' interim prospective rate and the accounting firm's retrospective rate. Then, with the finalization of each facility's cost report and the determination of the retrospective audited per diem rate, ICF/IID payments will be adjusted to the retrospective per diem rate that reflects the actual cost of operation.

---

## Provider Service Fee Payments

Statute [Section 25.5-6-204(1)(c), C.R.S.] authorizes HCPF, as the administrator of Medicaid in Colorado, to assess and collect an annual provider service fee (provider fee) from both privately owned and State-operated ICF/IID facilities “for the purposes of maintaining the quality and continuity of services.” As operators of ICF/IID-licensed Medicaid facilities, both the Wheat Ridge and Grand Junction Regional Centers are required to pay this provider fee. The State receives a 50 percent federal Medicaid match on the provider fee revenue that HCPF collects. According to statute, the total amount HCPF can collect through the provider fee may not exceed 5 percent of the total aggregated costs incurred during the same fiscal year by all the facilities that pay the fee.

In Fiscal Year 2012, the collection of the ICF/IID provider fee was temporarily suspended due to concerns over whether the State was assessing the fee uniformly for all facilities, as required by federal regulations. Specifically, the provider fee had not been assessed for the one private provider in the state that is licensed as an ICF/IID. In addition, HCPF determined that fees had been collected from the regional centers in Fiscal Year 2010 in excess of 6 percent of their revenues, which is a limit imposed by federal regulations. In consultation with CMS, HCPF developed a corrective action plan that involved returning all excess fees that were collected between Fiscal Years 2004 and 2011 and changing the fee assessment process to ensure that all ICF/IID providers are assessed the fee using the same method. During the 2013 Legislative Session, the General Assembly implemented these changes by passing Senate Bill 13-167, which also appropriated funds for Fiscal Years 2013 and 2014 for the Wheat Ridge and Grand Junction Regional Centers to pay the provider fee. Because the provider fee had been suspended during Fiscal Year 2012, the regional centers’ appropriation for Fiscal Year 2013 was increased to allow them to pay HCPF the fee for 2012 retrospectively during Fiscal Year 2013.

For its first collection of the ICF/IID provider fee under the new legislation for both Fiscal Years 2012 and 2013, HCPF developed a per-client daily fee rate, which it applied to all ICF/IID-licensed facilities on the basis of the total resident days each had reported for Fiscal Year 2011. HCPF calculated this per-client daily fee rate in such a way that, once applied to all the facilities, the total fees collected per annum would be about 5 percent of the facilities’ aggregated total costs, which is the maximum amount statute allows HCPF to collect.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to determine whether the Department paid the correct Medicaid provider fee amounts for each ICF/IID-licensed regional center for Fiscal Years 2012 and 2013. We compared records in COFRS for both the Department and HCPF that showed the ICF/IID provider fees that the Wheat Ridge and Grand Junction Regional Centers paid in Fiscal Year 2013 to documentation showing the provider fee amounts that HCPF had billed each regional center. We reviewed documentation of communications between HCPF and the Department regarding the provider fee amounts that each regional center was required to pay and interviewed Department and HCPF management and staff about how the fee amounts were calculated and paid.

### **How were the results of the audit work measured?**

**Uniform fee collection method.** As a condition for approving the State's plan to re-implement the provider fee during Fiscal Year 2013, CMS required that the fee collection be "broad-based and uniform" in accordance with federal regulations. According to federal regulations (Permissible Health Care-Related Taxes, 42 C.F.R., pt. 433.68), a state may collect a "health care-related tax," such as a provider fee, without incurring a reduction in federal Medicaid matching funds if the taxes are "broad-based" and "uniformly imposed throughout a jurisdiction." This regulation further specifies that a "broad-based" tax is one that is "imposed on at least all health care items or services in the class [e.g., all ICF/IID services] or providers of such items or services [e.g., all ICF/IID providers] furnished by all non-Federal, non-public providers in the State, and is imposed uniformly..." Federal regulations recognize several ways in which a health care-related tax, such as a provider fee, may be imposed uniformly. For example, one way is for the tax to be imposed "on the basis of the number of beds (licensed or otherwise) of the provider [such that] the amount of the tax is the same for each bed of each provider" [42 C.F.R., pt. 433.68(d)(1)(ii)].

As the State's Medicaid agency, HCPF is responsible for ensuring that the processes for assessing and collecting the Medicaid provider fee are uniform, in compliance with federal regulations and CMS requirements. Thus, once HCPF determines the provider fee amounts that each regional center should pay, the Department should pay the amounts charged by HCPF.

**Method for disputing fees charged or billing.** State Fiscal Rules outline procedures for state agencies to follow when disputing a fee or charge billed by another state agency. Specifically, Rule 2-6 states that the agency disputing the charge shall notify the agency providing the goods or services and attempt to resolve the dispute; the chief executive officers of these agencies shall assist in the resolution, if necessary; and if the agencies are unable to reach a resolution,

then the agency disputing the charge shall petition the State Controller to resolve the dispute.

### What problem did the audit work identify?

We found that the Department did not pay the exact Medicaid provider fee amounts that HCPF billed the Wheat Ridge and Grand Junction Regional Centers for Fiscal Years 2012 and 2013 and, therefore, HCPF's provider fee collections did not comply with federal regulations. The following table shows the provider fee amounts that HCPF billed each regional center and the private ICF/IID provider compared with the fee amounts that each actually paid.

<b>Provider Fee Billed Amounts Compared with Fee Payments for The Regional Centers' ICF/IID Facilities and the Private ICF/IID Provider Fiscal Years 2012 and 2013<sup>1</sup></b>			
	<b>Grand Junction (ICF/IID)</b>	<b>Wheat Ridge (ICF/IID)</b>	<b>Private Provider (ICF/IID)</b>
Provider Fee Rate that HCPF Applied	\$32.37/day	\$32.37/day	\$32.37/day
Resident Days Reported by the Facility for Fiscal Year 2011	13,801	43,880	7,073
Provider Fee Amount that HCPF Billed for Fiscal Years 2012 and 2013	\$893,476	\$2,840,792	\$457,906
Provider Fee Amount Actually Paid by the Facility for Fiscal Years 2012 and 2013	\$1,007,357	\$2,726,908	\$457,906
Difference	\$113,881	-\$113,884	\$0
<b>Average Provider Fee Rate Based on the Amount Paid</b>	<b>\$36.50/day</b>	<b>\$31.07/day</b>	<b>\$32.37/day</b>
<b>Source:</b> Office of the State Auditor's analysis of data from the Colorado Financial Reporting System (COFRS) and documents provided by the Department and HCPF.			
<sup>1</sup> During Fiscal Year 2013, HCPF assessed 2 years of provider fees for the ICF/IID-licensed facilities to cover Fiscal Years 2012 and 2013.			

As shown in the table, although the Department paid almost exactly the total amount in provider fees that HCPF billed for Wheat Ridge and Grand Junction, combined, for Fiscal Years 2012 and 2013, the provider fee amounts that the Department paid for each of the two regional centers individually differed from the amounts HCPF billed. Conversely, we found that the private provider that is required to pay the ICF/IID provider fee paid the exact amount that HCPF billed for Fiscal Years 2012 and 2013. Therefore, the fees that HCPF collected from the private provider were based on that provider's bed utilization for Fiscal Year 2011, whereas the provider fees that HCPF collected from each regional center

were not. In other words, the ICF/IID provider fees for Fiscal Years 2012 and 2013 were not applied uniformly as required by federal regulations.

### **Why did the problem occur?**

Overall, we found that the Department paid different amounts than what HCPF billed for the ICF/IID provider fee because it did not agree with HCPF's method for calculating the fee amounts. Rather than following the process outlined in State Fiscal Rules for disputing payments between state agencies, the Department applied alternative methods that it believed HCPF should have used. Department staff disagreed with HCPF's method of applying a per-client daily rate to the number of resident days that each public and private ICF/IID-licensed facility reported for Fiscal Year 2011. Therefore, shortly before the close of Fiscal Year 2013, when the Department paid HCPF the provider fees for the Wheat Ridge and Grand Junction regional centers, the Department paid amounts that equaled about 5 percent of each regional center's total costs for Fiscal Year 2012 because Department staff believed the provider fee should be calculated based on a flat percentage of each facility's Medicaid-reimbursable costs, and statute allows HCPF to collect up to 5 percent of all the providers' aggregated costs. Further, for the Fiscal Year 2013 provider fees, the Department applied an additional method because the fiscal year had not yet closed and the Department did not know the final total costs for each regional center. Specifically, for the Fiscal Year 2013 provider fees, the Department paid amounts for each regional center based on the number of resident days each facility had reported so far that year. HCPF management reported to us that federal regulations prevent it from assessing the provider fee according to the methods the Department used.

Senior Department managers reported that they approved the plan to pay the provider fee amounts differently than what was billed because, in the aggregate, the total amount that was ultimately paid was the same as what HCPF billed. From an accounting perspective, the total provider fees paid by the Department for the two regional centers essentially equaled the total amount in fees that HCPF assessed for the two centers for Fiscal Years 2012 and 2013. However, the Department's fee payments per facility did not follow a uniform assessment method, so the State cannot demonstrate compliance with federal Medicaid regulations.

In addition, according to Department documentation, the Department notified HCPF staff about its plan to use an alternative method to pay the provider fee for the regional centers. HCPF staff reported to us that they were not aware of the discrepancy in the provider fee payments until our audit. HCPF's regular process for reconciling its fee billings and collections had not identified that the Department had paid incorrect provider fee amounts for each regional center

because HCPF's reconciliations checked whether the total in fees paid by the Department (both regional centers combined) matched the total billed.

### **Why does this problem matter?**

The ICF/IID provider fee allowed the State to access about \$2.1 million in federal Medicaid matching funds in Fiscal Year 2013 that would not have been available without the fee. According to HCPF management, by applying an alternative method to its payments, which caused HCPF's fee collection in Fiscal Year 2013 to be non-uniform and, therefore, noncompliant with federal regulations, the Department may have jeopardized these federal matching funds. Specifically, CMS could require HCPF to pay back the federal matching funds that the State received as a result of the provider fee. Also, if the Department continues to apply alternative methods in its payments of the ICF/IID provider fees for Wheat Ridge and Grand Junction, future federal matching funds could be at risk.

(CFDA No. 93.778; Medical Assistance Program; Cash Management. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-30:**

The Department of Health Care Policy and Financing should implement procedures to verify that it collects the Intermediate Care Facility for Individuals with Intellectual Disabilities provider service fee amounts from each provider that it bills.

### **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: June 2014.

The Department of Health Care Policy and Financing will update its Department of Human Services Medicaid-funded activity line item crosswalk to include a clear review and approval process for the Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) provider service fee to ensure the appropriate amounts are collected from each provider it bills.

# Department of Higher Education

---

The Department of Higher Education was established under Section 24-1-114, C.R.S., and includes all public higher education institutions in the State. It also includes the Auraria Higher Education Center, the Colorado Commission on Higher Education, the Colorado Student Loan Program, College Assist, CollegeInvest, History Colorado, and the Division of Private Occupational Schools.

State public institutions of higher education are governed by 10 different boards. The governing boards and the schools they oversee are as follows:

- **Board of Regents of the University of Colorado**  
University of Colorado Boulder  
University of Colorado Denver – Anschutz Medical Campus  
University of Colorado – Colorado Springs
- **Board of Governors of the Colorado State University System**  
Colorado State University  
Colorado State University – Pueblo  
Colorado State University – Global Campus
- **Trustees of the University of Northern Colorado**  
University of Northern Colorado
- **Trustees of the Colorado School of Mines**  
Colorado School of Mines
- **State Board for Community Colleges and Occupational Education**  
13 community colleges

## **Board of Regents of the University of Colorado**

### **Organization and Administration**

The University of Colorado (University) was established on November 7, 1861 by Act of the Territorial Government. Upon the admission of Colorado into the Union in 1876, the University was declared an institution of the State of Colorado and the Board of Regents was established under the State Constitution as its governing authority.

The University consists of the system office and the following three accredited campuses:

- University of Colorado - Boulder (CU-Boulder)
- University of Colorado – Denver | Anschutz Medical Campus
- University of Colorado - Colorado Springs (UCCS)

The three campuses comprise 26 schools and colleges, which offer 132 fields of study at the undergraduate level and 194 at the graduate level, offering 290 bachelor and master's degrees, along with 98 doctorates offered.

The Board of Regents is charged constitutionally with the general supervision of the University and the exclusive control and direction of all funds of and appropriations to the University, unless otherwise provided by law. The Board of Regents consists of nine members serving staggered six-year terms, one elected from each of the State's seven congressional districts and two elected from the State at large.

The Board of Regents appoints the President of the University. The President is the chief executive officer of the University. The President is responsible for the administration of the University and for compliance of all University matters with applicable regent laws and policies and state and federal constitutions, laws, and regulations. The President is the chief academic officer of the University, responsible for providing academic leadership for the University in meeting the needs of the State, and shall maintain and advance the academic policies of the University. The President is also the chief spokesperson for the University and interpreter of University policy and represents and interprets the roles, goals, and

needs of the University throughout the State and elsewhere, as appropriate. The Chancellors are the chief academic and administrative officers at the campus level, responsible to the President for the conduct of the affairs of their respective campuses in accordance with the policies of the Board of Regents.

Enrollment, tuition, and faculty and staff information is presented on the next page. The information was obtained from the Budget Data Book for the respective fiscal years, prepared by the University for the Colorado Department of Higher Education.

The following comment was prepared by the public accounting firm of CliftonLarsonAllen LLP, which performed the Fiscal Year 2013 audit work at the University of Colorado.

## **Student Financial Aid Cluster**

### **Special Tests – Return of Title IV Funds**

The purpose of Federal Student Financial Aid (SFA) Programs (Title IV) is to provide assistance to eligible students attending institutions of postsecondary education. During Fiscal Year 2013, the University expended approximately \$452 million of federal financial assistance for the Student Financial Aid programs. The programs within this cluster that are administered by the U.S. Department of Education are authorized by Title IV of the Higher Education Act of 1965, as amended, and collectively are referred to as the “Title IV programs.” When a recipient of Title IV grant or loan assistance withdraws from an institution during a payment period or period of enrollment in which the recipient began attendance, the institution must determine the cumulative amount of Title IV aid earned by the student as of the student’s withdrawal date. If the total amount of Title IV assistance earned by the student is less than the amount that was disbursed to the student or on his or her behalf as of the date of withdrawal, the institution must return the excess disbursement to the U.S. Department of Education. The institution is responsible for determining the student’s date of withdrawal. The affected institution is required to deposit or transfer returns of Title IV funds into the federal SFA account or to initiate an electronic fund transfer to the U.S. Department of Education as soon as possible, but no later than 45 days after the date of the student’s withdrawal.

### **What was the purpose of the audit work?**

We performed procedures required by the federal Office of Management and Budget (OMB) *Circular A-133* and related 2013 Compliance Supplement for the Student Financial Aid Cluster. Specifically, we performed testing of CU-Boulder’s, CU Denver’s, and UCCS’ calculations of return of Title IV funds to

determine whether the University of Colorado returned Title IV funds in the proper amount and in a timely manner for students.

### **What audit work was performed and how were results measured?**

In Fiscal Year 2013, we tested processes for returning Title IV funds at CU-Boulder, CU Denver, and UCCS. These three campuses disbursed a total of approximately \$171 million, \$189 million, and \$62 million, respectively, in Title IV funds during Fiscal Year 2013. We selected a sample of 62 Title IV recipients among the three campuses described above, who withdrew, dropped out, or never attended during the audit period. Our testing procedures included ensuring that the refunds of Title IV funds were calculated correctly and if the calculation resulted in a return of Title IV funds, that the funds were returned within the 45-day requirement. Of the recipients selected for testing, 23 resulted in a refund of Title IV funds.

### **What problem did the audit work identify?**

At CU Denver, one of the Title IV refunds tested was returned 57 days after the student's withdrawal date. All other tested refunds at CU Denver, CU-Boulder, and UCCS were calculated correctly and returned within the 45-day requirement.

### **Why did the problem occur?**

CU Denver reported that there was a change in CU Denver staff responsible for processing the return of Title IV funds. Although internal review processes exist to check the accuracy of the calculation, processes were not in place to review whether the funds were in fact returned to the U.S. Department of Education. As a result, staff did not perform follow up to ensure that excess funds had been returned within 45 days after the date of the student's withdrawal.

### **Why does this problem matter?**

CU Denver failed to return Title IV funds within the required time frame; therefore, the University of Colorado was out of compliance with federal program regulations.

(CFDA Nos. 84.007, 84.032, 84.033, 84.063, 84.268, 84.375, 84.376, 84.379, 93.364, 93.342, 93.407, 93.408, 93.925; Federal Student Financial Aid Cluster; Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

### **Recommendation No. 2013-36:**

The University of Colorado Denver should implement concurrent quality controls to ensure returns of Title IV funds are completed within 45 days after the date of the student's withdrawal.

#### **University of Colorado Response:**

Agree. Implementation date: July 2013.

As a result of the prior year finding, the Financial Aid Office moved responsibility for the return of Title IV funds from a 40 percent staff person to a full-time staff person in August 2012 and ensured proper training. Supervision of the process was moved to the Senior Associate Director. The student information system (ISIS) was used to compile data and run the calculations that had previously been external to ISIS. ISIS allows better tracking of dates. To ensure timeliness, retrospective audits began in September 2012, to test the timeliness and calculation accuracy. These audits are performed by the Finance Office, which is external to the Financial Aid Office.

After the internal audit process identified some ongoing accuracy and timeliness issues, the Financial Aid Office applied a position to monitor the full-time person's calculations and timeliness. In addition, the Finance Office started ensuring that the internal audits were occurring prior to the end of the return timeline; therefore becoming prospective rather than retrospective. The Financial Aid Office reviews and the Finance Office audits now cover 100 percent of the return of Title IV fund calculations and are 100 percent prospective, allowing for corrective action of the issue, if necessary, within the specified timeline.

---

## **Colorado State University**

### **Organization and Administration**

The institutions that compose the Colorado State University System (System) are established in Title 23, Colorado Revised Statutes. The Board of Governors (Board) has control and supervision of three distinct institutions: Colorado State

University (a land-grant university), Colorado State University – Pueblo (a regional, comprehensive university) and Colorado State University – Global Campus (an on-line university).

The 15-member Board consists of:

- Nine voting members appointed by the Governor and confirmed by the Senate for 4-year terms.
- Six advisory members representing the student bodies and the faculty councils for each of the three institutions, elected for 1-year terms.

The Board administers the State Board of Agriculture Fund located in the State Treasury. The Board is authorized to set tuition, pay expenses, and hire officials. The chief academic and administrative officers are the Chancellor of the System and the President of each institution.

## **Colorado State University**

In 1870, the Territorial Council and House of Representatives of the Territory of Colorado created the Agricultural College of Colorado (College). When the Territory became a state in 1876, the College was placed under the governance of the State Board of Agriculture.

The College began admitting its first students in 1879. It was also designated that year as Colorado's land-grant college and recipient of federal endowment support under the Morrill Act of 1862. Subsequent federal legislation led to the establishment of the Agricultural Experiment Station and the Extension Service of the College.

State legislation also made the College responsible for the Colorado State Forest Service. Following several name changes, the College became Colorado State University in 1957. In this report, the terms Colorado State University and CSU refer to Colorado State University – Fort Collins.

The following comments were prepared by the public accounting firm of BKD, LLP, which performed the Fiscal Year 2013 audit work at the Colorado State University.

## **Return of Title IV Funds (Student Financial Aid Cluster): Colorado State University – Global Campus**

Federal Title IV – Student Assistance funds are awarded to a student under the assumption that the student will attend school for the entire period for which the assistance is awarded. When a recipient of Title IV grant or loan assistance withdraws from an institution during a payment period or period of enrollment in which the recipient began attendance, the institution must determine the amount of Title IV grant or loan assistance (Title IV funds) that the student earned (amount earned) as of the student’s withdrawal date. CSU-Global distributed approximately \$42.6 million in Title IV funds during Fiscal Year 2013.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the System’s compliance with the special tests and provisions compliance requirement related to attendance with respect to the federal return of Title IV grant or loan assistance.

### **What audit work was performed and how were results measured?**

The audit work consisted of a review of 60 student files sampled from a population of CSU-Global students who withdrew during the fiscal year. Federal regulations mandate that when a student withdraws, any unearned funds must be returned to the Federal Department of Education no later than 45 days after the date of the institution’s determination that the student withdrew.

### **What problem did the work identify?**

We did not note any questioned costs; however, in seven of the 60 instances, there was no documentation of supervisory review or approval of the return of Title IV calculations. In addition, we noted eight instances in which CSU-Global did not return funds within the required 45-day time frame. The funds were returned anywhere from 47 to 214 days after the student withdrew. We also noted one instance in which CSU-Global did not perform a post-withdrawal disbursement within the required 30-day time frame.

### **Why did the problem occur?**

In the instances noted above where the funds were not returned or disbursed timely, there was a delay in return due to using the “last date attended” method instead of the midpoint method for determining withdrawal dates. This caused a backlog of calculations at the end of each term making it difficult to complete them in a timely manner to allow for timely return of funds.

**Why does this problem matter?**

Establishing and maintaining internal controls, such as supervisory review and approval by someone other than the preparer of return of Title IV calculations, is imperative to ensuring compliance with federal laws, regulations and program compliance requirements. Additionally, by not returning funds or disbursing funds within a timely manner, CSU-Global is in violation of Federal Department of Education requirements.

(CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan); Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

---

**Recommendation No. 2013-37:**

Colorado State University – Global Campus should implement an internal control procedure which ensures that Title IV funds are returned or distributed timely.

**Colorado State University – Global Campus  
Response:**

Agree. Implementation date: July 2013.

CSU-Global addressed the finding of a significant deficiency in internal control over compliance in connection with the timely and accurate return of Title IV funds to its students as follows: July 2013, we changed the review process to ensure that there is a clear and documented difference between the person doing the calculation and the person reviewing the calculation. The process that was implemented requires that the person who completes the calculation closes out the activity which then triggers the review activity to the reviewer. Since the review activity was and has been triggered off of the individual completing the calculation, we implemented a secondary review process in which we pull weekly reports to determine who the withdrawn students are and follow up to ensure that the calculations are completed on time.

---

## **Davis-Bacon Act (Research and Development Grant Cluster): Colorado State University**

### **What was the purpose of the audit work?**

The purpose of the audit work was to review CSU's compliance with the Davis-Bacon federal compliance requirement.

### **What audit work was performed and how were results measured?**

The audit work consisted of reviewing CSU's files for the two general contractors and six subcontractors for the RIC Image Suite funded by federal funds from the Research and Development Cluster. Recipients (i.e. direct recipients), such as CSU, of federal grants used to fund construction are required under the Davis-Bacon Act to obtain a copy of the payroll and a statement of compliance (certified payrolls) from all contractors or subcontractors working on construction contracts in excess of \$2,000 financed by federal assistance funds. Weekly certified payrolls are required for any week in which contract work is performed in order to determine that the contractors and subcontractors are paying wages not less than those established for the locality of the project (prevailing wage rates).

### **What problem did the work identify?**

We identified one instance of a general contractor and four instances of subcontractors not submitting all required weekly payroll certifications to CSU. We noted that the four subcontractors were contracted by the same general contractor who did not submit all required certifications. Management indicated that they relied on the contractors to provide all required payroll certifications rather than implementing a tracking mechanism to ensure all contractors and subcontractors submitted proper documentation.

### **Why did the problem occur?**

This lack of monitoring of contractors and subcontractors occurred due to a lack of adequate controls in place at CSU surrounding Davis-Bacon Act compliance requirements if funded by research and development funds.

### **Why does this problem matter?**

Insufficient monitoring of contractor and subcontractor payroll certifications could result in noncompliance with these requirements and potential federal sanctions.

(CFDA No. 93.702; National Center for Research Resources, Recovery Act Construction Support; Davis-Bacon Act. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-38:**

Colorado State University (CSU) should implement an internal control procedure which tracks and ensures that all payroll certifications required under the federal Davis-Bacon Act and funded through the Research and Development cluster are obtained from CSU's contractors and subcontractors for each week in which work is performed.

### **Colorado State University Response:**

Agree. Implementation Date: April 2014.

The University will implement an internal control procedure that tracks and ensures that all payroll certification required under the Davis-Bacon Act are obtained from CSU's contractors and subcontractors for each week in which work is performed. The University will request certificates from contractors and subcontractors prior to making payments. The University will also ensure that staff are trained on the requirements under the Davis-Bacon Act and utilize a check list to ensure that requirements are met. The University will also review Davis-Bacon Act requirements with contractors and provide more direction and expectations in a written documentation to them.

---

## **University of Northern Colorado**

### **Organization and Administration**

Eighteen years after the City of Greeley, Colorado was founded in 1855, a movement was started to establish a "normal" school to supply teachers to the community and the State. The law creating the State Normal School, as the University of Northern Colorado (UNC or University) was first known, was eventually signed April 1, 1889. In 1911, the name was changed to Colorado State Teachers College. UNC retained that name until 1935 when it was renamed Colorado State College of Education. In 1957, another name change occurred making it the Colorado State College. The Act changing the name to the University of Northern Colorado became law May 1, 1970, thus making official

the University-level work which it has offered since 1929. The authority under which the University operates is Article 40 of Title 23, C.R.S.

The Board of Trustees is the governing body of the University and is composed of seven members, appointed by the Governor with the consent of the Senate, for four-year terms (effective for terms beginning July 1, 1987); with one faculty member elected by the faculty, and one student member elected by the student body. The University of Northern Colorado seeks to provide all students with a broad general education as well as preparation for selected professions within the fields of business, education, health services, music and related areas; and pre-professions such as pre-law, pre-medicine, and others. Historically, the principal emphasis has been preparing students for careers in education.

The following comments were prepared by the public accounting firm of Anderson & Whitney, PC, which performed the Fiscal Year 2013 audit work at the University of Northern Colorado.

## **Collection of Delinquent Federal Perkins Loans**

The federal Perkins loan program is a revolving loan fund to provide low-interest loans to students with financial need. The University makes new loans to students from the proceeds of the collection of previous loans. No new federal contributions to the fund have been received in recent years. The University had a total of approximately \$9 million of Perkins loans outstanding to 3,000 borrowers at June 30, 2013. Borrowers for approximately 300 of the loans equaling \$470,000 were over four years delinquent in payments at that time.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the University's compliance with federal grant requirements relating to the recovery of funds from delinquent Perkins loan borrowers.

### **What audit work was performed and how were results measured?**

Federal regulations require the University to exercise due diligence in the collection of loans from defaulted borrowers. If collection agencies utilized by the University are not successful in collecting the loan, the loan is returned to the University where there must be an annual attempt to collect until the loan is recovered through litigation against the borrower, assigned to the U.S. Department of Education, or written off. The University generally does not write off loans at this stage. If collection efforts are unsuccessful, institutions are

encouraged to assign delinquent loans to the U.S. Department of Education for collection.

We reviewed the status of approximately 300 delinquent loans for which collection agency efforts were unsuccessful. The Federal Student Aid Handbook, Volume 6, Chapter 5, indicates that if collection procedures have not resulted in the repayment of a loan, the school must consider litigation against the borrower once every two years.

### **What problem did the work identify?**

Our audit identified that the University did not assign delinquent Perkins loans to the U.S. Department of Education or document litigation considerations every two years as required, for any of the approximately 300 borrowers that were over four years delinquent as of June 30, 2013.

### **Why did the problem occur?**

The problem has occurred because the University has not fully developed its delinquent Perkins loans collection procedures to address due diligence requirements when collection agencies are unsuccessful and the loan is returned to the University.

### **Why does this problem matter?**

If full collection efforts are not undertaken, it is unlikely that delinquent loans will be collected, which reduces funds available for new loans to students.

(CFDA No. 84.038; Federal Perkins Loan (FPL) – Federal Capital Contributions; Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-39:**

The University of Northern Colorado should revise its procedures for addressing delinquent Perkins loans to ensure that actions are taken, including that litigation considerations are made and documented at least every two years and that delinquent loans are assigned to the U.S. Department of Education, as determined appropriate.

## **University of Northern Colorado Response:**

Agree. Implementation date: February 2014.

The University of Northern Colorado will review and revise its procedures for addressing delinquent Perkins loans to ensure that timely and appropriate actions are taken and documented. This includes ensuring that litigation considerations are made and documented at least every two years and that delinquent loans are assigned to the U.S. Department of Education, as determined appropriate. This review, documentation of procedures, and employee training will be completed by the end of February 2014.

---

## **Controls over the Return of Title IV Funds**

The University participates in the Title IV programs of the U.S. Department of Education including Federal Pell Grants, Federal Supplemental Educational Opportunity Grants and Federal Direct Student Loans. Total federal Title IV assistance paid to students at the University of Northern Colorado in Fiscal Year 2013 was approximately \$90 million, including loans. Approximately 211 student financial aid recipients withdrew from the University during the year. When a financial aid recipient withdraws in the first 60 percent of a semester, University staff are required to perform a calculation to determine if the financial aid recipient or the University needs to return funds to the U.S. Department of Education Title IV programs.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the University's compliance with respect to the return of Title IV grant or loan assistance calculations for the 211 aid recipients who withdrew from the University during Fiscal Year 2013.

### **What audit work was performed and how were results measured?**

We tested a sample of 21 files out of the 211 student financial aid recipients who withdrew from the University during the fiscal year. We performed testing to determine whether the University has implemented adequate internal controls over the return of Title IV funds calculations. The 21 files tested represented a total of approximately \$28,000 of financial aid received.

Two counselors at the University are responsible for calculating the amount of funds earned and the amount to be returned, and reviewing the calculations

completed by the other counselor to ensure proper determinations are made. If the total amount of Title IV assistance earned by the student is less than the amount that was disbursed to the student as of the date of the student's withdrawal determined by the institution, the excess distributed must be returned to the Title IV programs. Federal regulations require that institutions return Title IV funds to the U.S. Department of Education programs no later than 45 days after the date of the student's withdrawal as determined by the institution.

### **What problem did the work identify?**

We identified problems with 2 (10 percent) of the 21 calculations we reviewed. In both cases, the students had withdrawn prior to spring break during the Spring 2013 semester; however the nine days of spring break were inadvertently included in the University's determination of total days in the semester for each of these students. This resulted in excess funds being returned to the programs. This error was not detected as there was no review performed on these two calculations by either another counselor or supervisor. These two determinations were completed during a vacation period of one counselor, and no further review was requested.

### **Why did the problem occur?**

We found that the University does not have a formal policy in place for its supervisory review or maintenance of documentation of the review of Title IV refund calculations. The University's review process over these determinations is designed to function in a fully-staffed environment, and the problem occurred when a key individual in this process was absent.

### **Why does this problem matter?**

Failure to properly calculate refunds in the timeline required increases the risk that Title IV funds will not be returned in accordance with federal regulations. The University may refund too much to the federal programs, as in these cases, or it may not refund enough funds.

(CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan); Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

Total Known Questioned Costs: The amount of excess funds returned was \$758 and \$270, for a total of \$1,028 for the two students combined.

### **Recommendation No. 2013-40:**

The University of Northern Colorado should ensure that federal requirements for return of funds under federal Title IV programs are met by establishing a formal policy relating to its supervisory review process and maintenance of documentation of its supervisory reviews.

#### **University of Northern Colorado Response:**

Agree. Implementation date: December 2013.

The University will ensure that federal requirements for return of funds under federal Title IV programs are met. The University will ensure this by reviewing, improving and following its established formal policy and procedures. Specific attention relating to the supervisory review process and maintenance of documentation of its supervisory reviews will be reinforced. A formal policy and related employee training will be completed by December 31, 2013.

---

### **State Board for Community Colleges and Occupational Education**

The State Board for Community Colleges and Occupational Education (Board) was established by the Community College and Occupational Education Act of 1967, Title 23, Article 60 of the Colorado Revised Statutes. The Board functions as a separate entity and, as such, may hold money, land, or other property for any educational institution under its jurisdiction. The statute assigns responsibility and authority to the Board for three major functions:

- The Board is the governing board of the state system of community and technical colleges.
- The Board administers the occupational education programs of the State at both secondary and postsecondary levels.
- The Board administers the State's program of appropriations to Local District Colleges (LDCs) and Area Vocational Schools (AVSs).

The Board consists of nine members appointed by the Governor to four-year staggered terms of service. The statute requires that Board members be selected so as to represent certain economic, political, and geographical constituencies.

The Colorado Community College System's (CCCS) operations and activities are funded primarily through tuition and fees; federal, state, and local grants; the College Opportunity Fund stipends; a fee-for-service contract with the Department of Higher Education; and Amendment 50 funding. In addition, the Board receives and distributes state appropriations for LDCs, AVSs, and school districts offering vocational programs.

The 13 colleges in the community college system are as follows:

<b>College</b>	<b>Main Campus Location</b>
Arapahoe Community College (ACC)	Littleton
Colorado Northwestern Community College (CNCC)	Rangely
Community College of Aurora (CCA)	Aurora
Community College of Denver (CCD)	Denver
Front Range Community College (FRCC)	Westminster
Lamar Community College (LCC)	Lamar
Morgan Community College (MCC)	Fort Morgan
Northeastern Junior College (NJC)	Sterling
Otero Junior College (OJC)	La Junta
Pikes Peak Community College (PPCC)	Colorado Springs
Pueblo Community College (PCC)	Pueblo
Red Rocks Community College (RRCC)	Lakewood
Trinidad State Junior College (TSJC)	Trinidad

The following comments were prepared by the public accounting firm of KPMG LLP, which performed the Fiscal Year 2013 audit work at the Colorado Community College System.

### **Controls over the Return of Title IV Funds:**

Pueblo Community College (PCC) and Northeastern Junior College (NJC) participate in several federal student financial aid programs authorized under Title IV of the Higher Education Act of 1965 (Title IV), including Direct Loans, Pell, and Federal Work Study. Title IV establishes general rules that apply to student financial aid programs and requires that when a student who has received Title IV funds withdraws from an institution, the institution must determine the amount of Title IV aid that shall be returned to the federal government for Title IV programs. PCC distributed \$15,254,982 and NJC distributed \$2,494,952, in Title IV funds to students during Fiscal Year 2013.

### **What was the purpose of the audit work?**

The purpose of the audit work was to assess the adequacy of PCC's and NJC's internal controls over and compliance with the return of Title IV funds to the U.S. Department of Education requirements when students who receive these funds withdraw from the institution.

### **What audit work was performed and how were results measured?**

The audit work included reviewing a sample of 40 return calculations for the Title IV students who withdrew from both colleges during the Fiscal Year 2013, to determine whether adequate controls were implemented by the college to ensure Title IV funds were returned in compliance with federal regulations. Of the 40 items tested, 13 were from PCC, 14 were from NJC, and 13 were from Morgan Community College (MCC). Exceptions were identified at PCC and NJC; no exceptions were identified at MCC. When a recipient of Title IV grants or loan assistance withdraws from an institution during a payment period (the current semester for which the student has paid) or period of enrollment (if the student is enrolled in a nonstandard term) in which the recipient was in attendance, the institution must determine the amount of Title IV aid earned by the student as of the student's date of withdrawal. If the total amount of Title IV assistance earned by the student is less than the amount that was disbursed to the student as of the date of the student's withdrawal determined by the institute, the excess amount disbursed must be returned to the U.S. Department of Education. Federal regulations require that institutions return Title IV funds to the U.S. Department of Education no later than 45 days after the date of the student's withdrawal.

### **What problem did the work identify?**

Overall, we identified at least one exception with 3 (7.5 percent) out of 40 return calculations we tested for students who withdrew. We noted the following specific exceptions as a result of our work:

- At PCC, out of 13 calculations tested, we identified one calculation for which PCC used incorrect information when calculating the amount of funds to be returned. Specifically, the tuition rate used was too low, which resulted in \$569<sup>1</sup> less Title IV funds being returned to the U.S. Department of Education than should have been, had the correct rate been used.
- At NJC, out of the 14 calculations tested, we identified two calculations that were performed incorrectly. In the first calculation, NJC used incorrect information when calculating the amount of funds to be returned. Specifically, the tuition rate used in the calculation was too high, resulting

in \$367 more Title IV funds being returned to the U.S. Department of Education than should have been, had the correct rate been used. In the second calculation, the required documentation for determining the withdrawal date and calculating the amount of funds that should be returned was not completed within the required 45 days of withdrawal notification. However, this did not affect the amount of funds returned as the student did not receive excess funds.

### **Why did the problem occur?**

In general, the institutions did not have adequate processes in place for timely identification of withdrawing students by the institutions' respective directors of financial aid, who initiate the process for calculating whether Title IV funds must be repaid to the U.S. Department of Education. Additionally, the institutions did not have adequate supervisory reviews in place over of the return Title IV funds calculations to ensure the calculations were accurate.

### **Why does this problem matter?**

Failure to properly calculate or initiate refunds in the timeline required increases the risk that Title IV funds will not be returned in accordance with federal regulations.

(CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan); Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

<sup>1</sup>Known questioned costs of \$569 assigned to the Student Financial Aid Cluster.

---

## **Recommendation No. 2013-41:**

Pueblo Community College and Northeastern Junior College should implement internal controls to ensure that Title IV funds are returned to the federal government in the required timeframe, and the return of Title IV calculations are properly reviewed to ensure accuracy.

### **Colorado Community College System Response:**

Agree. Implementation date: December 2013.

PCC has initiated in depth training for the advisor who processes the Return of the Title IV funding. The advisor attended training at the system

office specifically geared to Return of Title IV (R2T4) in July 2013. The PCC Advisor will also attend additional R2T4 training provided by Colorado Association of Financial Aid Administrators (CAFAA) in November 2013. The advisor has also discussed the possibility of having one-on-one training with System Office as well. As soon as training is complete, PCC will develop a step-by-step manual on the R2T4 process to aid in training individuals who may perform the job in the future. The Financial Aid Director will review a random sampling of the work performed at the end of each semester to check for any errors starting in December 2013.

NJC has implemented and will continue to conduct secondary reviews on all Return to Title IV calculations. NJC will also utilize system office resources by having them perform initial R2T4 calculation. The registrar will work with faculty by sending reminders regarding the importance of reporting students that have not attended classes to ensure a more timely reporting of student no-shows at the beginning of each semester.

---

## **Metropolitan State University of Denver**

### **Organization**

Established in 1963 as Colorado's "College of Opportunity," Metropolitan State University of Denver (University) is the third largest higher education institution in Colorado and one of the largest public four year universities in the United States. With a modified open-enrollment policy, students who are at least 20 years old need only have a high school diploma, a general educational development (GED) high school equivalency certificate, or the equivalent to gain admission.

The University is governed by the Board of Trustees, an 11-member board consisting of 9 members appointed by the Governor of Colorado with the consent of the Senate, and a faculty and a student representative. The University offers 55 major fields of study and 82 minors through its School of Business; School of Letters, Arts and Sciences; and School of Professional Studies. Degrees include Bachelor of Science, Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Music Education, and three Masters. Academic bachelor programs range from the traditional, such as English, art, history, biology, and psychology, to business-related degrees in computer information systems, accounting and marketing, and professional-directed programs in nursing, healthcare management, criminal justice, premedicine, prelaw, and preveterinary science. Master programs include art in teaching, social work, and professional accountancy.

The following comments were prepared by the public accounting firm of KPMG LLP, which performed the Fiscal Year 2013 audit work at the University.

### **Controls over the Return of Title IV Funds:**

The University participates in several federal student financial aid programs authorized under Title IV of the Higher Education Act of 1965 (Title IV), including Direct Loans, Pell, and Federal Work Study. Title IV establishes general rules that apply to student financial aid programs and requires that when a student who has received Title IV funds withdraws from an institution, the institution must determine the amount of Title IV aid that shall be returned to the federal government for Title IV programs.

### **What was the purpose of the audit work?**

The purpose of the audit work was to assess the adequacy of the University's internal controls over, and compliance with, the return of Title IV funds to the U.S. Department of Education (ED) as required by the Office of Management and Budget's *Circular A-133*, when students who receive these funds withdraw from the institution.

### **What audit work was performed and how were results measured?**

We selected a sample of 35 Title IV recipients who withdrew from the University during Fiscal Year 2013 to determine whether adequate controls were implemented by the University to ensure Title IV funds were returned in compliance with federal regulations. Federal regulations mandate that when a student withdraws, any unearned funds must be returned to ED no later than 45 days after the date of the student's withdrawal.

### **What problem did the work identify?**

We identified 3 (9 percent) out of 35 return calculations tested for students who withdrew which were instances of noncompliance. In each of the three instances, the University used incorrect information when calculating the amount of funds to be returned. Specifically, the tuition rate used was too low, which resulted in \$1,032<sup>1</sup> less Title IV funds being returned to ED than should have been returned, had the correct rate been used.

### **Why did the problem occur?**

The University did not have adequate supervisory reviews in place over the return of Title IV funds calculations to ensure that both the calculations and data used in

the calculations were accurate. Specifically, the University does not have a process in place to review 100 percent of the calculations, and evidence of reviews that were performed is not maintained.

### **Why does this problem matter?**

Failure to properly calculate or initiate refunds in the timeline required increases the risk that Title IV funds will not be returned in accordance with federal regulations.

(CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan); Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

<sup>1</sup>Known questioned costs of \$1,032 assigned to the Student Financial Aid Cluster.

---

### **Recommendation No. 2013-42:**

Metropolitan State University of Denver should implement appropriate internal controls to ensure that all applicable return of Title IV funds calculations are properly reviewed by someone other than the preparer to ensure accuracy and that evidence of the review is maintained.

### **Metropolitan State University of Denver Response:**

Agree. Implementation date: July 2013.

This issue related to the calculation of Colorado Opportunity Funds (COF) and how they interplay with the institutional charges. With our process, staff make the assumptions that each student receives the full COF payments for the credit hours they were enrolled in. In these cases, for each of the three students, the COF payment was reduced due to the students nearing or reaching their maximum of 145 hours on COF. To address this issue, we have revised our training and added staff to provide training and compliance oversight. Additionally, we have updated our policies and procedures, and will randomly audit 20 percent of the files to ensure that we are calculating returns accurately.

---

## **Management Review Controls over Disbursements and Borrower Data Transmission**

The University is required to have controls in place over each compliance requirement applicable to the Student Financial Aid program.

### **What was the purpose of the audit work?**

The purpose of the audit work was to assess the design and implementation and operating effectiveness of the University's internal controls over, and compliance with, the disbursement and borrower data transmission compliance requirements as prescribed by the Office of Management and Budget's *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*.

### **What audit work was performed and how were results measured?**

We tested the design and implementation of the review of disbursement of financial aid dates within the Banner system. For disbursements to or on behalf of students, University management reviews the disbursement of financial aid dates established in the Banner system to ensure they agree to the approved institutional calendar and are in compliance with U. S. Department of Education requirements for disbursing student financial aid payments.

For the borrower data transmission and reconciliation compliance requirement the University is required to reconcile the School Accounts Statements (SAS) to the institution's financial records. We tested the design and implementation of the control of the reconciliation of the SAS. Each month, the Common Origination Distribution System provides institutions with a SAS data file which consists of a Cash Summary, Cash Detail, and (optional at the request of the school) Loan Detail records. The school is required to reconcile these files to the institution's financial records.

### **What problem did the work identify?**

Management did not maintain documented evidence that the review of the disbursement dates established in the Banner system occurred. Additionally, management did not maintain documented evidence that a reconciliation of the SAS was performed or reviewed. While no evidence of the performance of the control was maintained, no instances of noncompliance were identified in the compliance testwork performed.

### **Why did the problem occur?**

The University does not have policies and procedures in place to ensure that evidence of the review of disbursement dates and the completion of the SAS reconciliations is maintained to document that the control was performed.

### **Why does this problem matter?**

Failure to maintain documented evidence of the performance of management review and reconciliation procedures increases the risk of material noncompliance in the Student Financial Aid program.

(CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan); Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-43:**

Metropolitan State University of Denver should implement policies and procedures to ensure documented evidence of review of disbursement dates established in the Banner system is maintained. Additionally, the University should implement policies and procedures to document both the performance and review of the School Accounts Statements (SAS) reconciliation.

### **Metropolitan State University of Denver Response:**

Agree. Implementation date: July 2013.

The Office of Financial Aid & Scholarships will implement a process to ensure documented evidence of review of disbursement dates established in the Banner system. We will maintain email threads to document the review of our disbursement dates. Additionally, we will implement a process to document both the performance and review of the SAS reconciliation files. We will maintain email threads to document that these files are being reviewed.

---

## **Controls over Accuracy of Enrollment Reporting**

The University participates in the Student Financial Aid program. Under the loan programs, schools must complete and return within 30 days of the Enrollment Reporting roster file from the U. S. Department of Education. Once received, the

University must update the roster file for changes in student status, report the date the enrollment status was effective, enter the new anticipated completion date, and submit the changes electronically through the batch method or the National Student Loan Data System (NSLDS) website. Institutions are responsible for timely reporting, whether they report directly or via a third-party servicer.

Unless the University expects to complete its next enrollment reporting roster within 60 days, the University must notify the lender or the guaranty agency within 30 days, if it discovers that a student who received a loan either did not enroll or ceased to be enrolled on at least a half-time basis (34 CFR section 682.610; Direct Loan, 34 CFR section 685.309).

The University accesses the NSLDS website and creates the Enrollment Reporting Summary Report. These reports include the dates the roster files were sent by the University and returned, the number of errors included within the report submission that required correction, date and number of online updates to be made, and the number of letters sent for overdue enrollment reporting rosters.

### **What was the purpose of the audit work?**

The purpose of the audit work was to assess the University's compliance with enrollment reporting requirements as required by the Office of Management and Budget's *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*.

### **What audit work was performed and how were results measured?**

We selected a sample of 25 students from the Enrollment Reporting Summary Report generated from the NSLDS website who either graduated from, withdrew from, dropped out of, or enrolled but never attended the University during Fiscal Year 2013 to determine whether the information per the NSLDS website agreed to the students' academic files.

### **What problem did the work identify?**

We identified instances of non-compliance with 9 (36 percent) out of 25 students selected. We specifically found that, for six instances, the student's status was incorrectly reported by the University. For the remaining three instances, the student's status changed during the semester; however, the NSLDS did not reflect the change in status.

### **Why did the problem occur?**

The University does not have adequate controls in place to ensure that student enrollment data reported to the NSLDS is accurate or reported timely. While the University submitted the Enrollment Reporting roster files for Fiscal Year 2013 within the required timeline and resolved any exceptions identified through the submission, the data submitted was not reviewed for accuracy.

### **Why does this problem matter?**

Failure to properly report student enrollment status increases the risk of material non-compliance with federal Student Financial Aid program requirements.

(CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan); Special Tests and Provisions. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-44:**

Metropolitan State University of Denver should implement appropriate internal controls to ensure that the student enrollment data reported to the National Student Loan Data System (NSLDS) is accurate.

### **Metropolitan State University of Denver Response:**

Agree. Implementation date: Spring 2014 Semester.

We are aware that there were some discrepancies with the enrollment files submitted to NSLDS from the National Student Clearinghouse (NSC). We are in the process of ensuring we have the appropriate internal controls to ensure that the student enrollment data reported to NSC for NSLDS is accurate. These are the steps we are taking:

1. Networking with other schools to understand how they are sending their data to NSC. According to NSC, every school reports the student status differently.
2. After the collection of information we will work with the Office of Financial Aid to determine how and when the University should report student enrollment data.
3. Work with Administrative Computing to extract the data in a readable format to have the ability to verify it before uploading to NSC.

4. Work with NSC to ensure when the enrollment file is uploaded that it contains accurate student data. There is no clear evidence why the data provided did not match for some student records, which indicates there may have been an error in the data upload.
-

---

# Department of Human Services

---

The Department of Human Services (Department) is solely responsible, according to statute [Section 26-1-111(1), C.R.S.], for managing and overseeing the delivery of the State's public assistance and welfare programs throughout Colorado. Most of these programs are administered through local county departments of human/social services. The Department also manages and directly administers programs in the areas of developmental disabilities, mental health, nursing homes, and youth corrections. Please refer to the introduction in the Department of Human Services chapter within Section II. Financial Statement Findings for additional background information.

As part of our Fiscal Year 2013 audit, we tested the Department's compliance with federal grant requirements for the following programs:

- Temporary Assistance for Needy Families (TANF)/Colorado Works Program
- Supplemental Nutrition Assistance Program (SNAP)
- Title IV-E Foster Care
- Child Care and Development Program Cluster
- Rehabilitation Services - Vocational Rehabilitation Grants to States
- Veterans State Nursing Home Care

In Fiscal Year 2013, the Department's expenditures for these programs were approximately \$1.5 billion, of which \$1.2 billion was federal funds and \$300 million was state general and cash funds. The Department is responsible for ensuring that all expenditures for these programs are appropriate and that the State complies with the associated federal and state program requirements.

The results of our Fiscal Year 2013 audit identified errors resulting in recommendations for four of the programs tested (TANF, SNAP, Child Care, and Vocational Rehabilitation). In addition, we identified errors in the Low-Income Energy Assistance Program (LEAP) based on testwork performed related to a prior audit recommendation. We identified 12 material weaknesses and 13 significant deficiencies related to federal awards. The errors identified and audit recommendations for these programs are described in the following sections of this chapter.

## **Supplemental Nutrition Assistance Program Quality Assurance Annual Report**

The Supplemental Nutrition Assistance Program (SNAP) (CFDA Nos. 10.551 and 10.561) was designed to help low-income households buy food. Operationally, the county departments of human/social services and the Department share the responsibility for determining beneficiaries' eligibility for SNAP benefits. The Department's Food and Nutrition Division, within the Office of Economic Security, oversees Colorado's SNAP program, and the county departments of human/social services administer the program locally. Counties are specifically responsible for administering the benefit application process and processing changes to beneficiaries' eligibility.

The SNAP Quality Assurance (SNAP QA) Division, within the Office of Performance and Strategic Outcomes, conducts an independent monthly review of a statistically valid sample of participating households (those determined to be eligible) and households for which participation was denied or terminated (those determined to be ineligible). These reviews measure the accuracy of eligibility determinations and authorized payments, as well as provide additional information on the causes of errors and the number of errors that occurred in the review.

The SNAP QA staff compile the results of the monthly reviews each Federal Fiscal Year into an annual report, which also discusses the overall accuracy of caseworkers' SNAP eligibility determinations and related payments. The purpose of the annual report is to present the official quality control error rates for multiple years as provided by the federal government and other statistical data derived from SNAP QA reviews to provide to Department program staff and county departments of human/social services.

The Department is required to submit a corrective action plan annually to the federal government that discusses the causes of the payment errors identified and the actions the Department plans to take in order to reduce SNAP payment errors. As part of the Department's corrective action, SNAP QA staff provide training to counties in order to assist in preventing and detecting SNAP eligibility and payment errors and to decrease the error rates identified during the SNAP QA reviews.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the SNAP QA Federal Fiscal Year 2010-2012 annual reports to determine if the Department is at or below the national average error rates, in accordance with federal requirements. In addition,

we assessed the Department's process for utilizing the information in the annual report to improve the payment error rates each year.

### **What audit work was performed and how were the results measured?**

We reviewed the SNAP QA Federal Fiscal Years 2010 through 2012 annual reports to determine the trend of payment error rates identified for both eligible and ineligible households for Federal Fiscal Years 2010 through 2012 and if the Department is at or below the national averages for payment error rates. We also interviewed Department staff regarding the ways in which they use error rate information contained in the annual report to improve future years' error rates.

According to federal regulations [Determination of State agency program performance, 7 C.F.R., pt. 275.23(e)], the Department is required to maintain payment error rates associated with both eligible and ineligible cases at or below the national average error rate. For Federal Fiscal Year 2012, the annual report stated that the national average error rate was 3.42 percent for the eligible cases and 27.27 percent for the ineligible cases where errors were identified. In addition, the State is subject to federal sanctions if, for two consecutive federal fiscal years a State's payment error rate exceeds 105 percent of the national average and is above six percent for the eligible case reviews.

### **What problems did the audit work identify?**

Based on our review of the Department's SNAP QA Federal Fiscal Years 2010 through 2012 annual reports, we found that the Department's SNAP error rate for eligible cases was above the national average in two of the three fiscal years and that, while the national error rate improved over the three-year period, the Department's error rate worsened over the same time period. Further, when the QA sample results were applied to the full amount of benefits issues, the Department estimated that it inappropriately issued about \$26 million in SNAP benefits and failed to issue almost \$11 million in benefits during Federal Fiscal Year 2012.

The following table lists the national average and Department (Colorado) error rates for eligible cases for Federal Fiscal Years 2010 through 2012. In addition, the table provides the State's national ranking and dollar amounts of over- and under- issued SNAP benefits.

<b>Department of Human Services SNAP/Food Stamps Payment Error Rates for Eligible Households Amounts of Over and Under Issued Funds Federal Fiscal Years 2010, 2011 and 2012</b>			
	<b>Federal Fiscal Year</b>		
	<b>2010</b>	<b>2011</b>	<b>2012</b>
<b>National Average Payment Error Rate</b>	3.81%	3.80%	3.42%
<b>Colorado Payment Error Rate</b>	3.18%	4.45%	4.55%
<b>Colorado's National Ranking<sup>1</sup></b>	16	34	36
<b>Estimated Total Amount of Over Issued SNAP Benefits</b>	-- <sup>2</sup>	\$24,791,020	\$26,283,206
<b>Estimated Total Amount of Under Issued SNAP Benefits</b>	-- <sup>2</sup>	\$9,077,327	\$10,755,624
<b>Source:</b> Supplemental Nutrition Assistance Program Quality Assurance Federal Fiscal Years 2010, 2011, and 2012 Annual Reports.			
<sup>1</sup> This ranking is out of 53. The 53 includes 50 states and 3 territories that administer the SNAP QA program.			
<sup>2</sup> The Federal Fiscal Year 2010 annual report did not include the amounts of over or under issued SNAP benefits.			

We also found that the Department's ineligible error rate identified in its Federal Fiscal Year 2012 annual report exceeded the national error rate. The following table shows the national average and the Department's (Colorado) error rates for ineligible SNAP cases for Fiscal Year 2012, as well as the Department's national ranking. According to the Federal Fiscal Year 2012 annual report, because the federally required review methodology for SNAP ineligible error rates changed in Federal Fiscal Year 2012, the ineligible error rate noted in the table is calculated differently as of Federal Fiscal Year 2012 and cannot be compared to previously calculated ineligible error rates. For reviews conducted prior to Federal Fiscal Year 2012, SNAP QA staff were required to review cases that were denied eligibility; for the Federal Fiscal Year 2012 reviews, SNAP QA reviewed cases in which benefits were suspended or terminated, in addition to cases in which eligibility was denied. In addition, as part of the Federal Fiscal Year 2012 reviews, errors were noted if caseworkers were not timely suspending or terminating cases or if they did not provide proper noticing to individuals; these errors were not previously included as errors.

<b>Department of Human Services SNAP/Food Stamps Payment Error Rates for Ineligible Households Federal Fiscal Year 2012</b>	
<b>National Average Payment Error Rate</b>	27.27%
<b>Colorado Payment Error Rate</b>	68.79%
<b>Colorado's National Ranking<sup>1</sup></b>	53
<b>Source:</b> Supplemental Nutrition Assistance Program Quality Assurance Federal Fiscal Year 2012 Annual Report. <sup>1</sup> This ranking is out of 53.	

As demonstrated in the table, Colorado's error rate for ineligible households is significantly higher than the national average, and is currently ranked last nationally.

### **Why did the problem occur?**

The Department has not fully implemented its corrective action plan to reduce the payment error rates identified through the SNAP QA reviews. First, while SNAP QA staff provided two trainings related to payment errors during state Fiscal Year 2013, the Department did not require county staff to attend the training; rather, the Department allowed the individual counties to decide which staff from the county are required to participate. In addition, the Department has indicated that it plans to implement increased training, county monitoring, and Colorado Benefits Management System (CBMS) system changes in order to address payment errors, but did not plan to do so until Federal Fiscal Year 2014.

### **Why does this problem matter?**

By not ensuring that county department of human/social services caseworkers are appropriately trained on the importance of determining eligibility and benefit payments accurately, the Department risks significant overpayments and/or underpayments to SNAP participants. Further, if the Department fails to ensure that its eligibility and payment error rates for SNAP are at or below federally required levels, the State may face federal sanctions.

(CFDA Nos. 10.551, 10.561; Supplemental Nutrition Assistance Program Cluster; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Subrecipient Monitoring. Classification of Finding: Material Weakness.)

**Recommendation No. 2013-45:**

The Department of Human Services should ensure that it complies with federal compliance requirements related to eligibility and payment error rates for the Supplemental Nutrition Assistance Program (SNAP) by:

- a. Fully implementing its corrective action plan as demonstrated by improving payment error rates to a level at or below the national average for eligible and ineligible cases.
- b. Requiring county caseworkers to attend SNAP training on at least an annual basis.

**Department of Human Services Response:**

Agree. Implementation date: June 2015.

- a. The corrective action plan with Food and Nutrition Services is considered to be a continuous improvement plan that documents identified barriers, the plan for resolution, and the final actions taken to resolve issues in achieving timely and accurate processing of benefits. Over the past two years, primary efforts were focused on improving timely processing, due to the lawsuit and corresponding Amended Court Stipulation Agreement, which required a 5 percent improvement in timely processing every six months. While the state improved timely processing to meet the 95 percent expectation, payment errors increased primarily due to changes in county departments' business processes. To improve the payment and case and procedural error rates, the Department will work with the 10 largest counties on business process improvement strategies that standardize work and procedures within a county office to reduce variances between workers. This work will be completed by September 30, 2014.
  - b. Over the next 18 months, the Department will implement 10 automated system changes that will help to prevent errors and create a plan with the State Staff Development Center to ensure that adequate training is provided to key county staff on an annual basis. This plan will be developed by September 30, 2014 with training to occur by June 2015.
-

## **Temporary Assistance for Needy Families/Colorado Works Program**

The federal Temporary Assistance for Needy Families (TANF or Program) (CFDA No. 93.558) program was created in 1996 by the federal Personal Responsibility and Work Opportunity Reconciliation Act and is overseen at the federal level by the U.S. Department of Health and Human Services. The program was implemented in Colorado by the Department as the “Colorado Works” program to provide time-limited assistance to needy families with children. Program goals include assisting parents so children can be cared for in their own homes or in the homes of relatives; ending dependence of needy parents on government benefits by promoting job preparation, work, and marriage; preventing and reducing out-of-wedlock pregnancies, including establishing prevention and reduction goals; and encouraging the formation and maintenance of two-parent families. During Fiscal Year 2013 the Program’s expenditures totaled approximately \$290 million.

The Department is responsible for ensuring that all expenditures under TANF/Colorado Works are appropriate and that the State complies with federal and state requirements for this program. Operationally, Colorado counties and the Department share the responsibility for ensuring that only eligible beneficiaries receive public assistance benefits under TANF/Colorado Works. Individuals and families apply for TANF/Colorado Works benefits at their local county departments of human/social services. County caseworkers enter information into the Colorado Benefits Management System (CBMS) to determine individuals’ eligibility for benefits. Caseworkers must redetermine each individual’s eligibility on an annual basis.

For adults that are participating in the TANF/Colorado Works program, a condition for continued eligibility in the program is an Individual Responsibility Contract (IRC). The IRC specifies the terms and conditions under which a participant may receive assistance under the program and specifies the responsibilities of the county and the participant.

In addition, caseworkers use the Income, Employment, and Verification System (IEVS) to verify individuals’ earned and unearned income information. If an individual’s income-related data do not match the data in CBMS, an “IEVS hit” will be produced via a CBMS alert. The alert is then returned to the county department of human/social services for research and resolution of the income discrepancy.

The Department's Program Integrity Section is responsible for monitoring county activities. The purpose of the Program Integrity, Compliance & Evaluation unit is to ensure the proper administration of the TANF/Colorado Works program and that federal requirements are met, including ensuring that all counties are in compliance with federal and state TANF/Colorado Works program regulations.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the Department's monitoring controls over, and compliance with, eligibility determinations of applicants and benefit payments to beneficiaries of the TANF/Colorado Works program. In addition, we sought to review the Department's progress in implementing our Fiscal Year 2012 audit recommendation. Specifically, we recommended at that time that the Department continue to work with the county departments of human/social services to ensure the accuracy of eligibility determinations and benefit payments for the TANF/Colorado Works program.

### **What audit work was performed and how were the results measured?**

During our Fiscal Year 2013 audit, we tested a sample of 60 TANF/Colorado Works benefit payments totaling \$23,299 issued between July 1, 2012, and June 30, 2013, and the associated beneficiaries for the Program. We reviewed the eligibility information in CBMS as well as the case files related to these payments to determine whether the payments were made only to eligible beneficiaries, benefits were correctly calculated on the basis of the information entered into CBMS, authorized payments were supported by documentation in the case files, applications were processed timely, IEVS hits were researched and resolved, and data was accurately entered into the CBMS system based on the documentation in the hardcopy case files.

We used the following criteria when evaluating the sample of TANF/Colorado Works benefit payments and beneficiaries:

- **Case file documentation.** According to federal regulations (Reports and Maintenance of Records, 45 C.F.R., pt. 205.60), the State will maintain and supervise the maintenance of records, including records used for determining eligibility. The records are required to include information concerning the date of an individual's application, the date the county determined eligibility, and facts the county used as the basis for the eligibility determination.

- **Data Entry.** Accurate data input is critical to ensure information input into the CBMS system is reliable and that only eligible applicants receive TANF/Colorado Works benefits. In addition, for any system to be effective, the user must be able to rely on the data integrity of the information maintained within that system.
- **Timely Processing.** According to federal regulations (Application, Determination of Eligibility and Furnishing of Assistance, 45 C.F.R., pt. 206.10), within 45 days of receiving an application, the county department of human/social services, on behalf of the Department, must promptly make a decision regarding eligibility.
- **Individual Responsibility Contract (IRC).** Federal regulations (42 USC 608, 2009), state that the IRC must be completed and signed within 30 days after the individual is determined eligible for the Program.
- **Benefit payment calculation.** According to state regulations (Section 3.614.4, 9 C.C.R., 2503-1), a TANF/Colorado Works beneficiary's payment amount is determined using a base grant amount and formula based on household circumstances, including income and time in the program. The base grant amount is established in the state regulations (Section 3.614.21, 9 C.C.R., 2503-1) and is based on household size.
- **Eligibility for payments.** According to the United States Code (21 USC 862, 2011), any individual convicted of a federal or state offense involving possession of a controlled substance shall, at the discretion of the court, be ineligible for any or all federal benefits for up to a year, be required to complete a drug treatment program, be required to perform community service, or any combination of these. In addition, Department regulation (Section 3.606.8.7, 9 C.C.R., 2503-6) states that a TANF/Colorado Works beneficiary shall not receive a state diversion payment for any month for which the individual receives basic cash assistance.
- **IEVS hits.** According to federal regulations (Requirements Governing the Use of Income and Eligibility Information, 45 C.F.R., pt. 205.56), within 45 days of receiving an IEVS hit, the county caseworker must determine whether the information affects eligibility or the amount of TANF/Colorado Works payments and address the hit, as appropriate.

### **What problems did the audit work identify?**

In 33 (55 percent) of the 60 payments tested, we identified at least one error. For some payments, we identified multiple problems with the same case file. These

errors resulted in a total of \$27,782<sup>1</sup> in known questioned costs and \$246 in underpayments. Specifically, we identified the following errors:

- **Incomplete case files.** In 23 cases, the case files did not contain all the documents required to support eligibility determinations and redeterminations. The Department could not provide one case and stated it could not be located. The remaining 22 cases were missing items such as monthly status reports, citizenship documentation, support of income, and/or the individual responsibility contract. These errors resulted in a total of \$24,163 in known questioned costs.
- **Data Inconsistency.** In four cases, the information in CBMS did not match the information on the application or the data was inconsistently reported in CBMS. Specifically, in two cases, the county caseworkers incorrectly entered individuals' information into CBMS, such as citizenship status or whether a member of the household was requesting TANF/Colorado Works benefits. In two cases, the payment tested was an initial payment; however, CBMS noted it as a regular benefit instead of an initial payment. No known questioned costs were identified related to data entry problems.
- **Untimely processing.** In one case, the county caseworkers did not determine eligibility within 45 days of receiving the application, as required.
- **Unsigned IRC.** In three cases, the caseworker did not ensure that the beneficiary signed the IRC within 30 days of applying for or being redetermined eligible for TANF/Colorado Works. One of these errors resulted in a total of \$275 in known questioned costs.
- **Incorrect benefit payments and calculations.** In ten cases, the benefit payment and/or calculation was incorrect. CBMS calculates the benefit payment using information input by the caseworker; however, the caseworker must ensure that the benefit payment is correct. Specifically, two of the Department's benefit calculations excluded or used the incorrect income. In another two cases, the Department's benefit calculation used the incorrect household circumstances. In six cases, we could not determine how CBMS calculated the benefit amount. These errors resulted in a total of \$1,348 in known questioned costs and \$246 in underpayments.
- **Improper payments.** In two cases, the county caseworker issued payments to ineligible individuals. Specifically, in one case, the section on the application for criminal history was not completed which could make

them ineligible to receive benefits yet they received benefits. In one case, a diversion payment was paid to a beneficiary in the same month as a basic cash assistance payment. These errors resulted in a total of \$3,197 in known questioned costs.

- Outstanding IEVS hits.** Two cases contained IEVS hits; however, neither the case file nor CBMS contained any evidence that the county caseworkers had researched and resolved the IEVS hits. One of the IEVS hits affected eligibility and resulted in known questioned costs totaling approximately \$364.

Compliance with TANF/Colorado Works is tested annually as part of the financial and compliance audit of the State. The table below summarizes the identified rates of internal control errors during the 5-year period from Fiscal Years 2009 through 2013. In addition, the table provides our assessment of the level of internal control weaknesses related to eligibility determinations for the TANF/Colorado Works program.

<b>Department of Human Services                      TANF/Colorado Works Program                      Assessed Levels<sup>1</sup> of Internal Control Weakness and                      Associated Internal Control Error Rates                      Fiscal Years 2009 through 2013</b>		
<b>Fiscal Year</b>	<b>Internal Control Weakness<sup>2</sup> Level</b>	<b>Internal Control Error Rate</b>
2009	Deficiency in Internal Control	8%
2010	Deficiency in Internal Control	8%
2011	Deficiency in Internal Control	7.5%
2012	Material Weakness	45%
2013	Material Weakness	55%
<b>Source:</b> State of Colorado Statewide Single Audit Reports. <sup>1</sup> Assessments determined and reported by the Office of the State Auditor as part of the audit of the TANF/Colorado Works program. <sup>2</sup> Severity levels of control weakness are (1) deficiency in internal control: least severe, (2) significant deficiency: more severe, and (3) material weakness: most severe.		

As demonstrated in the table, the internal control error rate identified in our Fiscal Year 2013 audit is significantly higher than the rate identified during our previous three years' audits.

### **Why did the problems occur?**

Although the Department has a monitoring process in place over the county departments of human/social services' administration of the TANF/Colorado Works program, the errors identified through our testwork indicate the need for the Department to make improvements to the review process. Our eligibility testing found that the error rates are increasing, while the Department is conducting fewer county reviews. We found that the Department decreased the number of county reviews it conducted by two from Fiscal Year 2012 to 2013. Specifically, the Department conducted 76 reviews during Fiscal Year 2013 and 78 reviews during Fiscal Year 2012. In addition, in Fiscal Year 2011, the Department conducted 98 reviews. Further, the errors indicate a need for the Department to provide additional guidance and training to counties regarding required case file documentation, follow-up on IEVS hits, data entry, timely application processing, benefit calculations, and required signatures on the IRCs.

In addition, the Department has not determined why some TANF/Colorado benefit amounts were not calculated appropriately. Specifically, the Department has not identified if the miscalculations occurred due to county caseworkers inputting information incorrectly into CBMS or if there is a CBMS programming issue.

Further, while the Department has provided guidance to county caseworkers that they can use an applicant's Medicaid eligibility as verification that citizenship documentation was previously provided by the individual, the Department has not ensured that this is an allowable verification of citizenship or included it as part of its TANF rules.

### **Why do these problems matter?**

The federal requirements for TANF case file documentation, data entry, timely processing, and clearing outstanding IEVS hits help to ensure that benefit payments are made only to eligible individuals and that the payments are correct. Because the county caseworkers perform eligibility determinations and ensure proper benefit calculations by CBMS, the Department needs to have an adequate monitoring process to ensure that the State is not overcharging or undercharging the federal grant. Further, without strong internal controls over TANF/Colorado Works eligibility, the Department cannot ensure that eligible beneficiaries are receiving the appropriate TANF/Colorado Works benefits.

<sup>1</sup>Known questioned costs total \$27,782: \$7,166 identified in the 60 payments selected; \$20,616 identified in the payments outside of the 60. This total will not equal the sum of the amounts noted in the bullets on pages III-90 and III-91 because 15 of the sampled payments costs had more than one problem. Therefore, the related questioned costs are included in more than one bullet.

(CFDA No. 93.558; Temporary Assistance for Needy Families; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility, Subrecipient Monitoring. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-46:**

The Department of Human Services should ensure county departments of human/social services comply with eligibility requirements for the Temporary Assistance for Needy Families program by:

- a. Improving county monitoring by conducting additional reviews.
- b. Investigating and resolving the payment calculation issues identified through the audit.
- c. Providing county training on the issues identified during the audit.
- d. Ensuring program rules include all allowable verification sources for citizenship.

### **Department of Human Services Response:**

Agree. Implementation date: December 2014.

- a. Improved monitoring will include a more robust sample of cases, additional county reviews, cross program monitoring, and predictive analytics. The sample size of cases reviewed will increase to include the entire caseload. Other activities will include targeted samples of high risk cases, and targeted reviews based on reports provided by the Audit Division.
- b. The Department will investigate and resolve the payment calculation issues identified through the audit.
- c. The Department will offer counties a combination of training through the Employment and Benefits Division and the Staff Development

Center. The Department will communicate with counties through director letters, the Division's regular newsletter, county administrator meetings, and other policy guidance documents.

- d. The Department will also update State program rules to provide clarification of acceptable documentation for proof of citizenship and lawful presence.

---

## **Colorado Child Care Assistance Program - Eligibility**

The federal Child Care and Development Fund Program Cluster (Program) provides financial assistance to states to increase the availability, affordability, and quality of child care services for low-income families in which the parents are working or attending training or educational programs. The Program (CFDA Nos. 93.575 and 93.596) was enacted under Title IV-A of the Social Security Act and is administered at the federal level by the U.S. Department of Health and Human Services. In Colorado, the child care portion of the Program is referred to as the Colorado Child Care Assistance Program (CCCAP). During Fiscal Year 2013, CCCAP expenditures totaled approximately \$101 million.

The Department, through its Division of Early Care and Learning, is responsible for overseeing CCCAP and ensuring that the State complies with federal and state requirements for this program. This Program is administered at the local level by the county departments of human/social services and the Department is responsible for monitoring these counties. The determinations of families' eligibility to receive subsidized child care under CCCAP are made by the county departments of human/social services through the Child Care Automated Tracking System (CHATS). Individuals apply for CCCAP at their local county department of human/social services. County case workers then enter applicant-provided data for eligibility determination into its CHATS system and determine whether the applicant is eligible for CCCAP. If the applicant is eligible, then the county reimburses the selected child care provider. Applicant-provided information is maintained within the case files that are at the counties.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the accuracy of eligibility determinations, assess the Department's controls over compliance with federal and state program eligibility requirements, assess the Department's controls over county monitoring, and ensure the accuracy of data in the CHATS system.

## What audit work was performed and how were results measured?

We reviewed a sample of 40 case files for participants who were deemed eligible for low-income CCCAP during Fiscal Year 2013. We reviewed the data entered into the CHATS system as well as the supporting documentation within the case file to determine whether these participants were accurately determined to be eligible and the data was properly input into the CHATS system. In addition, we made inquiries of the Department regarding its county monitoring process to determine if the process was effective.

We applied the following criteria during our testing:

- **Case File Documentation.** The following federal regulations (A Child's Eligibility for Child Care Services, 45, C.F.R, pt 98.20) and state regulations (9 C.C.R., 2503 – 9) relate to application and verification requirements:
  - Federal regulations require that children who receive child care services be under 13 years old.
  - State regulations require county caseworkers to verify the date of birth for all children.

State regulations also require that:

- County caseworkers verify an applicant's ongoing employment income with three months of current paystubs.
  - Applicants sign a participant responsibilities' agreement form.
  - County caseworkers verify an applicant's county residence.
  - County caseworkers generate a child care certificate for all children receiving child care.
- **Data Entry.** Accurate data input is critical to ensure information input into CHATS is reliable and that only eligible applicants receive CCCAP benefits. In addition, for any system to be effective, the user must be able to rely on the data integrity of the information maintained within that system.
    - State regulations (9 C.C.R., 2503 – 9) require accurate updating in CHATS for the following:

- At redetermination, the participant is required to provide updated income documentation. This should be entered into CHATS prior to redetermination of eligibility.
- When there is a change in the number of children receiving child care, the parent fee needs to be updated in CHATS. The parent fee is the portion of the child care payment that the participant is responsible for paying the child care provider, which is based on a sliding scale calculation using the number of children in care as well as the participant's monthly income.
- After an individual is determined eligible and the participant has selected a child care provider, a child care certificate should be generated in CHATS for each child receiving care. Additionally, best practices require that when a case file is closed, the file's status in CHATS needs to be changed from "open" to "closed."
- **Timely Processing.** State regulations (9 C.C.R., 2503 – 9) require completed applications to be approved or denied within 15 calendar days of receipt of the completed application.

### **What problem did the audit work identify?**

In 15 (38 percent) of the 40 case files tested, we identified at least one error. In some cases, we identified multiple problems with the same case file. These errors resulted in a total of \$7,517<sup>1</sup> in known questioned costs. Specifically:

- **Case File Documentation.** In six cases, the counties did not obtain required documentation prior to determining eligibility. Specifically, we found:
  - In one instance, there was no verification of the child's age on file. Thus, eligibility should have been denied until this documentation was received. This resulted in questioned costs of \$2,470.
  - In one instance, the county did not verify an applicant's income with 3 months of paystubs after initially receiving an employment verification letter. Eligibility should have been denied until paystubs were received. This resulted in questioned costs of \$4,229.
  - In one instance, the county did not receive a signed participant responsibilities checklist from the applicant. Eligibility should have been denied until this was received. This resulted in no known

questioned costs because the Department did not make any payments to the child care provider on behalf of the individual.

- In three instances, the county did not verify the applicant's county of residence at application. Eligibility should have been denied until this was verified. This resulted in questioned costs of \$4,229. This is the same \$4,229 questioned in the second bullet.
- **Data Entry.** There were thirteen instances where case file data was not appropriately entered or updated in CHATS, as discussed below.
  - In eight instances, the counties did not update CHATS appropriately after the initial eligibility determination. Specifically, we noted the following:
    - In two instances, updated income data was not entered into CHATS at redetermination. Eligibility was affected in one of these cases, but not the other. These two errors resulted in questioned costs of \$2,873 because updated income would have resulted in one individual being ineligible for the program and the other individual being required to pay a larger parent fee. These errors resulted in the Department overpaying the providers for child care.
    - In two instances, the parent fee was not updated in CHATS to reflect the removal of a child from child care services. Eligibility was not affected in either of these cases. In both cases, these errors resulted in questioned costs of \$140 because an updated parent fee would have caused the Department to under-pay its portion of the child care fee, resulting in \$140 owed back to the parent.
    - In two instances, cases with no open authorizations were still identified as "open" in CHATS. This is because the case files were closed by the county prior to Fiscal Year 2013, but CHATS was never updated to reflect the case being closed. Eligibility was not affected in either of these cases, and no known questioned costs were identified.
    - In two instances, the county did not generate child care certificates for all children receiving care. Eligibility was not affected in either of these cases, and no known questioned costs were identified.

- In five instances, incorrect monthly income data was entered into the CHATS system. These were caused by the caseworker entering the incorrect paystub income in CHATS. Eligibility was not affected in any of these cases, but these errors resulted in questioned costs of \$275 because correct income would have caused a change in the parent fee, resulting in the Department over-paying or under-paying its portion of the child care fee.
- **Timely Processing.** Caseworkers did not process two applications within the 15-calendar-day requirement. The amount of time it took to approve these applications ranged from 1 day to 19 days after the initial 15-day requirement. Eligibility was not affected in either of these cases, and no known questioned costs were identified.

### **Why did the problem occur?**

Although the Department has a monitoring process in place over the counties' administration of CCCAP, the errors identified indicate inadequate training and case file reviews by the State regarding eligibility and case management procedures. Furthermore, the Department lacks a process, such as a standard report, to identify case files that have been closed by a county but left "open" in CHATS.

### **Why does this problem matter?**

Inaccurate processing of case file information to determine eligibility can result in counties improperly granting CCCAP benefits to ineligible individuals, or assessing an incorrect parent fee. Also, the federal government can disallow the payment of federal matching funds for program expenditures that do not adhere to regulations, and the State would be required to bear the cost of these errors. Finally, leaving cases "open" in CHATS when they have been "closed" by the county can result in erroneous Department-wide reporting.

<sup>1</sup>Known unduplicated questioned costs total \$7,517. This total will not equal the sum of the amounts noted in the bullets on pages III-96 through III-98 because some of the questioned costs are the result of more than one problem. Therefore, the related questioned costs are included in more than one bullet.

(CFDA Nos. 93.575, 93.596; Child Care and Development Block Grant, Child Care Mandatory and Matching Funds of the Child Care and Development Fund; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility, Subrecipient Monitoring. Classification of Finding: Significant Deficiency.)

---

**Recommendation No. 2013-47:**

The Department of Human Services (Department) should ensure the county departments of human/social services comply with Colorado Child Care Assistance Program eligibility requirements and ensure accurate data entry into the Child Care Automated Tracking System by improving the training and case file review portions of the monitoring process. In addition, the Department should develop and implement a Child Care Automated Tracking System (CHATS) report for identifying open case files in the system which have been closed by the counties, and to ensure that these cases are properly closed in CHATS.

**Department of Human Services Response:**

Agree. Implementation date: December 2014.

The Department will conduct on site coaching for the 11 counties identified in the audit in January 2014, as well as provide regional and webinar trainings for all other counties throughout 2014. Additionally, the Department will improve upon its internal audit process, in which CCCAP staff will sample cases statewide starting in July 2014. A summary of frequent audit findings will be a standing agenda item during the monthly statewide user group meeting with counties. Based on the findings of these audits we will partner with the individual counties, discuss our findings, and collaboratively develop an individual coaching plan to ensure accountability. The plan will involve on-site, hands on, over the shoulder counseling by our subject matter expert/trainer, and any other technical assistance that is identified during the development of the coaching plan. Future monthly audits will identify whether the counties are responding positively to the coaching plan or whether modifications need to be made. The Department is in the planning stages of a statewide CCCAP conference to be held in October 2014, where we will continue to share the audit findings and work in partnership with the counties to develop best practices to address any trends identified to ensure future compliance with all Federal and State laws and regulations. Lastly, the Department will work with counties to develop a report by December 2014 that lists cases that have been closed by a county but remain active in the CHATS automated system.

---

## **Low-Income Energy Assistance Program**

The federal Low-Income Home Energy Assistance program is designed to provide assistance to low-income recipients to meet home energy costs. At the federal level the program is administered by the U.S. Department of Health and Human Services. In Colorado, the Department administers the program under the name Low-Income Energy Assistance Program (LEAP). Colorado's program assists eligible households with winter heating, weatherization, and furnace repair costs. During Fiscal Year 2013, the Department's LEAP expenditures totaled approximately \$40 million.

The Department is responsible for ensuring all LEAP expenditures are appropriate and that the State complies with federal and state requirements for this program. Operationally, Colorado counties and the Department share responsibility for ensuring only eligible beneficiaries receive LEAP benefits. The counties are responsible for administering the program, while the Department is responsible for monitoring the counties. Individuals apply for LEAP at their local county department of human/social services. County workers then enter applicant-provided data for eligibility determination into the LEAP system and determine whether the applicant is eligible for LEAP. Applicant-provided information is maintained within the case files that are at the counties.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the accuracy of eligibility determinations made for the program during Fiscal Year 2013, assess the Department's controls over compliance with federal and state program eligibility requirements, and ensure the accuracy of data in the LEAP system. In addition, we reviewed the Department's progress in implementing the Fiscal Year 2010 recommendation related to LEAP. Specifically, we recommended at that time that the Department strengthen controls over LEAP in areas including training, county monitoring, and supervisory reviews. The Department agreed with our recommendation.

### **What audit work was performed and how were results measured?**

We reviewed a sample of 40 case files for beneficiaries who were deemed eligible for LEAP during Fiscal Year 2013. We reviewed the data entered into the LEAP system as well as the associated supporting documentation within the case file to determine whether these participants were accurately determined to be eligible and that data was properly input into the LEAP system. In addition we reviewed the Department's plan used to monitor the counties to determine if the plan was effective.

According to state regulations (Section 3.752.21, 9 C.C.R., 2503 – 7), to be determined eligible, households must, at the time of application, be vulnerable to the rising costs of home heating, and meet other requirements of the program as defined in these regulations. We used the specific regulations noted below during our testing:

- **Case File Documentation.** State regulations (Section 3.755.13, 9 C.C.R., 2503 – 7) require a case file to contain a completed application, documentation to support eligibility, written explanations for discrepancies between information on the application and information in the LEAP system, income calculation, and copies of all written notices sent to the applicant. Examples of documentation to support eligibility are proof of lawful presence, documentation to support the applicant's responsibility for paying the heating costs, documentation of communication if emergency case, and documentation verifying applicant's address.
- **Income.** State regulations (Section 3.752.22, 9 C.C.R., 2503 – 7) state that income shall be the countable gross income in any four weeks of the eight weeks prior to the application which best represents the applicant's current income situation.
- **Data Entry.** Accurate data input is critical to ensure information input into the LEAP system is reliable and that only eligible applicants receive LEAP benefits. In addition, for any system to be effective, the user must be able to rely on the data integrity of the information maintained within that system.

In addition, state regulations (Section 3.751.63, 9 C.C.R., 2503 – 7) state that the Department shall have responsibility for monitoring counties based on a monitoring plan developed by the Department.

### **What problem did the audit work identify?**

In 18 (45 percent) of the 40 cases we reviewed, we identified at least one error. In some cases, we identified multiple problems with the same case file. These errors resulted in a total of \$1,561<sup>1</sup> in known questioned costs.

Specifically, we found the following:

- **Case File Documentation.** Six cases were missing documentation to support program eligibility. Three of the six cases were missing documentation to support the applicant's proof of lawful presence. One of

the three cases missing lawful presence documentation was also missing documentation to support the applicant's responsibility for paying the heating costs. A fourth case did not contain documentation or communication with the applicant to confirm whether the case was an emergency. The fifth case did not contain documentation verifying that the applicant resided at the address for which benefits were being applied for. Finally, in the sixth case, the application was not signed by the applicant and, therefore, was incomplete. These errors resulted in questioned costs of about \$1,561.

- **Income.** In four cases, the county caseworkers calculated total household income incorrectly. For example, in one case, the applicant's Social Security income, which should have been considered countable income, was incorrectly excluded from total household income. If the caseworker had correctly included the Social Security income when calculating total income, then the individual would have been found ineligible to receive benefits. This error resulted in questioned costs of \$255.
- **Data Entry Errors.** In ten cases, the counties entered incorrect data into the LEAP system. For example, in one case, the county caseworker entered the individual's address incorrectly into the LEAP system. Eligibility was not affected in any of these cases, and no known questioned costs were identified.

We have tested the Department's compliance with LEAP eligibility requirements as part of our financial and compliance audit of the State for the past 4 years. Overall, we determined nine (23 percent) of the 40 cases discussed above had errors in eligibility. Therefore, the Department's error rate for LEAP eligibility, as determined through our audits, is comparable to the 2010 error rate. The table below summarizes the identified rates of eligibility errors from our Fiscal Years 2010 and 2013 audits. In addition, the table provides our assessment of the level of internal control weaknesses related to eligibility determinations for LEAP.

<b>Department of Human Services</b> <b>Low-Income Energy Assistance Program</b> <b>Assessed Levels<sup>1</sup> of Internal Control Weakness and</b> <b>Associated Internal Control Error Rates</b> <b>Fiscal Years 2010 and 2013</b>		
<b>Fiscal Year</b>	<b>Internal Control Weakness<sup>2</sup> Level</b>	<b>Eligibility Error Rate</b>
2010	Significant Deficiency	25%
2013	Significant Deficiency	23%
<b>Sources:</b> State of Colorado Statewide Single Audit Reports and results of auditor's LEAP case file testing. <sup>1</sup> Assessments determined and reported by the Office of the State Auditor. <sup>2</sup> Severity levels of control weakness are deficiency in internal control (least severe), significant deficiency (more severe), and material weakness (most severe).		

### Why did the problem occur?

Although the Department has a monitoring plan in place over the counties' administration of LEAP, the errors identified through our testwork indicate the need for the Department to make improvements to its county monitoring plan for the LEAP program. Specifically, the Department's current monitoring plan does not include a requirement to or mechanism for performing reviews of the results of the counties' case reviews.

In addition, while the Department has provided guidance to county caseworkers that they can use the Department of Motor Vehicles database to verify a participant's lawful presence, the Department has not updated its LEAP rules to list the Department of Motor Vehicles database as an allowable source for verification of lawful presence.

### Why does this problem matter?

Maintaining accurate and complete case file documentation, as well as ensuring accurate data entry, is important for ensuring that LEAP benefits only go to eligible individuals. Without strong internal controls in place to ensure that counties are accurately determining applicants' eligibility for LEAP, the Department is at risk of federal disallowances or sanctions. In addition, although the data entry errors we identified did not result in questioned costs, all of the errors compromised the integrity of the data in the system. Finally, it is important for the LEAP system to have accurate data in order for the Department to rely on reporting from the system.

<sup>1</sup>Known unduplicated questioned costs total \$1,561. This total will not equal the sum of the amounts noted in the bullets on pages III-101 and III-102 because one of the questioned costs had more than one problem. Therefore, the related questioned costs are included in more than one bullet.

(CFDA No. 93.568; Low-Income Home Energy Assistance; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility, Subrecipient Monitoring. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-48:**

The Department of Human Services (Department) should strengthen internal controls over the Low-Income Energy Assistance Program (LEAP) to ensure it complies with eligibility requirements for LEAP. This should include establishing and implementing a requirement to, and mechanism for, reviewing the results of county social/human services LEAP case reviews. In addition, the Department should update its LEAP rules to include the Department of Motor Vehicles database as an allowable verification source of lawful presence.

### **Department of Human Services Response:**

Agree. Implementation date: September 2014.

Counties currently provide a copy of their case file review plan to the State LEAP program for review and approval. The Department will enhance the oversight of this process by reviewing the county implementation of the plan. This will include, but not be limited to, the State review of a county's log identifying cases reviewed, errors cited, and efforts made to correct identified issues. The Department plans on implementing this new requirement in January 2014 with the start of the annual monitoring schedule. The Department will analyze the results of each county's case file review process and compare it to the error rate identified in the State's case file review process. This data will be used to identify both best practices and areas of deficiency. Counties identified with high error rates (as determined by the Department) will be required to submit performance improvement plans within 30 days of the receipt of the State's LEAP audit report.

LEAP will also update State program rules to provide clarification of acceptable documentation for proof of lawful presence.

---

## Subrecipient Monitoring

The Department “passes through” federal funds to counties, non-profit organizations, and for-profit organizations that qualify as either a subrecipient or a vendor. The Department is responsible for identifying and monitoring entities that qualify as subrecipients of federal funds. A subrecipient is a non-federal entity that expends federal awards received from a pass-through entity to carry out a federal program, but does not include an individual that is a beneficiary of such a program. A vendor is a dealer, distributor, merchant, or other seller providing goods or services that are required for the conduct of a federal program; these goods or services may be for an organization’s own use or for the use of beneficiaries of the federal program. The Department’s program staff are responsible for running and overseeing each federal grant program, including understanding any work performed by a subrecipient. The Department’s program staff are also responsible for the initial Colorado Financial Reporting System (COFRS), the State’s accounting system, account coding for funds passed through by the Department to subrecipients.

Internal audit staff perform their own determination of entities that are subrecipients. Internal audit staff use a COFRS expenditure report to identify entities that receive federal pass-through funds from the Department. Internal audit staff input all of these entities into a tracking spreadsheet and then send letters and questionnaires to these entities requesting additional information, such as copies of the entities’ Office of Management and Budget (OMB) *Circular A-133* Single Audit (Single Audit) reports, expenditure amounts, or an explanation as to why a Single Audit was not completed for the entity.

During Fiscal Year 2013, the Department passed through a total of about \$446 million in federal funds to 272 subrecipients for 43 federal programs.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine whether the Department has adequate internal controls in place to identify its subrecipients of federal grant funds and to ensure that subrecipients are properly monitored for compliance with applicable laws, regulations, and provisions of contracts.

### **What audit work was performed and how were results measured?**

The audit work involved reviewing the Department’s methodology for identifying its non-county subrecipients (i.e., determining whether an entity receiving federal pass-through funds should be classified as a subrecipient or a vendor), reviewing internal audit staff’s subrecipient identification for all 36 non-county

subrecipients identified in internal audit's tracking spreadsheet for Fiscal Year 2013, and reporting of subrecipient expenditures to the OSC.

The audit work also included selecting a sample of nine of the 36 non-county subrecipients identified in internal audit's tracking spreadsheet for Fiscal Year 2013 and determining whether the Department performed monitoring procedures as required under *Circular A-133*, including whether the Department followed up on any findings within those subrecipients' Single Audit reports.

**Identification of Subrecipients.** OMB *Circular A-133*, requires the Department to have a process to identify and differentiate between its subrecipients and vendors to whom it pays federal grant funds. According to *Circular A-133*, characteristics that distinguish an entity as either a subrecipient or vendor are noted in the following table.

<b>Subrecipient Monitoring Distinctions between Subrecipient Organizations and Vendor Organizations</b>	
<b>Category</b>	<b>Federal Definition</b>
<b>Characteristics Indicative of a Subrecipient</b>	<ol style="list-style-type: none"> <li>1. The organization determines who is eligible to receive federal financial assistance.</li> <li>2. The organization has its performance measured against whether the objectives of the federal program are met.</li> <li>3. The organization has responsibility for programmatic decision making.</li> <li>4. The organization has responsibility for adherence to applicable federal program compliance requirements.</li> <li>5. The organization uses the federal funds to carry out a program of the organization as compared to providing goods or services for a program of the pass-through entity.</li> </ol>
<b>Characteristics Indicative of a Vendor</b>	<ol style="list-style-type: none"> <li>1. The organization provides the goods and services within normal business operations.</li> <li>2. The organization provides similar goods or services to many different purchasers.</li> <li>3. The organization operates in a competitive environment.</li> <li>4. The organization provides goods or services that are ancillary to the operation of the Federal program.</li> <li>5. Is not subject to compliance requirements of the federal program.</li> </ol>
<b>Source:</b> Federal Office of Management and Budget's <i>Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations</i>	

In addition, when the Department provides the federal funding to a subrecipient, the Department is required to identify to the subrecipient the applicable compliance requirements and the federal award information, such as the Catalog of Federal Domestic Assistance (CFDA) title and number; the award name and number; and the name of the federal awarding agency.

Further, the subrecipients noted on COFRS as having received federal pass-through funds from the Department should agree to the subrecipients included on

the internal audit tracking sheet and, therefore, those monitored by the internal audit staff.

**Monitoring of Subrecipients.** OMB *Circular A-133* requires the Department to ensure that subrecipients comply with the requirements of OMB *Circular A-133* through receipt of audit reports (Single Audit) for those subrecipients who receive \$500,000 or more in federal funds and ensuring that for any deficiency identified in the audit, required corrective actions occur. The Department must issue a management decision on the subrecipients' audit findings within 6 months of receipt of the subrecipients' Single Audit reports. In addition, as part of reviewing the subrecipient's Single Audit reports, the Department should ensure the subrecipient is in compliance with federal reporting requirements by reviewing the subrecipient's Schedule of Expenditures of Federal Awards (SEFA) and verifying that the Department's federal funds passed through to the subrecipient are reported properly. The SEFA reports the amount of federal funds expended by the subrecipient for each federal program.

**Reporting of Subrecipient Expenditures.** Program staff in the Department's program areas are initially responsible for coding federal funds passed through to subrecipients by using a subrecipient code on COFRS. If program staff have questions, accounting staff provide clarification about subrecipient status. Accurate coding ensures that the Department can properly monitor and report on the funds the Department provides to its subrecipients. Specifically, the Department uses the reporting to submit the information on an Exhibit K to the Office of the State Controller (OSC) which compiles the information and submits it to the federal government.

### **What problem did the audit work identify?**

During our audit, we determined that the Department did not have adequate controls over the identification of subrecipients and reporting of subrecipient expenditures. First, the Department's internal audit staff did not properly monitor one out of the 36 non-county subrecipients as a subrecipient. Specifically, we found that internal audit staff did not ensure that a Single Audit report was completed, obtained, and reviewed for this subrecipient. The Department's program accounting staff recorded this entity as a subrecipient on COFRS and included this entity's expenditures of federal dollars totaling about \$1.3 million as subrecipient expenditures in the Department's Exhibit K submission.

Second, the Department did not code 16 entities appropriately as subrecipients on COFRS, even though the internal audit staff monitored these entities as subrecipients, including receiving audit reports and issuing management decision letters. Because these subrecipients were not coded appropriately on COFRS, the Department did not include approximately \$15 million of expenditures for these

subrecipients on the Department's Exhibit K. The \$15 million consisted of expenditures for the Aging Cluster (CFDA Nos 93.044, 93.045), Special Programs for the Aging Title III, Part D Disease Prevention and Health Promotion Services (CFDA No. 93.043), and National Family Caregiver Support, Title III, Part E (CFDA No. 93.052).

Third, the Department's internal audit staff did not properly track subrecipient expenditures for one (11 percent) of the nine non-county subrecipients in our sample. Specifically, the Department passed through \$83,000 to one subrecipient, but the internal audit tracking sheet inaccurately showed that the Department had passed through a total of about \$780 million in federal funds to this subrecipient. Therefore, the tracking spreadsheet incorrectly showed that a Single Audit report was required from this subrecipient.

Finally, for seven of the nine subrecipient samples reviewed, we found that the Department's internal audit staff did not verify that the subrecipients properly reported in their Single Audit reports the federal programs and the CFDA number for the federal funds passed through to them from the Department. In reviewing the subrecipients' SEFAs and the Department's COFRS expenditures reports that show the CFDA number and amount of expenditures the Department passed through to the subrecipients, we found that for four subrecipients, the CFDA numbers the Department showed did not agree to the subrecipients' SEFAs. In addition, for three subrecipients, the amount of expenditures on the subrecipients' SEFA did not match the amount of funds the Department showed as passed through to these subrecipients.

### **Why did the problems occur?**

We identified three overall reasons for the problems we identified, as noted below.

**Lack of clear responsibility for identifying subrecipients.** The Department's policies and procedures are not clear as to who is responsible for determining the Department's subrecipients of federal programs. Although the Department has assigned responsibility for subrecipient monitoring to internal audit staff, the Department's program staff make their own subrecipient assessments which, in some cases, differ from internal audit staff's assessments. Because program staff are the most familiar with the amount of funding provided to the entities and the various entities' responsibilities, it may be more appropriate for the Department to assign program staff the responsibility for making the subrecipient assessment and reporting the results of this assessment to internal audit and accounting staff. Internal audit staff could then be responsible for ensuring proper monitoring of subrecipients and accounting staff could ensure accurate federal reporting.

**Inadequate policies and procedures for subrecipient identification and reporting.** The Department does not have adequate policies and procedures to address identification of subrecipients and vendors, or the related COFRS coding and Exhibit K reporting. Internal audit staff currently use accounting information and information reported by the entities themselves to identify the subrecipients for monitoring for federal compliance. However, if during internal audit's monitoring process, they identify concerns regarding the identification, then the current procedures do not state who internal audit staff should contact to resolve this issue and ensure proper monitoring and reporting. This would include discussions with accounting staff on the COFRS coding for subrecipients to ensure that the Exhibit K is accurate for subrecipient expenditures and that the internal audit staff are monitoring all subrecipients that are identified on the Department's Exhibit K.

We also found that internal audit staff do not routinely review subrecipient's SEFAs to ensure that the CFDA number for the federal funds passed through from the Department to the subrecipients is properly and accurately reported. Specifically, the internal audit staff do not compare the subrecipient's SEFA to the Department's COFRS reports to ensure that the CFDA numbers and the amount of federal funds agree. If internal audit staff are unable to agree this information, then the Department does not have a procedure, such as contacting the subrecipient or the subrecipient's auditor, to obtain an explanation for the difference and ensure proper corrections are made by the subrecipients.

**Miscommunication and lack of adequate supervisory review.** During our audit, we determined there was a miscommunication between internal audit staff and accounting staff regarding the reliability of COFRS reports for identifying subrecipients and their expenditures. Internal audit staff reported during our audit that, based on discussions with Department accounting staff, the COFRS report internal audit staff use to determine subrecipients and subrecipient expenditures is not accurate, although the report is entitled, "Sub-Recipients of Pass Through Grants." However, based on our interviews with accounting staff, the internal audit staff should rely on this report for subrecipients as it is pulled using the account coding information on COFRS and the accounting staff also use this COFRS information to create the Department's Exhibit K. Internal audit staff were not aware of COFRS reporting that identifies subrecipients and that accounting staff use to prepare the Department's Exhibit K.

In addition, the Department does not have a supervisory review of the internal audit tracking sheet to ensure that the correct amount of pass-through funds are listed and reconciled to the COFRS expenditure reports.

### **Why do these problems matter?**

The Department's failure to appropriately identify subrecipients and perform adequate subrecipient monitoring procedures could result in the Department's subrecipients using federal funds for unallowable activities under federal grants and without the Department's knowledge. In addition, failure to ensure that subrecipients are aware that the Department has determined they are subrecipients of federal grant funding could result in errors in subrecipients' SEFA reporting and a lack of understanding of and compliance with relevant compliance requirements. Both of these conditions may expose the State to increased business risk and potential federal disallowances.

In addition, by not properly identifying subrecipients, the Department did not initially report almost \$15 million in subrecipient federal expenditures on its Fiscal Year 2013 Exhibit K. The Department subsequently corrected this error to ensure proper reporting for Fiscal Year 2013.

(CFDA Nos. 93.043, 93.044, 93.045, 93.052; Special Programs for the Aging Title III, Part D Disease Prevention and Health Promotion Services, Aging Cluster, National Family Caregiver Support, Title III, Part E; Subrecipient Monitoring. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-49:**

The Department of Human Services (Department) should improve its internal controls over subrecipient monitoring by:

- a. Evaluating and reassigning, as appropriate, the responsibility for identifying subrecipients and vendors for the Department's federal programs and ensuring that staff communicate the identification of subrecipients to internal audit and accounting staff.
- b. Developing and implementing policies and procedures for identifying entities as subrecipients and vendors and reporting funds provided to those entities determined to be subrecipients as subrecipient expenditures on COFRS, and on the Schedule of Federal Assistance (Exhibit K) submitted to the Office of the State Controller.
- c. Ensuring internal audit staff are monitoring the Department's subrecipients to ensure the Catalog of Federal Domestic Assistance numbers for the federal funds passed through from the Department to the subrecipients agree to the subrecipients' Schedules of Expenditure of

Federal Awards. This should include procedures for contacting subrecipients and subrecipients' auditors when the information does not agree.

- d. Implementing a supervisory review of the internal audit tracking spreadsheet to reconcile the amounts listed on the sheet agree to the amounts on COFRS.

### **Department of Human Services Response:**

- a. Agree. Implementation date: June 2014.

The Department will evaluate the responsibility for identifying subrecipients and vendors through ongoing monthly fiscal team meetings that include accounting, program, and audit staff. Program staff will be responsible for documenting the subrecipient or vendor status using a checklist. Policies and procedures will be drafted to clearly define roles and responsibilities between accounting, program, and audit staff. The identification of subrecipients will be communicated to internal audit and accounting staff through monthly fiscal team meetings, as well as the checklist.

- b. Agree. Implementation date: June 2014.

Using the checklist as defined in part "a," accounting staff will review the coding of purchase orders and other contract and grant documentation to ensure that correct accounting codes have been assigned to track the subrecipient status. This information will help ensure that correct amounts are reported on the Schedule of Expenditures of Federal Awards (Exhibit K) submitted to the Office of the State Controller.

- c. Agree. Implementation date: June 2014.

The Department's internal audit staff will revise subrecipient monitoring procedures to include a review and reconciliation of subrecipients' Catalog of Federal Domestic Assistance (CFDA) numbers as reported on their Schedules of Expenditures of Federal Awards with Departmental data and the internal audit tracking spreadsheet. Beginning with the Fiscal Year 2013 subrecipient single audits received by the Audit Division, staff has begun to verify the CFDA numbers and contact subrecipients and subrecipients' auditors when the information does not agree.

- d. Agree. Implementation date: March 2015.

Supervisory staff within the Department's internal audit division will perform a supervisory review of the internal audit tracking spreadsheet to reconcile the amounts listed with information on COFRS. Because a new statewide accounting system, CORE, will be implemented in July 2014, the Department will work toward developing a new report within CORE to accurately capture subrecipient data. However, due to uncertainty with the new system, and other anticipated financial data priorities, the Department estimates that a long-term subrecipient report solution will not be in place until March 2015. Until then, we will continue to collect and use a variety of information from grant awards to help ensure accurate reporting to subrecipients and the Office of the State Controller.

---

During Fiscal Year 2013, the Office of the State Auditor conducted the *Vocational Rehabilitation Program* (November 2013) performance audit. The information and comments below were contained in that report.

## Vocational Rehabilitation Program

In 1973, the United States Congress enacted the Rehabilitation Act, which authorized grants to assist states in operating programs designed to provide vocational rehabilitation services to individuals with disabilities. In Colorado, the Division of Vocational Rehabilitation (Division), within the Department of Human Services (Department) administers the State's vocational rehabilitation programs and services, including the Vocational Rehabilitation Program (Program). Colorado's Program provides a variety of services to help unemployed and employed individuals with disabilities prepare for an occupation, enter into employment, become more engaged in or satisfied with their occupation, and retain current employment. The Program has 230 staff and 29 field offices in Colorado that provide a range of services to participants, including vocational counseling, job placement, tuition for higher education, and physical and mental health therapy, among many other services. During Fiscal Year 2013, Colorado's Program provided services and application assistance to 19,834 individuals.

The Program is funded with state and federal funds. The federal government provides reimbursement for 78.7 percent of eligible rehabilitation expenditures up to the total annual federal grant for Colorado, which was about \$40 million in Federal Fiscal Year 2013. The State provides matching funds of 21.3 percent for these federal dollars through general fund and local government funds. The local government funds are from school districts that contract with the Division to

provide vocational rehabilitation services to students. During Fiscal Year 2013, Program revenues totaled about \$53.5 million, the majority of which were federal funds; Program expenditures also totaled about \$53.5 million.

The audit assessed whether the Department of Human Services' Division of Vocational Rehabilitation (Division) ensures: (1) only those who are eligible for the Vocational Rehabilitation Program (Program) are approved for services and the services that participants receive are reasonable and appropriate; (2) that participants achieve employment outcomes successfully; and (3) the Program is managed in a fiscally responsible and efficient manner.

## **Program Management**

According to federal regulations (Purpose, 34 C.F.R., pt. 361.1), the purpose of the State's Vocational Rehabilitation Program is to provide a statewide comprehensive, coordinated, effective, efficient, and accountable program of vocational rehabilitation services to individuals with disabilities, consistent with the individual's strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice, so that the individual may prepare for and engage in gainful employment. The Department has delegated the authority to administer the State's Program to the Division. According to statute, the Division is a Type 2 entity with the authority to promulgate policies and rules and administer Program operations, but the Division's authority, duties, and functions fall under the Department's purview. As the administrator of the State's Program, the Division is responsible for developing a system of management practices and internal controls, including a series of policies, procedures, actions, and activities throughout the Program's operations, which ensure the Program operates effectively and efficiently, complies with laws and regulations, and has a culture of accountability.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to determine whether the Division manages the Program effectively and sufficiently oversees and monitors its field offices' practices and delivery of Program services to ensure the Program operates in accordance with the regulatory intent and purpose of the Program. We performed the following audit work: (1) obtained and reviewed data from the Division's electronic case management system, the Accessible Web-Based Activity and Reporting Environment (AWARE) application, to assess the Program data available from the system and system capabilities; (2) reviewed the case files of a random sample of 85 participants who received Program services from one of 13 sampled Division field offices during Fiscal Year 2013 to determine whether Program staff properly determined the participants' eligibility, authorized and paid for Program services, and monitored the participants to ensure they

successfully met their employment goals; (3) reviewed the Division's Program policy manuals that were in place from Fiscal Years 2007 through 2013; (4) reviewed materials from training sessions the Division provided its staff during Fiscal Year 2013; (5) interviewed Division management and staff, and Program staff, on Program operations, Division guidance and training, and how staff use the AWARE system; and (6) interviewed management from the federal Rehabilitation Services Administration (RSA), which oversees the Program and promulgates the federal regulations. Further, we surveyed or interviewed management from vocational rehabilitation programs in eight other states to determine best practices for Program management.

### **How were the results of the audit work measured?**

We used the following criteria to evaluate the Division's management of the Program:

**Program administration and oversight.** Federal regulations (Methods of administration, 34 C.F.R., pt. 361.12) require the State to properly and efficiently administer the Program and to carry out all functions for which the State is responsible under federal regulations. Federal regulations [State agency for administration, 34 C.F.R., pt. 361.13(c)] also require the Division, as the administrator of the State's Program, to establish procedures to ensure financial accountability and accurate data collection; oversee all decisions affecting eligibility for vocational rehabilitation services, including the nature, scope, and provision of services; oversee the allocation and expenditure of vocational rehabilitation funds and determinations of case closure; and formulate and implement policy.

State statute (Section 26-1-111, C.R.S.) requires the Department to administer and supervise all of the State's public assistance and welfare activities, including rehabilitation programs. As such, the Department has a duty to taxpayers who provide the federal and state funding for this Program, as well as to those who receive services from the Program, to ensure that Program funds are spent appropriately. Further, best practices for program management in Colorado government agencies are identified in the State Measurement for Accountable, Responsive, and Transparent (SMART) Government Act (Section 2-7-201 et seq., C.R.S.), and a 2010 study of government programs sponsored by the Project Management Institute. These sources identify the elements of a well-managed government program, including standardized program oversight processes and tools and practices developed to aid program implementation, such as systems to maintain program information.

**The Program is not an entitlement.** Federal regulations [Assessment for determining eligibility and priority for services, 34 C.F.R., pt. 361.42(a)(5)] specify that nothing is to be construed to create an entitlement to participants for any vocational rehabilitation service. As such, in reviewing the federal grant award documentation and through discussion with RSA management, the federal grant is a fixed amount awarded to the State and therefore, the State must manage the Program within the state and federal funding that is provided. The Division should have mechanisms—such as policies, procedures, and monitoring—in place that ensure Program funds are spent efficiently, effectively, and appropriately to provide services to participants. Further, RSA management stated that the State can limit services for the Program as long as the State has a standard and consistent process to review and allow for reasonable exceptions to the limits.

**Reasonable, necessary, and appropriate use of public funds.** Federal regulations [Written policies governing the provision of services for individuals with disabilities, 34 C.F.R., pt. 361.50(c)] require the State to maintain written policies that govern the rates for all purchased services and allow the State to establish a fee schedule to ensure service costs are reasonable. The Division's Policy Manual (Division policy) states that "all services and goods that have been determined to be necessary and appropriate must be procured at the least possible cost insofar as they are adequate to meet the needs of the individual" (Division policy, Section 12.11.3). In April 2013, the Division added a statement to its policy that "the Division of Vocational Rehabilitation is entrusted to be good stewards of public funds when providing necessary and appropriate rehabilitation services leading to meaningful careers."

### **What problems did the audit work identify?**

Throughout this audit, we identified pervasive problems in the Program that raise questions about the Division's oversight, system of internal controls, and culture of accountability. Specifically, we identified problems in each area of the Program we reviewed, including audit exceptions in 83 (98 percent) of the 85 sampled participant case files, resulting in a total of 20 audit findings and recommendations and \$83,582 in known questioned costs. We found:

- The Program did not have adequate processes or controls for determining eligibility, setting employment goals, authorizing services for participants, processing payments, monitoring cases, ensuring participants meet employment goals, and budgeting and managing public funds, among numerous other problems.
- The Program did not have processes to prevent abuse and waste of Program funds and exposure to legal risks. In addition, the Division has

not held Program field offices and staff accountable for complying with federal regulations, state statutes and rules, and Division policies.

- Division and Program staff had a general misunderstanding of the Program's purpose and scope, as specified in federal regulations, and as a result, the Program has provided participants a range of goods and services including car repair, dental surgery, out-of-state tuition, computers and cell phones, household items, funds for living expenses, retailer gift cards, and direct payments made to participants, among many other goods and services. Some of the goods and services the Program provided participants did not appear reasonable or appropriate.

The following table summarizes each Program area we reviewed and our resulting audit findings and recommendations.

<b>Vocational Rehabilitation Program Performance Audit Summary of Findings</b>				
<b>Rec. No.</b>	<b>Audit Finding Area</b>	<b>Exception or Error Rate (If Applicable)</b>	<b>Questioned Costs (If Applicable)</b>	<b>Internal Control Weakness Level</b>
2013-50	Program Management	--	--	Material Weakness
2013-51	Duration of Program Services for Participants	--	--	Material Weakness
2013-52	Service Authorizations	28% <sup>1</sup>	\$33,559 <sup>2</sup>	Material Weakness
	Payments	38% <sup>1</sup>		
2013-53	Eligibility Determinations	29%	\$14,0572	Material Weakness
2013-54	Setting Employment Goals	29%	\$ 7402	Material Weakness
2013-55	Comparable Services and Benefits	44%	\$10,9432	Material Weakness
2013-56	Severity of Disability Determinations	48%	--	Significant Deficiency
2013-57	Case Management	19%	\$ 4,0512	Significant Deficiency
2013-58	Wait List Management	--	--	Significant Deficiency
2013-59	Fiscal Management	76%	--	Material Weakness
2013-60	Corporate Credit Accounts	90%	\$13,837	Material Weakness
2013-61	Participant Use of Program Funds and State-Owned Equipment	--	\$ 4,029	Material Weakness
2013-62	Participant Contributions	70%	\$ 5,135 <sup>2</sup>	Material Weakness
2013-63	Fee and Bonus Payments to Vendors	--	--	Significant Deficiency
2013-64	Administrative Costs	14%	--	Significant Deficiency
2013-65	Contract Management	67%	--	Significant Deficiency
2013-66	Procurement Cards	43%	\$ 9	Significant Deficiency

2013-68	Complaint Management	86%	--	Significant Deficiency
2013-69	AWARE Application Backups	--	--	Significant Deficiency
<b>Total Known Questioned Costs</b>			<b>\$83,582<sup>3</sup></b>	
<b>Source:</b> Office of the State Auditor's summary of the audit findings and recommendations.				
<sup>1</sup> Recommendation No. 2013-52 has two samples; therefore, the table shows the error rates for the service authorizations sample and payments sample.				
<sup>2</sup> These specific questioned costs were identified during the review of the 85 sampled case files. Some case files had multiple exceptions in more than one finding area.				
<sup>3</sup> Total known questioned costs are the total unduplicated questioned costs identified during the audit. Some questioned costs listed in the table are repeated in some of the findings and therefore do not sum to the total known questioned costs.				

In addition to the problems listed above, the Division was unable to provide all Program data from its AWARE system that we requested. Specifically, although the Division was able to provide data on the individuals served by the Program and the payments made to vendors during Fiscal Year 2013, the Division was

only able to provide Program data that were updated as of the date Division staff extracted the data from AWARE. For example, the Division could not provide data from AWARE on a particular participant's case, disability, or employment goal as of a particular date, such as July 1, 2012; this type of case information could only be obtained by manually reviewing the hard-copy case files, which we found were not always complete. Further, the Division could not provide certain historical information needed to determine Program trends, performance, and federal compliance. For example, the Division could not provide the following data:

- The number of participants who met their employment goals, which are documented in their Individualized Plans for Employment, after being served by the Program,
- The Program services that each participant received that the Division recorded outside of the AWARE system, or
- The total dollar amount of services that each participant has received through the Program.

Further, during the audit we requested AWARE data on the number of participants who were employed or not employed at the time they applied for Program services. Division staff reported that these data were not available in AWARE but could be found in the hard-copy case files. Therefore, we reviewed the case file documentation to determine the employment status for the 85 sampled participants; we found 36 (42 percent) were employed and 49 (58 percent) were not employed at the time of their Program application. After the audit was completed, the Division reported that it could provide data from AWARE on the applicants' employment status and provided these data on November 6, 2013. We performed reliability testing on the data by comparing it to the 85 sampled participants' case file documentation and found that for some participants the data did not match what was in the case files. For example, for seven of the 85 participants, the participants' hard-copy case files showed that they were employed at the time of application, but the data provided by the Division in November showed that these participants were not employed. Therefore, we questioned the reliability of these data.

Lastly, we found that the AWARE system does not include all payment information for all Program participants because some payments, such as bus passes and equipment that Program staff purchase for participants through procurement cards, are processed through the State's accounting system, the Colorado Financial Reporting System (COFRS), rather than through AWARE.

## Why did the problems occur?

Overall, we found that the problems we identified have occurred because the Division has not established effective Program management practices to ensure that it carries out both its responsibilities under federal and state law and its duty to taxpayers. Specifically, we found:

**Lack of Division and Program oversight.** The Department has not exercised its oversight authority over the Division and established systems to ensure accountability. For example, the Department has allowed the Division considerable latitude with respect to administering the Program and determining and implementing appropriate controls, including controls related to eligibility, service authorizations, accounting, budgeting, use of Program funds, and state contracts. Further, the Department has not established oversight mechanisms for monitoring the Division's policies and practices to ensure transparency of Division operations, including documented processes and open communication and reporting to Department management.

This is not the first time our Office has raised concerns with Division controls and management. Since 1997, we have identified areas for improvement at the Division through five financial audits and one performance audit. Most of the issues identified in prior audits are consistent with concerns identified in our current audit, including weaknesses in the timeliness of eligibility determinations, fiscal controls and accounting procedures, case file management, administrative expenditures, supervisory reviews, quality assurance reviews, and contract management. Despite recurring problems in the Division over the past 16 years and the Department's agreement with our prior audit recommendations, our current audit findings demonstrate that the Division has not acted to sufficiently address the problems identified and strengthen controls.

**Lack of clear direction and reporting on the Program's purpose.** We found the Division has not clearly or accurately defined the purpose and scope of services for this Program, in accordance with federal regulations, nor has the Division ensured that the Program is not treated as an entitlement. For example, we found that in several Division documents and reports to entities such as the Joint Budget Committee (JBC), the Division incorrectly stated that it cannot stop services to a participant, which contradicts federal regulations. We also found training materials that the Division provided its staff in Fiscal Year 2013 that stated that the Division's policies and procedures are intentionally vague in areas such as eligibility, employment goals, and services, to provide Program counselors discretion. Further, some staff we interviewed did not have an accurate understanding of the purpose of the Program. Some Division and Program staff mistakenly believed the Program is required to help the participants achieve their employment aspirations, regardless of the cost, time required in the Program, and

whether the aspirations are reasonable; other staff stated that they believed they were required to provide all goods and services that a participant wants as long as the good or service may be needed for a participant to obtain employment, keep a job, or be happy in their job, which, as we discuss in the audit findings, has resulted in Program staff allowing significant latitude in the types, costs, and duration of goods and services that participants receive.

**Lack of adequate data to monitor the Program.** Based on interviews with Division staff and the Division's documentation and data, we determined that the Department and Division have not sufficiently determined the Program data and AWARE reports that are necessary to adequately monitor the Program, nor have they developed a system project plan outlining the steps the Division should take to develop AWARE reporting capabilities. Specifically, at the beginning of the audit, the Division could not provide us a listing of all the data that is tracked within AWARE which is needed to ensure Department and Division management have a sufficient understanding of the data maintained in the system. Further, the Division does not have a data warehouse to review historical Program data and does not require staff to record all payment information for all Program participants in AWARE. Once the Department and Division identify the AWARE capabilities needed to manage and oversee the Program and allow staff to record all payment information in AWARE, the Division would need to prepare a system project plan and provide it to either the State's Office of Information Technology or the AWARE vendor so that the reporting capabilities can be implemented.

**Lack of oversight and monitoring of determinations made by Program counselors and supervisors.** Program administration and service provision is decentralized and delegated to the 29 Program field offices. The Division has not implemented sufficient processes to oversee counselors' and supervisors' activities. For example, the Division does not require supervisory reviews to ensure that counselors properly determine eligibility, employment goals, and services; follow proper accounting controls; and comply with federal regulations, state laws and rules, and Division policies. In addition, the Division does not adequately monitor payments issued by Program staff to ensure the payments are reasonable and appropriate. As we discuss in the audit findings throughout the report, the Division has not established sufficient limits on the types or costs of services provided through the Program nor has the Division established a process for reviewing and approving exceptions to Program limits, in line with federal regulations.

### **Why do these problems matter?**

In establishing the Program within the Division, the General Assembly vested the Department with broad responsibilities for managing about \$53 million in

Program funding annually. Comprehensive steps to improve internal controls and oversight of Division activities are needed to ensure accountability to taxpayers for the effective use of these funds. The Program provides a broad spectrum of services for individuals determined eligible for this program. By not having clear guidance and monitoring of Program services and payments, the Department cannot ensure that services are provided to individuals consistently and appropriately.

Because the Division could not provide the data on participants who met their employment goals, the services that each participant received, and the total dollar amounts of those services, we could not determine the overall effectiveness of the Program. Further, without adequate AWARE system capabilities to allow the Division to review the records of all cases, services, and payments, the Division does not have an accurate and electronic historical record of its participants, achievements, and challenges from which future staff and leadership can learn. Without sufficient controls to maintain historical Program data there is a risk that case file or payment data information in AWARE could be manipulated or altered without detection. For example, we received payment data as of June 26, 2013, that showed that \$19.9 million in participant vocational rehabilitation services were authorized, incurred, and paid during Fiscal Year 2013 through that date. In September 2013, the Division provided updated payment data for Fiscal Year 2013 that covered services authorized and incurred as of June 30, 2013 but were paid as of September 19, 2013, which totaled \$20.9 million. This indicates that the Program made more than \$1 million in payments between June 26 and September 19 for Fiscal Year 2013 services. It is unclear whether the large number of payments were appropriate or whether the AWARE reports were consistent or accurate.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-50:**

The Department of Human Services (Department) should improve its oversight of the Division of Vocational Rehabilitation (Division) and management and administration of the Vocational Rehabilitation Program (Program) by:

- a. Establishing and implementing a plan for conducting ongoing monitoring of the Division's performance to ensure the Division accomplishes its duties and responsibilities to administer the Program and is accountable to the Department. The plan should include following up on the Division's

progress in implementing external audit recommendations from the Office of the State Auditor to ensure implementation is timely and effective.

- b. Ensuring Division compliance with applicable federal regulations, state statutes and rules, and Department and Division policies. This should include reviewing federal regulations, state statutes and rules, and Department policies to identify inconsistencies and areas for statutory and policy clarification; working with the General Assembly, as needed, to clearly specify the role and responsibilities of the Division and help ensure it accomplishes the purposes intended by federal regulations and state laws; and revising Division policies, procedures, and staff training to provide clear guidance on the purpose and scope of the Program.
- c. Determining the record keeping and reporting capabilities needed in the Accessible Web-Based Activity and Reporting Environment (AWARE) system and developing and implementing a system project plan to provide to either the Office of Information Technology or the AWARE vendor to implement any necessary system changes. This review and plan should include a method for extracting historical Program data.

### **Department of Human Services Response:**

- a. Agree. Implementation date: March 2014.

In July 2013, the Department began performing a large-scale reorganization of the Division of Vocational Rehabilitation. Since that time, the Division was moved into the Office of Long Term Care (the Office) to be co-located with similar programs. The Department has hired a new director of the Office and a seasoned audit manager for the position of Deputy Director for the Office. A new Division Director also was hired in October 2013. The Division will be working closely and collaboratively with the Department's Divisions of Accounting, Audit, Budget, and Procurement to address the issues identified throughout the audit.

The Department will establish a corrective action plan and conduct ongoing monitoring of the Division's performance. The Department will convene a workgroup to assist with developing this plan; the workgroup participants will include vocational rehabilitation staff within the Region VIII Technical Assistance and Continuing Education Program, a federal Rehabilitation Services Administration-funded regional technical assistance resource housed at the University of Northern Colorado. The Department will ensure the Division

properly implements each recommendation by using the audit tracking process already in place to manage the timely resolution of external audit recommendations from the Office of the State Auditor. In addition, the Division will rewrite its annual employee performance plans (PMAP) for management positions to include individual and team objectives related to ensuring Program accountability and teamwork.

- b. Agree. Implementation date: July 2014.

The Department, by way of the Office Director, Budget Division, and Accounting Division, will work with the Division to review federal regulations, state statutes and rules, and Department and Division policies to identify inconsistencies and/or areas for statutory and policy clarification. The Division has begun the process for a formal revision of its rules. The Division will seek technical assistance from the federal Rehabilitation Services Administration, as necessary, regarding interpretation of the Rehabilitation Act. Based on this comprehensive review, the Division will revise its policies and procedures to comply with federal and state laws, and will train staff by providing guidance on the purpose and scope of the Program.

- c. Agree. Implementation date: November 2014.

The Division will develop a system project plan to determine the specific record keeping and reporting capabilities that are needed for the AWARE system, as well as the costs associated to implement the changes. The Division will also evaluate how other states are using the AWARE system successfully in a data-driven environment and incorporate those concepts, as necessary, into its plan. With the technical assistance of the vendor, the Division will assess the capacity of the AWARE system to extract historical program data. The Division will implement the system's project plan as feasible.

---

## **Duration of Program Services for Participants**

The primary goal of the Program is to achieve successful employment outcomes for its participants. A key element that the Division uses to help ensure that participants will succeed in achieving gainful employment is the development of an Individualized Plan for Employment (Plan) for each participant. The Plan outlines the services that the individual needs to achieve his or her employment outcome, or goal. To achieve an employment goal, participants may receive a variety of services, such as job skills training, transportation assistance, and

academic training in which the participant attends college to obtain a degree that may enable the participant to get a job. Each participant's Plan includes a section for the Division to document the estimated length of time it will take the individual to complete the planned vocational rehabilitation services and reach his or her employment goal and a section to document the estimated costs of those planned services.

In Fiscal Year 2013 the Program provided some type of service to 19,834 participants, which included those individuals who were determined eligible for the Program and only received application assistance and referral services. During the fiscal year, the Program paid for 9,256 of the 19,834 participants to receive a good or service in addition to the vocational rehabilitation services provided internally by Program staff. The amount of time that these participants had been receiving Program services averaged 1.8 years, and the cumulative costs of their goods and services to the Program recorded in the Division's AWARE system in Fiscal Year 2013 totaled about \$22 million or an average of about \$2,434 per participant for the year.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to analyze the length of time that participants are generally in the Program before successfully reaching their employment goals and the costs to the Program of providing their services. We reviewed the length of time that participants had been receiving Program services since they were determined eligible and the costs to the Program to serve them. We identified 1,168 participants who were determined eligible before July 1, 2008, but still received services during Fiscal Year 2013, 5 years later, and reviewed Division documentation for a sample of eight of those 1,168 participants. The sample included four participants out of the 1,168 participants who had the longest periods of eligibility in the Program and an additional random sample of four participants from the remaining population of 1,164 participants. We reviewed hard-copy case files and information in the Division's electronic case management system, AWARE, for the eight sampled participants to understand the reasons they continued to receive Program services in Fiscal Year 2013.

### **How were the results of the audit work measured?**

We used the following criteria when evaluating the length of time participants receive Program services:

**Reasonable time periods.** Federal regulations (Written policies governing the provision of services for individuals with disabilities, 34 C.F.R., pt. 361.50) specify that states may establish reasonable time periods for the provision of

services provided that the time periods are not so short as to effectively deny an individual a necessary service and not absolute where exceptions are allowed so that individual needs can be addressed.

**Employment outcomes.** Federal regulations (Purpose, 34 C.F.R., pt. 361.1) require state vocational rehabilitation programs to assess, plan, and provide vocational rehabilitation services for individuals with disabilities so that they may prepare for and engage in gainful employment. Federal regulations [Content of the Individualized Plan for Employment, 34 C.F.R., pt. 361.46(a)(1)] also require that each participant's Plan include a description of the specific employment outcome that is chosen by the participant.

**Monitoring of participants' Plans.** Division policy (Section 11.7) states that the counselor shall monitor and review the implementation of the Plan on a regular basis and document such reviews in the case file. Division policy (Section 11.8) also states that the entire Plan must be reviewed at least annually by the counselor and the counselor must document the annual review in the participant's case file; the annual review shall encompass the progress toward and continued appropriateness of the planned employment outcome, objectives, vocational rehabilitation services' providers of goods and services, evaluation criteria, evaluation methods, and evaluation schedules contained in the Plan.

**Reasonable costs.** Federal regulations [Written policies governing the provision of services for individuals with disabilities, 34 C.F.R., pt. 361.50(c)] require the State to maintain written policies that govern the rates for all purchased services and allow states to create a fee schedule to ensure each service is procured at a reasonable cost to the Program. Regulations also specify that the fee schedule must not be so low as to effectively deny a participant a necessary service. The State should allow exceptions to the fee schedule so participants' needs can be addressed, and the State may not establish an absolute dollar limit on service categories or the total services a participant may receive. According to RSA management, the Division can limit services, and therefore costs, for the Program as long as the Division has a standard and consistent process to review and allow for reasonable exceptions to the limits. Division policy (Section 12.11) states that all vocational services and goods provided by the Division must be necessary, appropriate, and provided at the least possible cost.

**Case closure criteria.** Division policy (Sections 17.1 and 17.51) lists numerous reasons for case closure; some of the reasons include closure due to a successful employment outcome or ineligibility; "The individual cannot be contacted or located and there is documentation in the [case file] showing that the [Division] counselor made repeated and appropriate efforts to contact the individual and, when appropriate, his/her authorized representative;" and "The individual has failed to cooperate, and documentation in the [case file] shows that the [Division] counselor has made repeated and appropriate efforts to encourage participation."

### What problems did the audit work identify?

Overall, we found that some participants remained in the Program for extended periods of time without meeting their employment goals. These participants cost significantly more than the average cost per participant. The table below shows a summary of the 9,256 participants for whom the Program paid for goods and services, in addition to the vocational rehabilitation services provided internally by Program staff, in Fiscal Year 2013. The table includes the goods and services the Program purchased for the participants and recorded in AWARE since the date the participants had entered the Program, which in some cases was in the 1980s; the participants' average costs for goods and services during Fiscal Year 2013; the average number of years the participants have received Program services; and the range in the number of years that the participants have received services.

<b>Vocational Rehabilitation Program                      Summary of Participants Served                      Fiscal Year 2013<sup>1</sup></b>				
<b>Total Participants</b>	<b>Costs Recorded in AWARE for Participants Since Entering the Program</b>	<b>Average Cost per Participant in Fiscal Year 2013</b>	<b>Average Time Receiving Services</b>	<b>Range of Time Receiving Services</b>
9,256	\$60.4 million	\$2,434	1.8 years	2 weeks to 32 years
<b>Source:</b> Office of the State Auditor's analysis of Division of Vocational Rehabilitation data from the Accessible Web-Based Activity and Reporting Environment (AWARE) system. <sup>1</sup> Data are as of June 18, 2013.				

Further, we found that the Program costs incurred by the Division for about one-third of the participants (about 2,800 of the 9,256) exceeded the average cost per participant of \$2,434. The costs to the Program to serve each participant during Fiscal Year 2013 varied significantly, ranging from about \$1 to \$114,000.

### Problems Identified with Sampled Cases

We reviewed the cases for a sample of eight out of the 1,168 participants who were determined eligible before July 1, 2008, but still continued to receive services during Fiscal Year 2013. The following table summarizes each of the eight participant's length of time in the Program, the cumulative amount paid for each participant's services, and the key goods and services that the Program purchased for each participant. These participants also received vocational

rehabilitation services directly from Program counselors, which were internal costs to the Program and not reflected in the table as Program payments.

<b>Vocational Rehabilitation Program</b> <b>Sample of Eight Participants Who Received Services in Fiscal Year 2013</b> <b>As of August 2013</b>					
<b>Participant</b>	<b>Year Determined Eligible</b>	<b>Years in Program</b>	<b>Goods and Services Paid for by the Program<sup>1</sup></b>	<b>Key Goods and Services Received</b>	<b>Met the Employment Goal?</b>
#1	1981	32	\$203,000	Tuition, assistive technology <sup>2</sup> , and personal adjustment training <sup>3</sup>	No
#2	1988	25	\$52,000	Tuition, books, childcare, transportation, and a computer	No
#3	1994	19	\$315,000	Tuition, books, living expenses, transportation, and computers	No
#4	1994	19	\$150,000	Tuition, books, assistive technology <sup>2</sup> , and transportation	No
#5	2001	12	\$21,000	Tuition, books, and medical supplies	No
#6	2006	7	\$46,000	Tuition, books, and childcare	No
#7	2006	7	\$23,000	Dental treatment, auto repairs, and employment assistance	No
#8	2008	5	\$1,700	Psychiatric, orthopedic, and hearing evaluations	Unknown

We found that there was no evidence that any of the eight sampled participants met their employment goals despite receiving services through the Program for 5 or more years. We also found additional problems with each of the eight cases, including that the Program: (1) allowed participants to change their employment goals multiple times, (2) lost contact with some participants, and (3) failed to close participants' cases within reasonable time frames when evidence documented in the case files showed that the participants were unable or unwilling to participate in the Program or meet employment goals. We identified the following specific problems:

- For Participant No. 1, who was determined eligible in 1981, although Division staff reported that documentation was missing for much of this case and we were, therefore, unable to determine the participant's original employment goal, the available case file documentation showed that the participant changed the employment goal at least twice. Specifically, the participant's employment goal changed from counselor to answering service agent and then to self-employment. Case notes in both May 2011 and July 2013 stated that the participant was not progressing toward his or her employment goal, but the case was still open. As of August 2013, this participant was continuing to receive services from the Program and had received a total of \$203,000 in Program goods and services.
- For Participant No. 2, who was determined eligible in 1988 and originally had an employment goal to become an administrative assistant, the Program paid for the participant's tuition toward a bachelor's degree, a certificate for a course of study that differed from the bachelor's degree, and other services. The participant changed the employment goal from administrative assistant to Web designer after the Program had paid for much of the participant's college education to become an administrative assistant, and the Program revised the participant's Plan based on the new goal. Case file documentation showed that the participant was frequently out of contact with the counselor, often for 1 year or more at a time, yet the Program continued to pay for the participant's college coursework. The case was closed in January 2013 without the participant achieving the employment goal. The Program had paid for a total of \$52,000 in goods and services for this participant.
- For Participant No. 3, who was determined eligible in 1994 and had an employment goal to become a medical doctor, the Program paid for the participant to obtain a bachelor's degree and a doctoral degree, as well as a doctorate in medicine from a university in the Caribbean. Case notes indicated that the participant applied to schools located within the United States but was not accepted to those schools. Case notes stated the

participant was repeatedly out of compliance with the Plan and Program requirements, including not keeping contact with the counselor for long periods, not submitting monthly progress reports, and misusing Program funds. The case notes also indicated the participant had difficulty progressing toward the employment goal. The participant's counselors amended the Plan numerous times to authorize new degree programs to improve the participant's chance of being accepted into a medical school and allowed the participant more time to complete each degree. Although the case file documentation indicated that the participant had completed the degrees, the participant's case was still open and the participant had not achieved the employment goal of medical doctor as of October 2013 because the participant was unable to pass the medical licensure exam. As of August 2013, the Program had paid for a total of \$315,000 in goods and services for this participant. Further, paying for the participant's graduate education outside of the United States did not appear to be a necessary, appropriate, or prudent use of federal and state funds.

- For Participant No. 4, who was determined eligible in 1994, the Program staff allowed the participant to change employment goals and change college majors, which resulted in the Program paying for the participant's college classes under both majors. The participant originally had an employment goal of elementary school teacher and changed it to human services assistant. According to Program staff, the participant attended classes part-time and was allowed by Program staff to change majors and the employment goal to human services assistant, all of which significantly delayed the participant's progress toward completing a degree and achieving employment. As of August 2013, the participant's case was still open, the participant had not completed a degree or reached his or her employment goal, and the Program had paid a total of \$150,000 for goods and services. Additionally, Program staff told us that the participant's records from 1994 through 2004 were inadvertently destroyed, so we were unable to review all documents since the participant had been in the Program.
- For Participant No. 5, who was determined eligible in 2001, the Program staff allowed the participant to change employment goals and change college majors, which resulted in the Program paying for the participant's college classes under both majors. Specifically, in 2008, the participant changed majors and the employment goal from a public health educator to freelance writer. According to case file documentation, the participant attended classes part-time and counselors amended multiple Plans to extend the time for the participant to complete a degree. In addition, case notes showed that the participant was out of contact with the counselor from January 2012 until July 2013, but the case was not closed. As of

August 2013, the participant's case was still open, the participant had not completed a degree or met the employment goal, and the Program had paid a total of \$21,000 for goods and services.

- For Participant No. 6, who was determined eligible in 2006 and originally had an employment goal to become an engineer, the Program paid for the participant to take classes toward two bachelor's degrees in two different fields from two different institutions, although the participant was expelled from the first institution and failed to stay in contact with the counselor for more than 2 years. When the participant was expelled, the counselor approved a change to the Plan for the participant to obtain an information technology degree at another institution. Case file documentation from 2010 showed that the participant was also suspended from the second institution, and the counselor lost contact with the participant in early 2011. The most recent case note was dated March 2012 and stated that the counselor had been unable to contact the participant. As of August 2013, the participant had not achieved the employment goal but the case was still open despite lack of contact with the counselor for nearly 2 years. Further, the Program had paid a total of \$46,000 in goods and services for this participant.
- For Participant No. 7, who was determined eligible in 2006 and had an employment goal of animal groomer, between 2006 and 2009 the Program paid for dental services and to repair the individual's automobile. According to hard-copy and electronic case file documentation, the participant's services were suspended in 2009 but were reinstated in 2010 to provide additional dental work and assistance with obtaining employment as an animal groomer. Altogether the Program spent \$15,600 on dental work for the participant, although case file documentation did not support that dental work was necessary for the participant to become an animal groomer. As of August 2013, the participant had not achieved the employment goal, but the case was still open and the Program had paid a total of \$23,000 for goods and services.
- For Participant No. 8, who was determined eligible in 2008 and had an employment goal of administrative assistant, the Program failed to close the participant's case within a reasonable time frame when the case file showed that the participant was unwilling to participate in the Program. Specifically, the case file documentation noted that the participant refused to comply with medical evaluations that were needed to determine the services the participant should receive and refused to provide financial information so that the counselor could determine whether the participant could contribute toward the cost of services. The case file documentation

also stated that the participant did not stay in contact with the counselor for long periods, yet the case remained open until July 2012, when the counselor learned that the participant had obtained employment. At that time, Program staff closed the case even though they were unsure what type of employment the participant had obtained or whether the participant met his or her employment goal. The Program had paid a total of \$1,700 in goods and services for this participant.

### **Why did the problems occur?**

The problems we identified occurred for the following reasons:

- **No thresholds on the amount of time a participant can receive services.** The Division has not established policies regarding a reasonable length of time for a participant to receive services, as allowed by federal regulations. For example, although counselors estimate in each participant's Plan the amount of time, typically in months, that it will take the participant to reach his or her employment goal, the Division has not established benchmarks or reasonable time frames, such as 2 years for a participant not seeking a degree or 5 years for a participant seeking a degree, for providing services to help the participant reach his or her employment goal. Other states we surveyed have established policies that limit or have increased requirements regarding the duration of time that the Program will pay for services. For example, Georgia has established a policy limiting the time allowed to complete a bachelor's degree to 5 years.
- **Lack of procedures for ensuring service costs are reasonable and necessary.** The Division has not established policies or procedures, including cost thresholds, to ensure the Program only pays reasonable, necessary costs for participants. For example, the Division does not have a policy limiting authorizations to the cost of in-state tuition or equivalent out-of-state tuition. In addition, Division policy does not require the participant to pay any costs that exceed in-state tuition or the equivalent. According to Division data, in Fiscal Year 2013 the Program paid a total of \$930,000 to colleges and universities in 25 other states, including Florida, Hawaii, and New York, for participants' tuition and fees. Several of the vocational rehabilitation programs in other states that we surveyed—Washington, West Virginia, Alabama, Oklahoma, and Maryland—have developed policies limiting their programs' cost or payment of tuition to in-state tuition.

According to the Division, its fee schedule serves to limit tuition costs because the schedule states that "When a [participant] chooses an out-of-

state or private college or university and there are other appropriate and less costly alternatives that meet the individual's vocational rehabilitation needs within Colorado, [the Program] will not be responsible for those costs that are greater than the least costly alternative." However, based on our review of case files and interviews with Program staff, we found that staff repeatedly determine that there are no alternatives available to meet participants' education needs in Colorado, such as when a Colorado school will not accept a participant or does not have the exact degree program that a participant desires. Further, the Program has paid for participants' out-of-state tuition without requiring the participants to pay for the amount that exceeded an equivalent in-state tuition.

In addition, the Division does not sufficiently ensure participants do not waste Program funds when the individuals fail to meet expectations outlined in their Plans or complete the services that the Program purchased. For example, the Division does not have a policy or process to recover Program costs or discontinue services to participants who drop out of college, get expelled, change degrees without prior Program approval, or fail classes.

- **Lack of monitoring of participants' duration in the Program.** The Division has not established a process for monitoring participants' length of time in the Program and assessing the reasonableness of continuing to serve those participants who fail to meet employment goals after receiving Program services for multiple years. For example, there is no process for supervisors to identify cases that extend several years or to review a sample of those cases to assess the appropriateness of employment goals and changes to the goals, or to monitor for participant compliance with the Plan. Further, there is no review and oversight by Division management of participant cases that have extended several years beyond the length of time that counselors originally estimated was needed for the participant to reach his or her employment goal or of those cases that represent a substantial cost to the Program to determine why Program staff continued services or revised employment goals rather than closing cases. In addition, the Division does not have a standard and consistent process for reviewing and approving exceptions to its policies or fee schedule, in line with federal regulations.

### **Why do these problems matter?**

The problems we identified with the Division's lack of oversight and controls over the duration and costs of participants' Program services are important for the following reasons:

- **The Program cannot ensure participants achieve employment in a timely manner.** The purpose of the Program is to provide services to participants to prepare for and engage in employment. When the Division does not establish reasonable thresholds for the number of years it will provide services before it will begin limiting a participant's services or close the participant's case, it cannot ensure participants will meet their goals in a timely manner. When the Division does not identify and review cases that have been open for extended periods, it cannot evaluate whether the participants' employment goals are reasonable and attainable.
- **The Program cannot ensure federal and state funds are used appropriately and efficiently.** Paying for services for participants who are not making sufficient progress toward meeting employment goals within reasonable time frames is not an appropriate or prudent use of limited Program funds. For the eight case files we reviewed for participants who had received services for at least 5 years since they were determined to be eligible, the Program spent a total of more than \$816,000 on vocational rehabilitation services, yet each of the participants had been out of compliance with his or her Plan at some point and had not achieved his or her employment goal. Further, expenditures for college tuition and training represent a significant cost to the Program and totaled \$4.9 million in Fiscal Year 2013. Due to the limited controls the Division has over the approval of participants' tuition, the Division cannot ensure that the funds that it has paid for participants' tuition were procured at the least possible cost to the federal government and State. Finally, paying for participants to receive services outside of the United States, such as college in a foreign country, as a general practice appears inappropriate given that vocational rehabilitation is a federal grant program and creates difficulties for counselors regarding their abilities to monitor participants' progress toward achieving their employment goals.

Additionally, by not closing the cases of participants who do not cooperate and do not comply with Division policies, the Division cannot realize the potential cost savings that it could use to serve new individuals who are on the Program's wait list and are in need of services, as discussed in Recommendation No. 2013-58. Specifically, in Fiscal Year 2013, while the Program had open cases for more than 1,100 participants who had been in the Program for 5 years or more and continued to receive services, the Program had more than 4,200 eligible individuals on its wait list. When participants can receive services indefinitely without sufficient procedures to ensure reasonableness, it is less likely that individuals on the wait list will be served in a timely manner.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-51:**

The Department of Human Services (Department) should improve controls to ensure participants in the Vocational Rehabilitation Program (Program) reach their employment goals within reasonable time periods and federal and state funds are used prudently and efficiently by:

- a. Establishing and implementing policies regarding reasonable time frames, such as 2 years for participants not seeking a degree and 5 years for degree-seeking participants, for participants to receive Program services, as allowed by federal regulations.
- b. Establishing and implementing methods to control Program costs. These methods should include setting reasonable thresholds for the costs of different types of Program services; instituting controls over authorizations and payments for academic training and tuition that limit the Program costs to in-state tuition or the equivalent; and recovering Program costs or discontinuing services for any participant who withdraws or is expelled from college or otherwise fails to reasonably meet the requirements in his or her Individualized Plan for Employment.
- c. Establishing and implementing an ongoing review process, such as at the Division of Vocational Rehabilitation level or by a special team of Department management and staff, to assess the appropriateness of continuing to serve participants who fail to meet employment outcomes and goals within the time frames and thresholds established in parts “a” and “b” above. This process should include implementing a methodology for reviewing and approving exceptions to the limitations, when reasonable, and notifying participants who remain in the Program for extended periods without sufficiently progressing toward their goal of a reasonable time frame to meet their goal before Program services will end.
- d. Establishing and implementing procedures to close cases, as appropriate, when participants fail to meet the reasonable time frame for meeting employment outcomes and goals, set in part “c” above, after they have been notified of such case closure.

## **Department of Human Services Response:**

Agree. Implementation date: July 2014.

- a. The Division of Vocational Rehabilitation (Division) will establish and implement policies regarding reasonable participant timeframes to ensure adequate progress toward the achievement of an employment outcome. The duration of each service needed by a participant must be determined on an individual basis and reflected on the participant's Individualized Plan for Employment. The Division will look at operational process improvements, policy revisions, and training and supervision of staff to ensure that participants are making timely and satisfactory case progress and receiving services only for the duration necessary to address their individual barriers to employment.
  - b. The Division agrees to establish reasonable thresholds regarding costs of services in a manner that complies with 34 C.F.R., pt. 361.50. The Department also agrees to establish controls over authorizations and payments for academic training and tuition that limit Program costs to in-state tuition or the equivalent, if appropriate. The Division will request written guidance from the Rehabilitation Services Administration about how to address the recovery of costs, as appropriate, when participants fail to reasonably meet the requirements in his or her Individualized Plan for Employment. The Division will revise its policies and procedures to clarify that cases will be closed when participants do not make appropriate case progress.
  - c. The Division will establish a Division-level ongoing review process to ensure that participants, particularly those with cases that have been open for extended periods of time, are making sufficient case progress. Additionally, the Division will provide training along with increased coaching and supervision to strengthen counselors' skills and capacity to effectively manage, review, and document participant progress. Data obtained from the review process will provide Department and Division management with information to more adequately assess whether sufficient case progress is occurring.
  - d. The Division will review existing policies and procedures regarding case closure and will revise them to ensure compliance with federal and state laws. The Division will also provide training and supervisory oversight to assure that vocational rehabilitation counselors make appropriate case closure decisions.
-

## **Controls over Service Authorizations and Payments**

The Division has developed a service authorization and payment process to provide services and goods to participants eligible for the Program. According to Division staff, Program counselors work with each participant to develop an employment goal and determine the services the participant will need to complete his or her employment goal. The identified services and goods that the participant will need are to be documented in the participant's Plan. Counselors can authorize a wide range of goods and services, such as hearing aids, job interview clothing, job placement services, academic training, psychological counseling, and assistive technology devices for participants, which are typically provided by vendors. Participants can also receive some Program services, such as vocational counseling and guidance, directly from Program staff rather than vendors. For the participant to receive goods or services from a vendor, the counselor must complete a Service Authorization form that includes information about the type of good or service, the vendor that will provide it, the dollar amount authorized to pay for the good or service, and the date the Authorization form was created.

The Division has created a fee schedule that provides guidance on the cost of goods and services provided by the Program. This fee schedule includes either an allowable range of fees or an allowable threshold for payments for goods and services provided by the Program. The participant's counselor must authorize an amount for each good or service based on the fee schedule in accordance with the Division's policy of least possible cost. If the cost of the authorized good or service is over a certain dollar threshold specified by Division policy or Division management, the counselor must have supervisory approval before giving the Service Authorization form to the participant to obtain the service or good. A copy of this form is to be maintained in the participant's hard-copy case file.

Federal regulations require the Division, as a recipient of federal grant funds, to monitor and properly document all payments made with federal dollars to ensure that the funds are used for allowable purposes. For goods or services that participants receive from a vendor, the counselor verifies the transaction by (1) obtaining an invoice or receipt from the participant or contacting the participant to verify he or she received the service (such as an appointment with a doctor) and (2) reviewing the invoice or billing statement that the vendor sends to the field office. The counselor matches any invoices and receipts that he or she receives to the participant's Service Authorization form and approves and signs the payment invoice before providing it to an administrative assistant within the counselor's office to process the payment.

## **What audit work was performed and what was the purpose?**

The purpose of our audit work was to determine whether the Division has sufficient processes and controls to ensure that the services that participants receive and payments made on their behalf are allowable, reasonable, and appropriate based on federal and State regulations, Division policy, and the Division's fee schedule.

First, we reviewed the hard-copy documentation and Accessible Web-Based Activity and Reporting Environment (AWARE) data for a sample of 85 participants who received Program services in Fiscal Year 2013 to determine whether: (1) the services were authorized in accordance with the participants' Plans and before services were provided, (2) the authorizations were documented in the participant case files and AWARE, (3) the authorized services related to a disability that was documented in the participant's case file, and (4) the Program staff obtained supervisory approvals as required by Division policy.

Second, we identified 63 of the 85 participants that had payments made to external vendors on their behalf during Fiscal Year 2013. We reviewed a sample of 63 payments, one for each of the 63 participants, totaling \$60,450. We reviewed the 63 sampled payments to determine whether: (1) Program staff paid the correct amount based on the Service Authorization form and related unit rate contained on the Division's fee schedule, (2) the Service Authorization Form contained evidence of supervisory approval as required by Division policy, (3) the payment was properly supported with an invoice or receipt, (4) the payment was approved by a counselor, and (5) the service or good was documented as authorized on the participant's Plan. In addition, for a sample of 14 vendors that received payment from the Program, we confirmed that they had a business filing with the State and were, therefore, valid vendors.

We also interviewed Department accounting and internal audit staff, Division management and staff, and a sample of 15 administrative staff, counselors, and supervisors from seven of the Program's field offices throughout the state to understand the Division's requirements and field offices' practices for authorizing, providing, and paying for Program services and goods.

## **How were the results of the audit work measured?**

We used the following criteria to assess the Division's controls over service authorizations and payments:

**Internal controls over transactions.** The federal Office of Management and Budget's (OMB) *Circular A-133, Audits of States, Local Governments, and Non-*

*Profit Organizations (Circular A-133)*, requires that states implement internal controls to ensure that transactions are properly executed, recorded, and accounted for to permit the preparation of reliable financial statements and federal reports, maintain accountability over assets, and demonstrate compliance with laws, regulations, and other compliance requirements. Federal regulations (Methods of administration, 34 C.F.R., pt. 361.12) require the State to properly and efficiently administer the Vocational Rehabilitation Program. As a best practice, a comprehensive system of financial controls includes a post-payment review process to ensure that controls are operating as intended; all payments are necessary, appropriate, and supported by adequate documentation; and participants receive services deemed necessary to meet their needs.

Additionally, State Fiscal Rule 1-9 states that departments, agencies, and institutions of higher education are responsible for the design and implementation of programs and internal controls to prevent, deter, and detect fraud. To reduce the risk of error or fraud, agencies should separate the duties and responsibilities for reviewing the transactions, recording them, authorizing transactions, and handling any related assets.

**Services, goods, and associated payments must be reasonable and appropriate.** OMB's *Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments (Circular A-87)*, provides basic guidelines for a cost to be allowable under a federal award. These guidelines state that the costs charged to a federal award must be necessary and reasonable and that the cost be adequately documented. OMB's *Circular A-133* states that transactions must be executed in compliance with laws, regulations, and the provisions of contracts or grant agreements. State Fiscal Rule 2-1 states that all expenditures by state agencies and institutions of higher education shall meet the standards of propriety as being for official state business purposes only and reasonable and necessary under the circumstances. In addition, State Fiscal Rule 2-3 requires that receiving reports, or other sufficient documentation, be prepared for all goods and services received, and that staff ensure that they show actual quantities prior to processing a voucher for payment. According to Division policy (Section 12.11), all goods and services must be necessary and appropriate, procured at the least possible cost to the Division, and essential to assess an individual's eligibility and severity of disability and establish his or her vocational rehabilitation needs.

**Authorization of and payment for goods and services.** Division policy (Sections 10.2 and 10.3) contains the following provisions regarding the authorization of goods and services:

- An authorization for Vocational Rehabilitation Service form reflects the Division's commitment to pay for specific goods and services rendered in accordance with the terms and conditions of the authorization.
- Any service paid for, in part or in whole, by the Division shall be authorized, in writing, by a counselor prior to its initiation unless the case file documents that prior written authorization is not possible; in those instances, supervisory approval is required.
- Once a participant's Plan has been developed and signed by the individual and the counselor, only the services or goods documented in the Plan may be authorized.
- Counselors must authorize services and goods and approve payment in accordance with the Division's fee schedule. Market-based standardized rates of payment and other rate-setting procedures are established in writing by the Division's Director for each available vocational rehabilitation service.

**Required supervisory approvals.** Division policy (Section 10.41 and 10.24) requires supervisors to approve purchases of more than \$5,000 in writing, and authorizations for which the payment will be made directly to the participant must be approved by the Division's Administrator of Field Services. In January 2013, the Division implemented a temporary policy that decreased the threshold needed for supervisory approval of service authorizations to \$2,000 or more. In April 2013, the policy was revised to require a supervisor to also approve payments that are made directly to participants.

**Mileage reimbursement rates.** State Fiscal Rule 5-1 specifies that a state employee can be reimbursed for each mile actually and necessarily traveled on State business using the employee's personal vehicle at 90 percent of the prevailing Internal Revenue Service (IRS) rate per mile. As of January 2013, the IRS rate for vehicles is 57 cents per mile and the State's rate is 51 cents per mile for two-wheel drive vehicles.

### **What problems did the audit work identify?**

We found problems with Program field office staff's authorization and payment processes related to the purchasing of goods and services for participants, as discussed below.

## Service Authorizations

We identified problems related to service authorizations in 24 (28 percent) of the 85 participant case files we reviewed. We found that Program staff authorized participant services that did not correspond to a documented need, impairment, or disability; authorizations for services were missing, created after the services had been provided, or did not have supervisory approval; payments were over the authorized amounts; and authorized services did not appear reasonable and necessary, as described below. Some sampled participant case files had multiple exceptions. The problems we identified with service authorizations resulted in a total of \$24,727<sup>1</sup> in known questioned costs.

- **Lack of evidence that an authorized service was needed to address a disability or impairment.** In five participant case files, the Program staff did not document, in the case file or in AWARE, a disability or job-related impairment related to the service that was authorized. For example, four participants had been authorized vision examinations and eyeglasses, but there was no documentation that they had vision-related disabilities. For another participant, Program staff authorized the participant to receive dental work, eyeglasses, and hearing aids but did not document any disabilities in these areas. These problems resulted in a total of \$5,695 in known questioned costs.
- **Missing written authorizations.** For 11 participant case files, the hard-copy case files did not contain all of the required written authorizations for those participants. These errors resulted in \$623 in known questioned costs.
- **Authorizations created after services were provided.** For two participant case files, Division staff did not complete the Service Authorization form until after the date of the vendor invoice, meaning that services were provided without prior authorization as required by Division policy. This problem resulted in \$2,725 in known questioned costs.
- **Lack of required supervisory approval.** Five participant case files did not contain evidence of appropriate supervisory approval, as described below. These errors resulted in \$11,644 in known questioned costs. Specifically, for two participants, authorization amounts for hearing aids exceeded \$5,000, but the authorizations did not contain evidence that the supervisor had approved the authorization as required by Division policy; one authorization for a direct payment of \$500 to the participant for child care services was not approved by the Administrator of Field Services as required by Division policy; and the Division paid \$285 for two

participants to receive services that had not been authorized prior to the initiation of services and did not include supervisory approval as required by Division policy when a service is provided before it is authorized by the counselor.

- **Authorized services did not appear reasonable or necessary.** Four participant case files contained authorizations for services for which the Program paid but that did not appear to be necessary or appropriate. Specifically, for two participants who wore and had hearing aids, the Program paid for the participants to receive new hearing aids, but there was no documentation in the hard-copy case file or in AWARE of malfunctions or problems with the participants' existing hearing aids. For two other participants, the Program included college courses in the participants' Plans, but the participants were already attending college when they applied to the Program. There was no documentation in the hard-copy case file or AWARE of the rationale for why the Program began paying the participants' tuition when the participants had been able to pay for these costs. These problems resulted in a total of \$3,976 in known questioned costs.
- **Payments exceeded the amounts authorized.** In three participant case files, the Division paid the vendor more than the total amount shown on the Authorization forms. These problems resulted in a total of \$314 in known questioned costs.

### Payments for Services

We also identified problems with 24 (38 percent) of the 63 payments we reviewed, including payments for services that were not authorized by a counselor, did not follow the fee schedule, exceeded the amount authorized, lacked required supervisory approval, or lacked documentation to support the amount paid, as discussed below. Some sampled payments had multiple exceptions. The problems we identified resulted in a total of \$14,216 in known questioned costs. However, \$5,384 of the \$14,216 are identified as questioned costs in the problems with service authorizations noted above, and therefore, \$8,832<sup>1</sup> are the total known questioned cost related to payments for services.

- **Payments for services that were not authorized or not in the Plan.** Seven of the sampled payments, totaling \$2,189, were for services that did not match the Service Authorization form or were not documented in the participant's Plan. For example, one payment was for eyeglasses although vision restoration was not included in the Plan. For another payment, the service authorized was learning evaluation services, but the payment was for a cancellation fee for the participant missing an appointment for a

learning evaluation. These problems resulted in \$1,661 in known questioned costs.

- **Payments did not match the fee schedule.** Five of the payments, totaling about \$2,381, and their related authorizations did not match the Division's fee schedule for the service or the fee schedule did not list an amount. For example, in two instances, the fee schedule included a rate for a psychological evaluation of \$201 per hour, but the authorization and subsequent payment showed a total payment authorized as \$550 with no hourly amount specified. These problems resulted in \$2,381 in known questioned costs.
- **Overpayments.** Three of the payments, totaling \$393, exceeded either the amount authorized or invoiced by the vendor by a total of about \$6. For example, for one payment for medical records, the amount paid to the vendor was more than the vendor charged on the invoice, and there was no evidence that the vendor refunded the overpayment or that the Division attempted to reconcile the cost. The \$6 represents known questioned costs. Although the overpayment amount noted is minimal, payment amounts should agree with supporting invoices.
- **Lack of supervisory approval.** Two of the payments, totaling \$9,251, lacked documentation or evidence of supervisory review and approval prior to the services or goods being authorized and then paid. One payment was for more than \$5,000 and therefore required supervisory approval; the other payment occurred after January 2013 and exceeded the \$2,000 threshold needed for supervisory approval. These payments of \$9,251 are known questioned costs.
- **Lack of supporting documentation for payments.** Six of the payments, totaling \$1,920, lacked sufficient supporting documentation, such as an invoice from a vendor or a receipt, for us to determine whether the payment amount was appropriate. Further, two of these payments were for travel reimbursements and were missing information, such as addresses and supporting documentation for the mileage amounts and rates used for reimbursement. These problems resulted in \$1,710 in known questioned costs.
- **Lack of counselor approval for purchases.** Six of the payments, totaling \$3,255, lacked evidence of the counselor's review and approval of the service or good that was purchased. These payments of \$3,255 are known questioned costs.

- **Authorizations were processed incorrectly, contained errors, or were incomplete.** Three of the payments, totaling \$515, did not have appropriate authorizations. Specifically, for one payment, the counselor's authorization of the service was dated after the date of the vendor's invoice. For the second payment, two authorizations were issued for the same service. We verified, in this case, that the two authorizations did not result in duplicate payments. For the third payment, the authorization listed two types of services that had different payment amounts in the fee schedule, so we could not determine whether the amount authorized and paid was appropriate. These problems resulted in \$265 in known questioned costs.

Based on our interviews and walk-throughs of the payment process with staff, we also determined that the field offices lack appropriate segregation of duties in relation to their payment process. Although supervisors are required by Division policy to approve authorizations for \$2,000 or more, counselors approve payments for the services that they have authorized and there is no supervisory review or other oversight of the payments. Specifically, the counselors authorize the services and goods for participants, receive the invoices and receipts from vendors and participants, verify that the participants received the services and goods, approve transactions for payment, and then typically provide the approved invoice to administrative staff who enter the payment information and transaction into AWARE for payment to the vendor. Additionally, some staff we interviewed reported that sometimes the counselors enter the payment into AWARE when administrative staff are not available. There is no additional review or approval of the payment information within AWARE.

### **Why did the problems occur?**

Overall, the Division does not have adequate controls and oversight over service authorizations and payments. Specifically, as we discuss below, the Division lacks: (1) policies and clear guidance regarding reasonable and appropriate services and payments; (2) sufficient monitoring of service authorizations and payments; (3) specific requirements for supporting documentation to support each payment, such as receipts, invoices, and any other documentation appropriate to support the transaction; (4) proper segregation of duties; (5) post-payment review processes; and (6) training to staff involved in payment processing. We found:

- **Lack of standard policies and procedures to ensure authorized services and payments are reasonable and appropriate.** The Division does not have a policy or procedure to ensure that Program staff only authorize services that relate to participants' documented disabilities and impairments. In addition, the Division has not established procedures or controls that ensure Program staff (1) authorize services before they are

provided and obtain appropriate supervisory approvals, (2) pay only the dollar amounts that have been authorized, and (3) maintain documentation of authorizations. Division staff told us that Service Authorization forms are not required to be in the hard-copy case files because the forms are stored electronically in AWARE. However, Division policy requires authorizations to be in writing, and Division-provided training materials stated that the authorizations must be printed and signed. In addition, Division staff indicated that supervisory approvals were not required for two transactions (totaling \$5,699 and \$5,160, respectively) we reviewed because the items in those transactions required prescriptions, yet the Division's policy specifically requires that goods or services that cost \$5,000 or more—\$2,000 or more after January 2013—must be approved by a supervisor without regard to whether the items require prescriptions. The Division does not have controls, such as a monthly review of reports from AWARE, to ensure that all high-dollar services and transactions are approved by a supervisor.

Further, in reviewing the Division's fee schedule, we noted that it indicates that the payment amount authorized on some of the services and goods should be the "lowest available usual and customary rates" but does not define how Program staff determine this amount and what documentation is needed for support. In addition, when the Division reimburses a participant's mileage related to travel, the Division's fee schedule specifies that Program staff are to review websites to determine miles per gallon for the vehicle used and the cost of fuel per gallon. The Division does not use the annually established federal or state mileage reimbursement rates, which would be consistent with State Fiscal Rules for mileage reimbursements and federal methodologies. The Division also stated that it requires services to be preapproved, but if there is an error on the Service Authorization form or a cancellation fee needs to be paid rather than the services approved, the Division has not provided guidance as to how the counselors should correct the error or document cancellation fees so that AWARE does not appear to show that the service was provided when it was not.

- **Lack of monitoring of service authorizations and payments.** Counselors are not monitored to ensure that the services they authorize for participants and approve for payment comply with federal regulations and Division policies. Currently, for all service authorizations under the dollar threshold requiring a supervisory approval, counselors are solely responsible for authorizing the services for participants and reviewing and approving invoices for payment. Division staff indicated that supervisors generally do not review participants' case files or service authorizations

under the dollar threshold unless the counselor is new or the participant files a complaint.

- **Lack of requirements for supporting documentation.** The Division does not have a policy requiring the case file to include documentation to support each payment, such as receipts and invoices. Further, the Division does not have a policy requiring counselors to verify that participants receive services and goods, document the verification and approval by signing the receipt or invoice, and maintain the documentation in the participant's file.
- **Lack of segregation of duties related to payments.** The Division does not appropriately segregate staff duties related to payment authorizations and processing to ensure that the staff member who is responsible for authorizing services differs from the individual who approves payment for those services. Further, the Division does not have a policy requiring staff other than a supervisor's direct report to approve the supervisor's payments that he or she has authorized for participant services.
- **Lack of post-payment review process.** The Division does not have a post-payment review process to ensure that payments are appropriate. Post-payment review processes should include: (1) comparing a risk-based sample of payments with supporting documentation to ensure that payments were appropriate and for allowable services and recovering payments made in error or for unallowable services, and (2) monitoring activities, such as calling, sending questionnaires to, and/or visiting a sample of participants to ensure that they received the services that vendors billed on their behalf. To be the most effective, post-payment reviews should be conducted using a risk-based sampling approach designed to address high-risk payment types, such as services billed in 15-minute increments, and review high-risk providers, including providers with an unusually high volume of payments. Additionally, the review process should include a method for tracking and analyzing errors found during the post-payment review to identify patterns and problem areas. The Division could use this information to modify payment policies and procedures as necessary.
- **Lack of proper training on payment processing.** The Division also has not properly trained Program staff on accounting controls, including each staff member's role in the payment process. Further, Program staff reported that they have not received training on the payment process regarding the types of documentation, such as invoices or receipts, that should be provided as support for the payments, the types of approvals that are needed on the documentation, the payments that are allowable or

unallowable for the Program, such as payments that are more than the range or amount specified in the fee schedule, and when a payment is appropriate or not appropriate to make.

### **Why do these problems matter?**

Division policies require the Program to provide services and goods that are necessary and appropriate, at the least possible cost. Authorizing services without documentation of their need or a related impairment, paying more for services than was authorized, and failing to obtain and document supervisory approval of higher risk purchases has resulted in unnecessary and unreasonable costs to the Program. Further, Colorado's Program has limited funding to provide services to participants and, due to budget constraints, has not been serving participants who are determined eligible for the Program since April 22, 2013, when the Division implemented a wait list. During Fiscal Year 2013, the Division authorized about \$22 million in federal and state funds for participant services.

By not having proper internal controls, including segregation of duties and supervisory review of payments, there is a risk that fraud or errors will occur and not be identified or addressed. In addition, without proper controls over service authorizations and associated expenditures, the Division cannot ensure that public funds are used efficiently, effectively, and for their intended purposes to ensure participants meet their employment goals. Further, noncompliance with federal grant requirements could lead to federal disallowances or sanctions. In addition, it is important that AWARE reflects accurate payment information, such as cancellation fees, for the Division to use in monitoring participants in the program and overseeing program expenditures.

<sup>1</sup> Known questioned costs total \$33,559. This total will not equal the sum of the amounts noted in the bullets in the section "What problems did the audit work identify?" because the case files had more than one problem. Therefore, the related questioned costs are included in more than one bullet. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Material Weakness.)

**Recommendation No. 2013-52:**

The Department of Human Services (Department) should improve controls over service authorizations and payments for the Vocational Rehabilitation Program (Program) by:

- a. Establishing and implementing policies and procedures requiring that the Program only authorize services that are needed to address participants' barriers to employment based on their documented disabilities and impairments.
- b. Establishing and implementing procedures that ensure staff authorize services before they are provided, obtain and document appropriate supervisory approvals, pay only the amounts that have been authorized, and maintain Service Authorization forms in the case files.
- c. Developing and implementing comprehensive written policies and procedures over the Program's payment process that includes requirements for maintaining documentation that supports the payment amount and purpose, ensuring service authorizations match the payments made, and approving and verifying the receipt of services and goods. In addition, the policies and procedures should define the lowest available usual and customary rates, specify clear restrictions and parameters for purchases, and include written guidance for staff to follow when reviewing and approving payments.
- d. Using the federal or state mileage reimbursement rate as specified by State Fiscal Rules when calculating a participant's mileage reimbursement.
- e. Adequately segregating staff duties within the payment process. Specifically, the Department should ensure that individuals who authorize and approve services and goods are segregated from the processing of payments and do not directly receive vendor or participant receipts or invoices. The Department should also ensure direct reports are not approving payments for their supervisors.
- f. Establishing and implementing processes to monitor service authorizations and associated payments to ensure that services are authorized before the participant receives the services and that payments for services do not exceed the amounts authorized. This should include a post-payment review procedure that reviews a sample of payments at least annually and mechanisms for revising policies and procedures as necessary based on patterns of errors identified during the annual review.

- g. Training Program staff on accounting controls and payment policies and procedures.

### **Department of Human Services Response:**

- a. Agree. Implementation date: July 2014.

The Department will ensure that the Division of Vocational Rehabilitation (Division) reviews and strengthens existing policies and practices to ensure that the only goods and services that may be authorized and purchased by vocational rehabilitation counselors are those that directly address an individual's barrier to employment in his or her identified vocational goal, which will be documented in their Individualized Plan for Employment.

- b. Agree. Implementation date: April 2014.

The Division will strengthen its policies and procedures ensuring that services are authorized prior to provision and that appropriate supervisory approvals are obtained and documented in the case files. The Division will review and adjust AWARE authorization processes to ensure that payments for the receipt of authorized goods and services follow the fee schedule and that there is proper alignment between the amount authorized and the amount paid. This will be accomplished by a procurement improvement team to identify and document strong, step-by-step processes for authorization and payment of goods and services that are compliant with federal and state laws.

- c. Agree. Implementation date: July 2014.

The Division will work with the Department's Divisions of Audit, Procurement, and Accounting to implement best practices in all areas of procurement, authorization, payment, and maintaining supporting documentation to provide the necessary goods and services to participants using the AWARE system. Adjustments to the AWARE system will be identified and implemented as feasible. The fee schedule will be reviewed to ensure that "lowest available usual and customary rates" are sufficiently defined and all established fees are clearly outlined.

- d. Agree. Implementation date: December 2013.

The Department will implement and train on the use of the state mileage reimbursement rate for all participant mileage reimbursements.

- e. Agree. Implementation date: April 2014.

The Division will work with the Department's Divisions of Audit, Procurement, and Accounting to ensure best practices are implemented and followed in all areas of procurement, authorization, payment, and supporting documentation processes.

- f. Agree. Implementation date: July 2014.

The Department will ensure that the Division develops a post-payment oversight process to review a statewide sample of payments and associated documentation to check for compliance with the policies, procedures, and practices implemented in response to Recommendation No.2013-52 by July 2014. This review will occur at least annually and the results of the review will be provided to the Division Director for review and follow-up action that may include system-wide adjustments to policies, procedures, and practices through appropriate training; individual office, region, or district process improvement corrections; and/or individual performance plan adjustments and supervisory action.

- g. Agree. Implementation date: July 2014.

The Division will ensure that all staff that have responsibility for any component of the procurement, authorization, approval, and payment processes associated with the provision of the necessary goods and services to participants will receive comprehensive training that addresses all new and existing policies and procedures.

---

## Eligibility Determinations

The Division oversees the process to determine applicants' eligibility for the Program. Individuals may apply for the Program by completing an application and participating in an intake interview with a Program vocational rehabilitation counselor in one of the Division's 29 field offices located throughout the state. Program counselors perform the eligibility determinations by assessing the applicant's disability or reviewing documentation of the disability, determining

whether the disability is a significant impediment to employment, and assessing the likelihood that the applicant will benefit from services.

The Division's AWARE system maintains information that Program staff record about each Program applicant and participant, such as his or her eligibility, demographics, and disabilities; the services that counselors have authorized the participant to receive through the Program; and the participant's Plan, which specifies the participant's employment goal and the services the counselor determines the participant needs to meet the goal. In addition, the Program field offices maintain a hard-copy case file for each participant that includes information such as a copy of the participant's identification or driver's license, the Program application, the participant's Plan, and the counselor's case notes.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to assess the Division's controls over eligibility determinations and determine whether its processes comply with federal regulations and Division policy.

We reviewed the case files for our sample of 85 participants who received Program services during Fiscal Year 2013 to determine whether the participants met the Program's eligibility criteria and Program staff complied with federal regulations and Division policies when conducting eligibility determinations. We also interviewed Division and Program staff to understand the eligibility determination process. At the time of our review, five of the sampled 85 participants had received only limited services of application assistance from a Program counselor and were on the Program's wait list for vocational rehabilitation services.

### **How were the results of the audit work measured?**

We applied the following criteria from federal regulations and Division policy when evaluating the Division's internal controls and processes for determining participants' eligibility for the Program:

**Eligibility criteria.** Federal regulations (Assessment for determining eligibility and priority for services, 34 C.F.R., pt. 361.42) require that the determination of an applicant's eligibility for vocational rehabilitation services be based only on the following requirements:

- The eligibility determination should be based on the "determination by qualified personnel that [the applicant's disability] constitutes a physical or mental impairment... that constitutes or results in a substantial

impediment to employment for the applicant.” Division policy (Section 6.12) states that the counselor shall determine if there are medical, psychological, vocational, educational, communications, and other related factors that interact with the impairment(s) that create a vocational impediment. If a substantial impediment to employment does not exist, then the individual is not eligible for the Program.

- Applicants that have been determined eligible for Supplemental Security Income (SSI) or Social Security Disability Insurance (SSDI) are presumed eligible for vocational rehabilitation services, and each is considered an individual with a significant disability.
- The Program counselor must determine whether the applicant requires vocational services to prepare for, secure, retain, or regain employment consistent with the applicant’s unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.
- There is a presumption that the applicant can benefit in terms of an employment outcome from the provision of vocational rehabilitation services, unless the Program counselor demonstrates, based on clear and convincing evidence, that the applicant is incapable of benefiting from vocational rehabilitation services due to the severity of the applicant’s disability. Division policy (Section 6.26) further states that when there are no services that can be provided to overcome the severity of the individual’s disability, then the counselor cannot support an applicant’s chosen employment outcome and the individual will not be eligible for the Program.

**Case files should document eligibility.** Federal regulations [Record of services, 34 C.F.R., pt. 361.47(a)] specify that there must be a record of services, or case file, for each applicant that includes documentation supporting the eligibility determination. In addition, for those participants who are determined to be SSI/SSDI eligible, these participants must provide evidence of this eligibility, such as an award letter, or the Program staff can contact the Social Security Administration to confirm the participant’s eligibility. To meet federal requirements, Division policy (Section 6.24) states that the case file must document the basis upon which the applicant has been determined eligible and contain a written and signed Certification of Eligibility form. Division policy (Section 6.23) also allows for additional diagnostic services and assessments if the existing data do not permit counselors to identify the individual’s current level of functioning or if data are unavailable, insufficient, or inappropriate to make an eligibility determination. In April 2013, Division policy (Section 6.24) was revised to state that a Certification of Eligibility form is not used and instead eligibility is documented on the eligibility determination page in AWARE. In

addition, Division policy (Policy manual introduction section page 2) states that Program staff shall ensure the collection and entry of accurate and timely data into AWARE to ensure accurate federal and state reporting and that counselors will use case notes to document counseling and guidance and all relevant rehabilitation activities.

Division policy (Section 5.2) also specifies that each participant's record must include: (1) a copy of the participant's identification, such as a driver's license, state identification card, or passport, and (2) an Affidavit of Lawful Presence form signed by the participant that states that the participant is either a United States citizen or a legally permanent resident or that he or she is otherwise lawfully present in the United States pursuant to federal law. Further, if medical information must be obtained from providers, then the case record must include a completed Authorization for Disclosure of Health Information form, signed by the participant (Section 2.4).

**Eligibility determinations must be completed within 60 days.** Federal regulations [Processing referrals and applications, 34 C.F.R., pt. 361.41(b)(1)] require that, once an individual has submitted an application for Program services, an eligibility determination be made within 60 days unless exceptional and unforeseen circumstances beyond the control of the state preclude making an eligibility determination within 60 days and the state and the individual agree to an extension of time. Division policy (Section 6.21) further states that documentation describing the reason for a time extension, its anticipated length, and the applicant's agreement to the time extension shall be in the case file and shall be completed prior to the expiration of the 60 days unless documentation shows good cause why the extension was not completed in a timely manner.

### **What problems did the audit work identify?**

In 25 (29 percent) of the 85 case files we reviewed, we identified problems related to eligibility determinations, including lack of documentation to support that the participant was eligible for the Program, missing documentation required by Division policy, and untimely determinations. In some cases, we identified multiple problems with the same case file. We identified two participants who did not appear to be eligible based on a lack of documentation to support that the participants had a substantial impediment to employment or would benefit from services, as required by federal eligibility requirements, which resulted in a total of \$14,057<sup>1</sup> in known questioned costs. We found:

- **Ineligible participants.** For two participant files, documentation made it appear that the participants did not have the ability to benefit from the vocational rehabilitation services as required by federal regulations and,

therefore, the participants did not appear eligible for the Program. For example, in one case, the participant stated in the application that he or she could not work and had not been employed since 1992 yet requested assistance in obtaining new hearing aids to replace the participant's existing hearing aids. The counselor determined that this participant was eligible despite the participant's statements that he or she could not work and paid \$4,920 for the participant to receive new hearing aids.

- **Missing eligibility documentation.** We found that 14 participant files were missing one or more required eligibility documents. One of these errors resulted in \$9,137<sup>1</sup> in known questioned costs. Specifically:
  - Five participant files did not contain documentation, either in hard-copy files or AWARE, supporting all of the participants' physical or mental impairments. Specifically, the documentation of one or more of the participant's impairments was either missing or outdated, meaning the documentation was more than 2 years old at the time of eligibility determination, and did not show the participants' current functioning.
  - Four participant files included case notes that the individuals were eligible for the Program because they were eligible for SSI or SSDI benefits but did not contain any documentation verifying the participants received those benefits.
  - Two participant files were missing the signed Certification of Eligibility form.
  - Three participant files were missing a valid copy of the participants' identification document. This resulted in \$9,137 in known questioned costs.
  - One participant file was missing a signed Affidavit of Lawful Presence form.
  - One participant file was missing the Authorization for Disclosure of Health Information form.
- **Late eligibility determinations.** For six participant files, Program staff did not determine the participants' eligibility within 60 days as required by federal regulations, and there was no extension letter documented in the case file, as required by the Division. In these six cases, the eligibility determination was between 2 and 114 days past the 60-day time line.

- **Data entry errors.** For 11 participant files, the application date recorded in AWARE did not match the date recorded in the hard-copy files. The application date is used to determine whether the eligibility determination was made within the required 60-day time line; therefore, it is important that the correct date is recorded in AWARE.

### Why did the problems occur?

We identified three main reasons for the problems we found with eligibility determinations and documentation needed to support eligibility determinations:

- **The Division does not require documentation of the applicant's disability or impediment from a medical professional.** Division policy allows counselors significant discretion to determine whether an applicant for the Program has a disability or impediment to employment, and the Division does not require staff to obtain and maintain documentation from a medical professional qualified to make the diagnosis. For example, some Program counselors we interviewed stated that the Division does not require proof or documentation, such as from a medical professional, of an individual's disability or impediment if the counselor is able to observe or detect during an interview with the applicant that he or she has an impairment. However, federal regulations do not specify that a *counselor* may determine if the participant has a disability or significant impediment to employment; federal regulations specify that "qualified personnel" should determine whether there is a significant impediment to employment and only state that a vocational rehabilitation counselor should determine whether a participant needs vocational rehabilitation services. According to RSA management, "qualified personnel" is an individual qualified to make the diagnosis. Other states we surveyed, including Wisconsin and Utah, reported that they require a licensed medical professional, such as a physician or psychiatrist, to provide the Program written documentation of the applicant's disability that demonstrates that the individual has a significant impediment to employment in order for the individual to be eligible for the state's program.
- **Additional training is needed.** Based on the errors identified and the interviews with Program staff, it appears that the Division needs to provide additional staff training to help staff comply with eligibility determination and documentation requirements. Despite the training provided by the Division on caseload management, case file documentation, and time management, multiple Program staff in different

field offices that we interviewed indicated that some staff believe it is difficult to meet the Program's documentation requirements.

- **The Division lacks ongoing supervisory reviews.** Although the Division has identified eligibility and documentation problems in its field offices in the past, it has not established a policy requiring ongoing supervisory reviews to ensure staff comply with documentation requirements or a mechanism, such as corrective action plans, to hold staff accountable for addressing and correcting the problems. As we discuss in Recommendation No. 2013-67 the Division conducts quality assurance (QA) reviews to determine each Program counselor's compliance with federal regulations and Division policy but does not require corrective action plans. In Fiscal Year 2013, the Division's QA reviews identified deficiencies similar to those that we identified, including case files that lacked eligibility documents required by Division policy and lack of staff verification of participants' SSI and SSDI benefits to ensure the applicants could be presumed eligible for the Program. The problems we identified in this finding may continue if the Division does not have an ongoing process that ensures staff compliance with federal and Division eligibility and documentation requirements.

### **Why do these problems matter?**

Maintaining accurate and complete eligibility determination documentation, as well as performing timely determinations, is important to demonstrate the Program's compliance with federal and state requirements. If counselors do not include each required form of eligibility documentation—such as a copy of the individual's identification document, the affidavit of lawful presence, and evidence verifying that an applicant is receiving SSI or SSDI benefits—the Division cannot demonstrate that the participant is eligible for the Program. Providing ineligible individuals Program services is a misuse of federal grant monies and state funds. Further, when the Division does not determine eligibility in accordance with the 60-day federal requirement, services to participants are delayed at a time when the participants may be unemployed and needing services to become employed.

<sup>1</sup> Known questioned costs total \$14,057. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Eligibility. Classification of Finding: Material Weakness.)

---

**Recommendation No. 2013-53:**

The Department of Human Services should strengthen controls over Vocational Rehabilitation Program (Program) eligibility determinations and documentation by:

- a. Establishing and implementing a written policy and procedure requiring counselors to obtain documentation of the applicant's disability from an appropriate medical professional and maintain documentation of the disability in the case file.
- b. Establishing and implementing a written policy and procedure requiring ongoing supervisory reviews to ensure that Program staff comply with eligibility and documentation requirements.
- c. Providing Program staff training, as determined appropriate, that assists in ensuring that staff are aware of and comply with federal and state eligibility and documentation requirements.

**Department of Human Services Response:**

Agree. Implementation date: July 2014.

- a. The Division of Vocational Rehabilitation (Division) will modify policy to include procedures ensuring eligibility determinations are accurately made and documented by vocational rehabilitation counselors. The Division will indicate in policy that the first of the four eligibility criteria (the existence of a physical or mental impairment) shall be documented by a professional who is qualified to make that determination. The Division will implement policies and procedures that ensure the counselor's determination of the impediment (barrier) to employment, along with the remaining two eligibility criteria, are documented in every participant's case file.
- b. The Division will implement policies and procedures for supervisory reviews to ensure that the Division is serving individuals with disabilities in a consistent manner and that eligibility determinations are documented accurately and comprehensively in the case files. The Division will convene a workgroup to assist with developing supervisory reviews, including staff within the Region VIII Technical Assistance and Continuing Education Program (a federally-funded technical assistance program), and to review other states' vocational

rehabilitation programs to identify best practices in conducting supervisory reviews.

- c. The Division will implement training on federal and state eligibility and documentation requirements to ensure that vocational rehabilitation counselors comply with requirements related to eligibility determinations.

---

## Assessments for Setting Employment Goals

The Program counselor and participant work together to choose an appropriate employment outcome or goal. The setting of a goal is an important part of a participant's vocational rehabilitation and should lead to the participant's successful employment. Counselors work with participants to determine their employment goals through a process called the comprehensive assessment. To help determine the employment goal, counselors consider the following eight federally required factors for the participant:

1. Strengths
2. Resources
3. Priorities
4. Concerns
5. Abilities
6. Capabilities
7. Interests
8. Preferred choice of employment goal

Counselors gather information from a variety of sources to assess the eight factors in light of the participant's education, work experience, and disabilities that affect the participant's employment needs. The result of the comprehensive assessment process is the participant's Plan, which contains information such as the employment goal, the services that the participant will receive to achieve that goal, the vendors that will provide the services, and the estimated duration of the Plan.

### What audit work was performed and what was the purpose?

The purpose of our audit work was to determine whether the Division has sufficient processes to ensure that participants' employment goals and associated Plans are established in accordance with federal regulations and Division policies. We reviewed a sample of 85 participant case files from Fiscal Year 2013 to determine whether the comprehensive assessment was completed, timely, and contained enough information to appropriately assess the eight factors for each participant in accordance with federal regulations and Division policies. We interviewed Division and Program staff to understand processes for conducting comprehensive assessments and completing Plans.

## How were the results of the audit work measured?

We applied the following criteria when evaluating the Division's processes for overseeing comprehensive assessments and Plan development:

**Plan requirements.** According to federal regulations [Content of the Individualized Plan for Employment, 34 C.F.R., pt. 361.46(a)(1)], each Plan must include a description of the eligible individual's specific employment outcome, and the outcome should be consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, career interests, and informed choice. In addition, Division policy (Section 11.6) states that the Plan must be signed by the Division counselor and the participant.

**Comprehensive assessment form.** The Division developed a standard comprehensive assessment form for staff to document the counselor's written analysis. The standardized form lists the eight assessment factors and includes spaces for counselors to document an analysis for each factor. Division policy (Section 9.5) requires the counselor's written analysis of the participant's rehabilitation needed to address his or her vocational impediments in order for the participant to attain an appropriate employment outcome.

**Timing of the Plan.** According to Division policy (Section 11.3), the Plan shall be developed as soon as possible following the determination of eligibility. The time between the determination of eligibility and finalization of the Plan shall not exceed 120 calendar days unless additional comprehensive assessment is necessary. In April 2013, the Division revised its policy to change the time line requirement for finalizing Plans from 120 days to 90 days.

## What problems did the audit work identify?

We found that for 25 (29 percent) of the 85 participant cases we reviewed, the comprehensive assessments were not conducted or were incomplete, or participants' Plans were not completed within the time lines required in Division policy, as described below. For some cases, we identified multiple problems.

- **Missing or incomplete assessment.** For 19 participant cases, the comprehensive assessment was missing from the participant's case file or was incomplete in that the staff did not document their analysis of all of the eight factors that Division policy requires in the assessment.
- **Goal did not match the assessment.** For one participant case file, the participant's employment goal did not appear to match the comprehensive assessment. The participant's employment goal was to become a counselor, but there was no evidence that Program staff took into account

the participant's disability documentation. Based on our review of the disability documentation, it did not appear that the participant could meet his or her employment goal.

- **Unsigned Plans.** For five participant case files, the Plan was not signed by the participant, the counselor, or both. This resulted in \$740<sup>1</sup> in known questioned costs.
- **Untimely Plans.** For five participant case files, the Plan was not completed and signed by the participant and counselor within the time frames prescribed by Division policy. For five cases that should have had a completed Plan within the Division's 120-day policy requirement, the Plans exceeded the 120-day target by between 3 and 80 days.

### **Why did the problems occur?**

The problems we identified occurred for the following reasons:

- **The Division allows inconsistent processes.** The Division has not established a consistent process for completing and documenting a participant's comprehensive assessment. For example, the Division does not require staff to use the standardized assessment form; rather, the Division allows counselors to document the assessment using either the form or through a case note in AWARE. Staff documentation of their analysis of the eight factors also varied because the Division does not require staff to document an assessment of each factor. The Division has not specified, such as through policy or training, the level of detail that staff must document in the comprehensive assessment.
- **Lack of supervisory review.** The Division also does not have a policy or procedure requiring supervisors to review the comprehensive assessments or participant Plans to ensure they are complete, timely, and reflect a reasonable and appropriate employment goal based on the comprehensive assessment process. Additionally, as we discuss in Recommendation No. 2013-67 the Division's quality assurance review in Fiscal Year 2013 also identified deficiencies with the comprehensive assessment process for setting employment goals and determining participants' service needs, but the Division does not have processes in place to ensure that problems found through the quality assurance reviews are corrected.

### **Why do these problems matter?**

The problems we identified with the Program's comprehensive assessment process and establishment of participants' employment goals are important for four reasons. First, missing and incomplete comprehensive assessments limit the

Program's ability to ensure that counselors assess all of the factors needed to determine whether each participant's employment goal is appropriate as federally required. When counselors do not utilize the standardized form, they do not have a tool to prompt them to analyze each factor. Second, when Plans are not signed by a participant and/or a counselor, the Program lacks evidence that the participant and counselor agreed on the employment goal and the planned services. The lack of a signed Plan makes it difficult for the Program to ensure the participant will comply with the Plan. Third, when Plans are not completed timely, it delays service provision to participants. Finally, when counselors and participants do not establish an employment goal that is achievable by the participant, there is a risk that the participant will not meet the goal or succeed in the Program.

<sup>1</sup> Known questioned costs total \$740. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Eligibility. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-54:**

The Department of Human Services should improve Vocational Rehabilitation Program (Program) processes for conducting assessments to determine participant employment goals and completing the participant Individualized Plan for Employment (Plan) by:

- a. Establishing and implementing written policies and standardized processes for completing and documenting the comprehensive assessment.
- b. Providing training to Program field office staff on policies and processes for completing the comprehensive assessment and employment Plan.
- c. Implementing a supervisory review process over counselors' comprehensive assessments and the creation of participant employment Plans to ensure that all factors required to determine participant employment goals are fully documented and that Plans are signed and completed in compliance with Division of Vocational Rehabilitation policies.

## **Department of Human Services Response:**

- a. Agree. Implementation date: July 2014.

The Division of Vocational Rehabilitation (Division) will implement a standard process for completing and documenting the comprehensive assessment to ensure vocational goals are clearly and thoroughly substantiated prior to the development of the Individualized Plan for Employment. Procedural updates requiring the consistent use of the Employment Outcome and Service Needs form were communicated to all staff on September 13, 2013 and Division policy 9.5 was revised accordingly on October 1, 2013. The Division is also working on improvements to include best practices from other states related to documenting the vocational goal. Policies and procedures will be further revised and expanded to clarify that any vocational goal change during the course of the participant's case requires a newly completed assessment.

- b. Agree. Implementation date: July 2014.

The Division delivered staff training in September 2013 to specifically address policy and procedure updates, and strategies for thoroughly completing and documenting the comprehensive assessment. Division staff are in the early stages of conducting a training needs assessment, which will be incorporated into a comprehensive training plan for State Fiscal Year 2014.

- c. Agree. Implementation date: April 2014.

The Division staff will incorporate Division-level quality assurance processes to ensure that comprehensive assessments and requirements are in compliance with policies and procedures through the use of a recently developed form to document follow-up actions needed and performed by counselors. The new supervisory review process will require supervisors to follow up with each counselor to ensure that corrections identified through the quality assurance process are reflected in the case record.

---

## **Comparable Services and Benefits**

The Program provides some services, such as medical services, eyeglasses and hearing aids, mental health counseling, substance abuse treatment, and college tuition, for Program participants that are sometimes available to participants through other programs or organizations. According to the federal regulations

(Comparable services and benefits, 34 C.F.R., pt. 361.53), states must determine whether comparable services and benefits exist under any other program before providing certain services, such as training through college course work, occupational goods and services, hearing restoration, and transportation, to a Program participant using Program funds. Comparable services and benefits are those available to the participant and provided or paid for, in whole or in part, by other federal, state, or local public agencies, health insurance, or employee benefits. For example, the Program considers Pell grants awarded as part of federal financial aid to be a comparable service or benefit for a Program participant who needs college courses or academic training as part of achieving his or her employment goal. Other examples of comparable services or benefits include medical services provided by Medicaid and the Colorado Indigent Care Program. For some services, Division policy states that a comparable benefits search is not required, such as for assessment services that assist with determining eligibility and vocational rehabilitation needs, vocational rehabilitation counseling and guidance, and rehabilitation technology services and goods.

According to our interviews with Program staff, the counselors are typically responsible for identifying the comparable services and benefits that are available to the participant and documenting those services and benefits in the participant's Plan, with corresponding documentation in the hard-copy case file. The Plan identifies the providers or vendors for all services, including those that the Program and outside organizations will provide. Some staff also indicated that the Division maintains a searchable database of information on comparable services and benefits. According to interviews, counselors typically use the Division's AWARE system to draft the participant's Plan and complete the comparable services and benefits section electronically to include as part of the Plan. AWARE allows staff to record whether there are comparable services and benefits available to the participant by checking a box for "None," meaning the staff member was not able to find comparable services or benefits, or "Other," meaning staff identified a comparable service or benefit. If staff check "Other," they can type the name of the provider of the comparable service in AWARE. If a staff member does not choose "None" or "Other," the AWARE system automatically records "No Items Selected" in that section of the participant's Plan.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to assess the Program field offices' processes for identifying and documenting comparable services and benefits. In our sample of 85 participant files from Fiscal Year 2013, we identified 79 of the 85 files that had services within their Plans that required a search for comparable services and benefits based on Division policy. Specifically, Division policy exempts certain services, such as assessments by counselors to determine participant eligibility and vocational rehabilitation needs, from requiring a search for comparable services and benefits. We evaluated these 79 files to determine whether Program

staff completed a search for comparable services and benefits and documented the availability of the comparable service or benefit in the participant's Plan and included applicable documentation on the comparable service or benefit within the case file. We also interviewed Division and Program staff to understand the process for determining and documenting comparable benefits.

### **How were the results of the audit work measured?**

We used the following criteria to measure the results of our audit work:

**Comparable services or benefits required.** Federal regulations [Comparable services and benefits, 34 C.F.R., pt. 361.53(c)] specify that if comparable services or benefits exist under any other program—such as programs in other federal, State, or local public agencies; health insurance; or employee benefit plans—and are available to the participant at the time needed to ensure the progress of the individual toward achieving the employment outcome in the participant's Plan, the state must use those comparable services or benefits to pay for all or part of the costs of the vocational rehabilitation services.

**Comparable services or benefits must be explored.** According to Division policy (Sections 10.1 and 12.24.1), comparable services and benefits under any program must be explored and utilized to meet all or part of the cost of any vocational rehabilitation service. Specifically relating to tuition, the Division will not finalize the provisions for training services in an institution of higher education until the individual's financial aid award status is determined and documented, in accordance with the time lines governing financial aid award decisions at the chosen training facility.

According to Division policy (Section 10.1), certain services or benefits are exempt from a comparable benefits search, which include: (1) assessment services to determine eligibility and vocational rehabilitation needs; (2) vocational rehabilitation counseling and guidance; (3) referral and other services to secure needed services from other agencies; (4) job-related services; (5) rehabilitation technology services and goods; and (6) post-employment services if included as part of the services provided in 1 through 5 above. However, Division policy states that "Although a search is not required for an exempt service or good, the [Program] counselor is not precluded from identifying comparable benefits as long as it does not delay services or otherwise negatively impact the vocational rehabilitation program."

**Comparable services or benefits search must be documented.** Division policy (Section 10.1) states that the participant files must contain evidence of the comparable services and benefits search prior to expenditure of Division funds for any good or service that is not exempt from the search. In addition, according to Division management, if staff are unable to identify comparable services or

benefits for a participant, the staff typically note “None” on the participant’s Plan in AWARE.

### **What problems did the audit work identify?**

We found problems with 35 (44 percent) of the 79 participant cases for which Program staff should have searched for comparable services and benefits, resulting in \$10,943<sup>1</sup> of known questioned costs. For some cases, we identified multiple problems. Specifically, we found:

- **Lack of evidence that staff searched for comparable services and benefits.** In 15 participant case files, staff did not document a search for comparable services and benefits for services that were outlined in the participants’ Plans and did not qualify as exempt services. These 15 participants received a total of \$34,800 in services in Fiscal Year 2013. The AWARE system automatically recorded “No Items Selected” for each of these cases because staff did not choose the “None” or “Other” option, indicating that the staff may not have performed the search; there was also no documentation in the hard-copy file indicating staff searched for comparable services or benefits. These problems resulted in \$10,943 in known questioned costs.
- **Staff noted no comparable services and benefits were available when documentation showed otherwise.** For 18 participant case files, Program staff marked “None” in AWARE to indicate there were no comparable services or benefits associated with the purchase of hearing aids, although there was evidence in another case that comparable benefits were available for hearing aids. For that one case, staff had assisted the participant with applying to a non-profit organization for funding toward the purchase of hearing aids that were part of the participant’s Plan. The non-profit organization approved the participant’s application and paid \$1,800 toward the cost of the participant’s hearing aids, which were about \$5,000. There was no documentation in any of the 18 case files or AWARE to indicate that staff had searched, such as on the Division’s database, for comparable benefits or attempted to determine whether an entity could contribute toward the cost of hearing aids.
- **Staff did not appear to determine whether financial aid was available.** For two participants in our sample who were approved to take college courses as part of their Plans, AWARE noted “None” for comparable services or benefits, but there was no documentation that Program staff had assisted participants in applying for financial aid or determined the participants’ financial aid award status, as required by Division policy.

## Why did the problems occur?

The following four factors contributed to the problems we identified:

- **Lack of clear guidance on identifying comparable services and benefits.** We found that the Division's written policies do not specify how Program staff should search for and identify comparable services and benefits. For example, policy does not state that staff must check each participant's potential eligibility for other programs, such as those administered by the Department of Human Services, or Medicaid and the Colorado Indigent Care Programs administered by the Department of Health Care Policy and Financing, nor do policies require that staff research the comparable services and benefits that may be available through non-profit organizations or retailers.
- **Staff were unaware of information the Division maintains on comparable services and benefits.** Although the Division appears to maintain a listing of comparable services and benefits on its intranet that is accessible to all field offices, the Division has not adequately disseminated the information to its field office counselors.
- **Staff believed searching for comparable services and benefits is time consuming.** The Division has not established a time frame, such as in written policy, specifying a reasonable amount of time that staff should take to search for comparable benefits and to assist participants in applying for and receiving services through other programs, such as Medicaid and the Colorado Indigent Care Programs. Some staff informed us that they believe that searching for comparable services and benefits and assisting participants to apply for benefits through other programs can cause delays in participants receiving the services they need, so to avoid delays the participants are provided services through the Program. Although Division policy states that an activity that jeopardizes a participant's immediate job placement or an extreme medical risk is considered urgent, for the case files we reviewed where staff had not identified comparable services and benefits, there was no evidence of an urgent need for the participants.
- **Participants have been allowed to refuse comparable services and benefits.** Some staff stated that a barrier to identifying comparable services and benefits is that participants refuse to apply for other assistance programs or refuse to accept services through other programs. The Division has not clarified in its policies that a participant's refusal to use comparable services and benefits constitutes a violation of the Division's policy that the Program provide services at the least possible

cost and, therefore, will result in denial of vocational rehabilitation services.

### **Why do these problems matter?**

The Program has limited funding to provide services to participants and currently has a wait list, so it is not serving all participants who are eligible for the Program. Identifying comparable services and benefits, including those offered by nongovernmental organizations, is an important component of reducing the overall cost to the Program of serving participants in need of a range of services that may be offered through other programs. For example, in the 15 case files where we identified that staff had not documented a search of comparable services and benefits, the participants received a total of \$34,800 in services in Fiscal Year 2013. Had staff identified and secured services through other programs for just a portion of these services, it would have created a savings for the Program or freed up funds that could have been used for other participants.

<sup>1</sup> Known questioned costs total \$10,943. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Eligibility. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-55:**

The Department of Human Services should improve Vocational Rehabilitation Program (Program) controls and processes for using comparable services and benefits to cover, in whole or part, the costs of Program services, as required by federal regulations by:

- a. Implementing written policies and procedures for identifying and maintaining updated information on available comparable services and benefits for the range of services that the Program provides and ensuring the information is accessible to all applicable field office staff.
- b. Establishing a target time frame in written policy for field office staff's search for comparable services and benefits and staff's assistance to participants with the application for services through other programs.
- c. Clarifying policies to indicate that when a participant refuses to use comparable services and benefits, the participant shall be responsible for

the costs of the services. The policy should address Program staff's related documentation requirements.

- d. Providing training to field office staff on federal and Division of Vocational Rehabilitation requirements and processes for identifying and documenting comparable services and benefits. This training should include working with staff within other agencies with similar program services to obtain information on the comparable services and benefits that may be available to Program participants and processes for assisting participants in the application process for comparable services and benefits.

### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

- a. The Division of Vocational Rehabilitation (Division) will update its policies and procedures providing structure and guidance about how to research, obtain, and apply available comparable benefits and services. The Division will convene a workgroup to assist with developing guidance for comparable benefits, including staff at the Region VIII Technical Assistance and Continuing Education Program (a federally-funded technical assistance program). In addition, the Division will establish a comprehensive list of locally and regionally available comparable benefits and services, and provide that list to vocational rehabilitation counselors who are responsible for determining and obtaining necessary goods and services for participants. A mechanism for ensuring this list is maintained and kept current will be implemented in accordance with this effort.
- b. The Division will update its policies and procedures to ensure that staff search for available comparable benefits and services that have been identified and included on the Individualized Plan for Employment within a targeted time frame. Staff may assist the participant in applying for other benefits as feasible.
- c. The Division will revise its policies and procedures to ensure that vocational rehabilitation counselors are identifying and documenting available comparable benefits in the case file, and participants are utilizing available comparable benefits that appropriately address the barriers to employment. If a participant refuses the application of an appropriate comparable benefit, she or he shall be responsible, in whole or in part, for the cost of the service, which will be documented in the case file.

- d. The Division will work with staff within other agencies with similar program services to obtain information on the comparable services and benefits that may be available to Program participants. The Division will ensure that all appropriate staff will receive training on the updated policies and procedures regarding the identification and application of comparable benefits and services. The Division will train staff to assist program participants to apply for comparable benefits and services as feasible.

---

## Determining Severity of Disability

Federal regulations (Assessment for determining eligibility and priority for services, 34 C.F.R., pt. 361.42) require states to conduct an assessment for determining eligibility and priority for services. In Colorado, the Program field office counselors perform the assessment for priority of services as part of the eligibility determination process. Counselors determine a participant's priority for services by classifying the participant's disabilities based on how those disabilities affect the participant's functional capacity. The Division has defined a participant's functional capacity as "a set of life activities or skills in which the ability to function is significant to successful independence and/or employment." As discussed previously, the Division has identified the following eight life activities or skills for the purpose of determination of severity of disability: mobility, motor skills, interpersonal skills, communication, work tolerance, work skills, self-care, and self-direction. In addition, the counselors estimate and list the number and the estimated length, in months, of vocational rehabilitation services that they believe a participant will need.

Based on the limitations in functional capacity posed by a participant's disabilities, and the number and length of services the participant is estimated to need, the counselors categorize participants into one of three categories that indicate the severity of disability: (1) Most Significantly Disabled, (2) Significantly Disabled, and (3) Individual with a Disability. The disability categories provide the basis for the order in which participants will be selected for services when the Program has a wait list, as discussed in Recommendation No. 2013-58. The following table summarizes the number of participants classified into each disability category, the average number of services that each category group received, the average types of services each group received, and the average functional limitations per group, for our sample of 85 participants.

<b>Vocational Rehabilitation Program Severity of Disability Categories and Characteristics of Sample of 85 Participants</b>				
<b>Category Determined by Staff</b>	<b>Total Number of Cases</b>	<b>Average Number of Services</b>	<b>Average Types of Disabilities for Participants</b>	<b>Average Functional Limitations</b>
<b>Most Significantly Disabled</b>	53	4.87	- Schizophrenia or other Psychotic Disorders - Psychosocial Impairment - Intellectual or Developmental Disability - Depressive Mood Disorder - Substance Abuse/Dependence - General Physical Impairments	Communication, Interpersonal Skills, Self-Direction, Work Skills, Work Tolerance, Self-Care, and Motor Skills
<b>Significantly Disabled</b>	21	4.52	- Hearing Loss - Learning Disabilities - Cognitive Disorders - Visual or Communicative Impairments - Physical Impairment	Communication, Interpersonal Skills, Work Skills, and Work Tolerance
<b>Disabled</b>	11	3.45	- Hearing Loss - Other Physical Impairments, Unknown Cause - Cognitive Impairments	Motor Skills, Work Tolerance, and Communication
<b>Source:</b> Office of the State Auditor’s analysis of Division of Vocational Rehabilitation eligibility determination documentation for the sample of 85 participants.				

The Eligibility Determination form within the Division’s AWARE system shows the participant’s eligibility date, specific disability, severity of disability category, functional limitations, impediment to employment, the estimated number and months of services, and the reason for the length of services. The participant is provided a notification letter that shows the severity of disability category and whether the Division can provide the participant services or if the Division has instituted a wait list for that category and is, therefore, currently unable to provide services.

**What audit work was performed and what was the purpose?**

The purpose of our audit work was to evaluate the Program’s processes for classifying the severity of participants’ disabilities. We interviewed Division and Program staff and reviewed the sample of 85 participant case files from Fiscal Year 2013. We reviewed the Division’s hard-copy documentation and information recorded in AWARE to determine how each sampled participant was categorized based on the severity of his or her disability, whether documentation of the disability was maintained in the case file, the types of disabilities the participant had, the functional capacities affected by each disability, and the number and types of services that counselors determined the participant would

need at the time of the eligibility determination. We also reviewed whether the Program notified the participants about the eligibility determination consistently and accurately, which would include the category of severity of disability into which the Division placed the participant.

**How were the results of the audit work measured?**

We applied the following criteria when evaluating the Division’s severity of disability determination process:

**Determination of disability severity.** The following table shows the definitions of the three categories of severity of disability as defined by federal regulations and Division policy.

<b>Vocational Rehabilitation Program                      Definitions of the Categories of Severity of Disability</b>		
<b>Category</b>	<b>Federal Definition</b>	<b>Division Definition</b>
<b>Most Significantly Disabled</b>	An individual with a significant disability who meets the designated state unit’s criteria for an individual with a most significant disability.	A participant has a severe physical or mental impairment that seriously limits at least three or more functional capacity areas (mobility, motor skills, interpersonal skills, communication, work tolerance, work skills, self-care, and self-direction) in terms of an employment outcome and whose successful vocational rehabilitation can be expected to require two or more core vocational rehabilitation services for at least 5 months.
<b>Significantly Disabled</b>	An individual who has a severe physical or mental impairment that seriously limits one or more functional capacities in terms of an employment outcome; whose vocational rehabilitation can be expected to require multiple vocational rehabilitation services over an extended period of time; and who has one or more physical or mental disabilities or combination of disabilities causing comparable substantial functional limitation.	A participant who has a severe physical or mental impairment(s) that seriously limits at least one factor in two or fewer functional capacity areas and who otherwise meets the same criteria as for a most significant disability. An individual who is determined to be eligible for SSI/SSDI on the basis of his or her own disability is presumed to have a significant disability.
<b>Individual with a Disability</b>	An individual who has a physical or mental impairment that substantially limits one or more major life activities; who has a record of such impairment; or who is regarded as having such impairment.	An individual who meets Program eligibility criteria but has a disability that does not meet the criteria for most significant or significant disability.
<b>Source:</b> Office of the State Auditor’s analysis of federal regulations (Applicable definitions, 34 C.F.R., pt. 361.5) and Division of Vocational Rehabilitation policy Sections 8.2 to 8.4.		

**Timing of severity of disability determinations.** Division policy (Section 8.1) requires field office counselors to determine severity of disability at the same time as the determination of eligibility when the Division has a wait list in place. When the Division does not have a wait list, field office counselors must complete determinations of disability severity as soon as possible but no later than the completion of the Plan development.

**Notification of participants.** Division policy (Section 7.2) requires that, upon placement into a priority category, the eligible individual shall receive written notification of his or her priority classification and information regarding the policies and procedures governing availability of vocational rehabilitation services, which is done through the Order of Selection notification.

### **What problems did the audit work identify?**

For 41 (48 percent) of the 85 participant cases we reviewed, we identified problems with the severity of disability determinations and notifications as described below.

- **Program staff did not classify participants' severity of disability consistently.** For the 53 out of 85 sampled participants who were categorized as "Most Significantly Disabled," their disabilities ranged significantly from mental health disorders to physical impairments and for 11 of the 53 participants in this category, Program staff estimated that the individuals needed two or three Program services. For example, while one participant categorized as "Most Significantly Disabled" had disabilities associated with a physical impairment, hearing loss, communication loss, and mental health impairment and needed nine services including job coaching, job placement, mental health counseling, and vocational guidance and counseling, another participant with a mental health impairment and substance abuse noted as his or her disability needed only two services including job coaching and mental health counseling.

We further found that, for 14 participants in our sample with hearing loss or hearing impairment as their only disability, the participants were inconsistently categorized: four individuals who needed 2 to 7 services for 5 to 12 months were categorized as "Most Significantly Disabled," four individuals who needed 3 to 5 services for 5 to 12 months were categorized as "Significantly Disabled," and six individuals who needed 1 to 6 services for 2 to 4 months were categorized as "Individual with a Disability." In addition, as we discuss in Recommendation No. 2013-53, Program staff did not consistently document participants' physical or mental impairments. Staff must assess participants' impairments to accurately determine participants' functional limitations, which is one factor used to classify participants' severity of disability.

- **Discrepancies in the estimated number of services that individuals needed.** For 41 participant case files, the number of services the counselor estimated the participant would need to address an impairment and meet an employment goal, which was listed on the Eligibility Determination form, did not match the services listed under the eligibility rationale on the same form. For example, in one case, the field office counselor documented the participant's estimated number of services as both two and six on the same form. Because one basis for the severity of disability is the estimated number of services the counselor believes the participant will need to meet an employment goal, we could not determine whether the classification of the disability severity was accurate.
- **Some individuals were not consistently and accurately notified of their disability priority category.** In six participant case files, we found inadequacies with the field offices' Order of Selection notification letter. As discussed, the field offices are required to utilize the notification letter to communicate to the participant his or her severity of disability and whether or not the participant will be placed on a wait list. We found:
  - For two individuals who were not placed on a wait list, the Order of Selection notification letter was missing from both the hard-copy case file and AWARE, so we could not determine whether Program staff notified the individuals, as required, of their severity of disability and whether the Division was able to serve the participants.
  - For two individuals, Program staff did not send the notification timely. Specifically, field office staff sent the notifications 5 and 9 months, respectively, after the two individuals' severities of disability were determined.
  - For two individuals, the notification reported a different disability priority category than what Program staff had documented in the case file at the time staff determined eligibility. Specifically, one individual was notified that his or her category was "Significantly Disabled" but AWARE showed the individual was actually categorized as "Individual with a Disability;" the other individual was notified that his or her category was "Most Significantly Disabled," but AWARE showed the individual was actually categorized as "Significantly Disabled."

## Why did the problems occur?

The problems we identified occurred for the following reasons:

- **The Division has not established a method that accurately or consistently assesses severity of disability.** During interviews, some Program counselors stated that the severity of an individual's disability and priority category is determined based on the estimated number of Program services that the individual will need. However, Division policy states that an individual is "Most Significantly Disabled" if he or she has a severe physical or mental impairment that affects three or more functional capacity areas and needs two or more core vocational rehabilitation services for at least 5 months. Program staff did not document the methodology used to determine the functional limitations, so we could not determine the appropriateness of the functional limitations staff identified and, therefore, the accuracy and consistency of the severity of disability determination.

In addition, Program staff use a checklist approach developed by the Division to indicate an individual's functional limitations, estimated number of services, and estimated length of time of services and to determine an individual's severity of disability category. We found that if staff mark that an individual needs services for 5 months, then the individual is automatically placed into the "Most Significantly Disabled" category; likewise, if staff check that the individual needs services for 2 months, the individual is automatically placed into one of the other two disability severity categories, even if the individual meets the functional limitations criteria for "Most Significantly Disabled." In fact, we found that if a Program counselor estimates that a participant needs vocational rehabilitation counseling and one other service, under current practice, the counselor may classify the participant as "Most Significantly Disabled," despite the significance of the participant's disabilities. Although the estimated number of services is one factor that the Division is required to consider when determining the severity of a participant's disability, the intent of federal regulations is for the Program to prioritize services based on the severity of an individual's disabilities.

The Division does not have a scoring or weighted system for determining severity of disability, which may be a more accurate method for assessing severity than the Division's current method. For example, Alabama determines the severity of disability for individuals who apply to its vocational rehabilitation program by using a functional limitations assessment tool. This tool evaluates the individual's functional abilities, such as motor skills, speaking, and sight, and calculates a severity score out of 90 where individuals with more-severe functional limitations have higher scores. Alabama uses the score to categorize each individual into

one of three severities of disability categories and prioritizes program services for individuals with higher scores.

- **Lack of clear guidelines for counselors to utilize when determining participants' severity of disability.** Division policy defines the categories of disability but does not require staff to use a consistent method, such as a checklist, to ensure counselors consistently categorize the severity of disabilities. Further, the Division provided training on its policies and procedures to Program staff during Fiscal Year 2013 but did not provide guidance on how to estimate the number of services a participant will need. Division staff indicated that the determination of the estimated number of services is based on counselor judgment. Program staff may have incentive to make the number of services as high as possible to get a participant into a disability severity level that would place the participant in a higher disability priority category.
- **The Division has not implemented a supervisory review over the severity of disability classifications.** In Maryland, the supervisor or designee is required to review the eligibility and severity of disability determinations and enter a case note in the electronic case management system, documenting his or her approval or disapproval of the decisions. Division staff indicated that it also does not have a process, such as through quality assurance reviews, to compare the estimated number of services recorded in different sections of the Eligibility Determination form to determine whether the counselor's documentation is consistent and estimates are reasonable.
- **Division policy does not reflect the staff's common practice of sending a notification letter when there is no wait list.** While we found that staff typically followed the best practice of sending all eligible individuals an Order of Selection notification to inform them of their severity of disability category and that the Program can provide services, Division policy does not require staff to send these notifications unless a wait list is in place. Division policy also does not include time lines for sending individuals this notification to ensure they receive timely information about their priority category for Program service.

### **Why do these problems matter?**

The problems we identified with participants' severity of disability determinations and notifications are important for the following reasons:

- **The severity of disability classification drives service prioritization.** A participant's disability severity determines the participant's placement on

the wait list and priority for services; specifically, those individuals who are categorized as “Most Significantly Disabled” are considered to be the highest priority and are, therefore, served before others on the wait list. When processes for determining the disability category are not consistently applied, the Division cannot ensure that eligible individuals are prioritized for services based on the severity of their disabilities, as required by federal regulations.

- **The State should ensure accurate reporting on severity of disability classifications.** The Department reports a summary of its vocational rehabilitation services by participants’ disability severity levels to the

State and federal governments. Specifically, the State Plan includes the number of participants who are most significantly disabled, significantly disabled, and disabled that are served by the Program during a fiscal year and the expenditures associated with those individuals. In addition, the Division utilizes the disability categories for internal reporting to Department management on information on the status of the Program. Therefore, it is important that severity of disability is properly determined to ensure accurate reporting to internal and external sources.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Eligibility, Reporting. Classification of Finding: Significant Deficiency.)

---

## **Recommendation No. 2013-56:**

The Department of Human Services should improve the process for determining participants’ severity of disability for the Vocational Rehabilitation Program (Program) by establishing a consistent and accurate method for assessing the severity of disabilities for Program applicants, modifying policies to provide clear guidance and tools for determining the severity of disability level, requiring notification of disability severity level to participants in all cases, and incorporating a supervisory review of this assessment. This process should include evaluating the benefits of implementing a scoring or weighted system for determining severity of disability and ensuring that staff are adequately trained on the new policies and procedures.

### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

The Division of Vocational Rehabilitation (Division) will improve accuracy and consistency for determining severity of disability by evaluating the current service delivery policy to determine where there are

inconsistencies and/or need for clarification; reviewing other states' policies for determining severity of disability, specifically those that use a scoring and/or weighted system, and their practices for supervisory reviews of assessments; and outreach to the Region VIII Technical Assistance and Continuing Education Program (a federally-funded technical assistance program) for input about the Division's current methodology for assessing the severity of disability. The Division will revise its policies and procedures accordingly to provide clarification and guidance for vocational rehabilitation counselors, including the requirement that participants receive written notification of their priority classification, and will implement supervisory reviews of a sample of determinations to ensure accuracy.

---

## **Case Management**

Case management is a multi-step process to ensure that all Program participants receive standardized, comprehensive, and efficient customer service, at the same level of quality, statewide. The case management activities that Program staff provide are diverse and include assisting participants with applying for Program services, maintaining ongoing communication with participants, monitoring each participant's compliance with his or her Plan, and developing methods to help keep participants engaged so that they continue to progress through the Program. Case management also includes maintaining participant records, which are kept both in hard-copy files and in AWARE.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to determine whether Program staff consistently document their case management activities in a manner that demonstrates compliance with federal regulations and state policy and rules. We reviewed the sample of 85 participant case files to determine whether Program staff provided sufficient, ongoing case management activities to help ensure participants successfully completed the Program and whether staff sufficiently documented those activities. We also interviewed a sample of Program staff from a sample of seven field offices to understand their processes for managing cases.

### **How were the results of the audit work measured?**

In April 2013, the Division revised its written policies for the Program. The sampled case files that we reviewed were in progress both before and after the policy update. The policies below applied to the case files we reviewed. We applied the version of the following policy that corresponded to each participant

case based on where the participant was in the eligibility determination and service delivery process:

**Accurate and timely data entry.** Division policy (Policy manual introduction section p. 2) requires staff to ensure the collection and entry of accurate and timely data into AWARE. In 2013, the Division revised this policy to include a requirement for counselors to use case notes to document counseling and guidance and all relevant rehabilitation activities.

**Monitoring and review of the Individualized Plan for Employment.** According to Division policy (Section 11.7), the participant's Plan shall be reviewed in accordance with the Plan schedule. The counselor shall assure monitoring and review of the implementation of the Plan on a regular basis and document such reviews. In 2013, the Division revised this policy to include a requirement for the Program counselor and the participant to engage in regular communication on the participant's progress in meeting service objectives and to document the communication in the participant's case file. The Division does not define "regular communication" in policy, but staff reported to us that they are expected to contact participants at least monthly.

**Case closure.** Division policy (Section 17.1) provides numerous reasons for closing a case. For example, Division policy specifies that case closure shall occur at any time when it has been determined that one of the following has occurred: (1) the individual has achieved an appropriate employment outcome after the provision of necessary and planned services under the Plan; (2) the individual is not eligible or is no longer eligible; (3) continued services are not appropriate or the individual is not available for other reasons; (4) after repeated attempts by the counselor, the individual cannot be contacted or located; and (5) the individual fails to cooperate.

### **What problems did the audit work identify?**

In 16 (19 percent) of the 85 case files we reviewed, we identified problems related to case management, as outlined below. For some participants' cases, we identified multiple problems. The problems we identified resulted in a total of \$4,051<sup>1</sup> in known questioned costs. We found:

- **Limited staff contact with the participant.** Eight participant case files showed limited staff contact with the participant. Specifically, in seven cases, there was no record, in a hard-copy case file or AWARE, of any Program staff communication with the participants for between 3 and 9 months during Fiscal Year 2013. In the remaining case, Program staff had not communicated with the employed participant in either of the first 2 months of new employment in order to assess job stability, as required by Division policy.

- **No evidence of regular progress reports or confirmation that participants were the ones who received the Program services.** Five participant case files lacked evidence, either in the hard-copy file or in AWARE, that the participant or third party, such as the participant's job coach, provided the Program counselor regular reports on the participant's progress as required by the participant's Plan. In two cases, the Program paid \$3,823 for the participants to receive hearing aids, but there was no evidence in the hard-copy case file or AWARE that the participants had actually received the hearing aids. In another case, the Program paid \$228 for a participant to receive an occupational license, but there was no evidence in the file or AWARE that the participant had obtained the license. These problems resulted in \$4,051 in known questioned costs.
- **Cases not closed timely.** Eight participant case files contained documentation showing an acceptable cause for closing the case, as required by Division policy, but the cases were either not closed timely or not closed at all by Program staff. Specifically, one of these cases was closed 4 months after staff documented the reason for case closure, six cases were still open and recorded in AWARE as "in service" as of July 2013, and one participant was placed on the wait list.

### **Why did the problems occur?**

The case management problems we identified occurred for the following reasons:

- **Ambiguous case management guidance from the Division.** Overall, the Division's written policies and procedures are not sufficiently written to ensure that staff and counselors communicate with participants regularly, document all case management activities, or close cases timely. Policy only states that communication should be "regular." Program staff we interviewed indicated that, through trainings and internal communication, Division management have stated that a best practice is for counselors to communicate with unemployed participants at least monthly and document this communication in the case file; however, this best practice is not required. Further, Division policy does not contain a time frame or procedure for closing cases when they meet the Division's criteria for case closure. For example, there is no guidance regarding staff determination of a participant as "unavailable" or "uncooperative" for case closure purposes.
- **No methods to ensure quality case management.** Regarding the instances we identified in which staff did not follow Division policy requiring monthly follow-up contact with employed participants, although the Division has an annual quality assurance process in place to review for

noncompliance, the Division does not specifically require documentation of noncompliance problems in staff performance reviews or otherwise hold staff accountable for noncompliance. In addition, the Division does not require ongoing supervisory reviews of case management activities in each field office to ensure staff comply with Division policy.

### **Why do these problems matter?**

Maintaining accurate and complete case file documentation is important to demonstrate Program staff compliance with Division policy and to ensure participants receive consistent assistance and monitoring from staff. Further, infrequent contact with Program participants could lead to participants not receiving timely services or losing motivation to follow through with their employment Plans in order to finish the Program successfully. If counselors do not obtain progress reports from third parties and participants, when required by the participant's Plan, the staff cannot determine a participant's progress accurately or make timely decisions about the need to modify the participant's Plan or close the case. Without written policies and training on the contact frequency for unemployed participants, documentation for each contact, and time frames and procedures for closing cases, the Division is unable to ensure that cases are frequently and consistently monitored.

<sup>1</sup> Known questioned costs total \$4,051. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013- 57:**

The Department of Human Services should ensure compliance with federal and state case management requirements for the Vocational Rehabilitation Program (Program) by:

- a. Implementing written policies specifying minimum requirements for communicating with unemployed participants, such as requiring counselors to contact these participants at least once every 30 days, and requirements for supervisory review of field office staff's case management activities and timely case closure when cases meet the closure criteria in policy.
- b. Providing training to Program field office staff on required documentation of case management activities, requirements for ongoing supervisory

reviews of case management, and case closure procedures, including best practices for case management and documentation.

### **Department of Human Services Response:**

- a. Agree. Implementation date: July 2014.

The Division of Vocational Rehabilitation (Division) will strengthen its policies and procedures pertaining to participant contact and timely case closure. The Division will implement supervisory reviews of case management practices. In October 2013, the Division updated its Policy Manual to require documented contact at a minimum of every 90 days for all Program participants. The policy revision also requires monitoring the progress of participants' in the Individualized Plan for Employment. Beginning in December 2013, the Division's quality assurance tool will include a follow-up form to ensure that quality assurance findings related to participant contact are addressed and that the case file reflects appropriate progress on the part of the participant toward an employment outcome. When appropriate progress is not made, the case will be closed in a timely manner.

- b. Agree. Implementation date: October 2014.

The Division delivered staff training in September 2013 to address policy and procedure updates that became effective in October 2013. After additional revisions to the Division's Policy Manual are completed by July 2014, additional training will include improved strategies for case management activities and timely case closure, along with a review of the new supervisor oversight requirements.

---

## **Wait List Management**

Federal regulations (Ability to serve all eligible individuals 34 C.F.R., pt. 361.36) require states to have an "order of selection," or wait list, process that prioritizes services to participants when projected fiscal and personnel resources for the Program are not sufficient to serve all individuals who are eligible for the Program. During Fiscal Year 2013, the Division implemented a wait list for Program services, in line with federal requirements, because the Division's fiscal year expenditures for vocational rehabilitation services outpaced the federal and state funding available to provide those services. Specifically, according to the supplemental request submitted to the JBC, in about February 2013 the Department learned that the Division was going to overspend its annual appropriation by \$5.5 million; in March 2013, the Department requested and

received a \$5.5 million supplemental appropriation, consisting of about \$1.2 million of State General Funds, to address the Program’s revenue shortfall; and the Department also implemented a wait list for Program services in March and April 2013. We further discuss the problems we identified with the fiscal management of the Program in Recommendation No. 2013-59.

The Division classifies each individual who has been deemed eligible for the Program into one of the following three disability severity categories: (1) Most Significantly Disabled, (2) Significantly Disabled, or (3) Individual with a Disability. The Division uses these categories to prioritize services to wait-listed individuals. In its Fiscal Year 2013 State Plan, the Division noted that when there is a wait list in place, eligible individuals in the “Most Significantly Disabled” category will be served first, followed by individuals in the “Significantly Disabled” category, and then those in the “Individual with a Disability” category.

On March 1, 2013, the Division first established a wait list for eligible individuals classified as “Individual with a Disability.” On April 22, 2013, the Division expanded the wait list to include eligible individuals classified as “Most Significantly Disabled” and “Significantly Disabled.” As of August 2013, a total of 4,279 eligible participants were on the wait list in Colorado. The following table shows the number of eligible individuals on the wait list categorized by the severity of their disability, as determined by Program staff.

<b>Vocational Rehabilitation Program                      Eligible Individuals on the Program Wait List by Severity of Disability                      As of August 27, 2013</b>		
<b>Severity of Disability Category</b>	<b>Number of                      Individuals on                      the Wait List</b>	<b>Percentage of                      Total</b>
Most Significantly Disabled	3,014	70%
Significantly Disabled	1,049	25%
Individual with a Disability	216	5%
<b>TOTAL</b>	<b>4,279</b>	<b>100%</b>
<b>Source:</b> Office of the State Auditor’s analysis of wait list data provided by the Division of Vocational Rehabilitation.		

Program staff offer wait-listed individuals assistance with completing their Program applications, determine each applicant’s eligibility for the Program, and provide the individuals information and referral services. Wait-listed individuals do not receive any other services offered through the Program until they come off the wait list.

**What audit work was performed and what was the purpose?**

The purpose of our audit work was to assess Division practices for managing the Program’s wait list. We reviewed the Program wait lists in place in May 2013 and

August 2013, respectively. We interviewed Division staff and Program staff from a sample of seven field offices to assess Division processes for managing the wait list, including prioritizing those who are on the wait list to ensure that the highest-need individuals will be served first, in compliance with federal regulations, and ensuring field offices have consistent processes for transitioning individuals off the wait list. We also reviewed hard-copy case files and information recorded in the Division's AWARE system for our sample of 85 participants who were eligible for services during Fiscal Year 2013 to determine whether the individuals who applied for the Program after the wait list was implemented had been properly placed on the wait list, as required by the Division. We surveyed other states to determine best practices for managing vocational rehabilitation program wait lists.

### **How were the results of the audit work measured?**

We applied the following criteria when evaluating the Division's processes for determining placement on and operating under an order of selection wait list:

**Wait list placement.** Division policy (Section 7.3) states that individuals who have established a signed and approved employment Plan prior to the implementation of a wait list will continue to receive vocational rehabilitation services. According to Division staff, the Division does not have a written policy specifying when and how individuals must be placed on the wait list, but the Division requires that an individual must be placed on the wait list if he or she is either determined eligible or had a Plan signed and approved after the implementation of the wait list (i.e., after March 1, 2013, for individuals categorized as "Individual with a Disability" and after April 22, 2013, for those categorized as "Most Significantly Disabled" and "Significantly Disabled").

**Wait list management.** Federal regulations [Ability to serve all eligible individuals; order of selection for services, 34 C.F.R., pt. 361.36(a)(3)] for the Program specify that if the state is unable to provide the full range of vocational rehabilitation services to all eligible individuals who apply for services, the state must identify service and outcome goals for those individuals and the time within which their goals may be achieved in each priority category within the order of selection, or management of the wait list. The state must also ensure that individuals with the most significant disabilities will be selected first for the provision of vocational rehabilitation services. Division policy (Section 7.1) further states that participants in the higher priority category will be served before a participant in the next lowest category. When the Division cannot serve all eligible individuals within a priority category, the individuals within that category will be served in chronological order based on the date of their Program applications.

## What problems did the audit work identify?

Overall, we identified the following three problems during our review of the Division's wait list management practices:

- **Lack of management strategies and time lines for the wait list.** The Division has not developed a plan for managing its wait list for Vocational Rehabilitation Program services, such as a strategy for identifying service and employment goals for wait-listed individuals or target dates for providing vocational rehabilitation services to individuals within each wait list priority category to establish and meet their employment goals, as required by federal regulations. In addition, the Division policy specifies that individuals in the highest priority category will be served before individuals in the lower categories in the event that there is a wait list, but the Division has not developed a policy or plan for serving individuals in any of the disability categories. As of the end of our audit in September 2013, Division staff provided us a draft model they had developed to project the amount of Program funding available to serve individuals on the wait list, but they indicated that they were still in the process of developing a plan for managing the wait list.
- **Lack of methods for projecting Program expenditures and available funding for participants on the wait list.** The Division does not have a comprehensive method for projecting Program expenditures and the funding available to serve wait-listed participants. We reviewed the Division's draft model for projecting its available funding to serve wait-listed individuals and found that the model only used prior year expenditure data and average per-participant costs from Fiscal Year 2013 to project the Fiscal Year 2014 costs and available funding for serving wait-listed individuals. Based on our audit work, we found that per-participant costs varied significantly, ranging from about \$1 to \$114,000 to serve each participant in Fiscal Year 2013. Changes in the number of participants and the types of services they receive have a significant effect on Program expenditures, which, in turn, affects the Division's ability to accurately project available funding for future years. We further discuss the issue that the Division does not track estimated costs of services authorized or approved in Recommendation No. 2013-59.
- **Lack of compliance with Division wait list procedures.** We identified one participant out of the 85 sampled who did not have a completed employment Plan in place by April 22, 2013, but was not placed on the wait list, which was a violation of Division requirements.

### **Why did the problems occur?**

Overall, the Department reported that it is waiting to finalize a wait list management plan until it addresses the problems within the Division that have been identified internally and through our audit. Further, the Division does not require supervisory reviews of counselors' placement of individuals on the wait list to ensure staff follow Division policy regarding the wait list.

While we recognize that it may not be prudent for the Department to begin serving any wait-listed individuals until it can ensure the Division has made significant improvements to the Program's operations, controls, and financial management, the Division needs to have written policies, procedures, and a comprehensive plan for managing the wait list in place for staff to follow once the Division is able to begin serving new participants. For example, Wisconsin's vocational rehabilitation program, which also has a wait list for services and prioritizes participants based on the severity of disability similar to Colorado, has a policy for managing its wait list and time line targets for serving wait-listed individuals in each severity of disability category.

In addition, to comply with federal regulations that require states to "identify the time within which the goals may be achieved for [individuals] in each priority category," Wisconsin has a written policy with target time frames for serving wait-listed individuals based on each individual's disability category. For example, once Wisconsin's vocational rehabilitation services program begins serving a priority category, it has a target to serve those wait-listed individuals within an average of 4 months. Wisconsin also uses a projection tool that it created to monitor available funding and the costs of current participants to determine when it will have funding available to move individuals off the wait list and serve them. Wisconsin uses its projection tool to determine how many individuals to move off the wait list each month and to project dates for moving individuals off the wait list in the future.

### **Why do these problems matter?**

The Program's wait list has grown rapidly since it was implemented. For example, more than 3,000 eligible individuals were on the Program's wait list in May 2013, and almost 1,300 more individuals were added to the wait list between June and August 2013. Not having a wait list management plan, including time frames for addressing the wait-listed individuals' needs, increases the likelihood of further delays serving wait-listed individuals once the Division has sufficient operational and financial controls in place and the funding available to serve new participants. Without a plan to serve individuals in each priority category, the Division cannot ensure it will have a consistent process to begin serving each category of wait-listed individuals.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-58:**

The Department of Human Services should ensure the Division of Vocational Rehabilitation develops and implements a written policy and strategy for managing the wait list for the Vocational Rehabilitation Program (Program) that include estimated time frame targets for serving wait-listed participants in each of the three disability categories, a supervisory review process to ensure staff follow wait list policies, and comprehensive methods for projecting Program expenditures and estimating available funding needed to begin serving individuals on the wait list.

#### **Department of Human Services Response:**

Agree. Implementation date: February 2014.

The Division of Vocational Rehabilitation (Division) will develop a policy and strategy for managing Order of Selection wait lists. The Division will improve the methodology to project caseload costs and estimate funding needed to begin serving participants in each of the three disability categories. The Division will use the information to establish targeted timeframes for serving participants in each of the three disability categories. The Division will increase emphasis on monitoring case costs and supervision of the plan and implementation strategy. The Division will implement a supervisory review process to ensure staff follow wait list policies and procedures.

---

### **Fiscal Management**

During State Fiscal Year 2013, the Division's Program revenues totaled \$53.5 million; Division expenditures for the Program also totaled about \$53.5 million. The State contributes 21.3 percent of total Program funds, and the federal government contributes the remaining 78.7 percent, up to the total federal grant amount for Colorado. The State's portion is funded through appropriations from the State General Fund and reappropriated local funds from the Colorado Department of Education. Division staff develop the Program's annual budget and funding request that is submitted to the Governor's Office, the Joint Budget Committee (JBC), and the General Assembly for approval. According to Division staff, the Division has been monitoring Program expenditures on a monthly basis since Fiscal Year 2012 to help ensure Program expenditures do not exceed revenues. Division management forecasts expenditures based on the total dollar

amount of Program services that staff authorize for participants and record in the Accessible Web-Based Activity and Reporting Environment (AWARE) application. In State Fiscal Year 2013, the Division was close to overspending its appropriation and requested and received a supplemental appropriation totaling about \$5.5 million, including about \$1.2 million in State General Funds and about \$4.3 million in federal funds. The Department reported to the JBC that the Division would over-spend the Program’s Fiscal Year 2013 appropriation unless the supplemental request was approved. The table below summarizes Program revenues and expenditures for Fiscal Years 2009 through 2013.

<b>Vocational Rehabilitation Program                      Revenues and Expenditures (in Millions)                      Fiscal Years 2009 Through 2013</b>					
	2009	2010	2011	2012	2013
Revenues	\$41.7	\$40.8 <sup>1</sup>	\$49.5 <sup>1</sup>	\$49.3 <sup>1</sup>	\$53.5 <sup>2</sup>
Expenditures	\$41.7	\$40.8	\$49.5	\$49.3	\$53.5
<b>Source:</b> Office of the State Auditor’s analysis of data from the Colorado Financial Reporting System (COFRS) and documentation provided by the Department of Human Services. <sup>1</sup> Includes federal funds from the American Recovery and Reinvestment Act in Fiscal Years 2010, 2011, and 2012. <sup>2</sup> Includes a \$5.5 million supplemental appropriation in March 2013.					

**What audit work was performed and what was the purpose?**

The purpose of our audit work was to review the Division’s processes for managing the Program’s financial resources and determining the Program’s annual budget. We reviewed Program budget and expenditure documentation we received from the Department and the Division and interviewed Department and Division staff. We also evaluated a sample of 85 participant files from Fiscal Year 2013 to determine how the Program estimates the costs of participant services and uses that information to forecast and monitor Program expenditures.

**How were the results of the audit work measured?**

We used the following criteria to evaluate the Division’s management of Program financial resources:

**The Program is not an entitlement.** Federal regulations [Assessment for determining eligibility and priority for services, 34 C.F.R., pt. 361.42(a)(5)] specify that nothing is to be construed to create an entitlement to participants for any vocational rehabilitation service.

**Efficiency and financial accountability.** Federal regulations (Methods of administration, 34 C.F.R., pt. 361.12) require the State to properly and efficiently

administer the Program and to carry out all functions for which the State is responsible under federal regulations. These methods must include establishing procedures to ensure financial accountability and accurate data collection.

**Cost estimates and projections.** When the State is unable to serve all eligible individuals during the current or preceding fiscal year due to a wait list, federal regulations [Ability to serve all eligible individuals; order of selection for services, 34 C.F.R., pt. 361.36(b)(2)(i)] require that the determination to provide the full range of services to all eligible individuals be based on: (1) the projected number of individuals with disabilities who will apply and be determined eligible, (2) the projected costs of serving those individuals, (3) the projected costs of administering the Program, and (4) the projected revenues.

### **What problems did the audit work identify?**

Overall, we identified problems with the Division's management of Program finances. Specifically, the Division has not implemented methods to contain Program costs or accurately forecasted or monitored Program expenditures, as we describe below.

- **The Division did not take sufficient steps to contain Program costs.** In its March 2013 written request for the \$5.5 million supplemental appropriation, the Department stated that the projected costs of Program services exceeded the Division's established Fiscal Year 2013 budget for participant services by more than \$5.3 million, or 34 percent because the Program had experienced a significant increase in spending for participant services. However, Division management in place during Fiscal Year 2013 did not sufficiently limit spending by Program field office staff (Program staff). Although the Division began requiring supervisory approval for purchases of \$2,000 or more in January 2013, we found that Program spending is highly decentralized and has been determined by individual counselors at the field offices rather than overseen from a higher level by Division management. As discussed in Recommendation No. 2013-52, all counselors authorize services and there are no limits on the costs of services that participants may receive.
- **The Division did not forecast expenditures accurately to ensure it could fund all individuals eligible for Program services.** The Department's supplemental appropriation request stated that the Division made a policy decision to actively engage current participants, such as those who have lost contact with the Program, in rehabilitation processes to increase successful employment outcomes. However, the Division did not appear to plan for or incorporate in the budget any anticipated costs associated with increased engagement. Increasing participant engagement would have an effect on Program expenditures because more participants could receive services from the Program.

Further, we found that the Division determines the annual Program budget based on inaccurate forecasts of Program expenditures. Division forecasts do not include the total cost of Program services that staff authorize for each participant. Specifically, the Division forecasts Program expenditures based only on the total Program services that staff authorize and record in AWARE, which does not include the costs of services staff record in the Colorado Financial Reporting System (COFRS), the State's accounting system. Some Program costs that the Division records on COFRS that it does not record in AWARE include the costs of Program participants' bus passes and goods purchased for participants using procurement cards.

- **Program staff did not accurately estimate the costs of services that participants would receive or did not estimate costs at all.** During our case file review, we found that for 65 (76 percent) of the 85 participant case files, the estimated costs of the participants' services were not documented or were not accurate. Specifically, although each participant's Individualized Plan for Employment (Plan) includes a section for counselors to document the total estimated cost for a participant, this section of 46 participant Plans we reviewed showed \$0 in costs. However, after these Plans were developed, Program staff authorized services totaling \$151,000 for the 46 participants. The costs of these services ranged from \$60 to \$24,000 per participant. Further, for another 19 participants' Plans we reviewed, the estimated costs documented in the Plan did not agree to the service cost amounts that counselors authorized.

In addition, we found that the Department was not aware of the extent of Program spending problems. Based on our interviews with Department and Division staff and our reviews of documentation, former Division management and Division staff identified concerns with Program spending and the potential for the Division to overspend its appropriation in August 2012—7 months before the Department requested a supplemental appropriation. According to Department documentation, the Division reported the problems associated with increased spending and the potential for overspending to the Department in December 2012, but the Department did not know the full extent of the problems within the Division until February 2013.

### **Why did the problems occur?**

Overall, we found that the Division does not have sufficient policies, procedures, and oversight to manage its financial resources and ensure its expenditures are within available resources. As stated in the previous findings, the Division has insufficient practices for ensuring participants reach their employment goals within reasonable time frames and at the least possible costs; authorizing Program services and ensuring services are appropriate; and securing comparable services

and benefits for participants through other available programs. We found that the Division does not have adequate processes for ensuring Program payments are accurate, made for necessary services, and processed timely. We also found that the Division does not adequately monitor participant use of Program funds and state assets and recover funds, when appropriate; monitor corporate account spending, administrative costs, and procurement card purchases for reasonableness and timely payments; ensure participants make contributions toward the costs of services when they are financially able to do so; and ensure contracts are in place to protect federal and state resources. Controls are needed in each of these areas to accurately oversee expenditures, forecast Program expenses or costs, and ensure the Program's spending does not exceed available funding.

In addition, we found that the following factors contributed to the Division's fiscal problems:

- **The Division does not have a method to accurately estimate the costs of participants' services.** Although counselors estimate the number, types, and duration of services that participants will need to reach an employment goal, the Division has not developed a method to track estimated participant costs and use those estimates to project future Program costs and liabilities. For example, a counselor may plan for the Program to pay for a participant's tuition, books, and transportation over the next 5 years, yet the Division has not developed a process to track those estimated costs and forecast anticipated costs during the year and in future years. Further, although we found that some Program staff had documented the estimated costs of participants' services within some Plans, Division staff informed us that it does not require Program field office staff to estimate or document the costs of services that participants will receive, and the Division does not use the cost estimates when staff choose to document this information.
- **The Division lacks methods to contain costs.** The Division has not required field offices or counselors to have budgets, monitor costs, or contain costs in recent years. According to Program staff, in Fiscal Year 2014 the Division began requiring the Program's four regional supervisors to manage budgets for their regions. However, some Division staff reported that it has been the Division's belief that the Program could only contain costs by implementing a wait list. We surveyed eight other states' vocational rehabilitation programs and found that each of the eight states— Alabama, Georgia, Maryland, Oklahoma, Utah, Washington, West Virginia, and Wisconsin—employ some cost containment measures, such as prohibiting Program staff from paying for participants' psychological counseling, which may be covered by other federal or state programs, and restricting expenditures for participants' college tuition to in-state tuition rates.

- **The Division lacks budgeting expertise.** The Division has not ensured that staff have the expertise needed to establish the Program's budget and properly manage Program finances. Based on our interviews with JBC, Department, and Division staff, the Division staff responsible for developing the Program's budget have limited experience in the State's budgeting and appropriation process and are not sufficiently versed in the State's accounting and control requirements.
- **The Department did not have sufficient procedures to monitor Division activities.** Although the Department requires each of its divisions to report performance information to Department management on a monthly basis, Department documentation indicated that Division management was not forthcoming with Department management about the extent of the Division's spending problems. Further, the Department did not have other monitoring methods, such as thorough accounting or internal audit reviews of Program purchases and services, to identify the spending problems and ensure the Division had adequate methods for managing Program finances.

### **Why do these problems matter?**

Sound financial management is a fundamental responsibility of government agencies. Accurate forecasting of expenditures and revenues is essential to ensure that public monies are used for the purposes for which they are intended and that programs are managed within the appropriations made by the General Assembly. Division staff reported that Program staff do not document the estimated costs of services and that the Division has not established a process to track this information because the estimates may not reflect the actual costs. Nonetheless, when the Division does not estimate the costs of each participant's services, it cannot project the costs of planned services in the current year and in future years; this information is needed for budget development and to determine whether expenditures will exceed revenues. In addition, when staff are not given budgets, required to monitor spending, or required to contain costs, there is a greater risk of overspending and that staff will not be held accountable for ensuring Program funds are spent appropriately and prudently.

Not only has the Division's spending affected Coloradoans because of the necessity of a wait list for vocational rehabilitation services, but the Division's budgeting and expenditure problems have impacted future Program funding. As part of its Fiscal Year 2013 request for a supplemental appropriation, the Division also requested a \$4.88 million increase in its Fiscal Year 2014 appropriation. This request was not approved by the General Assembly after JBC staff expressed concerns about the Division's inability to manage its Fiscal Year 2013 existing appropriation.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-59:**

The Department of Human Services (Department) should improve the fiscal management of the Division of Vocational Rehabilitation (Division) and the Vocational Rehabilitation Program (Program) by:

- a. Establishing and implementing a comprehensive budgeting process that includes procedures for estimating service costs for each participant in each fiscal year, and using the estimates to more accurately forecast Program expenditures in the current and future fiscal years.
- b. Ensuring that Division staff responsible for developing the Program budget and monitoring expenditures and revenues have expertise and training in state and federal budgeting processes and proper accounting and fiscal procedures.
- c. Implementing a process for Departmental review and approval of the Division's annual budget and routine Division reporting to Department management on the Program's estimated costs for participants, service authorizations, budget-to-actual costs, and expenditures-to-spending authority.
- d. Implementing a regular Departmental review of Division expenditures until the Division can demonstrate full implementation of proper accounting controls. Once the Division demonstrates adequate controls, the Department should follow up and periodically review a sample of Division transactions to ensure ongoing compliance.

### **Department of Human Services Response:**

- a. Agree. Implementation date: January 2014.

The Division will establish and implement a comprehensive budgeting process to include estimating the total cost of each new and revised Individualized Plan for Employment (Plan or IPE) entered into AWARE for new participants. In September 2013, vocational rehabilitation counselors were directed to begin entering estimated Plan costs prior to completion of each IPE. The Division will utilize these estimates to more accurately forecast Program expenditures in current and future fiscal years.

- b. Agree. Implementation date: April 2014.

The Division will improve fiscal management of the Program by ensuring that fiscal staff complete training to ensure expertise with Vocational Rehabilitation Program budgeting practices and federal fiscal obligations; and will work in collaboration with the Department's Divisions of Accounting and Budget to ensure staff have expertise in state budgeting, accounting, and fiscal procedures.

- c. Agree. Implementation date: April 2014.

The Department will implement a process for review and approval of the Division's annual budget prior to the end of each state fiscal year. The Division will provide routine fiscal reporting to the Department outlining the Program's estimated costs for participants, service authorizations, budget-to-actual costs, and expenditures-to-spending authority. The Division will work in collaboration with the Department's Divisions of Accounting and Budget to ensure sound fiscal management practices are in place.

- d. Agree. Implementation date: January 2014.

The Department's Budget Division will review the Division's fiscal reports outlining the Program's expenditures on at least a quarterly basis, or as agreed upon between the Division and the Department. The Budget Division will determine when adequate accounting controls have been demonstrated for conversion to a more periodic review.

---

## Corporate Credit Accounts

The Division maintains 26 corporate credit accounts for use by the Program field offices for the purpose of purchasing goods—such as computer hardware and software, industrial tools and equipment, work clothing, and books—for Program participants. Program participants can make purchases in a store by presenting a copy of a Service Authorization form signed by a Division counselor. Further, Program staff can make an online purchase for a participant by recording a purchase authorization number in the transaction details of the Authorization form. The participant must provide a copy of the receipt to his or her counselor and sign a form verifying his or her receipt of the goods and acknowledgment that the Division owns the goods. Division staff are responsible for setting up and managing the credit agreements with the vendors. Payment of the purchases on

these accounts is the responsibility of the Division's field offices. The following table lists the vendors and the credit limits for each of the Division's corporate credit accounts. In Fiscal Year 2013, the Division reported that it made a total of about \$590,000 in purchases on the 26 corporate accounts.

<b>Vocational Rehabilitation Program Corporate Accounts and Credit Limits As of August 2013</b>	
<b>Vendor</b>	<b>Credit Limit</b>
Amazon.com (Online Only)	\$40,000
Avia Pharmacy Services (Safeway)	No Limit
Barnes & Noble Inc.	\$5,000

## **What audit work was performed and what was the purpose?**

The purpose of our audit work was to evaluate the sufficiency of the Division's controls over its corporate credit accounts, including which staff had access to make purchases and whether the accounts had been paid timely and in full each month. We specifically reviewed whether the purchases on the corporate accounts were clearly made for Program participants and whether the Division's reconciliation processes were adequate to identify errors or potential problematic purchases. We interviewed Division staff regarding the Division's controls over the corporate accounts. To determine whether the Division appeared to pay the corporate bills timely, we reviewed the Division's May 2013 documentation, such as the account statements, for eight of the accounts. We also reviewed transactions from the March, April, and May 2013 statements and detailed invoices for three of the Division's corporate accounts (Amazon, Sears, and Wal-Mart).

## **How were the results of the audit work measured?**

We used the following criteria when evaluating the Program's processes for corporate accounts:

**Reasonable and allowable expenditures.** State Fiscal Rule 2-1 requires that all expenditures by state agencies shall meet the standards of propriety as being for official state business purposes only and reasonable and necessary under the circumstances. In addition, State Fiscal Rule 2-3 requires that receiving reports, or other sufficient documentation, be prepared for all goods and services received, showing actual quantities, any unsatisfactory condition, and compliance with specifications, before a voucher is processed for payment. According to Division policy (Section 10.3), counselors must authorize services and goods associated with a participant's employment Plan and approve payment in accordance with the Division's fee schedule. Further, Division staff stated that, after a purchase, participants are required to provide receipts to their counselors, who match the receipts to the Service Authorization form and sign off on the receipt or Service Authorization form to approve the transaction for payment. In addition, Division policy (Section 12.11.5) states that when equipment, tools, and other non-prescriptive devices, such as computers, are purchased for and issued to participants, the participant shall provide written acknowledgment of the State's ownership of the equipment, and the counselor will maintain the signed acknowledgment in the participant's case file. The equipment remains the property of the State until the participant's successful closure from the Program occurs, at which time the equipment becomes the property of the participant.

**Internal controls to ensure proper payments.** Title 31, Section 3321 of the United States Code, which is known as the "Improper Payments Information Act of 2002," requires states to establish and maintain sufficient internal controls that

effectively prevent improper payments and promptly detect and recover improper payments that are made. An improper payment is defined as a payment that should not have been made or was made for an incorrect amount, such as any payment for an ineligible service, duplicate payment, payment for services not received, and any payment that does not account for a credit for any applicable discounts. State Fiscal Rule 2-10 requires agencies to have processes for reviewing and reconciling card statements and states that agencies shall: (1) complete a preaudit when the disbursement is made to the bank or when distributions are made, (2) reconcile the disbursements made to the bank with the total of validated individual charges for the agency, and (3) use the dispute mechanism when charges from the bank are challenged. The Department's Procurement Card Manual states that its dispute mechanism is for the cardholder to file formal disputes with the bank upon discovery but no later than 60 days after the transaction was posted. A signed copy of the dispute form must be provided to the bank to document the transaction being disputed. The Department then requires this transaction to be identified on the monthly procurement card statement. Division policy (Section 3.6) mandates that goods and services provided to participants should be necessary, appropriate, and procured at the least possible cost, and that any purchase must be authorized, in writing, prior to its initiation.

**Controls to restrict access to authorized persons.** Statute (Section 24-17-102(1), C.R.S.) requires state agencies to have internal accounting and administrative controls that shall provide: (1) restrictions permitting access to state assets only by authorized persons in performance of their assigned duties; (2) adequate authorization and recordkeeping procedures to provide effective accounting controls over state assets, liabilities, revenues, and expenditures; and (3) an effective process of internal review. These provisions are intended to protect state assets and ensure that expenditures are reasonable, appropriate, and solely for state business.

**Timely payment.** State Fiscal Rule 2-2 requires transactions to be paid within 45 days after products or services have been received and a notice of payment due has been provided by the vendor.

**Approval for open charge accounts.** State Fiscal Rule 2-10 prohibits state agencies from enrolling in other credit or debit card program agreements for purchases covered by the procurement card program. The Fiscal Rule indicates that state agencies participating in the procurement card program shall use the state procurement card for purchases at local vendors in lieu of open or other charge accounts. The Department's procurement card administrator and the Department's controller or chief fiscal officer must approve exceptions to this requirement in advance.

## What problems did the audit work identify?

Overall, we identified purchases made on the corporate credit accounts that appeared questionable and found that the Division does not consistently pay the outstanding balances due on its accounts. The problems we identified are described in the following sections.

### Questionable Transactions

In reviewing the Division's May 2013 corporate account statements and invoices, we identified purchases that appeared potentially inappropriate, including purchases for iPhones, gift/shopping cards, phone cards and prepaid phone time, higher-end laptops, and children's clothing. We reviewed a sample of 30 purchases totaling \$15,186 and credits totaling \$1,305 from the Amazon, Sears, and Wal-Mart statements in March, April, and May 2013. For each of the 30 transactions, we reviewed all related supporting documentation the Division had on file, including the Service Authorization forms, receipts, and participant Plans. We identified purchases that appeared questionable, inappropriate, or that were missing authorization numbers, which, according to Division staff, are required for a participant to make a purchase. We found one or more problems with 27 (90 percent) of the 30 sampled transactions, resulting in a total of \$13,837<sup>1</sup> in known questioned costs. Specifically, we found:

- For 12 sampled transactions totaling \$10,084, the case files either did not contain the receipt or the form signed by the participant that indicated acknowledgment of the State's ownership of the goods purchased, as required. All 12 transactions were from the same corporate statement. We reviewed the statement and determined that the 12 transactions, which ranged from \$23 to \$4,479, were for clothing and tool purchases made by three participants. Ten of these transactions were made by one participant who purchased approximately \$5,464 in tools and had received multiple authorizations to make purchases. Because the Division could not provide supporting documentation for the 12 transactions, we questioned the \$10,084 in Program costs related to these transactions.
- For 23 sampled transactions totaling \$14,662, the Division did not provide a copy of the participants' complete Plans or the Plans did not fully describe the goods that the participants would need to purchase or their anticipated costs. The 23 transactions included purchases for a computer, newborn and children's clothing, a toy, tools, and various household items and cleaning supplies. As a result of the lack of documentation, we were unable to determine whether the items purchased were necessary and appropriate for the participants to meet their employment goals, as

required by Division policy. We identified known questioned costs of \$1,710 for an incomplete Plan provided by the Division.

- For 15 sampled transactions totaling \$9,690, the Service Authorization forms did not clearly specify the good, number of goods, and/or the associated counselor-approved cost for the purchased items. For example, although 11 of the Service Authorization forms indicated participants could make purchases for tools or clothing, the forms did not provide specifics, such as the types of tools or clothing and the quantities allowed for purchase. In addition, one Service Authorization form referred to a list of authorized items attached to the form, but no list was attached. As a result of these problems, we were unable to determine whether the items purchased had been approved by the participants' counselors or whether the items were purchased at the least possible cost, as required by Division policy.
- For one sampled transaction, the receipt indicated that the related purchases were for newborn, children's, and men's clothing, although the authorization was for work clothes for a woman with a goal to work in laundry services. This resulted in \$249 of known questioned costs.
- For one sampled transaction, the Service Authorization form issued by the counselor was for \$500, but the receipt and account charge was for \$547. This resulted in known questioned costs of \$47.
- For four sampled transactions totaling \$1,458, the transactions did not appear reasonable or necessary for the participant to reach his or her employment goal and therefore did not appear to be allowable Program expenditures. These sampled transactions included purchases for three Sears Mall Store gift cards totaling \$1,120, a Coleman tent for \$153, and six items totaling \$185 for which the invoice only stated "www.sears.com" with no description of what was purchased. This resulted in known questioned costs of \$1,458.
- For three sampled transactions totaling \$1,409, the Division was not able to provide any documentation supporting the transactions. These transactions included one purchase for \$119 and two credits totaling \$1,290 for which the Division did not have any documentation to explain the charges or to show the credits had been applied to the original purchases. This resulted in known questioned costs of \$1,409.

### **Unpaid Balances**

We found that the Division does not always pay the full balances due on the corporate accounts, and as a result, balances on these accounts have been rolling

from month to month. At the end of July 2013, we requested that the Division provide a copy of all of the corporate account statements for May 2013 and the ending balances as of June 30, 2013. In September 2013, the Division provided the May 2013 statements for eight of its 26 corporate accounts but was unable to provide the remaining 18 account statements. Based on our review of the May 2013 statements that were provided, we identified \$59,035 in unpaid beginning balances on the eight accounts. Further, as shown in the following table, the Division reported that it had \$59,663 in outstanding balances on the corporate accounts as of June 30, 2013. When we requested supporting documentation for these balances, the Division reported that it had been contacting its corporate account vendors and obtaining verbal information for the ending balances but did not have documentation, such as account statements, to support the vendors' verbal statements or to allow the Division to reconcile the ending balances provided. Upon our request for documentation of account balances, the Division obtained some documentation from the vendors, including emails from vendors showing the outstanding balances, but the documentation did not include the details of the transactions or dates, so the documentation was not sufficient to complete reconciliations.

<b>Vocational Rehabilitation Program Corporate Accounts Ending Balances As of June 30, 2013</b>	
<b>Vendor</b>	<b>Ending Balance<sup>1</sup></b>
Amazon.com (Online Only)	\$2,562
Avia Pharmacy Services (Safeway)	\$258
Barnes & Noble Inc.	\$0
Best Buy	-\$513
Comp USA (Online Only)	-\$8
Citibank South Dakota NA (Sears)	\$2,178
Eschenbach Optical	\$299
Farm Plan	\$0
FedEx/Kinko's	\$186
Grainger	\$0
Hobby Lobby	\$601
Home Depot	\$171
JC Penney	\$5,333
King Soopers Pharmacy Services	\$19,964
King Soopers/City Market	\$643
Kohl's Department Store	\$10,807
Lowe's	\$0
Micro Center	\$2,205
Mike's Camera	\$0

Office Depot	\$720
Optelec	\$233
Walgreens	\$895
Wal-Mart	\$13,001
Universal Companies <sup>1</sup>	--
<b>TOTAL</b>	<b>\$59,663</b>
<b>Source:</b> Balances provided by the Division of Vocational Rehabilitation.	
<sup>1</sup> The Division was still confirming these balances when we concluded our audit test work.	

During our review we also learned that all Division and Program field office staff working in the Program had access to make and authorize purchases on the corporate accounts. After bringing this to Division management's attention, it reported in August 2013 that it specifically limited access to one account—the

Division's Amazon credit account—to 31 employees who are allowed to either use the account to make purchases or authorize purchases to be made on the account. The Division did not report limiting access to any of the other accounts.

In addition, we noted that the Division has not obtained approval to utilize open charge accounts for vendors in accordance with State Fiscal Rule 2-10. This rule requires departments to obtain approval for an exception from the rule requiring agencies to only use procurement cards for purchases. Specifically, the Division has not obtained this approval from the Department's procurement card administrator and the Department's controller or chief fiscal officer for these purchases.

### **Why did the problems occur?**

Overall we found that, although the Division staff are responsible for managing the Division's corporate accounts, the Division does not have processes for monitoring, limiting access, reconciling, resolving disputes for charges, or ensuring appropriate year-end reporting for these accounts, as discussed below. Further, the Department was not aware that the Division had the open charge accounts for providing benefits to participants in the Program; as a result, the Department's procurement card administrator and either the controller or chief fiscal officer had not granted the Division an exception to the fiscal rule requiring such approval for open charge accounts.

- **Lack of monitoring.** According to Division staff, the Division does not monitor each vendor account's balance to avoid reaching the respective credit limit, and it is only when a purchase is denied by a vendor that the Division becomes aware that an account has reached its limit.
- **Access to charge accounts not limited.** Once we brought this matter to the Division's attention, in August, the Division limited access to the Amazon credit account. However, the Division has not limited access for its other corporate accounts to appropriate Division staff. Division management has not placed restrictions on the number of people at each field office who are granted access to make purchases on these other accounts.
- **No reconciliation.** Division staff also indicate that there is no formal reconciliation process in place to match charges on the monthly vendor statements with authorizations and receipts. Rather, the Division performs reconciliations only in the event of a dispute with a vendor. Division staff reported that reconciliations are cumbersome and, in some cases, not possible for the Division to complete because authorization numbers for the associated purchases are not provided by vendors and shown on the

statements in all instances. As a result, for those charges without authorization numbers, Division staff cannot tie the charges on the statements to supporting documentation, such as receipts. Division management stated that they have instructed the field offices to not pay for purchases for which an associated authorization cannot be identified, leading to the payments not being made timely and past-due balances on the accounts.

- **Lack of process for resolving disputes.** The Division has not established a process for resolving disputes with the corporate account vendors. Division management stated that field offices are required to review the billing information from the vendors and make payments. According to Division management and Program staff, if there is a dispute, the field office staff work with the vendors directly to resolve the disputes. Field office staff may request the assistance of Division staff in resolving disputes.
- **No fiscal year-end reporting.** The Division has not established controls to ensure corporate account balances are properly reported at fiscal year-end. The Division also does not observe an official close period for the accounts and does not report fiscal year-end account balances to the Department's accounting unit.

### **Why do these problems matter?**

According to Division staff, several vendors, including Amazon, Home Depot, Kohl's, Office Depot, and Wal-Mart, are not allowing any additional purchases or charges on the accounts as of July 2013 because of the past-due balances. This has led to an interruption in providing goods and services from these vendors to participants until an alternative vendor is found.

Without appropriate controls in place over these accounts, the Department cannot ensure that fraudulent or inappropriate purchases do not occur or are identified and addressed if they do occur. There is also a risk that the Division's past-due balances will negatively impact the State's relationship with these vendors.

<sup>1</sup> Known questioned costs total \$13,837. This total will not equal the sum of the amounts noted in the bullets in the section "What problems did the audit work identify?" because one of the sampled transactions had more than one problem. Therefore, the related questioned costs are included in more than one bullet. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles. Classification of Finding: Material Weakness.)

---

**Recommendation No. 2013-60:**

The Department of Human Services (Department) should improve controls over the Division of Vocational Rehabilitation's (Division) corporate accounts by:

- a. Ensuring that the Division obtains an exception for the open charge accounts from the Department's procurement card administrator and the Department's controller or chief fiscal officer or discontinues the use of the corporate accounts.
- b. Establishing and implementing a process to monitor, reconcile, and resolve disputes in regards to charges on the corporate accounts. This process should include assigning responsibility for performing a monthly reconciliation of each account, obtaining copies of all account statements, ensuring that all charges on the account are appropriate and supported with receipts and invoices, and working with vendors to resolve charges noted on the statements that do not include authorization information.
- c. Ensuring that payments for the corporate accounts are made timely and by the payment due dates.
- d. Limiting the number of employees at each field office who are approved to make purchases on the corporate accounts.

**Department of Human Services Response:**

Agree. Implementation date: January 2014.

- a. The Division will determine which of its current corporate accounts are necessary to continue to serve the needs of participants in a timely and effective manner. The Division will complete the process of obtaining an exception from the Department's procurement card administrator and the Department's controller for the subset of necessary accounts, and inactivate the remainder by January 2014. The Division will also work with the Department's accounting staff to develop a policy for managing the remaining corporate accounts, as defined in part "b" below. Should the request for exception be denied, the Division will inactivate all corporate accounts and determine alternative methods of providing goods and services.
- b. The Division will establish a process to monitor, reconcile, and resolve disputes for corporate account charges. The Division will assign

individual responsibility for completing a monthly reconciliation of each account, obtaining and archiving copies of all account statements, ensuring charges are supported by receipts and invoices, and working with vendors to resolve charges noted on the statements that do not include authorization information. The Division will establish a review process to ensure all charges on the corporate accounts are appropriate, using assistance from the quality assurance unit to examine specific questionable expenses, as necessary.

- c. The Division will follow State Fiscal Rules and Procurement Rules to ensure timely payments on the corporate accounts, by the payment due dates. The Division will also develop and implement a process to identify unpaid authorizations in the Accessible Web-Based Activity and Reporting Environment (AWARE) system.
- d. In collaboration with the Department's Accounting staff, the Division will perform an extensive review of each corporate account and will limit the number of Program staff with account access.

---

## **Participant Use of Program Funds and State-Owned Equipment**

The Division allows the Program field offices to purchase a variety of goods and services for participants to assist them in meeting their employment goals. Field office staff purchase some goods online, such as computers and books, and give them to participants. For other types of goods, such as work clothing, work tools, cell phones, and office supplies, participants may purchase the goods directly from retailers, such as Sears and Wal-Mart, once they have received written authorization from a Program counselor. For selected participant expenses, such as gas and rent, that the counselor determines exceed the participant's normal expenses and are necessitated by the participant's participation in their Plan, the Division pays the participant directly. For example, a participant who is going on job interviews may receive Program funds to pay for gas to travel to each interview, or a participant who needs job training may receive Program funds to pay for a class and books.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to evaluate the Program field offices' processes for reporting suspected fraud and misuse of Program funds or property by participants to the Department and addressing the alleged incidents to help ensure they are investigated and resolved in a timely manner. We interviewed the Department's internal audit staff and Division staff to determine whether they had knowledge of instances of participants misusing Program funds or property and

understand the controls in place for preventing and reporting fraud. We reviewed Department and Division policies and procedures related to identifying, reporting, investigating, and resolving suspected instances of misuse of funds and property. We reviewed hard-copy case files and documentation in AWARE, including case notes and correspondence, to identify Division processes for reporting participants' misuse of Program funds and suspending or terminating the participants' services, when appropriate.

### **How were the results of the audit work measured?**

We used the following criteria when evaluating Division and Program field office processes for reporting and addressing suspected fraud or misuse of Program funds and property:

**Participant misuse of funds and required reporting.** Federal regulations [Review of determinations made by designated state unit personnel, 34 C.F.R., pt. 361.57(b)(4)] and Division policy (Section 4.3) allow the State to suspend, reduce, or terminate Program services if the State has evidence that the services were obtained through the participant's misrepresentation, fraud, collusion, or criminal conduct. Fraud includes intentional misappropriation of assets and theft or embezzlement of public property. State Fiscal Rule 1-9 specifies that any suspected theft or embezzlement of state funds or assets should be immediately reported to the Department's chief executive officer and chief financial officer and that appropriate action should be taken. The Department's Fraud Policy (I-2.7) further requires that any suspected theft of public monies or resources be reported to the Department's Audit Division for investigation and to the appropriate Department management and program staff. The policy states that Department management is responsible for addressing issues of prevention and detection of fraud within their respective offices or divisions.

**Internal controls over improper payments.** Title 31, Section 3321 of the United States Code, which is known as the "Improper Payments Information Act of 2002," requires states to establish and maintain sufficient internal controls that effectively prevent improper payments from being made and promptly detect and recover improper payments that are made. An improper payment is defined as a payment that was made for an incorrect amount or should not have been made, including any payment to ineligible recipients, for ineligible services or services that were not provided, duplicate payments, and any payment that does not account for credit for applicable discounts. State Fiscal Rule 1-9 requires agencies to design and implement controls to prevent, detect, and deter fraud.

**Equipment purchased for participants.** Division policy (Section 12.11.5) states that equipment purchased for participants:

- Remains the property of the State of Colorado until the participant's vocational rehabilitation case is successfully closed. The participant record will contain written acknowledgment of State ownership when the equipment is initially issued.
- Will be requested, in writing, to be returned if the participant is terminated without a successful vocational rehabilitation outcome. If the equipment is not returned after two such requests, recovery efforts may be turned over to the Office of the Attorney General.
- Will be retained, after recovery, to be reissued to other participants who may have need of such items. Documentation of reissued items will be placed in the participant record from whom state property was recovered as well in the participant record to whom it is being reissued.

### **What problems did the audit work identify?**

During the audit we identified three instances in which Program field office staff documented the suspected misuse of funds and property by participants during Fiscal Year 2013 but did not report the instances to the Department's Audit Division, Department management, or Division management. In two instances, participants were suspected of misusing Program funds and in the third instance, the participant was suspected of misusing Program property. We identified these instances during interviews and our review of participant case files. These three cases totaled \$4,029<sup>1</sup> in known questioned costs, as described below.

- One participant received a direct payment by check, totaling \$2,050 in Program funds, to attend a 3-week, out-of-state training class in August 2012. Program field office staff had authorized the participant to use the funds for the training fee, food, and lodging while attending the training. According to Program documentation, the participant's counselor learned shortly after the participant received the funds that the participant did not attend the full training and instead spent the funds on medication, a rental car, and other personal expenses that were not related to the training. Program field office staff have been working with the participant to repay these funds to the Program. According to the Department, as of October 2013, the Program had not closed the case to end services to the participant, who was still eligible to receive Program services, and the funds had not been recovered from the participant.
- One participant, whom the Program enrolled in a university outside of the United States, was provided a laptop computer for about \$1,329 purchased by the Program's field office as part of the participant's 2010 employment Plan. In November 2012, when the participant was still receiving Program services, the participant's counselor discovered that the participant had

returned the laptop to the vendor that sold the computer and the participant received a gift card as store credit from the vendor. According to the participant's case file documentation, the gift card was used to purchase a video game system. The participant's counselor wrote letters to the participant requesting that the participant reimburse the vendor for the purchase, but documentation did not specify why the staff believed that the participant needed to reimburse the vendor. Because laptops and other equipment the Program purchases for a participant's use remain the property of the State until a participant's case is closed, the participant should reimburse the Program and not the vendor. As of October 2013, the Program had not closed the case to end services to the participant and the Department had not recovered the funds from the participant, who is still able to receive services, according to Department staff.

- One participant acquired an iPad tablet computer and other supplies totaling \$650 from a retailer in December 2012 by providing a fictitious Program authorization number although the participant did not have authorization from the Program to make the purchase. Program field office staff discovered this purchase in January 2013 after receiving the invoice from the vendor. According to Department staff, as of October 2013, the Program had not paid the vendor invoice so no Program funds had been spent in this instance, but Program staff were working with the participant to either return the computer and supplies to the vendor or pay for the items from the participant's personal funds. Also as of October, the Program had not closed the case to end services to the participant who was still eligible to receive Program services.

Because field office staff did not report any of the three cases to the Department's Audit Division, the Department's internal auditors did not conduct an investigation of these instances until the end of our audit after we notified internal audit staff of the instances. According to Department staff, the Audit Division completed an investigation after our audit fieldwork and determined that although the three participants misused Program funds, the Audit Division did not obtain evidence that the participants intentionally misused Program funds. Internal audit staff also stated that they are limited in the investigations and monitoring that they can conduct for the Program because they do not have access to AWARE.

### **Why did the problems occur?**

The problems we identified occurred for the following reasons:

- **The Division has not developed procedures for staff to follow for reporting or addressing suspected misuse of funds or property.** Although the Department has a policy requiring that staff report any suspected theft of public monies or resources to the Department's Audit

Division for investigation as well as to the appropriate Department management and program staff, the Division has not developed and included procedures within its policy manual that specify how the reporting should occur. Further, the Division has not trained its staff on required reporting of the misuse of Program funds or property. Division and Program field office staff we interviewed appeared to be unaware of the Department's policy requiring that suspected fraud or misuse of public funds or property be reported to the Department's Audit Division and Department management. Additionally, Division staff told us that they believed that the field office where a participant receives services is responsible for investigating suspected misuse of funds or property; this practice does not comply with Department policy. The Division also lacks specific procedures for staff to follow for case closure and termination of services when a participant is found to have intentionally misused funds or property or when a participant refuses to repay misused funds.

- **The Division lacks a supervisory review process to ensure identified misuse is reported.** The Division does not monitor field office staff through a supervisory review to ensure that instances of suspected misuse of funds or property are communicated to Department and Division Management and the Department's Audit Division appropriately.
- **The Division lacks controls for direct payments.** The Division's controls do not include a limit on the dollar amounts of direct payments to participants or a supervisory approval for all direct payments to participants. The three cases of unreported suspected misuse of public funds and property involved the Program's practice of providing payments and equipment directly to the participants, which greatly increases the risk that the funds may not be used for their intended purposes.
- **The Division lacks methods for tracking State-owned equipment.** The Division does not have a centralized mechanism for tracking State-owned equipment issued to participants, including the identification number of the equipment, the value of the equipment, the participant to whom the equipment is checked out, the location of the equipment, or if the equipment is available for reissuance. Rather, each individual counselor is responsible for tracking the purchase, issuance, and return of the equipment. Division policy does not include standard procedures for the counselors to follow for tracking equipment issued to participants, nor does the Division require counselors to ensure that a State-issued identification tag is affixed to equipment issued to participants. For example, the State of Washington's vocational rehabilitation program has a written policy requiring its staff to track equipment it provides to participants that is considered desirable, reusable, or high-value, such as computers, cell phones, and tools. According to the State of Washington's policy, its program staff are required to check a centralized tracking

database to determine if the program already has the equipment in stock and, if not, its staff may purchase it for the participant to loan from the Program.

Further, while Division policy allows Program staff to turn over recovery efforts to the Office of the Attorney General after Program staff have made multiple failed attempts to recover the equipment, the Division has not established a process to notify the Attorney General in these instances. In addition, the Division does not enforce the policy to turn over these cases to the Attorney General nor does the Division track instances. According to the Division, none of the Program field office supervisors were aware of a recovery case that had been turned over to the Attorney General in the past 5 years.

Further, although the Department has provided internal auditors with direct access to other systems in the Department—such as the Colorado Benefits Management System, which is used for the Temporary Assistance for Needy Families (TANF) program and the Supplemental Nutrition Assistance Program (SNAP), and the systems for the Colorado Child Care Assistance Program and the Low-Income Energy Assistance Program—the Department has not provided the internal auditors with direct access to AWARE. Internal audit staff reported that it would benefit from access to the AWARE system to perform a comprehensive and accurate analysis of participant cases.

### **Why do these problems matter?**

The problems we identified are important for the following reasons:

- **Program funds that are not used for their intended purposes could have been used for other participant services.** Permitting participants to purchase goods or services directly with Program funds makes it difficult for the Division to ensure that funds will be used for their intended purposes. In Fiscal Year 2013, the Program paid \$678,000 directly to participants. When limited Program funds are not used for Program purposes and not recovered from participants who misused the funds, it reduces the funds available for other eligible participants. For example, in Fiscal Year 2013 the Division paid an average of \$2,100 in services per participant in the Program. Based on the average cost of services per participant, we estimate that the \$4,029 in questioned costs we identified from the suspected misuse of funds could have been used to provide vocational rehabilitation services to at least one other participant on the wait list.
- **Independent investigations of suspected misuse of Program funds or property may not be timely.** By not ensuring that Division staff promptly

report suspected cases of misuse of funds or property to the Department's Audit Division and by not providing direct access to AWARE, the Department cannot ensure timely and independent investigations of the cases. Department internal audit staff reported that there have been previous instances of fraud and suspected misuse of funds by participants in the Program, further highlighting the need for strong Program policies, procedures, and training on preventing and reporting potential misuse of funds or property.

- **Public funds were not used in a prudent or accountable manner.** Instances of suspected misuse of Program funds or property by participants indicate that public funds were not being used in a prudent or accountable manner, which undermines the public's perception of the integrity of the Program. Further, during Fiscal Year 2013, the Division purchased a total of about \$1.2 million in assistive technology devices and occupational and self-employment goods for participants. Without a mechanism to track State-owned equipment that is issued to participants, the counselors cannot determine whether items are available for reissuance, which would be a cost-effective alternative to purchasing new items. Equipment not placed back into circulation timely could become obsolete, damaged, or otherwise unsuitable for reissue. Without an identification tag, equipment that has been lost, stolen, or exchanged without the Program's knowledge cannot be identified as State-owned property and returned to the Program. Without a process to turn over recovery efforts to the Office of the Attorney General, the Division lacks a means to ultimately hold participants who refuse to return State-owned equipment accountable.
- **Continuing services to participants who misuse funds or property indicates noncompliance with federal requirements.** By not having sufficient procedures to (1) suspend or terminate services when a participant misuses Program funds or property or (2) ensure compliance with the Department's Fraud Policy, the Division is not in compliance with federal grant requirements, which could lead to federal disallowances and sanctions.

<sup>1</sup> Known questioned costs total \$4,029. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Material Weakness.)

---

**Recommendation No. 2013-61:**

The Department of Human Services (Department) should improve controls over the use of federal and state funds and processes for reporting and addressing instances of suspected misuse of funds or property in the Vocational Rehabilitation Program (Program) by:

- a. Developing and implementing policies and procedures for reporting instances of suspected misuse of funds or property. These policies and procedures should comply with federal regulations, State Fiscal Rules, and Department policy and include a policy specifying that, in circumstances of fraud, field office staff should stop services, thoroughly document the incident in the case file, and close the participant's case.
- b. Monitoring through supervisory review to ensure that instances of suspected misuse of funds or property are appropriately communicated to the Department's Audit Division and Department management in accordance with Department policy.
- c. Evaluating the necessity and appropriateness of providing direct payments to participants to purchase goods and services. If the Department determines that the practice of making direct payments should continue, it should strengthen controls, such as by limiting the dollar amount of the purchase(s), requiring supervisory approval of direct payments, and revising written policies and procedures accordingly.
- d. Providing direct access for the Accessible Web-Based Activity and Reporting Environment (AWARE) application to the Department's internal audit staff.
- e. Developing and implementing procedures for tracking the issuance, return, and reissuance of equipment purchased for participants. These procedures should include creating and maintaining a statewide tracking database of equipment purchased for participants and a requirement for attaching State-issued identification tags to the equipment.
- f. Developing and implementing procedures to turn over recovery efforts to the Office of the Attorney General in a timely manner once Program staff have been unsuccessful at recovering State-owned equipment from participants.

## **Department of Human Services Response:**

- a. Agree. Implementation date: July 2014.

The Division will develop policies and procedures to ensure that suspected incidents of fraud or misuse of Program funds or property on the part of a participant are reported in a timely manner through supervisory channels to the Department's Audit Division. The Division will further collaborate with Audit Division staff to establish a process for determining the seriousness and intent of participant actions that are under investigation. If fraudulent activity is confirmed, information will be thoroughly documented in the case file and the case will be closed, as appropriate. In addition, the Audit Division will train Division and field office staff on the Department's Fraud Prevention Policy by March 2014.

- b. Agree. Implementation date: April 2014.

The Division will incorporate into its periodic supervisory and quality assurance review questions for determining whether there are any indications of fraudulent activity or misuse of federal and/or state funds or property. The reviewer will verify that appropriate reporting requirements were met, as established in the policies and procedures in part "a". The fraud questions will be developed in collaboration with the Audit Division and incorporate appropriate safeguards to ensure maintenance of confidentiality requirements.

- c. Agree. Implementation date: July 2014.

The Division will work with subject matter experts and technical assistance resources to review the necessity and appropriateness of providing direct payments to participants, and mechanisms for doing so. If it is determined that restricted payments need to be issued directly to participants, the Division will revise its policy and procedures to include parameters, such as limitations to the amount and type of direct payments, as well as required supervisory approval steps and appropriate documentation thereof.

- d. Agree. Implementation date: Implemented and Ongoing.

In November 2013, the Division granted guest access for internal Audit Division staff to information on any participant suspected of fraudulent behavior or misuse of Program funds or property, and for other fraud prevention purposes. The Division will continue to grant read-only access to case management information contained in

AWARE to Department internal auditors in a manner that complies with federal regulations.

- e. Agree. Implementation date: December 2014.

The Division will define parameters for and develop a statewide system for tracking appropriate purchased goods and equipment, which will include defining what equipment is “recoverable.” The system will include to whom the equipment was provided; if and when the equipment needs to be returned; dates the equipment was returned; and the reissuance of the equipment, when applicable. The Division will explore AWARE functionality for the purposes of this statewide tracking system; research the viability of and mechanisms for the use of state-issued identification tags; and, if feasible, propose a strategy and time line for implementing the use of identification tags.

- f. Agree. Implementation date: July 2014.

The Division will develop and disseminate clear procedures to vocational rehabilitation counselors for responding to situations in which participants refuse to appropriately return equipment that meets the established definitions of “recoverable” in part “e.” These procedures will include structured communications and steps for involving the Department’s Audit Division, which will notify the District Attorney’s Office or Attorney General’s Office, as appropriate.

---

## Participant Contributions

According to federal regulations (Participation of individuals in cost of services based on financial need, 34 C.F.R., pt. 361.54), when determining the extent to which the individual who is eligible for the Program will financially participate in, or contribute to, the cost of the vocational rehabilitation services he or she receives, each state may choose to consider the financial need of the participant. Colorado’s Program determines the financial need of all individuals eligible for the Program except those who are eligible to receive benefits under the federal Supplemental Security Income (SSI) and Social Security Disability Income (SSDI) programs, because they have already been determined by these programs to have limited income and resources and, therefore, are determined to not have an ability to contribute, as outlined in Division policy. Further, statute [Section 26-8-105(4)(b), C.R.S.] requires that any goods or services, besides those required to determine an individual’s eligibility and his or her vocational service needs, shall be provided only to the extent that the individual is found to require financial

assistance. To determine whether a participant can contribute toward the services he or she will receive and how much he or she will contribute, the Division uses a tool called the financial need analysis form to calculate the participant's monthly income, expenses or deductions, liquid assets, and the contribution amount, when applicable.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to review and assess the appropriateness of the Program field offices' process for determining whether participants should contribute to the cost of the services they receive, the contribution amount that participants should pay, and whether participants pay the contribution amounts determined by the Program.

We reviewed the sample of 85 participant files from Fiscal Year 2013 and identified that 60 of the 85 files required a financial need analysis based on Division policy. Specifically, the remaining 25 participants did not require a financial need analysis at the time of our review because these individuals had not received any services, such as vocational training services, that would require a financial contribution; were receiving SSI or SSDI; or were on the Program's wait list; or because the case had been closed before the financial need analysis could be completed. We evaluated these 60 files to determine whether Program staff completed the financial need analysis form, calculated the participant's income and expenses accurately based on the information and source documentation provided by the participant, and documented the participant's ability to contribute, as well as the required contribution amount, in the hard-copy file. We identified 10 participants out of our sample of 60 who were determined by Program staff to have an ability to contribute financially toward their services. For those 10 participants, we also reviewed whether the participant paid the contribution amount that staff had documented on the financial need analysis form. We interviewed Division and Program staff and evaluated the financial need analysis form to determine whether it contained enough information for staff to accurately compute participants' financial contributions.

We also reviewed the cost-of-living allowance the Division used to calculate a portion of participants' monthly expenses and interviewed vocational rehabilitation program staff in eight states—Alabama, Georgia, Maryland, Oklahoma, Utah, Washington, West Virginia, and Wisconsin—to determine those states' processes for assessing and collecting participant contributions.

### **How were the results of the audit work measured?**

We applied the following criteria when evaluating the Program field offices' processes for determining whether a participant will financially participate in, or contribute toward, the cost of his or her vocational rehabilitation services; determining the contribution amount, when applicable; and ensuring that the

participant pays the contribution amount determined by the Program that the participant agreed to pay:

**The Program may pay for services only if participants need financial assistance.** According to state statute [Section 26-8-105(4)(b), C.R.S.], “Any goods or services, other than diagnostic and related services (including transportation) required for the determination of eligibility...[and] the services to be provided... shall be provided at the public cost only to the extent that the individual with disabilities is found to require financial assistance in accordance with the rules and regulations of the Department.”

**Policies applied uniformly.** According to federal regulations [Participation of individuals in cost of services based on financial need, 34 C.F.R., pt. 361.54(b)(2)(B)(ii)], the state must establish policies that are applied uniformly to all individuals in similar circumstances if the state chooses to consider financial need when providing services to participants.

**Documentation of financial need and participant contributions.** Division policy (Sections 10.5, 10.51, and 10.52) requires counselors to determine and document the individual’s financial need prior to the preparation and approval of an employment Plan. The documentation should also indicate the individual’s contribution amount.

**Proof and calculation of financial information.** Beginning in 2007, Division policy (Sections 11.51 and 10.52) allowed for the statement of the eligible individual to establish the financial basis for the need determinations. If the individual’s statement was not consistent with other reports obtained, the counselor could request financial information to verify the statement. The financial need determinations are to be calculated based on after-tax income from all sources in the family. In April 2013, the Division revised its policy (Section 10.51) to specifically require that participants provide proof of income and assets, but it did not change the previous requirements. The 2013 policy requiring proof of income and assets was in effect for three of the 60 financial need analysis forms we reviewed.

**Cost-of-living allowance.** Division policy (Section 10.51.3) allows for a standardized allowance for normal living costs based on family size. The Division Director establishes these rates, in writing, and they are required to be reviewed annually and adjusted when needed. The individual is allowed to exclude four times the calculated family cost-of-living allowance to determine net liquid assets.

Other programs within the Department of Human Services, such as the Low-Income Energy Assistance Program and the Colorado Child Care Assistance Program, utilize federal poverty guidelines, which are modified annually, to determine whether participants should contribute payment toward the services

they receive in those programs. The participant's contribution amounts are then calculated based on the income amounts of the household. Four of the eight other states that we surveyed—Georgia, Maryland, Utah, and West Virginia—administer a financial need analysis similar to Colorado's and have written policies that specify a cost-of-living benchmark as a percentage of the federal poverty guidelines and cost-of-living published annually by either the federal Department of Health and Human Services or Department of Labor. Colorado does not specify in its policy how the cost-of-living allowance is calculated.

### **What problems did the audit work identify?**

We identified four problems with the participant files we reviewed: (1) inconsistencies in information contained on participants' financial need analysis forms and applications; (2) inconsistencies in the processes Program staff use when conducting and documenting participants' financial need analyses; (3) lack of proof of participants' income; and (4) lack of evidence that participants paid the contribution amount, in all instances, when Program staff had determined the participants were financially able to do so. Overall, we determined that 42 (70 percent) of the 60 participant files that required a financial need analysis based on Division policy contained one or more of these problems. These problems resulted in a total of \$5,135<sup>1</sup> in known questioned costs.

- **Information on participants' financial need analysis forms did not match the application.** In 36 participant files, the income and expenses that Program staff recorded on the financial need analysis form did not match the income and expense information reported in the participants' applications for services. For example, one participant reported \$1,920 in income on the application, but the income shown on the analysis form was \$500. For the 36 files, we were unable to determine how staff performed the after-tax income calculation when entering income into the analysis form. These problems resulted in a total of \$2,439 in known questioned costs.
- **Financial need analysis forms were not consistently completed by staff when required.** For three participant files we reviewed in which a financial need analysis form was required by Division policy, Program staff did not complete the analysis form. There was no documentation in the hard-copy files or AWARE showing that the Program had made a determination of whether the three participants should have contributed to the cost of their services. Because staff did not document a financial need analysis, we completed a financial need analysis for the three participants using the Division's form and the participants' income and expense information found in their case files. Based on our analysis, we determined that none of them would have been required to contribute to the cost of their services. Accordingly, we did not identify questioned costs resulting from this issue.

- **Participant files lacked proof of income.** For the three participant files in our sample in which a financial need analysis was completed after the new Division policy was effective in April 2013, none of the files contained proof of the participants' income and assets as required.
- **Participant files lacked evidence that participants paid the contribution amounts they agreed to pay.** We found no evidence that three of the 10 participants for whom the financial need analysis form showed that the participant was required to pay a contribution, paid the contribution amounts that he or she agreed to pay. These participants should have contributed \$999 toward the cost of their services, which are considered known questioned costs for the Program. In addition, for four of the 10 participants, Program staff did not document the participant's contribution amount in the participant's Plan, as required by Division policy. This resulted in \$1,697 in known questioned costs.

We also found that the Division has not reviewed or updated the cost-of-living allowance it uses to determine participant contributions. As discussed earlier, Division policy requires staff to exclude a cost-of-living allowance from the participant's net liquid assets when calculating the participant's contribution amount. The cost-of-living allowance figure the Division uses is \$1,066 plus \$567 per person in the family unit multiplied by four. For example, for a participant with a family of four, the cost-of-living allowance would be calculated as \$3,334 (\$1,066 plus \$567 multiplied by four, or \$2,268) multiplied by four, or \$13,336 excluded from net liquid assets. We found that the Division has not reviewed the cost-of-living allowance annually or updated it, as required by Division policy, since at least 2007, which is when Division staff believe the allowance was implemented. Division staff also could not explain the reasoning behind the current figures used to calculate the allowance.

### **Why did the problems occur?**

We identified two main reasons why the problems related to participant contributions occurred, as described below.

#### **The Division lacks clear written policies and procedures in the following four areas:**

- Division policy does not specify how Program staff should document changes in participants' financial circumstances. Division staff reported that they believed some of the financial need analyses did not match supporting documentation because the participants' financial circumstances could have changed between the dates they applied for

services and when the analysis forms were completed. However, staff could not provide documentation that participants' financial condition had in fact changed.

- Division policy requiring that “financial need determinations will consider after-tax income” is unclear and inconsistent with other federal programs run by the Department. Division staff told us that information on participants' financial need analysis forms did not match the applications in the instances we identified because participants often report gross (or before-tax) income on their applications, and Program staff must input after-tax income into the analysis form, as required by the Division's policy. The Division could not provide written policies or procedures explaining how staff should calculate after-tax income if the participant does not provide a pay stub or how staff should consider it when assessing a participant's financial need and determining the contribution amount.

In addition, other federal programs at the Department, including Temporary Assistance for Needy Families and the Low-Income Energy Assistance Program, utilize gross (or before-tax) income for determining participant contributions for their programs. Federal regulations for the Program do not prescribe how states must determine contributions. Therefore, the Department should assess the reasonableness of the Division's use of after-tax income and consider requiring it to use gross income to ensure the federal programs run by the Department calculate contributions consistently. Because Division policy requires staff to utilize a financial need analysis to determine a participant's contribution toward services, the Division should document its methodology underlying the analysis.

- The Division does not have written procedures for applying the participants' contribution amounts to the services or goods outlined in the participants' Plans, documenting the contribution amounts, and ensuring those amounts are contributed by the participants.
- The amounts used by the Division to determine a participant's cost-of-living allowance are not defined in policy and are outdated because the Division has not implemented a process to annually assess whether the allowance is appropriate, reasonable, and provides an accurate evaluation of a participant's financial position.

**The Division has not implemented a supervisory or other review process.** The Division does not have a supervisory review process to ensure that Program staff complete the financial need analysis correctly, document the contribution amount in the participant's Plan, and ensure participants make required contributions. The Division's quality assurance team reviews a sample of participant case files annually to check whether Program staff complete the financial need analysis

form and participants pay contributions. However, the Division does not have a corrective action process to ensure errors identified during the quality assurance review are corrected.

### **Why do these problems matter?**

Division policies require the Division to provide vocational rehabilitation services and goods that are necessary, appropriate, and provided at the least possible cost. Assessing participants' financial contribution to services and goods is an important component of evaluating the overall cost to the State because the participants' contributions toward the services they receive reduce the amount expended by the State. For example, we identified three participants in our sample who did not appear to pay the \$999 in total contributions that Program staff had calculated, which represents lost income for the Program. Using outdated and unsupported information, such as the cost-of-living allowance, to calculate participant contributions may also result in lost income. For example, since at least 2007, the Division has used a monthly cost-of-living allowance of \$567 per person in the family unit plus \$1,066, or about \$19,600 annually for one person, but the Division has not defined the basis for using these figures.

In addition, when Program staff use inconsistent processes for determining participants' required contributions, there is a risk that participants may be treated inequitably depending on the Program office where they apply. Revising and implementing written procedures for monitoring the field offices' practices for assessing and documenting participant contributions would help ensure that the field offices operate consistently in accordance with federal regulations and Division policy.

<sup>1</sup> Known questioned costs total \$5,135. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-62:**

The Department of Human Services (Department) should improve its processes for assessing participants' contributions in the cost of vocational rehabilitation services by:

- a. Implementing changes to the Division of Vocational Rehabilitation's (Division) policy manual to provide clear guidelines for calculating and

documenting participant contributions. This should include procedures for documenting changes to participants' financial situations that occur between application and staff completion of the financial need analysis.

- b. Reviewing the Division's current methodology for calculating participants' financial need, including the cost-of-living allowance calculation, for appropriateness and making changes as deemed necessary.
- c. Instituting a supervisory review process to ensure that financial need analysis forms are completed correctly as required by Division policy, information used to complete the analysis form and calculating the participant's required contribution is properly documented, the participant's required contribution is documented in the Individualized Plan for Employment, and participants' required contributions are paid.
- d. Reviewing the Division's policy and practice of using after-tax income for calculating participant contributions and determining whether gross income should be used for this calculation for consistency with other federal programs at the Department. If after-tax income continues to be used, then the Department should establish a documented methodology for calculating after-tax income.

### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

- a. The Division will implement changes to its Policy Manual to provide clear guidelines for calculating and documenting participant contributions, as well as handling and documenting any financial changes during the participant's period in the Program. The Division will collaborate with other federal programs within the Department to model requirements on already established financial need testing procedures, as allowable under the Vocational Rehabilitation Program's federal requirements.
- b. As the Division establishes policies and procedures for financial need testing in alignment with other federal programs within the Department, the current methodology for calculating participants' financial need, including the cost-of-living allowance calculation, will be modified accordingly.
- c. The Division will strengthen the quality assurance and supervisory review processes to ensure the financial need analysis forms are completed correctly, the information used is properly documented, and the required contributions are incorporated into the participant's

Individualized Plan for Employment (Plan or IPE) and applied or paid in accordance with the Plan. The Division's updated quality assurance process, which will be effective in December 2013, requires any deficiencies to be corrected and reported using the newly developed follow-up action form. As an additional step to improve service delivery, technical assistance materials illustrating the appropriate application of participant contributions, will be prepared and made available to vocational rehabilitation counselors.

- d. The Division will establish policies and procedures for financial need testing in alignment with other federal programs within the Department. If these programs primarily use gross income for financial need calculations, the Division will apply a similar methodology, while also ensuring continued compliance with 34 C.F.R., pt. 361.54.

---

## **Fee and Bonus Payments to Vendors**

One type of service that Program participants receive is job placement assistance, which is provided to help the participant obtain suitable employment that is consistent with the individual's abilities, capabilities, and interests. The Division contracts with outside vendors to provide job placement services to participants in the Program and pays those vendors for each participant served based on a fee schedule established by the Division. Job placement vendors provide services such as developing a written job placement plan for the participant, assisting the participant with completing employment applications, arranging for job interviews, recommending worksite job modifications with the new employer, and helping the participant adjust to the workplace. The Division pays these vendors for developing job placement plans and successfully placing participants in jobs. The Division also pays bonuses to the vendors for successful job placements if certain criteria are met. In Fiscal Year 2013, the Program paid vendors a total of about \$511,000 for 1,533 participants to receive job placement assistance.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to evaluate the Division's policies and procedures regarding vendor payments. We obtained and reviewed data related to the Division's Fiscal Year 2013 payments to vendors, including those that provided job placement services, to determine whether the services that were provided appeared to comply with federal regulations and Division policy. We also reviewed the Division's fee schedule and interviewed Division staff and Program staff regarding vendor payment processes.

## **How were the results of the audit work measured?**

We applied the following criteria when assessing the Division's payments to vendors:

**Reasonable costs.** Federal regulations [Written policies governing the provision of services for individuals with disabilities, 34 C.F.R., pt. 361.50(c)(2)] allow each state to "establish a fee schedule designed to ensure a reasonable cost to the program for each service." The federal Office of Management and Budget's *Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments*, provides basic guidelines for a cost to be allowable under a federal award, including specification that costs should be necessary, reasonable, and adequately documented. In addition, State Fiscal Rule 2-1 states that all expenditures by state agencies shall be for official state business purposes only and reasonable and necessary under the circumstances. The State of Colorado Procurement Manual also requires agencies to ensure the good or service that a vendor provides is necessary and reasonable. Finally, the Division's policy (Section 12.11) states that "all services and goods that have been determined to be necessary and appropriate must be procured at the least possible cost to the Division insofar as they are adequate to meet the needs of the individual." When the Division updated its policy, effective April 2013, it added a statement that the Division "is entrusted to be good stewards of public funds when providing necessary and appropriate rehabilitation services."

**Payment requirements.** State Fiscal Rule 2-2 generally prohibits advance payments, which are payments for goods and services prior to receipt. In addition, State Fiscal Rule 2-3 states that receiving reports or other sufficient documentation shall be prepared for all goods and services received, showing actual quantities, any unsatisfactory condition, and compliance with specifications, prior to processing a voucher for payment.

## **What problems did the audit work identify?**

Overall, the Division pays job placement vendors fee and bonus payments that do not appear to meet federal and state requirements regarding the allowability of costs. First, we found the Division consistently pays job placement vendors a "successful job placement" fee to successfully place a participant in employment as well as a bonus for this same purpose. When surveying and interviewing eight other states' vocational rehabilitation programs, we found that five of the states we interviewed pay a bonus to their job placement vendors; however, the states only allowed the bonus payments when a vendor either helped the participant obtain high-quality, full-time employment with full benefits or placed the participant in a job quickly, such as in fewer than 35 days, and the participant retained the job, allowing the state to successfully close the case. One of the eight states we interviewed said it uses job placement vendors but does not pay the vendors any bonuses.

The bonuses that the Division pays its job placement vendors do not appear to be a reasonable, necessary, or federally allowable cost because they are essentially duplicate payments to vendors for services for which the vendors have already been paid. In Fiscal Year 2013, the Division paid 82 vendors bonuses totaling about \$171,000 for successful job placement. The bonuses were in addition to the \$340,000 in regular fee payments that the Division made to the same vendors to provide these services. The bonuses that were paid ranged from \$135 to \$780 each. The following table shows the Division’s vendor fee schedule, which includes fees and bonuses based on four different benchmarks.

<b>Vocational Rehabilitation Program                      Job Placement Vendor Fees and Bonus Payment Schedule by Category of Work<sup>1</sup>                      As of September 2013</b>					
Category of Work	Description	Fee for Developing a Job Placement Plan	Fee for Successful Job Placement	Bonus Amount <sup>2</sup>	Additional Bonus Option <sup>3</sup>
Mobile Work Crew	A group of two or more persons with disabilities who provide temporary services, such as janitorial, at an employer site. The crew is supervised by a person who teaches the job tasks and appropriate work-related behavior.	\$53	\$260	\$250	\$105
Competitive	Work in the labor market performed at or above minimum wage.	\$105	\$520	\$500	\$210
Supported Employment	Competitive employment with additional support services for participants with the most significant disabilities.	\$158	\$780	\$750	\$315
<b>Source:</b> Office of the State Auditor’s analysis of the Division of Vocational Rehabilitation’s fee schedule. <sup>1</sup> The Program pays each fee and bonus to a vendor on a per-participant basis. <sup>2</sup> The Program pays a job placement vendor this bonus when the vendor places the participant into employment and the Division successfully closes the participant’s case. <sup>3</sup> The Program pays a job placement vendor this bonus if the participant is placed in a job that pays wages that are 25 percent or more above the federal Department of Labor’s prevailing wage for comparable positions.					

For the 82 vendors who received bonuses in Fiscal Year 2013, we found the following:

- 59 (72 percent) out of the 82 job placement vendors received more than one bonus payment during the year. For example, one vendor received 21 bonus payments totaling \$5,750, or one bonus for each of the 21 participants the vendor served during the year. As another example,

four vendors each received between 10 and 20 bonus payments, which totaled \$19,500 for all four vendors.

- Three (4 percent) of the 82 job placement vendors received both types of bonuses, totaling \$710 paid to each vendor for serving one participant each who obtained employment in the “competitive” category of work.
- One vendor bonus payment for supported employment was in excess of the fee schedule. The Division paid the vendor a bonus of \$780 instead of the \$750 bonus payment allowed in the Division’s fee schedule.

We also found that, in some instances, the Division pays vendors up to \$405 of the “successful job placement” fee before the participant is successfully placed in employment. For example, the Program pays some vendors a portion of the “successful job placement” fee each month that they are serving a participant rather than paying the fee after the participant has been placed in a job. In Fiscal Year 2013, the Division paid 59 vendors approximately \$65,000 in “successful job placement” fees for 282 participants, before the vendors had found the participants a job. As of September 2013, we determined that 218 of those 282 participants still had not been placed in a job. Paying the “successful job placement” fee before the vendor has provided the service of placing the participant in a job can be considered an advance payment, which is generally prohibited by State Fiscal Rules, because it is made prior to the receipt of the service for which it was intended. In addition, the Division was unable to provide data regarding the amount of time that participants receive job placement services or actual vendor time frames for placing participants in successful employment.

### **Why did the problems occur?**

Based on our interviews with Division management and Program staff, there are two reasons why the Division pays vendor bonuses and pays the “successful job placement” fee before participants have a job. First, Division and Program staff stated that the vendor bonuses are meant as incentives for providing services timely and to encourage job placement agencies to find employment for disabled participants who sometimes require additional effort to find jobs. Second, staff stated that the Division pays some vendors a portion of the “successful job placement” fee before participants obtain jobs because staff believe incremental payments are needed to compensate vendors for services, such as helping participants complete employment applications and arranging job interviews, that vendors provide before the participant gets a job. We found:

- **Insufficient methods for ensuring job placements are timely.** The Division has not established written policies or procedures for ensuring vendors provide timely services. For example, the Division has not developed reasonable time line expectations for vendors to successfully find employment for a participant based on the severity of the participant’s

disability and the type of work they are seeking. The Division does not execute vendor contracts unless the vendors receive \$20,000 or more from the Program in a fiscal year, and this practice has been approved by the Office of the State Controller. We found that in Fiscal Year 2013, none of the job placement vendors received more than \$20,000 in payments; therefore, none had formal contracts with the Division. Instead, the Division required each job placement vendor to sign a Vendor Registration form and paid the vendors using a purchase order form. We found that the Division's forms do not include specific provisions for job placement bonuses, prescribe a time frame for the duration of each participant's job placement services or a time limit for finding job placement for participants, or refer to the fee schedule as the basis for payment of the bonus. Rather, the fee schedule instructs the job placement vendor to submit an invoice to the Division specifically requesting the bonus. In Recommendation No. 2013-65, we discuss other weaknesses in the Division's contract management practices and the agreements it has in place with vendors.

- **Insufficient methods for incentivizing vendor performance.** The Division has not established any other policies or procedures for incentivizing vendor performance, besides bonuses, such as by rewarding vendors who successfully place participants in jobs in a timely manner by continuing to do business with them or by requiring field offices to discontinue doing business with vendors who are not successful at placing participants in employment positions.

### **Why do these problems matter?**

The problems we identified with paying vendor bonuses and paying for job placement before participants are placed in positions matter for the following reasons:

- **The Division is not being a good steward of public funds.** Paying vendor bonuses that represent additional payment for services for which the vendor was already compensated and paying the "successful job placement" fee before the vendor has placed a participant in a job conflict with the Division's mission to be good stewards of public funds and provide services to individuals at the least possible cost.
- **Vendor bonuses reduce funds available for other Program services.** On April 22, 2013, the Division implemented a wait list for vocational rehabilitation services because the Division determined it did not have sufficient funding to provide services to all eligible individuals. As a result of the Division's wait list, the Division has not served any eligible

individuals who have applied for services since April 22, 2013. Discontinuing the payment of vendor bonuses would be a prudent cost-containment measure to preserve funds that could be used to provide services to individuals who are currently on the wait list. In Fiscal Year 2013, the Division paid an average of \$2,146 in services per participant in the Program. Based on the average cost of services per participant, we estimate that the \$171,000 in bonuses that the Division paid job placement vendors in Fiscal Year 2013 could have been used to pay for services for approximately 80 new participants.

In addition, if the Division believes that the regular fees it pays job placement vendors are not adequate to compensate them for the services they provide, the Division should revise its fee schedule. For example, the Division could establish a fee for regular job placement assistance to compensate vendors on a reimbursement basis for work they perform to help participants find a job. The Division should only pay the “successful job placement” fee once a participant is successfully in a job.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-63:**

The Department of Human Services (Department) should improve methods for compensating Vocational Rehabilitation Program vendors by:

- a. Discontinuing the practices of paying bonuses to vendors and paying the “successful job placement” fees prior to employment.
- b. Evaluating the fee schedule payment amounts allowed for regular job placement services to determine if the fees are appropriately structured to pay for the reasonable cost of providing those services and adjusting the fee schedule payment amounts as appropriate. This evaluation should include considering the implementation of a fee to compensate vendors for job placement assistance services they provide prior to a participant’s employment.
- c. Implementing reasonable time lines for vendors to follow when providing job placement services and for successfully placing a participant in an employment position, incorporating the time lines into each job placement vendor’s Registration form and/or purchase order, and monitoring the timeliness of vendor compliance with the time lines. The Department should discontinue doing business with job placement vendors who do not

consistently place participants in successful employment positions in a timely manner.

### **Department of Human Services Response:**

- a. Agree. Implementation date: February 2014.

The Division discontinued the job placement bonus and the fee allowance in September 2013. The Division will form a procurement improvement team to analyze current practices and revise the job placement payment structure.

- b. Agree. Implementation date: July 2014.

The Division will examine all fees and the timing of payments to placement vendors. The procurement improvement team mentioned in part “a” will review models for job placement service delivery reimbursement and review best practices from other states’ vocational rehabilitation programs to revise the fee schedule.

- c. Agree. Implementation date: July 2014.

The Division acknowledges the need to clearly communicate time frames for job placement service delivery. The Department will discontinue doing business with job placement vendors who do not consistently place participants in successful employment positions in a timely manner. The Division will implement a newly developed Job Placement Plan form, which includes a projection of the time frame needed for job placement services. The Division will establish new protocols for supervisory review of all participants in the job-ready status for an extended period of time.

---

## **Administrative Costs**

Federal regulations allow the Program to pay for administrative costs, including costs associated with Program planning, development, monitoring, and performance evaluation. These four types of costs can include expenses associated with financial management, information systems, supplies, administrative salaries, and travel related to carrying out the Program. The Department of Human Services (Department) pays for administrative costs using three methods: (1) reimbursements to staff, such as for business travel expenses, (2) direct payments to vendors, such as those providing information system maintenance, and (3) payments made through the Group Event System Cards

(event cards) issued to the Department's divisions or units for expenses, such as lodging costs incurred due to business travel. According to Division staff, individuals with knowledge of State Fiscal Rules and federal grant requirements are responsible for reviewing and approving expenditures.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to evaluate the Division's internal controls over Program administrative costs and compliance with federal regulations, the Program's federal grant award requirements for activities allowed and allowable costs, state statutes and rules, and Department travel and event card policies. We reviewed Department and Division documentation for a sample of 50 Program expenditure transactions totaling \$196,000, including 10 travel expenditure transactions for trips that occurred during Fiscal Year 2013. We reviewed the documentation to determine if the associated payment was properly paid, supported, approved, and coded correctly within the Colorado Financial Reporting System (COFRS), the State's accounting system. We also assessed the Department's processes for ensuring that travel reimbursements are reasonable and that travel reimbursement request forms submitted by Division and Program staff are accurate and complete.

### **How were the results of the audit work measured?**

We applied the following criteria when evaluating the Division's administrative cost transactions:

**Appropriate and reasonable payments.** The federal Office of Management and Budget's (OMB) *Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments*, provides basic guidelines for a cost to be allowable under a federal award. These guidelines state that the costs charged to a federal award must be necessary, reasonable, and adequately documented. OMB's *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*, requires that transactions using federal grant funds be executed in compliance with laws, regulations, and the provisions of the federal grant agreements. Statute [Section 24-17-102(1), C.R.S.] requires state agencies to have internal accounting and administrative control systems that include provisions for adequate authorization and recordkeeping, restrictions on use of state assets, and effective processes of internal review. These provisions are intended to protect state assets and ensure that expenditures are reasonable, appropriate, and solely for State business. Further, State Fiscal Rule 2-1 requires all state agency expenditures to meet the standards of propriety as being for official State business purposes only and reasonable and necessary under the circumstances.

**Approval of information technology purchases.** The Governor's Executive Order D 016 07 states that all state departments engaged in activities concerning information technology shall coordinate with the Office of Information

Technology (OIT) on those activities. Information technology spending is defined as spending on communication and information resources, communication and information resource technologies, and data processing.

**Travel expense requirements.** According to State Fiscal Rule 5-1, travel charged to the State shall be for the benefit of the State and completed using the most economical means available. Further, this State Fiscal Rule states that travel expenses that are reimbursable include lodging, meals, mileage, airfare and related fees, and incidental expenses. State Fiscal Rule 5-1 and the Department's travel policy require the following review and approval process: (1) the traveler must submit adequate documentation to the approving authority for the travel expenses, including a statement as to the purpose of the travel, within 60 days of completion of travel; (2) the approving authority must review the expenses claimed by a traveler and, if approved, endorse the travel reimbursement request manually or by electronic signature; and (3) Department accounting staff must review the travel expense reimbursement request before entering the transaction into COFRS and approving the payment voucher. Further, according to the Department's event card policy, the event card provides users with a means to make small dollar purchases (under \$5,000) for official state business related to conference rooms, meetings, and lodging for occasional travelers.

### **What problems did the audit work identify?**

We identified problems with seven (14 percent) of the 50 Division administrative cost expenditures we reviewed, including inadequate supporting documentation, lack of proper approvals, a payment error, and incorrect recording on COFRS. Specifically, we found:

- For four transactions totaling \$1,174, there was no evidence of proper approvals. Specifically, three travel expense transactions that were paid using the Division's event card were not approved by the traveler's supervisor; instead, the staff who traveled and incurred the costs had approved his or her own travel expenses. The fourth transaction was for the purchase of software and was not approved by OIT.
- For one transaction totaling \$45, the Division paid the wrong vendor based on the vendor listed on the invoice and the payment recorded.
- For one transaction totaling \$103, the Division did not properly record the administrative expense to the correct organizational code on COFRS.
- For one transaction totaling about \$3, the Division did not have adequate supporting documentation to substantiate whether the transaction amount was reasonable and appropriate. Specifically, the Division could not provide a contract to support the amounts paid.

### **Why did the problems occur?**

The problems we identified in our administrative costs testing resulted primarily from a lack of adequate controls, including a lack of supervisory reviews by staff who have oversight and approval responsibilities. First, Division and Program supervisors responsible for approving the transactions are not consistently ensuring that the transactions are adequately supported by documentation, paid to the correct vendor, recorded properly, and approved by OIT, if applicable. Additionally, the Department does not require that all expenditures made by a staff member on his or her own behalf, such as those charged on an event card, are reviewed and approved by the staff member's supervisor.

### **Why do these problems matter?**

The administrative cost problems we identified indicate that public funds are not being used in a prudent and accountable manner. The Division spent a total of approximately \$365,000 for staff travel expenses in Fiscal Year 2013; the lack of adequate supervisory review of travel transactions paid for using the event card increases the risk that state funds could be misused without detection. In addition, recording expenditures incorrectly on COFRS prevents the Department and the Division from monitoring administrative costs to ensure they are accurate and appropriate.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-64:**

The Department of Human Services should strengthen controls over Division of Vocational Rehabilitation administrative costs by implementing controls that ensure all transactions are properly supported by documentation, recorded properly in the Colorado Financial Reporting System (COFRS), approved by a supervisor of the staff who incurred the expense, and approved by the Office of Information Technology, if applicable.

### **Department of Human Services Response:**

Agree. Implementation date: April 2014.

As stated previously, the Division of Vocational Rehabilitation (Division) will form a procurement improvement team to analyze current practices. The procurement improvement team will identify current process

weaknesses and strengthen controls over administrative costs, such as travel reimbursements, use of procurement and travel cards, and the purchase of any information technology-related items. The Division will develop specific procedures as a result of these activities to ensure that all transactions have accurate supporting documentation and COFRS coding, as well as all required approvals to ensure full compliance with Departmental policies and State Fiscal Rules. The Division will ensure that all appropriate staff receive training in the application of the developed procedures and processes.

---

## **Contract Management**

The Division works with various vendors to provide Program participants certain services and goods, such as psychological evaluations, hearing aids, academic training at institutions of higher education, job placement services, and vehicle modifications for persons who are disabled. The Division secures these goods and services through several types of contractual agreements, including written contracts, interagency agreements, and purchase orders. In Fiscal Year 2013, the Division paid 1,989 vendors a total of \$20.9 million for services they provided to Program participants, which represented almost one-half of the Program's total expenditures that year.

Prior to doing business with a vendor, the Division requires that the vendor complete and sign a Vendor Registration Form with information such as the vendor's taxpayer identification number, mailing address, and contact information. The Vendor Registration Form also contains terms and conditions related to vendor performance and compensation. Once the Division is ready to purchase services from a vendor, for each transaction, the Division completes a two-page purchase order form that contains the Division's terms and conditions and the responsibilities of the Division and vendor. In addition, for vendors that the Division estimates will provide \$20,000 or more in services each fiscal year, the Division executes a formal contract that includes the Division's terms and conditions and a provision that services and goods will be defined and ordered by the Division based on the terms and conditions in the purchase order form.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to determine whether the Division's vendor forms, agreements, and contracts comply with State Fiscal and Procurement Rules and to identify and ensure compliance with any waivers of the procurement rules that the Division has received from the Office of the State Controller (State Controller). We interviewed Division staff and reviewed Division expenditure and transaction data to identify all payments made to vendors in Fiscal Year 2013. We

requested that the Division provide the contracts and supporting documentation, including the Vendor Registration Forms, it had executed with a judgmental sample of 12 vendors that were each paid \$20,000 or more during Fiscal Year 2013.

### **How were the results of the audit work measured?**

We evaluated the Division's contract management practices and its vendor agreements and contracts based on the following criteria:

**State contract requirements.** State Fiscal Rule 3-1 (Section 5.1) states that contracts must include a statement of work, payment terms including a maximum dollar amount, performance period, special provisions, and a statement that the contract shall not be valid until it has been approved by the State Controller or delegate. Since January 2009, State Fiscal Rules have required each state contract to include special provisions that include requirements for contract approvals, fund availability, vendor performance, and governmental immunity, among other requirements.

**Duration of state contracts.** State Procurement Rule 24-103-503 promulgated by the Department of Personnel & Administration states that contracts for periods in excess of 5 years shall not be executed without written permission from the State Purchasing Director.

**Division authority to use purchase orders for vendors receiving less than \$20,000 and contracts for vendors receiving \$20,000 or more.** In 2005, the Division received the State Controller's approval to use a purchase order form to streamline the process for purchases of less than \$20,000. According to the State Controller's waiver documentation, the Division represented that "We have set up a system for monitoring our expenditures with our vendors, each month [the Provider Relations Unit] will receive a report...which will show the vendors with which we are doing \$15,000 worth of business or more. When we have reached this level of business, the Provider Relations Unit within the Division of Vocational Rehabilitation will seek out the vendor and complete the [contract] so the vendor can continue to provide services up and above \$20,000." (Revised Contract Waiver Number 115 for the Division of Vocational Rehabilitation).

**Terms and conditions in the Division's vendor agreements.** The Division's Vendor Registration Form specifies that "the vendor agrees to abide by all of the terms and conditions set forth in the purchase order form..." and the vendor may stop work at any time without liability. The Division's purchase order form specifies that the Division "shall have the right to inspect services provided [by the vendor] at all reasonable times and places," the Division may terminate the purchase order in whole or in part for cause, and the Division may withhold amounts due to the vendor, as the Division deems necessary to procure similar

goods or services, such as when a vendor refuses or fails to properly perform any of its obligations.

### **What problems did the audit work identify?**

We found problems with the contracts for eight (67 percent) of the 12 sampled vendors as well as with the Division's agreements with vendors, as described below.

**No contracts with some high-paid vendors.** The Division had not executed contracts with three of the 12 sampled vendors that received a total of about \$434,500 in payments from the Division in Fiscal Year 2013, which was a violation of the Division's waiver from the State Controller requiring contracts with vendors receiving \$20,000 or more each year. We found:

- One vendor who Division staff reported had provided psychological evaluations to 386 participants during Fiscal Year 2013 was paid about \$208,600 by the Division. Division staff stated that the Division has a verbal agreement with the vendor and had negotiated a flat fee for evaluations provided by this vendor.
- The Division could not provide a copy of a contract for two other vendors—one vendor that was paid about \$197,600 during Fiscal Year 2013 for vehicle modification services, such as installations of electronic wheelchair ramps in vehicles, and one other vendor that was paid about \$28,300 to provide job placement services to Program participants.

**Outdated contracts with some vendors.** We found that five of the nine vendor contracts provided by the Division were outdated. Two of the sampled contracts had been executed by the Division in 1999, and the remaining three contracts were executed between 2002 and 2007. The Department and the Division could not provide evidence showing that the Division had obtained approval to enter into contracts exceeding 5 years, as required by State Procurement Rules. Further, we found that the Division's contracts executed in 2012 have a comprehensive 12-page format, whereas the contracts executed in 2007 and earlier have a short, 4-page format and do not include the special provisions required by State Fiscal Rules since 2009.

**Division forms signed by vendors expose the State to legal risks.** We found that the Division's Vendor Registration Form includes the following language that conflicts with the language in the Division's current purchase order form and places the State at risk:

- The Vendor Registration Form states “in no event may [the Division] oversee the actual work or instruct the vendor as to how the work will be performed and shall in no other way dictate the time of vendor’s performance.”
- The Vendor Registration Form specifies that vendors may stop work at any time without liability, but if work is stopped by the Division, the Division will be liable for work already done.

### **Why did the problems occur?**

The Division does not have written policies or procedures for contract management, including a process for monitoring payments to vendors to ensure that contracts are in place for vendors that will equal or exceed \$20,000 in services. In addition, the Division lacks a process to periodically review and update contracts and vendor forms and agreements to ensure they comply with State Fiscal Rules, include consistent provisions, and reflect current Division policies.

### **Why do these problems matter?**

Effective contract management practices are fundamental to ensuring that the Division meets state contracting requirements and sufficiently oversees the Program funds it pays to vendors. When the Division fails to execute contracts and contracts are out of date, the Division has limited ability to hold vendors accountable for providing quality services. Without a rigorous, well-defined contract and contract management process, the Division is unable to demonstrate accountability for the many services provided by vendors and the federal and state funds spent for those services or to ensure that vendors provide services in accordance with applicable federal regulations and state statutes and rules. Because the Division requires each vendor to sign and abide by the terms and conditions stated in the Vendor Registration Form and that form contains language that differs from the Division’s contract, the Division’s terms and conditions governing vendor transactions are unclear and place the State at risk for liability should a dispute arise with a vendor.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Procurement, Suspension, and Debarment. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-65:**

The Department of Human Services should ensure that the Division of Vocational Rehabilitation’s (Division) contract management processes and contracts comply

with State Fiscal Rules, State Procurement Rules, and the State Controller's waiver by:

- a. Executing standard and consistent contracts with all vendors who the Division anticipates it will pay \$20,000 or more a year.
- b. Establishing and implementing a Division policy and process to periodically review and update vendor contracts and obtain appropriate approvals for each contract template from the Office of the State Controller. This should include updating all Division contracts that have been in place 5 years or more and were executed prior to 2009.
- c. Revising the Division's Vendor Registration Form to ensure it complies with State Fiscal Rules and reflects the language contained in the Division's standard contract template.

### **Department of Human Services Response:**

- a. Agree. Implementation date: July 2014.

The Division will update, execute, and monitor standard and consistent contracts with all vendors who the Division anticipates it will pay above the thresholds determined by the State Procurement Rules on an annual basis.

- b. Agree. Implementation date: April 2014.

The Division will establish policies and procedures to periodically review and update vendor contracts and obtain appropriate approvals for each contract template from the Office of the State Controller. Division staff will update all vendor contracts that have been in place 5 years or more and were executed prior to 2009.

- c. Agree. Implementation date: January 2014.

The Division will revise its Vendor Registration Form to ensure it complies with State Fiscal Rules and reflects the language contained in the Division's standard contract template. Division staff will execute agreements using the revised form for all such vendors.

---

## Procurement Card Transactions

Procurement cards are credit cards used by an agency to pay for small purchases of goods for the State. The goal of the Department's procurement card program is to make it easier for Department personnel to acquire goods and services while providing more timely payment to vendors and reducing the small-dollar payments processed by the Department. The Department issues the cards to selected employees and the charges are billed to the Department. Each card has multiple controls, such as spending limits and procedures for limiting the State's liability in cases such as disputed transactions and card misuse. Each cardholder has an assigned approving official who is responsible for approving transactions and monitoring how individual employees use the cards.

### What audit work was performed and what was the purpose?

The purpose of the audit work was to evaluate the Division's internal controls and compliance with policies and procedures over expenditures made with procurement cards issued to Division staff. We reviewed a sample of 21 procurement card transactions made by the Division between July 1, 2012, and December 31, 2012, that we identified as potentially inappropriate based on State Fiscal Rules and the Department's Procurement Card Manual. We reviewed these transactions to determine the reasonableness and appropriateness of the purchases, timeliness of payments in accordance with State Fiscal Rules, whether the purchase complied with the Department's Procurement Card Manual and policy, and whether the purchase followed Department and Division processes for payments.

### How were the results of the audit work measured?

We applied the following criteria when evaluating the Division's procurement card transactions:

**Reasonable and allowable expenditures.** State Fiscal Rule 2-1 requires that all expenditures by state agencies meet the standards of propriety as being for official state business purposes only and reasonable and necessary under the circumstances.

**State requirements for procurement cards.** State Fiscal Rule 2-10 indicates that state agencies participating in the procurement card program shall use the state procurement card for purchases at local vendors in lieu of open or other charge accounts. This State Fiscal Rule also requires agencies to have processes for reviewing and reconciling the transactions on the procurement card statements. Specifically, the State Fiscal Rule requires that agencies shall: (1) complete a preaudit when the disbursement is made to the bank or when distributions are made; (2) reconcile the disbursements made to the bank with the total of validated

individual charges for the agency; and (3) use the dispute mechanism when charges from the bank are challenged. The Department's Procurement Card Manual states that the dispute mechanism is for the employee to file formal disputes with the bank upon discovery, but no later than 60 days after the transaction was posted. A signed copy of the dispute form must be provided to the bank to document the transaction being disputed. The Department then requires this transaction to be identified on the monthly procurement card statement.

**Department requirements for procurement card transactions.** The Department's Procurement Card Manual (the Manual) provides staff guidance for using procurement cards. Specifically, the Manual states that cardholders are to: (1) ensure the transaction is an appropriate purchase for the benefit of the Department's operations in accordance with State Procurement Rules, fiscal rules, and purchasing card policies and procedures; (2) obtain required prior approvals and a receipt for all purchases that includes the date of the transaction and attach to the receipt a description of items; and (3) ensure that only the cardholder uses the card. The Manual states that state sales tax is not permitted to be paid on any procurement card purchase and includes a listing of transactions that are unallowable, which includes airline tickets, purchases from auto and truck dealers, restaurants, medical drugs, and transportation charges. Further, each cardholder's assigned approving official must review and approve the cardholder's procurement card transactions and supporting documentation on a monthly basis.

**Controls over public funds.** According to State Fiscal Rule 1-9, the Department is responsible for the design and implementation of programs and controls to prevent, deter, and detect fraud, including theft of public property. Additionally, proper controls should include those over recording of transactions, authorization of transactions, and supervisory review of transactions.

**Timely payment.** State Fiscal Rule 2-2 requires transactions to be paid within 45 days of the receipt of products or services and the related receipt of an invoice or notice of payment due.

### **What problems did the audit work identify?**

We identified problems with nine (43 percent) of the 21 procurement card transactions we reviewed. For some transactions, we identified more than one problem. These problems, which resulted in \$9 in known questioned costs, are described as follows:

- **Purchases that were not allowed through procurement cards.** For three transactions totaling \$5,270, the purchases did not appear to be allowable purchases using a procurement card in accordance with the Department's Procurement Card Manual. Specifically, all three purchases were made for

bus passes for Program participants, yet transportation is not an allowable procurement card purchase per the Department's Procurement Card Manual.

- **Untimely payments.** For four transactions totaling \$5,302, the payments were not made timely within 45 days of the invoice date, in accordance with State Fiscal Rules. For one transaction, Program staff used a procurement card to pay a vendor on August 2, 2012, for medical records that were billed to the Division in April 2012, almost 4 months earlier and in a different state fiscal year, which is not allowable per fiscal rules. For the other three transactions, staff used a procurement card to pay an invoice between 2 and 4 months after the invoice date, but within the same fiscal year.
- **Purchases that may have been made by someone other than the cardholder.** For two transactions totaling \$1,481, the Division's supporting documentation did not indicate that the cardholder used the card to make the payment, which is required under the Department's Procurement Card Manual. For one of the transactions, the Division's documentation included a note stating that the payment was made via telephone and the note was signed by someone who was not the cardholder, indicating that someone else may have used the card for the payment.
- **Lack of support that purchases were reasonable and appropriate.** For two transactions totaling \$1,131, for the purchase of an iPad to conduct participant demonstrations in a field office and the payment of a wireless cell phone bill for a phone used for participant demonstrations, we could not determine if these transactions were reasonable or appropriate. According to the Department, Program supervisors approved the purchases but the Department could not provide documentation of the approvals.
- **Unallowable tax charges.** For two transactions totaling \$208, the payments included about \$9 in state taxes, which are not allowable charges per the Department's Procurement Card Manual because the State is a tax-exempt entity.

### Why did the problems occur?

We identified the following three key factors that have led to the problems we identified with procurement cards:

- **No Division processes to ensure staff compliance.** The Division has not established processes to ensure Program staff comply with state and

Department requirements for using procurement cards. Approving officials do not consistently ensure that procurement card purchases and payments comply with the Department's Procurement Card Manual and State Fiscal Rules, including the payment of balances within 45 days of invoice receipt, disallowance of state taxes on procurement card purchases, and evidence within supporting documentation to indicate that the cardholder made the purchase.

- **No approved waiver for transportation charges on procurement cards.** Department staff could not provide a copy of the approved waiver allowing participants' transportation charges on the procurement cards. Division staff stated that procurement cards are used for purchasing bus passes for participants because the vendor will not accept the Division's standard Service Authorization forms. However, the Department's Procurement Card Manual specifically states that transportation charges are not allowed to be made using procurement cards, but allows for a waiver from these requirements if approved by the Department's procurement staff. Department staff stated that the Division was approved for a waiver from this requirement but could not provide a copy of the waiver.
- **No controls over purchases for participant demonstrations.** The Division does not have policies or procedures to address the appropriateness, reasonableness, and necessity of the purchase of goods for participant demonstration purposes. Division staff reported that they purchase demonstration equipment in order to show participants various types of assistive technology, such as cell phones, computers, and cell phone applications that participants can utilize to meet their vocational goals. Further, according to Division staff, although Program regional supervisors are required to approve all equipment purchases for participant demonstration purposes, this approval is not required to be documented.

### **Why do these problems matter?**

When the Division does not comply with state and Department requirements for using procurement cards only for allowable purposes, accurately recording purchases in the correct fiscal year, and paying bills timely, it cannot ensure that federal and state funds are used efficiently and for the purposes intended. Further, without a clear policy or process for purchasing participant demonstration equipment, the Division cannot ensure that purchases are properly approved, the same equipment is not being purchased for multiple offices, and demonstration equipment is shared between offices, if necessary.

<sup>1</sup> Known questioned costs total \$9. The total known questioned costs identified through the audit are discussed in the table on page III - 118.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-66:**

The Department of Human Services (Department) should ensure that all Division of Vocational Rehabilitation Services' purchases made with procurement cards comply with State Fiscal Rules and Department requirements for procurement cards, including obtaining a waiver from Department requirements when applicable. In addition, the Department should establish and implement policies and processes for authorizing and purchasing participant demonstration equipment, such as cell phones and computers, and document supervisory approvals of equipment purchases.

#### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

The Division of Vocational Rehabilitation (Division) will establish policies and procedures for documenting supervisory approvals for equipment purchases, and authorizing and purchasing participant demonstration equipment. The Division will establish regular reviews of procurement card purchases to ensure compliance with State Fiscal Rules and Departmental requirements for procurement cards, including a waiver, if applicable. The Division will ensure that all procurement cardholders and their approving authorities receive additional procurement card training on the new requirements by March 2014.

---

### **Quality Assurance Monitoring**

The Division conducts monthly quality assurance (QA) reviews of the 29 Program field offices throughout the state. In December 2012, the Division completed its most recent annual QA review cycle in which it tested a sample of 615 case files statewide for participants who received services through the Program in Calendar Year 2012. The Division began a new QA review cycle in April 2013 due to changing its QA review cycle at that time to more closely align with the staff performance review cycle.

The purpose of the QA review is to ensure that field offices comply with federal regulations and Division policy. The QA reviews assess compliance and quality in several areas, including eligibility determinations, timely processing, required counselor and supervisor authorizations, acceptable case file documentation,

proper determinations of participant's severity of disability, adequate comprehensive assessments of the participant's skills and needs, procedures for closing a case, adequate counseling and guidance given to the participant, and counselor and supervisor decision making. Participant records include hardcopy files and electronic files maintained in the Division's AWARE case management system.

As part of their review, the Division's QA staff select a random sample of five participant records per counselor using a computer-generated selection process. The sampled case files are in various stages of completion, such as in-service, eligible, closed-other than successful, closed-successful, and in-employment within the current year. The QA teams that review the case files are comprised of the Division's QA staff, Program regional supervisors, field office supervisors, and field office lead counselors. According to staff we interviewed, the Division has communicated that it expects each regional supervisor, field office supervisor, and field office lead counselor to participate in at least one QA review during the year. Regional supervisors are invited to all QA reviews in their region, and field office supervisors and lead counselors participate in reviews that are not of their home field office. The teams make site visits to each field office and review each sampled case record using checklists as tools to guide them through the process. Upon completion of the on-site review, the QA team provides the results, which include an overall score for the field office and individual scores for each counselor, to the field office supervisor. Scores are based on the percentage of total correct answers to total questions on the review tool, as well as a summary detailing the strengths and concerns noted by the reviewer. The review team encourages supervisors to go through each sampled case file and the QA review results with the counselors to discuss the strengths and concerns identified by the review. The review team also provides a formal written report with the QA review results, including the problems identified and the scores of the field offices and counselors, to the counselor, field office supervisor, regional supervisor, and Program Deputy Director of Field Services within 2 weeks of the review.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to determine whether: (1) the QA reviews are conducted consistently in each of the 29 field offices on an annual basis, (2) the QA process assesses Program compliance with key federal and Division requirements related to eligibility determinations and case file documentation, and (3) the Division has sufficient corrective action processes to ensure field offices correct the deficiencies identified through the QA reviews.

As part of our audit, we reviewed the Program's QA review checklist tools, schedule of site visits for both review cycles, and documentation of results from the QA review performed in the month of April 2013 for two field offices judgmentally selected from 13 field offices included in our case file review. We

interviewed Division staff regarding their impression of the overall effectiveness of QA reviews. We also compared the results of the Division's QA review with the results of our single audit testwork of eligibility determinations in order to determine whether the QA review teams were identifying the same deficiencies.

### **How were the results of the audit work measured?**

The federal Rehabilitation Services Administration (RSA) Monitoring and Technical Assistance Guide for Federal Fiscal Year 2013 outlines the federal review process in place for monitoring state rehabilitation programs, which includes a requirement for states to prepare corrective action plans to address any findings identified through the monitoring process. The purpose of QA reviews and enforcement of corrective action plans in federal programs is to mitigate deficiencies over time. Based on the federal review process, a comprehensive state QA review should include a process for ensuring that the deficiencies identified as a result of the review are addressed and corrected. Other Department programs that perform QA reviews, including the Low-Income Energy Assistance Program (LEAP) and Temporary Assistance for Needy Families (TANF), customarily require management of each field office location to submit a corrective action plan to respond to QA findings. These programs' QA teams review and assess the corrective action plans to determine appropriateness of the plans and review the same locations in the next QA cycle to determine if the programs have improved their performance. These programs also incorporate the areas of deficiencies identified in the QA reviews into their annual statewide staff trainings.

### **What problems did the audit work identify?**

Based on our review of the Program's QA process, we found that after the QA team submits its findings to each field office, neither Division staff nor the QA team conducts follow-up procedures to determine whether the field offices have addressed and corrected the issues identified in the QA reviews. We found that the Division conducted QA reviews of 28 of its 29 field offices during Fiscal Years 2012 and 2013 to assess Program compliance with federal and Division requirements. The Division did not conduct a QA review of one field office, in Limon, because it was not staffed during the review period. According to Division staff, in some cases the QA results are included in the counselor performance reviews. However, field offices are not required to prepare and submit corrective action plans for the identified deficiencies.

The Division's QA reviews in Fiscal Year 2013 for the two field offices in our sample identified several types of deficiencies. For example:

- Insufficient case file documentation
- Lack of verification of presumptive eligibility for participants receiving Social Security benefits
- Incomplete assessments to determine participants' employment outcomes and service needs
- Failure to perform financial needs analyses
- Inadequate case monitoring

The deficiencies identified by the Division's QA review of these two field offices were consistent with the deficiencies we identified statewide in our case file review.

We also determined that, after completing each QA review, the Division does not have a process to compile the data results from the review to analyze trends in deficiencies statewide. Implementing such a process would allow the Division to identify overall areas for improvement and address these areas by developing and implementing additional guidance and staff training.

### **Why did the problems occur?**

The Division's QA staff does not have a mechanism in place to hold the field offices accountable for addressing and correcting deficiencies. Specifically, although Division management stated that the QA review team encourages Division management, regional supervisors, and field office supervisors to review the QA results with the field office counselors, and the field office supervisors we interviewed stated that they review the QA results, the Division has not established a written policy requiring management and staff to participate in QA reviews, field offices to develop corrective action plans, QA staff to follow-up to ensure the deficiencies are addressed, or supervisors to include QA problems identified in counselor performance reviews. Division management also has not established a policy or procedure requiring QA staff to compile and analyze trends in deficiencies statewide or annually report the results of the QA process to Department and Division management.

### **Why do these problems matter?**

Quality assurance reviews are a critical tool for identifying problems with federal and state compliance and quality of Program services. The Division's current process has identified deficiencies in case file documentation and participant monitoring; however, without a means for holding the field offices accountable

for correcting deficiencies identified in the QA reviews, deficiencies have continued to occur, and the overall quality of the Program could suffer as a result. In addition, by not compiling the results of the QA reviews, Department and Division management do not have a mechanism for identifying statewide trends and areas for training and policy clarification and revisions.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principle, Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-67:**

The Department of Human Services (Department) should improve the Vocational Rehabilitation Program's (Program) annual quality assurance (QA) review process by:

- a. Creating and implementing a policy requiring Division of Vocational Rehabilitation (Division) management and Program regional supervisors, field office supervisors, and field office counselors to review the deficiencies identified by the QA staff after each annual review is completed.
- b. Creating and implementing policies and procedures that require corrective action plans for cited deficiencies, a follow-up process for QA staff to ensure implementation of corrective action plans, and a process for including problems cited during the QA reviews in counselor performance reviews, as appropriate.
- c. Requiring QA staff to annually report the results of the corrective action plan process to Department and Division management.
- d. Implementing a process for the QA staff to verify that problems identified in QA reviews are addressed by annually following up on prior year deficiencies.
- e. Implementing a Division process to analyze trends in deficiencies statewide, at least annually, to identify overall areas for improvement, such as areas for additional staff training and guidance.

## Department of Human Services Response:

- a. Agree. Implementation date: July 2014.

The Department will work with the Division to improve its quality assurance monitoring processes to ensure compliance with regulations, rules, and policies. The Division will create a QA Procedure Manual that will describe the case file review process and will include a requirement that Program supervisors and vocational rehabilitation counselors review identified deficiencies after every QA review and, additionally, that Division management will review identified deficiencies after each annual review. The Division will continue to work with the Department's Office of Performance and Strategic Outcomes (OPSO) and C-Stat analyst to improve its quality assurance monitoring procedures and processes.

- b. Agree. Implementation date: October 2014.

The Department will work with the Division to incorporate policies and procedures into the QA Procedure Manual that will provide instructions for Division staff to complete actions required on cited deficiencies found during case file reviews, along with a follow-up process so that Division QA staff review and determine that errors have been corrected and the case files are in compliance with regulations, rules, and policies. The Division will craft measurable language to be used in counselor performance reviews regarding the results of the QA reviews. In addition, the Division will contact QA staff in other states' vocational rehabilitation programs for input and feedback regarding their policies and procedures for corrective action plans.

- c. Agree. Implementation date: January 2015.

The Division will annually report the results of the corrective action plans to Department and Division management. Once the QA Procedure Manual is created and implemented, the Division will gather this information and provide the first report after 1 year of case file reviews to begin this annual reporting cycle of corrective action plans.

- d. Agree. Implementation date: January 2015.

The Department will work with the Division to provide language in the QA Procedure Manual about the process to follow up on the prior year's identified deficiencies on an annual basis. The Division will

outreach to regional partners for input and feedback about effective processes to complete this follow up process. The Division will contact QA staff in other states' vocational rehabilitation programs for input and feedback regarding their policies, procedures, and practices to follow up on previously identified case file review deficiencies.

- e. Agree. Implementation date: January 2015.

The Department will work with the Division to implement a process to be incorporated into the QA Procedure Manual to analyze deficiency trends statewide on an annual basis. These trends will be used to determine areas noted as needing improvement, along with staff performance corrective actions, and used as part of the yearly training needs assessment.

---

## Complaint Management

Federal regulations for the Program specify that applicants or participants who are dissatisfied with a determination made by the State that affects the provision of services may appeal the determination through a hearing process or mediation. During our review, we found that Program staff provide each applicant for vocational rehabilitation services with a document outlining his or her rights to appeal and the appeals process. The Division reported that it received one request for an appeal in Fiscal Year 2013 and had one appeal request and one mediation in Fiscal Year 2012.

Federal regulations also allow states to develop an informal process for accepting and resolving complaints that are not filed as a formal appeal. Division staff reported that the Division has an informal process for handling complaints; the process involves resolving issues at the lowest possible level, such as at the field office staff level, because staff typically have more information than management about participant cases. Division staff stated that a participant who is unhappy with some aspect of Program services may contact his or her counselor to discuss the matter; contact the office supervisor, regional supervisor, Division management, or Department management to discuss the concern; or choose to begin the appeal process. According to Program counselors and supervisors we interviewed, complaints are typically first investigated and resolved by the applicant's or participant's counselor or the counselor's supervisor. Division staff reported that when they are contacted by a participant or staff regarding a complaint, they contact the appropriate regional supervisor and request that they follow-up to resolve the complaint.

The Governor's Office also has an Office of Constituent Services that receives complaints from the public about state services and programs and forwards the

complaints to the appropriate state agency for follow-up. Division staff reported to us that when the Governor's Office receives complaints regarding the Division or the Program, the complaints are forwarded to the Division. Division staff members log these complaints into a spreadsheet. In Fiscal Years 2012 and 2013, the Governor's Office forwarded a total of 37 complaints from applicants, participants, and participants' family members to the Division. The Division's complaint tracking spreadsheet includes fields to document the date it received the complaint, the complainant's name, the nature of the complaint, the complainant's counselor and the counselor's supervisor, the person the complaint was referred to for follow-up, and how the complaint was resolved. Complaints logged in the Division's spreadsheet included concerns such as allegations of insufficient communication by Program staff, untimely services, and dissatisfaction with the counselors or services provided.

### **What audit work was performed and what was the purpose?**

The purpose of the audit work was to evaluate the Division's practices for investigating, resolving, tracking, and analyzing complaints from Program applicants, participants, and others. We reviewed each of the 37 complaints that the Division received from the Governor's Office during Fiscal Years 2012 and 2013. We interviewed Division staff to understand the types of complaints they receive and their procedures for resolving and documenting complaints. We also analyzed Division documentation of training it provided its staff in Fiscal Year 2013 to determine how the Division trained staff on the complaint management processes.

### **How were the results of the audit work measured?**

We applied the following criteria when evaluating the Division's complaint management process:

**Complaint reporting.** Federal regulations [Review of determinations made by designated state unit personnel, 34 C.F.R., pt. 361.57(c)] allow states to develop an informal process for accepting and resolving complaints. Complaint management systems are meant to protect Program applicants' and participants' rights and to help ensure eligibility determinations are accurate and services are effective. Overall, as a best practice, Program applicants and participants should have an avenue to report problems to ensure the quality of the services they receive is not compromised.

**Complaint tracking, investigating, and resolution.** Other Department programs and facilities have found that centralized tracking and analysis of complaints helps identify potential problems with service provision and improve the overall quality of their programs. For example, the state Mental Health Institutes within the Department of Human Services have implemented a centralized complaint

tracking system, including time lines for resolving complaints such that urgent complaints involving injury or patient rights must be investigated and resolved within 48 hours. Less severe complaints, such as a complaint about the Department's no smoking policy or concerns that do not involve injury or patient rights, must be resolved within 30 days.

In general, effective complaint systems include the following components: (1) procedures for staff and complainants to report all complaints to a centralized location; (2) a written record or log of the complaint, including the date of the complaint, which is typically entered into an electronic complaint database; (3) categorization of the complaint according to its urgency, importance, or topic; (4) investigation and resolution of the complaint within established time frames to ensure prompt action is taken; (5) follow-up to ensure that the complaint resolution was implemented and the complainant was notified of the outcome; and (6) ongoing analysis of complaint data to identify underlying patterns or trends that need to be addressed or corrected.

### **What problems did the audit work identify?**

We found that, while the Division tracks complaints received through the Governor's Office, the Division does not have a process for tracking complaints received directly through the field offices or the Division. Further, some field office staff we interviewed stated that when they receive complaints, they typically investigate and resolve complaints themselves and do not report them to the Division.

In addition, for 32 (86 percent) of the 37 complaints the Division received from the Governor's Office during Fiscal Years 2012 and 2013, we identified one or more problems with the Division's log of and related processes for investigating and resolving the complaints. Specifically, we identified the following:

- **Documentation did not always include the nature or date of the complaint.** For nine complaints, Division staff either did not document the nature of the complaint or provided very limited documentation so the nature of the complaint was unclear. For example, for one complaint the only information that Division staff documented to explain the nature of the complaint was, "Received letter from [participant] in regards to the services he has been receiving;" in another example, the staff documented "[complainant] wishes to lodge a complaint against the Division. [Participant] requested a face to face meeting to voice complaint;" in a third example, staff documented "Dissatisfied with [Program] services. Requested a new counselor." In addition, for three complaints, there was no documentation of the date of the complaint so we could not determine when the complaint was reported to the Division.

- **No prioritization or categorization of complaints.** The Division did not document the significance or urgency of any of the complaints, nor did it categorize or organize the complaints, other than by the date they were received. As a result, we were unable to determine the importance of the complaints or whether any should have been prioritized. Further, there was no method, other than through a manual, labor-intensive process, to determine the main topics of the complaints or trends and patterns in problems reported.
- **Lack of evidence of an investigation or follow-up.** For six complaints, there was no documentation that staff in the field office or Division investigated the complaints; the section of the spreadsheet for staff to document the investigation or follow-up was blank.
- **Lack of documentation of the resolution or outcome.** For six complaints, the Division's spreadsheet contained no documentation as to how the complaint was resolved; specifically, the "resolution" field was blank. For an additional 22 complaints, there was no documentation that the resolution that had been identified by staff had occurred, and there was no documentation of the final outcome. For example, for 10 complaints where a participant complained about Program services or the Program staff, the only information recorded in the "resolution" section of the spreadsheet was "Referred to [another person]," and there was no documentation of whether the individual who received the referral followed up with the complainant or whether the complaint was resolved.
- **Lack of evidence that the participant was informed of resolution.** For 28 complaints, there was no evidence in the Division's spreadsheet that the complainant was notified of the resolution.
- **No evidence of analysis of complaint information to identify trends.** The Division staff reported that it currently has no process for analyzing trends or patterns in the types of complaints it receives, such as to identify problems within particular offices, with specific staff, or to identify systemic problems in the Program.

### **Why did the problems occur?**

The Division does not have a written complaint management policy or process. For example, we found the Division has not established policies or procedures that address any of the following:

- Field offices or Division staff reporting complaints to the Division or a central database

- Documenting complaints
- Prioritizing or ranking complaints to ensure the more urgent complaints are prioritized or a method for categorizing complaints by nature or topic
- Investigating complaints or required timeframes to ensure staff follow up on complaints in a timely manner
- Resolving complaints or a method for providing complaint resolutions to the applicant or participant in writing
- When a complaint is considered resolved, such as when a supervisor finds that staff have taken reasonable and sufficient action to address and document the complainant's concern and that the Division has sent written notification of the resolution to the complainant
- Analyzing complaints so Division management can determine patterns or trends in problems by office or statewide

In addition, the Division training documentation we reviewed contained no evidence of training for staff on how to investigate, resolve, and document complaints.

### **Why do these problems matter?**

Investigation of complaints by numerous staff in field offices with no formal complaint management processes, or requirements to report complaints to the Division, and insufficient complaint documentation, increase the risk of inconsistencies in complaint handling and the risk that complaints may not be sufficiently addressed. By not fully documenting the nature of complaints and the follow-up and investigation, or ensuring that resolutions are implemented, the Division cannot ensure that applicants' and participants' complaints are addressed. Additionally, by not analyzing complaints, the Division may not identify systemic issues, cannot use complaint information to assess deficient practices, and cannot evaluate the timeliness of the complaint handling process. Complaint analysis is needed to identify staff training needs or areas where policies should be clarified to address the problems and improve the quality and efficiency of services.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-68:**

The Department of Human Services should ensure the Division of Vocational Rehabilitation (Division) strengthens its management of complaints by:

- a. Establishing and implementing policies and procedures to ensure that all complaints are investigated and resolved in a timely manner. This should

include developing a written description of the process; a prioritization method with time lines for investigating and resolving complaints, such as a method based on the severity of the allegations; and a time line for sending the complainant written notification of the resolution.

- b. Establishing and implementing policies and procedures for documenting complaints in a centralized Division database and requiring that Division data sufficiently detail the nature, timing, investigation, and final resolution of each complaint in a consistent manner.
- c. Establishing and implementing policies and procedures for categorizing complaints, such as by topic, to facilitate meaningful analysis and analyzing the complaints logged in a centralized database at least annually to identify trends and taking appropriate action, such as through training or policy clarification, to address the problems.

### **Department of Human Services Response:**

- a. Agree. Implementation date: July 2014.

The Division will convene a workgroup comprised of Division staff and regional partners, to understand industry best practices to address the processes for receiving, investigating, and resolving complaints by participants, vendors, and other community partners. This workgroup will define policies and procedures to assess and prioritize complaints, including a time line for investigation, resolution, and notification to the complainant.

- b. Agree. Implementation date: July 2014.

The Division will expand upon the already established complaint tracking spreadsheet to develop a centralized tracking tool that sufficiently documents relevant details regarding complaints made by participants, vendors, and other community partners. Procedures will be implemented for the proper handling of all Division-related complaint communications, including the nature, timing, investigation, and final resolution of each complaint.

- c. Agree. Implementation date: October 2014.

The Division will establish procedures for reviewing and categorizing, on a periodic but at least annual basis, the nature of complaints documented in the established centralized tracking tool for purposes of analyzing trends that may indicate systemic opportunities for

improvement. This periodic analysis will result in the potential implementation of policy, process, communication or performance improvements, and/or staff training to address identified deficiencies in customer service or other service delivery processes.

---

## **Application Backups**

Division staff utilize AWARE to track participants' eligibility, maintain participants' individualized plans for employment, record authorized services, and perform other case management-related activities. The AWARE system is a configurable off-the-shelf system and is managed and hosted by Alliance Enterprises (Alliance) under contract with the Division. Program and Division staff access the system via a secure Web portal and can only do so from properly configured Division computers. Program information is stored on servers and databases managed by Alliance. Alliance developed the AWARE system specifically to meet federal requirements for Vocational Rehabilitation Program services and AWARE is used by 28 states, including Colorado. In Fiscal Year 2013, the Division's AWARE system processed about \$20.9 million in service payments for the Division.

### **What audit work was performed and what was the purpose?**

Our audit work was designed to determine if IT control activities related to AWARE, individually or in combination with others, were properly designed and functioning. We reviewed and tested the relevant general computer controls related to AWARE. General computer controls include controls related to user access management, system and data backups, logical security, interface management, and contract management of the vendor. Our test procedures included interviewing relevant staff at the Division and OIT, reviewing the Division's and OIT's policies and procedures for AWARE, and reviewing the Division's contract with Alliance. In addition, we tested system-generated reports and documentation samples pertaining to user access management, computer operations, such as backups and disaster recovery, and interface management.

### **How were the results of the audit work measured?**

We compared the Division's backup processes and recovery plans with requirements specified in State Information Security Policy P-CISP-004, federal regulations (Administrative Safeguards, 45 C.F.R., pt. 164.308) concerning data protected under the Health Insurance Portability and Accountability Act (HIPAA) as well as with industry standards and IT control frameworks, such as Information Systems Audit and Control Association's (ISACA) Control Objectives for Information and Related Technology (COBIT), standard DS4.9. Specifically, P-CISP-004 requires that system backups are sent off-site, so that a system can be

recovered in the event of a data center disaster. Additionally, P-CISP-004 requires that disaster recovery plans be tested on a regular basis. In terms of HIPAA compliance, federal regulations require organizations to implement policies and procedures to “prevent, detect, contain, and correct security violations.” Industry standards, such as those promoted by ISACA, strongly encourage organizations to send backups of business-critical applications to offsite storage. Industry standards, such as COBIT’s DS4.9, encourage organizations to test their system recovery plans on a regular basis, usually annually. Finally, P-CISP-011 requires that backups be encrypted when those system backups are managed by vendors performing services for an agency.

### **What problems did the audit work identify?**

We compared the Division’s AWARE system with the standards outlined in the aforementioned areas and found places where the Division could improve its backup and disaster recovery processes. We identified three issues with backups and disaster recovery processes of the AWARE system. First, the AWARE backups are not sent off-site. Instead, the backups are created and stored in the same physical data center as the production system. Although the AWARE backups are stored on a separate physical machine from that of the production system, if a disaster were to occur within the data center, the AWARE production system and its backups could be destroyed and rendered non-recoverable. Second, the AWARE backups are not encrypted. Under HIPAA regulations, if HIPAA data are lost, misplaced, stolen, or otherwise compromised, an organization is required to notify all persons affected by the breach. However, if the lost or stolen data are encrypted, organizations do not have to notify affected persons. Therefore, it is beneficial to encrypt backup data, because data are often transported either electronically or via physical backup tapes from secure data centers to secure storage facilities. Third, we found that, although the Division has an approved system recovery plan, the plan has not been tested on a regular basis. The last time the plan was tested and approved was in September 2011.

### **Why did the problems occur?**

While the Division and OIT included provisions for backup and recovery procedures within the contract with Alliance, the two agencies did not consider all aspects of a successful and industry-compliant backup plan or the specific security requirements outlined in applicable State Information Security Policies.

### **Why do these problems matter?**

Following industry best practices and State Information Security Policies helps to ensure that critical systems, such as AWARE, are recoverable in the event of a disaster and provides an additional layer of security in the event that AWARE data are accessed or taken by unauthorized individuals. While the likelihood of a

data center disaster or the theft of AWARE data is unlikely, the chance still exists. If data were stolen, the required notifications to individuals affected by the stolen data would be costly and embarrassing for the Department. Further, if a disaster were to occur, it would prevent the Division from effectively managing the Program, which includes serving more than 19,000 individuals, tracking payments to vendors, and performing other related program activities. Additionally, the Division and its contractor report that data backups could be securely stored off-site for approximately \$10,800 a year. When weighing the criticality of the system with the total funding the Division received for the Program, which was about \$53.5 million in Fiscal Year 2013, the value of protecting the data and improving disaster recovery capabilities seems to outweigh the additional cost to the Division. Finally, the regular testing of the system recovery plan helps to ensure that the system can be quickly and correctly reconstituted in the event of a disaster. Testing the plan on a regular basis, such as annually, helps both the Division and the Division's vendor (Alliance) identify areas where the recovery plan can be updated to meet current system configurations and also develop unaddressed areas.

(CFDA No. 84.126; Rehabilitation Services Vocational Rehabilitation Grants to States; Activities Allowed or Unallowed, Allowable Costs/Cost Principle, Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-69:**

The Department of Human Services should improve backup and recovery processes for the Accessible Web-Based Activity and Reporting Environment (AWARE) system by:

- a. Working with the vendor to encrypt backup files and send them to a secure off-site location that is not in the same physical location as the production system.
- b. Testing the system recovery plan on an annual basis and making updates to the plan as necessary.

### **Department of Human Services Response:**

Agree. Implementation date: October 2014.

- a. The Division of Vocational Rehabilitation (Division) will work with the vendor for the AWARE case management system to develop and implement a plan outlining the fiscal and human resources required to encrypt backup files and send them to a secure off-site location that is not in the same physical location as the production system.

- b. The Division will work with the vendor for the AWARE system to complete testing on the system recovery plan on an annual basis, and to make updates to the recovery plan as necessary.

---

During Fiscal Year 2013, the Office of the State Auditor conducted audit work that resulted in findings and recommendations addressed separately and jointly to the Department of Human Services and the Department of Health Care Policy and Financing and the for the *Regional Centers for People with Developmental Disabilities* (November 2013) performance audit. The findings and recommendations made separately to the Department of Human Services and recommendations made jointly to the two departments are presented below.

## **Regional Centers for People with Developmental Disabilities**

The Colorado Department of Human Services (Department) operates three regional centers, located in Wheat Ridge, Pueblo, and Grand Junction, that house and provide medical care, behavioral services, and supports for daily living to Medicaid-eligible adults with severe intellectual and developmental disabilities. Statute [Section 27-10.5-102(11)(a), C.R.S.] defines a developmental disability as “a disability that is manifested before the person reaches 22 years of age, that constitutes a substantial disability to the affected individual and that is attributable to mental retardation or related [neurological conditions].”

At a minimum, all three regional centers provide residential, behavioral, and nursing services 24 hours a day, 7 days a week, but the regional centers also operate under two different types of Medicaid licenses that affect the way services are provided and funded. The two types of licenses and the regional centers operating under each are described as follows.

### **Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) License at the Wheat Ridge and Grand Junction Regional Centers.**

The regional centers that operate under an ICF/IID license are open to all Medicaid-eligible clients under the Medicaid State Plan who meet the admissions criteria. According to federal regulations (Definitions Relating to Institutional Status, 42 C.F.R., pt. 435.1010) the ICF/IID facilities (1) are primarily for the diagnosis, treatment, or rehabilitation of individuals with intellectual and developmental disabilities; and (2) provide a protected residential setting, ongoing evaluation, planning, 24-hour supervision, coordination, and integration of health or rehabilitative services to help each individual function at his or her greatest ability. The Wheat Ridge and Grand Junction Regional Centers operate ICF/IID-

licensed homes and dormitories that provide a range of services to meet the needs of clients. In addition, both regional centers provide a secure physical environment in ICF/IID facilities for clients in the intensive treatment program who have exhibited problematic sexual or violent behaviors. Regional center employees provide most of the services the Wheat Ridge and Grand Junction ICF/IID facilities offer, and the centers contract with private practitioners for certain specialty treatments, such as neurology and psychiatry.

**Community Residential Home License for HCBS-DD waiver-funded homes at the Grand Junction and Pueblo Regional Centers.** The regional center group homes that operate under a community residential home license are funded by the HCBS-DD waiver and may only serve individuals who meet eligibility criteria for the HCBS-DD waiver program. This license is designed for group homes that serve four to eight residents and provide appropriate living arrangements, supports for caring for clients' daily needs, and opportunities for community interaction and inclusion. Waiver-funded homes at the Grand Junction and Pueblo Regional Centers provide many of the same services, such as 24-hour care, that are provided in ICF/IID facilities. However, unlike ICF/IID facilities, the waiver-funded homes are not authorized to provide medical care directly to residents and must help the residents obtain all medical services from private practitioners.

Within the Department of Human Services, the following two divisions oversee operations at the State's three regional centers.

**The Division for Regional Center Operations (Division)** is responsible for general administrative oversight of all three regional centers. Division-level staff comprise five individuals who create and implement policies, administer budgets, coordinate referrals and placements of clients, and oversee general business operations.

**The Division for Developmental Disabilities (DDD)** oversees the HCBS waiver programs for people with developmental disabilities. DDD was administratively within the Department at the time of our audit, but with the enactment of House Bill 13-1314, DDD will be transferred to the Department of Health Care Policy and Financing (HCPF) by March 2014. DDD works closely with the Division to ensure compliance with applicable regulations at the regional centers' waiver-funded group homes that are licensed under the community residential home license. In addition, DDD contracts with and oversees the community-centered boards (CCBs), which are responsible for performing case management and other assessment functions for waiver clients, including those residing in the regional centers. Finally, while final approval for reimbursement rates rests with HCPF, DDD establishes the reimbursement rates for HCBS-DD providers, including for services provided by the regional centers to waiver clients.

DDD contracts with 20 CCBs located throughout the state to provide case management and ensure delivery of services to a specified number of people for

each waiver program who live within defined geographic areas. The CCBs are independent corporations authorized by statute to serve as the “single point of entry” for people with developmental disabilities who are in need of either residential or supported living services. As the single entry point, CCBs assess individuals’ needs, assist with determining eligibility for various programs, develop individual service plans, and ensure individuals receive appropriate services, either by providing the services themselves or contracting for the services with a private service agency.

In addition to the Department of Human Services, the Colorado Department of Human Services (HCPF) also has a role in regional center oversight. As the State’s Medicaid agency, HCPF is recognized by the federal Centers for Medicare and Medicaid Services (CMS), and is ultimately responsible for overseeing the delivery of services and supports to persons with intellectual and developmental disabilities under Medicaid. HCPF is also responsible for approving the reimbursement rates for HCBS-DD service providers, including the state-owned regional centers, that are set by DDD. For day-to-day administration of the regional centers, HCPF delegates authority to the Department through an interagency agreement.

## **Reimbursement Rates for ICF/IID Facilities**

The regional centers receive most of their funding from Medicaid through fee-for-service reimbursements. The regional centers receive reimbursements from HCPF, which administers the State’s Medicaid program, differently depending on whether the services were provided by the regional centers’ HCBS-DD waiver-funded group homes or by ICF/IID-licensed facilities. Services provided under the HCBS-DD waiver are reimbursed based on per-unit rates for each type of service provided. All services provided by ICF/IID-licensed facilities are reimbursed using a flat daily rate, which statute says should cover the actual cost of the services provided by these facilities [Section 25.5-6-204(1)(b), C.R.S.]. Clients also contribute a portion of their personal income, if they have any, to cover the cost of care.

HCPF reimburses the regional centers on a monthly basis for services provided in ICF/IID-licensed facilities using *prospective* daily rates that are requested by the Department. Typically, the prospective rate that is effective for a regional center at the beginning of the fiscal year is the same rate that was in effect during the prior fiscal year. As the fiscal year progresses, the Department typically requests that HCPF update the prospective rate. The Department reported that it considers average daily costs from the prior fiscal year, anticipated programmatic changes, and legislative changes when making these rate-change requests. For example, for Fiscal Year 2013 the prospective rates for both Grand Junction and Wheat Ridge were initially set in March 2012 and then changed twice during the fiscal year,

first in October 2012 and again in April 2013. After HCPF approves the Department's rate-change request, HCPF adjusts all the reimbursements that were made during the current fiscal year to reflect the new rate.

Once the fiscal year comes to a close and the actual regional center costs are tabulated, a final *retrospective* rate is determined. HCPF contracts with an accounting firm annually to calculate the actual average daily cost for serving clients under the ICF/IID license at the Wheat Ridge and Grand Junction Regional Centers for the purpose of identifying the retrospective reimbursement rate that should be applied to cover actual costs. The accounting firm calculates this average daily cost using Medicaid cost reports that the regional centers submit to HCPF following the close of the fiscal year. Once the accounting firm performs its calculation, the Department reviews the calculation and submits a rate-change request to HCPF for an adjustment to the reimbursements that occurred during the prior fiscal year.

### **What audit work was performed and what was the purpose?**

The purpose of our analysis was to determine whether the reimbursement rates that the Department requested from HCPF for its two ICF/IID-licensed regional centers, Grand Junction and Wheat Ridge, were sufficient to cover the actual costs of operating those regional centers.

We compared the total revenue that Grand Junction and Wheat Ridge received during Fiscal Years 2008 through 2012 for their ICF/IID facilities to the total costs these regional centers reported to HCPF on Medicaid cost reports for the same years to determine how closely the Medicaid reimbursement rates produced revenue to cover actual costs at the regional centers. We also reviewed the final retrospective reimbursement rates that HCPF applied to Grand Junction and Wheat Ridge's billings for Fiscal Years 2003 through 2012 to determine whether they were the same as the rates that HCPF's contracted accounting firm calculated on the basis of the regional centers' Medicaid cost reports. We interviewed Department staff and reviewed Department documents to ascertain the methods the Department used to calculate both retrospective and prospective reimbursement rates that it requested from HCPF for reimbursements made in Fiscal Years 2010 through 2012. We also interviewed HCPF management to determine its processes for reviewing and approving the rate requests that the Department submits.

### **How were the results of the audit work measured?**

We measured the results of our audit work against the following criteria:

**Statute requires that Medicaid reimbursements to the regional centers licensed as ICF/IIDs be based on actual costs.** Section 25.5-6-204(1)(b), C.R.S.,

states that “State-operated [ICF/IIDs] shall be reimbursed based on the actual costs of administration, property, including capital-related assets, and room and board, and the actual costs of providing health care services....” The statute goes on to state that “such costs shall be projected by such facilities and submitted to [HCPF] by July 1 of each year for the ensuing 12-month period. Reimbursement to State-operated [ICF/IIDs] shall be adjusted retrospectively at the close of each 12-month period.”

**HCPF rules specify the retrospective rate must be based on Medicaid-allowable costs and the total resident days.** HCPF rules (10 C.C.R. 2505-10, 8.443.16) echo the statutory language that the reimbursements will be based on the actual costs of administration, property, including capital-related assets, and room and board, and the actual costs of providing health care services. The rules go on to state that “actual costs will be determined on the basis of information on the [Medicaid cost report] and information obtained by [HCPF] or its designee for the purpose of cost auditing.... The retrospective per diem rate will be calculated as total allowable costs divided by total resident days.”

Because statute requires the regional centers to be reimbursed based on actual costs for ICF/IID services, we expect the Department to calculate prospective rates and prospective rate changes based on current, comprehensive information about actual costs. Similarly, we expect the Department to request and HCPF to approve retrospective rates that closely align with the actual average daily cost per client calculated by the contracted accounting firm, because the contractor’s rates are supposed to be calculated on the basis of the regional centers’ actual costs, in accordance with state statute and rule. We would also expect that, once HCPF pays the regional centers the retrospective reimbursements, the total revenue that the regional centers receive would roughly equal their total expenses.

### **What problem did the audit work identify?**

We found the ICF/IID-licensed regional centers were not fully reimbursed for their actual costs in some years between Fiscal Years 2010 and 2012. Specifically, Grand Junction was not reimbursed for its actual ICF/IID costs for Fiscal Years 2011 and 2012, and Wheat Ridge was not reimbursed for its actual costs in Fiscal Year 2010. The following table compares the total revenue that the two ICF/IID-licensed regional centers received from Medicaid and clients in Fiscal Years 2008 through 2012 to the actual costs that the regional centers reported to HCPF.

<b>Total Revenues Compared to Medicaid-Reimbursable Expenses (In Millions) For the Grand Junction and Wheat Ridge ICF/IID-Licensed Regional Centers Fiscal Years 2008 Through 2012</b>					
<b>Grand Junction ICF/IID</b>					
	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Revenue Received During the Fiscal Year <sup>1</sup>	\$15.52	\$16.27	\$13.95	\$8.81	\$9.57
Medicaid-Allowable Expenses	15.73	16.18	15.02	12.71	12.33 <sup>2</sup>
Difference Between Revenue and Expenses	-0.21	0.09	-1.07	-3.90	-2.76
Retrospective Adjustment Applied in the Following Fiscal Year	0.24	-0.07	0.84	2.03	1.50
<b>Final Revenue Surplus (+) / Shortfall (-)</b>	<b>\$0.03</b>	<b>\$0.02</b>	<b>-\$0.23</b>	<b>-\$1.87</b>	<b>-\$1.26</b>
Final Revenue Surplus or Shortfall as a Percentage of Expenses	0%	0%	-2%	-15%	-10%
<b>Wheat Ridge ICF/IID</b>					
	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Revenue Received During the Fiscal Year <sup>1</sup>	\$5.22	\$5.11	\$13.01	\$28.40	\$27.18
Medicaid-Allowable Expenses	5.46	6.56	14.82	26.48	26.93 <sup>3</sup>
Difference Between Revenue and Expenses	-0.24	-1.45	-1.81	1.92	0.25
Retrospective Adjustment Applied in the Following Fiscal Year	0.13	1.32	0	-1.58	0.17
<b>Final Revenue Surplus (+) / Shortfall (-)</b>	<b>-\$0.11</b>	<b>-\$0.13</b>	<b>-\$1.81</b>	<b>\$0.34</b>	<b>\$0.42</b>
Final Revenue Surplus or Shortfall as a Percentage of Expenses	-2%	-2%	-12%	1%	2%
<b>Source:</b> Office of the State Auditor's analysis of Colorado Financial Reporting System (COFRS) data and Medicaid cost reports for the regional centers.					
<sup>1</sup> Includes Medicaid reimbursements and client cash received during the fiscal year.					
<sup>2</sup> Includes \$587,135 for the Fiscal Year 2012 Provider Fee that Grand Junction paid in Fiscal Year 2013.					
<sup>3</sup> Includes \$1,279,475 for the Fiscal Year 2012 Provider Fee that Wheat Ridge paid in Fiscal Year 2013.					

As shown in the table above (blue highlight), during Fiscal Year 2011, Grand Junction received about \$3.9 million less than it needed to cover actual Medicaid-reimbursable costs for its ICF/IID-licensed facilities. More importantly, after receiving a \$2.03 million retrospective adjustment in the next fiscal year, Grand Junction's total revenues for Fiscal Year 2011 services were still short of actual costs by about \$1.87 million (yellow highlight), or 15 percent. Similarly, during Fiscal Year 2012, Grand Junction received about \$2.76 million less than it needed to cover actual costs. Then, after receiving a \$1.5 million retrospective adjustment in the following fiscal year, Grand Junction's total revenues for Fiscal Year 2012 services were still short of actual costs by about \$1.26 million, or 10 percent. Further, the Wheat Ridge regional center received less revenue during Fiscal Year 2010 than actual Medicaid-reimbursable costs by about \$1.81 million, or 12 percent. Wheat Ridge did not receive a retrospective adjustment in Fiscal Year 2011 to cover this shortfall.

Historically, the Department has used revenue surpluses at one regional center to cover deficits at another, because the appropriation for the regional centers in the annual appropriations bill, or Long Bill, was not broken out by each regional center. For example, in Fiscal Year 2012, Pueblo had a revenue surplus of more than \$2 million, which helped cover Grand Junction's deficit.

### **Why did the problem occur?**

Medicaid did not reimburse Grand Junction's ICF/IID-licensed facilities for actual Medicaid-reimbursable costs in Fiscal Years 2011 and 2012 or Wheat Ridge for its actual costs in Fiscal Year 2010 because the revised prospective reimbursement rates and the retrospective reimbursement rates requested by the Department and approved by HCPF were not determined based on current, accurate, actual cost information as discussed below.

### **Revised Prospective Rates Not Based on Accurate Projections of Current-Year Costs**

We examined the revised prospective rates that HCPF applied for Wheat Ridge in Fiscal Year 2010 and for Grand Junction in Fiscal Years 2011 and 2012 and found that they were not based on accurate projections of current-year costs. In each of these years, HCPF changed the prospective rates after receiving reports of the regional centers' average daily costs per client for the prior fiscal year from its contracted accounting firm. Two of the rate changes were made following requests from the Department, and all three were made between January and May when the Department had access to actual cost data for at least the first 6 months of the fiscal year. However, we identified the following problems with the rate changes:

- **Inaccurate projection of current-year costs.** Wheat Ridge's final prospective rate in Fiscal Year 2010 was based on an inaccurate projection of current-year costs. On May 25, 2010, the Department requested a revised prospective daily reimbursement rate of \$618 for Wheat Ridge based on projected Medicaid-reimbursable costs for the year of about \$11,434,000 and 18,500 total resident days. The Department could not provide us with documentation showing how the total reimbursable costs were calculated or what the actual costs were at the time it requested this revised rate. However, Wheat Ridge's actual costs for Fiscal Year 2010, as reported in its Medicaid cost report following the fiscal year end, were about \$14,818,000, or about 30 percent more than the Department had projected, and its total resident days were 21,066, or about 14 percent more than the Department had projected.

- **No projection of current-year costs.** Grand Junction's final prospective rate in Fiscal Year 2011 was not based on a projection or analysis of current-year costs but rather was a simple continuation of the retrospective rate for the prior year. After receiving a report of Grand Junction's average daily cost per client for Fiscal Year 2010 from its contracted accounting firm in January 2011, HCPF applied the same rate of \$639.95 both retrospectively for Fiscal Year 2010 and prospectively for Fiscal Year 2011. The Department did not request any adjustments to the prospective rate to ensure that it was sufficient to cover current-year costs. By simply carrying forward the prior retrospective rate, the Department missed an opportunity to adjust the prospective rate to reflect recent changes to Grand Junction's operations. For example, in April 2010, Grand Junction closed a skilled nursing facility unit, which reduced its total ICF/IID capacity by 32 beds. This change was not reflected in the revised prospective rate that HCPF applied for Fiscal Year 2011.
- **Aggregating costs for all regional centers in the current-year projection.** Grand Junction's final prospective rate in Fiscal Year 2012 was based not on a projection of Grand Junction's costs, but rather on a projection of costs and revenue for all three regional centers combined. On March 23, 2012, the Department requested that HCPF apply a revised prospective rate of \$685.50 for Grand Junction for Fiscal Year 2012. Department documents we reviewed showed that this rate was calculated using a method designed to ensure that the aggregated revenue received by all three regional centers during Fiscal Year 2012—inclusive of HCBS-DD waiver revenue—would approximately equal their combined projected costs. While this method attempted to balance overall revenues to costs for the three regional centers, it did not ensure that each *individual* regional center would be reimbursed for its actual costs.

### **Retrospective Rates Not Based on Actual Costs**

If the regional centers receive insufficient revenue throughout the fiscal year to cover actual costs, then statute requires HCPF to apply a retrospective adjustment in the following fiscal year to close the gap. This process involves reversing each of the reimbursement claims that were paid to the regional centers and paying them again at the new retrospective rate. The following table compares the final retrospective ICF/IID reimbursement rates that HCPF applied, at the Department's request, for Grand Junction and Wheat Ridge for Fiscal Years 2008 through 2012 with the actual daily per-client costs calculated by the accounting firm.

<b>Average Daily Costs per ICF/IID Regional Center Client Compared to Final Retrospective Medicaid Reimbursement Rates Fiscal Years 2008 Through 2012</b>					
<b>Grand Junction ICF/IID</b>					
	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Final Retrospective Reimbursement Rate Applied in Subsequent Fiscal Year	\$606.12	\$603.48	\$639.95	\$787.27	\$792.81
Average Daily Cost per Client Calculated by Accounting Firm	606.12	603.48	639.95	920.96	836.91
<b>Difference</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	<b>-\$133.69</b>	<b>-\$44.10</b>
<b>Wheat Ridge ICF/IID</b>					
	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>
Final Retrospective Reimbursement Rate Applied in Subsequent Fiscal Year	\$512.74	\$642.67	\$640.00	\$603.51	\$606.13
Average Daily Cost per Client Calculated by Accounting Firm	512.74	642.67	703.41	603.52	572.37
<b>Difference</b>	<b>\$0</b>	<b>\$0</b>	<b>-\$63.41</b>	<b>-\$0.01</b>	<b>\$33.76</b>
<b>Source:</b> Office of the State Auditor's analysis of documents and data provided by the Department of Health Care Policy and Financing.					

As shown in the table above (yellow highlights), for Grand Junction, the Department requested and received retrospective reimbursement rates for Fiscal Years 2011 and 2012 that were lower than the cost-based rates calculated by the contracted accounting firm. For Wheat Ridge, the Department requested and received a rate for Fiscal Year 2010 that was similarly lower than the rate calculated by the contracted accounting firm. These are the same years for which we found that the respective regional centers did not receive sufficient revenue to cover their actual costs. Additionally, as shown in the blue-highlighted box, for Fiscal Year 2012, the Department requested and received a rate for Wheat Ridge that was higher than the accounting firm's cost-based rate. The Department reports that it requested this higher rate for Wheat Ridge to cover a provider fee for Fiscal Year 2012 that was not included in the accounting firm's calculation because it was not paid until the following fiscal year.

The table above also shows significant fluctuations in the per-client cost of care at each regional center that are due, in part, to operational and licensing changes. For example, a partial reason Grand Junction's per-client costs in Fiscal Year 2011 increased compared with the prior year is that the number of clients residing at Grand Junction decreased more rapidly than overall costs when Grand Junction closed its skilled nursing facility unit in April 2010. Also, Wheat Ridge's per-client costs changed significantly between Fiscal Years 2009 and 2010 partly because it converted 10 of its 14 waiver-funded homes to ICF/IID facilities during

Fiscal Year 2010; the remaining four homes were converted on the first day of Fiscal Year 2011.

We identified two main reasons for the Department not requesting retrospective reimbursement rates to match regional center costs. First, the Department was pursuing the following priorities in its rate requests that conflicted with the purpose of covering costs:

- **Help HCPF avoid overspending its regional center appropriation.** In May 2011, the Department requested a low retrospective reimbursement rate of \$640 for Wheat Ridge for Fiscal Year 2010 to protect HCPF against overspending its regional center appropriation for Fiscal Year 2011. According to the Department, it did not believe it needed the additional revenue from such an adjustment during the then-current fiscal year to pay current-year expenses, and so it requested a lower retrospective reimbursement rate for Wheat Ridge. However, it is not clear that HCPF would have overspent its appropriation, since HCPF ultimately reverted more than \$741,000 that was budgeted for the regional centers in Fiscal Year 2011.
- **Keep reimbursement rates low.** Grand Junction's daily cost per client of \$920.96 for Fiscal Year 2011 represented an increase of about 44 percent over the prior year. Rather than requesting the full Medicaid reimbursement rate it needed to cover Grand Junction's costs for that year, the Department limited the retrospective rate it requested for Grand Junction to \$787.27, or an increase of 23 percent over the prior year rather than the 44 percent increase it needed to cover costs. The Department calculated this new rate by determining the amount of increase that could be offset by a corresponding reduction in Wheat Ridge's rate, which occurred because Wheat Ridge's daily cost per client had declined between Fiscal Years 2010 and 2011. We recognize that the Department has an interest in keeping the daily costs of care to a minimum. However, artificially capping the retrospective rate so that it does not cover the prior year's actual costs will not result in a lowering of costs—either for the prior year or for the current year.
- **Avoid major shifts in annual revenue totals.** In April 2013, the Department requested that HCPF apply a retrospective reimbursement rate of \$792.81 for Grand Junction for Fiscal Year 2012. Department staff reported that this rate was calculated to ensure that Grand Junction would receive about the same amount of revenue during the then-current fiscal year as it received during the prior year, inclusive of retrospective rate adjustments. However, our analysis shows that prior-year revenue is not an accurate benchmark of actual costs in either the prior year or the current year.

Second, we found errors in the Department's calculations for the retrospective rates it requested in April 2013 for Fiscal Year 2012. Specifically, during Fiscal Year 2013, the Department determined that it would need to request higher retrospective rates for Fiscal Year 2012 reimbursements to secure enough revenue to cover a reinstated provider fee that the regional centers would have to pay HCPF. This provider fee had been suspended during Fiscal Year 2012. Department staff reported that they calculated the retrospective rates for both Wheat Ridge and Grand Junction for Fiscal Year 2012 so as to provide additional revenue in Fiscal Year 2013 to cover the \$3.7 million in provider fees that the Department needed to pay to HCPF. However, we found no indication that the Department included the provider fee in the rate it requested for Grand Junction. For Wheat Ridge's Fiscal Year 2012 rate, we found the Department included the provider fee but did not calculate the amount it needed to cover the provider fee on the basis of the number of resident days it reported for Fiscal Year 2012. As a result, we estimated that the reimbursement rate the Department requested was about \$0.60 per client per day more than what was needed to cover the amount that HCPF charged for Wheat Ridge's provider fee for Fiscal Year 2012 and therefore generated about \$27,000 more revenue than was needed to pay the provider fee.

In addition to the problems related to the Department's rate requests, we found a problem in the data the regional centers reported in their Medicaid cost reports, which HCPF's contracted accounting firm relies on to calculate the average daily costs per client for the ICF/IID facilities. According to Department staff, the rate that HCPF's contracted accounting firm calculated to reflect Wheat Ridge's average daily cost per client for Fiscal Year 2012 was incorrect because Wheat Ridge had reported extra days on its Medicaid cost report that are not reimbursable by Medicaid, such as time that clients were in the hospital, in jail, or on extended leave with family. The Department corrected for this error when it calculated the retrospective rate for Fiscal Year 2012 that it requested in April 2013, but it did not revise Wheat Ridge's Medicaid cost report to show the correct number of resident days. We reviewed Wheat Ridge's policy on management and reporting of census and statistical information and found that it does not clarify which days should be reported on the Medicaid cost reports.

In general, the concerns we identified in the Department's reimbursement rate calculations indicate a need for the Department to develop a process, which currently does not exist, for secondary review of the method and calculations used to ensure mathematical accuracy and appropriateness.

Finally, while the Department is ultimately responsible for ensuring the soundness of its rate requests, HCPF also bears responsibility for ensuring that rate requests are fully justified because statute requires HCPF to reimburse the regional centers for actual costs. If the Department requests reimbursement rates that conflict with the average daily costs calculated by HCPF's contracted accounting firm, then

HCPF has a responsibility to ensure that the Department applied a sound methodology and calculated its requested rates correctly. HCPF staff reported that, due to its limited resources, HCPF relied on the Department to exercise due diligence in ensuring that the regional centers' costs were fully reimbursed by Medicaid and did not evaluate the Department's methodology in calculating reimbursement rates for the regional centers.

### **Why does this problem matter?**

When the Medicaid reimbursement rates for the two ICF/IID-licensed regional centers are not sufficient to cover the costs of operating those centers, it matters for the following reasons:

- **Unsustainable balancing of revenues.** Currently, the regional centers, taken together, are solvent because revenue shortfalls at one regional center tend to be offset by surpluses at another. For example, for Fiscal Years 2011 and 2012, Pueblo's revenue surpluses helped offset Grand Junction's revenue shortfalls. However, starting in Fiscal Year 2014, the General Assembly has begun breaking out the regional centers' appropriations into separate line items in the Long Bill, which will reduce the Department's flexibility in managing reimbursement rates that do not align with costs. The new budget format allows the Department to transfer no more than 5 percent of the regional centers' total funding among the regional centers without seeking a supplemental appropriation.
- **State General Fund may cover Medicaid-allowable expenses.** By requesting retrospective reimbursement rates that are lower than the actual daily cost per client, the Department risks incurring costs that should be funded by Medicaid but that are not. It is important to ensure that all Medicaid-allowable expenses are being covered by Medicaid dollars, which carry a 50 percent federal match to the State's contribution. For example, if Pueblo had not had a budget surplus in Fiscal Year 2012, then the Department might have needed to use 100 percent State General Fund dollars to cover Grand Junction's \$1.26 million deficit for its Fiscal Year 2012 ICF/IID services.
- **Lack of transparency.** It is important for decision makers and taxpayers to have access to the true cost of services. In response to recent requests for information from the JBC regarding regional center costs, the Department has reported reimbursement rates as reflective of daily costs per client. However, our analysis shows that the reimbursement rates are not reflective of actual daily costs per client.

(CFDA No. 93.778; Medical Assistance Program; Activities Allowed or Unallowed, Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

(See Recommendation No. 2013-29 to the Department of Health Care Policy and Financing on page III-48.)

---

### **Recommendation No. 2013-70:**

The Department of Human Services should ensure that each regional center facility that is licensed as an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) is fully reimbursed by Medicaid for actual costs by:

- a. Using the most current information available to make cost projections for the regional centers and calculating revised prospective Medicaid reimbursement rates for the ICF/IID-licensed facilities.
- b. Requesting retrospective adjustments to prior-year reimbursements using rates that are based on the regional centers' actual costs from the prior year as reflected in Medicaid cost reports.
- c. Implementing a mechanism for staff other than those who perform the rate calculations to conduct comprehensive reviews of the methods and calculations for all proposed Medicaid reimbursement rate requests.

### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

- a. The Department agrees with the need to use the most current information for cost projections and calculating revised prospective Medicaid rates. The Department will use the reports to work with the Department of Health Care Policy and Financing (HCPF) to create a prospective Medicaid reimbursement rate for the ICF/IID facilities.
- b. The Department agrees that it will request retrospective adjustments based on the cost reports and request revised prospective reimbursement rates from HCPF.
- c. The Department agrees with the need to utilize outside expertise in conducting a comprehensive review of the reimbursement rate process. The Department will contract with an independent third party to create the annual Medicaid cost reports for consistency across the Office of Long Term Care. The reports will be reviewed

by Accounting Division staff before being sent to HCPF for rate setting.

### **Recommendation No. 2013-71:**

The Department of Human Services should ensure that the regional centers' Medicaid cost reports accurately report the number of resident days by updating its policies on managing census information to clarify which days should be reported on the cost reports and updating its procedures accordingly.

### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

The Department agrees with the need to ensure that the regional centers' Medicaid cost reports accurately report the number of resident days. The Department will update its policies and procedures for managing census information.

---

## **Waiver Reimbursement Rates**

The Department's Division for Developmental Disabilities (DDD) administers the HCBS-DD waiver program for both private providers and the regional centers. As of the end of our audit in November 2013, DDD is within the Department of Human Services. However, with the enactment of House Bill 13-1314, DDD staff and operations will be transferred to HCPF by March 2014. One of DDD's responsibilities is to set reimbursement rates for service providers with the approval of HCPF. The reimbursement rates establish the amount an HCBS-DD waiver service provider will be reimbursed based on the number of service units for a set of approved services provided to clients. To receive reimbursement, HCBS-DD service providers submit claims to HCPF monthly through a Web portal.

The Pueblo and Grand Junction Regional Centers operate waiver-funded homes that provide HCBS-DD services. The regional centers are reimbursed for providing services to their clients enrolled in the HCBS-DD program using three methods: (1) for residential services, or services provided at the regional center facility where the client resides, reimbursement is based on a daily per-client rate; (2) for day programming, transportation to and from day programming, and behavioral services, reimbursement is based on a per-unit-of-service rate; and (3) for specialized medical equipment, dental services, and vision services, reimbursement is provided for the actual cost of the service.

The Department creates annual cost reports on the Pueblo and Grand Junction Regional Centers that include the annual client census and the related expenses for each type of HCBS-DD service. These cost reports are broken out into the services shown in the following table, which includes the reimbursement rates for each approved HCBS-DD waiver service that the regional centers provide.

Regional Center HCBS-DD Waiver-Funded Services and Reimbursement Rates Fiscal Year 2012		
Service Type	Service Examples	Reimbursement Rate <sup>1</sup>
Residential Services	<ul style="list-style-type: none"> <li>Independent living skills and cognitive skills training, such as finance management</li> <li>Behavioral or therapeutic treatment</li> <li>Daily health care monitoring</li> <li>Emergency response</li> <li>Community integration activities</li> <li>Continual supervision</li> </ul>	\$385.53 per day
Day Programming	<ul style="list-style-type: none"> <li>Activities in a nonresidential setting and in the community</li> </ul>	\$8.78 per 15 minutes
Non-Medical Transportation	<ul style="list-style-type: none"> <li>Transportation to and from day programming activities</li> </ul>	\$5.34 per trip for up to 10 average daily miles; \$11.19 per trip for 11 to 20 miles; and \$17.04 per trip for 21 or more miles
Behavioral Services	<ul style="list-style-type: none"> <li>Consultation</li> <li>Plan assessment</li> <li>Individual and group counseling</li> <li>Direct implementation of support plan</li> </ul>	Ranging from \$6.12 per 15 minutes for line staff to \$29.34 per 15 minutes for lead staff
Specialized Medical Equipment and Supplies	<ul style="list-style-type: none"> <li>Devices that enable client to perform daily living and community activities</li> <li>Ancillary medical or supportive equipment not supplied under the Medicaid State Plan</li> </ul>	Actual costs
Dental Services	<ul style="list-style-type: none"> <li>Preventative care visits</li> <li>Dental implants</li> </ul>	Actual costs
Vision Services	<ul style="list-style-type: none"> <li>Eye exams</li> <li>Contacts or eye glasses</li> </ul>	Actual costs
<p><b>Source:</b> Office of the State Auditor’s analysis of the Department’s schedule of approved HCBS-DD waiver services and rates.  <sup>1</sup> All HCBS-DD services are limited for each client by a maximum number of annual units or a maximum annual monetary amount.</p>		

**What audit work was performed and what was the purpose?**

The purpose of the audit work was to determine if the Medicaid reimbursements that the Pueblo and Grand Junction Regional Centers receive are in line with the actual costs of services at the regional centers. We reviewed the Fiscal Year 2012

waiver cost reports for the Pueblo and Grand Junction Regional Centers and compared the total waiver costs for those regional centers to their total Medicaid reimbursements for waiver services. We used information from the Department's cost reports for Fiscal Year 2012 to analyze whether the reimbursement rates for residential and day programming services aligned with the regional centers' costs to provide the services. We reviewed residential and day programming services because these services are utilized consistently by all regional center clients and make up the majority of waiver costs, representing about 94 percent of the total costs for the regional centers' HCBS-DD services in Fiscal Year 2012. We also interviewed Department and HCPF staff regarding how the regional center residential and day programming reimbursement rates were calculated in 2006 and 2009.

### **How were the results of the audit work measured?**

We used the following criteria to evaluate the audit results:

- **Reimbursement payments should not exceed the reasonable costs of providing services.** The HCBS-DD waiver states that the State will assure CMS that the aggregate amount of payments for regional center services, meaning the total amount of Medicaid reimbursement payments made to the Pueblo and Grand Junction Regional Centers for HCBS-DD services, does not exceed reasonable costs of providing waiver services at those regional centers. In order to ensure that reimbursement payments do not exceed costs, the Department needs a method to compare regional center costs to reimbursements and determine that the regional center costs are reasonable. If the aggregate amount of Medicaid reimbursements to the regional centers for HCBS-DD services exceeds the cost of those services, the Department must have a process to recover these payments and return the federal funds to CMS.
- **Rates should recognize reasonable and necessary provider costs.** The State reported to CMS that the methodology for setting reimbursement rates for HCBS-DD services is intended to recognize reasonable and necessary provider costs for meeting the clients' service needs. In addition, in documents the Department provided to the JBC in Fiscal Year 2013, the Department reported that it attempted to set the current regional center reimbursement rates for HCBS-DD services based on the costs to serve clients at the regional centers.

### **What problem did the audit work identify?**

Overall, we found that the HCBS-DD waiver reimbursement rates do not clearly comply with federal guidance for administering the HCBS-DD waiver for the Pueblo and Grand Junction Regional Centers. First, we found that the combined

regional center reimbursements for Fiscal Year 2012 exceeded costs, which does not appear consistent with language in the waiver that the State should ensure that aggregated Medicaid payments for the regional centers' HCBS-DD waiver services do not exceed reasonable costs of those services. As the following table shows, the total amount of Medicaid reimbursements paid to the two regional centers exceeded their costs by about \$1.3 million, or 6 percent. The \$1.3 million in excess payments are questioned costs.

<b>Medicaid Costs Compared to Medicaid Revenue for Services Provided by the Pueblo and Grand Junction Regional Centers to Clients Residing in HCBS-DD Waiver-Funded Group Homes Fiscal Year 2012</b>	
Medicaid Reimbursements	\$24,839,055
Aggregate Regional Center Costs for Waiver-Funded Services	\$23,537,203
Excess of Reimbursements Over Costs	\$1,301,852
<b>Source:</b> Office of the State Auditor's analysis of Department cost reports and revenue recorded in the Colorado Financial Reporting System (COFRS).	

In the HCBS-DD waiver, the State reported to CMS that the regional center reimbursement rates were based on a determination that the costs were reasonable and that the reimbursements did not exceed costs. However, the Department was unable to provide us with any analysis or documentation showing that the costs were reasonable or to support how it ensured that the reimbursements did not exceed the costs.

Second, the regional center reimbursement rates do not reflect the costs of the regional centers to meet the clients' various service needs as intended according to the HCBS-DD waiver. For example, the daily reimbursement rate for HCBS-DD residential services for the Pueblo and Grand Junction regional centers is \$385.53. However, we found that for Fiscal Year 2012, the average daily cost to provide HCBS-DD residential services to clients in these two regional centers was \$360.78 at Pueblo and \$423.89 at Grand Junction.

### **Why did the problem occur?**

To determine why the aggregate Medicaid reimbursements to regional centers exceeded their costs to serve clients in Fiscal Year 2012, we asked the Department for information on how the residential rates were originally established in 2006 and how the current rates were set in 2009. The Department could not provide us documentation showing how the residential reimbursement rates were set for the regional centers, and staff told us they did not know how those rates were established. The Department provided documentation showing that the day programming rate was originally established in 2006 based on an

analysis of all HCBS-DD private provider costs, but the rate-setting method did not include the costs of the regional centers. The Department stated that the day programming rate should reflect the cost to provide day programming services to clients with the most severe service needs, but we found that the current rate does not do so. Further, the Department does not have a method to determine if reimbursements for residential and day programming services are reasonable compared with regional center costs.

Because the Department’s documentation did not show whether the regional centers’ costs were considered when setting residential and day programming rates, we compared the reimbursement rates to the average costs per day for residential services and per unit for day programming services to assess whether the rates appeared to have been set based on actual costs. First, we found that the Department treats the State as one provider for purposes of setting Medicaid reimbursement rates and, therefore, Medicaid reimburses both regional centers using the same rate. Second, we found that the costs of services varied between the Pueblo and Grand Junction Regional Centers for Fiscal Year 2012. As a result, each time Pueblo claimed a unit of day programming or a day of residential services, it was reimbursed an amount higher than its costs to provide the services. Conversely, each time Grand Junction claimed a unit of day programming or a day of residential services, it was reimbursed an amount less than its cost to provide the services. The following table shows these differences.

<b>Comparison of the Regional Centers’ HCBS-DD Waiver Reimbursement Rates and Service Costs for Residential and Day Programming Services Fiscal Year 2012</b>		
	<b>Grand Junction</b>	<b>Pueblo</b>
Residential Services Daily Reimbursement Rate	\$385.53	\$385.53
Residential Services Average Daily Cost per Client	\$423.89	\$360.78
<b>Difference</b>	<b>-\$38.36</b>	<b>\$24.75</b>
Day Programming Per-Unit Reimbursement Rate <sup>1</sup>	\$8.78	\$8.78
Day Programming Average Cost per Service Unit	\$9.96	\$4.31
<b>Difference</b>	<b>-\$1.18</b>	<b>\$4.47</b>
<b>Source:</b> Office of the State Auditor’s analysis of regional center cost reports.		
<sup>1</sup> One day programming service unit equals 15 minutes of service.		

As the table above shows, the rates for these two services resulted in more reimbursement to the Pueblo Regional Center than it needed to cover its actual costs and less reimbursement to the Grand Junction Regional Center than it needed to cover its actual costs. Overall, we found that the regional centers were reimbursed about \$900,000 more than costs for residential services and about \$1.2 million more than costs for day programming services. Setting different

waiver reimbursement rates for each of the two regional centers could help ensure the Medicaid reimbursements for these services more accurately reflect individual regional center costs. However, HCPF would need to evaluate the feasibility of establishing different reimbursement rates for each of the regional centers and ensure that the rates reimburse for reasonable costs. According to the CMS technical guide for the HCBS-DD waiver, CMS does not require the same rate for all state and local providers. CMS allows the operating agency to determine the reimbursement rates for state and local entities, and these rates can differ from the reimbursement rates for private providers as long as the rates are based on a determination of reasonable provider costs or the agency has a mechanism to identify and recoup excess payments. The Department's cost reports show that the total Medicaid reimbursements for HCBS-DD waiver services at the regional centers exceeded the costs for those services at the regional centers. Department analysis of these cost reports could be useful in establishing waiver reimbursement rates that more accurately reflect costs.

### **Why does this problem matter?**

The State cannot assure CMS that it determined that regional center costs are reasonable, which is a compliance requirement for the HCBS-DD waiver. It is not clear whether the Department can assure CMS that it is meeting all the requirements for reimbursing public providers, which creates a risk of the State's noncompliance with the waiver. Specifically, the Department and HCPF cannot assure CMS that reimbursements to regional centers do not exceed the regional centers' costs and could be cited for deficiencies by CMS in a federal audit. As stated, in Fiscal Year 2012, the total combined HCBS-DD reimbursements that the two regional centers received exceeded their combined costs to provide these services by \$1,301,852, which appears to have violated the terms of the HCBS-DD waiver and are questioned costs. According to HCPF, if the reimbursed amount exceeds what is allowed in the HCBS-DD waiver, the Department would have to report the overpayment to CMS.

Although Grand Junction was not fully reimbursed for actual costs during Fiscal Year 2012, the Department was able to use excess revenue from Pueblo to cover the shortfall at Grand Junction. Historically, the Department has had flexibility to use revenue surpluses at one regional center to cover deficits at another, since the appropriation for the regional centers in the annual appropriations bill was not broken out by each regional center. However, beginning in Fiscal Year 2014, the Department has less flexibility to balance regional center budgets by using the revenue surpluses at one regional center to cover deficits at another. This is because the JBC has requested separate line items in the Department's budget for each regional center beginning in Fiscal Year 2014. This new budget format does not allow the Department to transfer more than 5 percent of regional center funding among regional centers without a supplemental appropriation.

(CFDA No. 93.778; Medical Assistance Program; Allowable Costs/Cost Principles. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-72:**

The Department of Human Services and the Department of Health Care Policy and Financing should work together to ensure that the reimbursements the Grand Junction and Pueblo Regional Centers receive under the Home and Community-Based Services for Persons with Developmental Disabilities (HCBS-DD) waiver program more closely align with costs by:

- a. Revising the rate-setting method for the regional centers' HCBS-DD waiver-funded services. The revision process should include evaluating the feasibility of establishing separate rates for each of the two regional centers and other options for setting the reimbursement rates, as appropriate.
- b. Implementing procedures to compare, at least annually, the regional centers' reported costs to their HCBS-DD waiver reimbursements to ensure that the reimbursements continue to align with costs and the costs are reasonable.

### **Department of Human Services Response:**

Agree. Implementation date: June 2014.

- a. The Department will work with the Department of Health Care Policy and Financing (HCPF) to revise the rate-setting method for the regional centers' HCBS-DD waiver-funded services. The Department will work with HCPF to evaluate options for setting the reimbursement rates, including evaluating the feasibility of establishing separate rates for the regional centers.
- b. The Department will work with HCPF to develop and implement a procedure to compare regional center costs to waiver reimbursements.

### **Department of Health Care Policy and Financing Response:**

Agree. Implementation date: June 2014.

- a. The Department of Health Care Policy and Financing (HCPF) agrees based upon the Office of the State Auditor's analysis that the

reimbursement methodology should be reviewed and revised. HCPF will work with the Department of Human Services to evaluate options for setting the reimbursement rates, including evaluating the feasibility of separate rates for the regional centers.

- b. HCPF agrees to work with the Department of Human Services to implement a review and approval process to compare at least annually the regional centers' reported costs to their HCBS-DD waiver reimbursements to ensure that the costs are reasonable and the reimbursements continue to align with reasonable costs.

---

## Provider Service Fee Payments

Statute [Section 25.5-6-204(1)(c), C.R.S.] authorizes HCPF, as the administrator of Medicaid in Colorado, to assess and collect an annual provider service fee (provider fee) from both privately owned and State-operated ICF/IID facilities “for the purposes of maintaining the quality and continuity of services.” As operators of ICF/IID-licensed Medicaid facilities, both the Wheat Ridge and Grand Junction Regional Centers are required to pay this provider fee. The State receives a 50 percent federal Medicaid match on the provider fee revenue that HCPF collects. According to statute, the total amount HCPF can collect through the provider fee may not exceed 5 percent of the total aggregated costs incurred during the same fiscal year by all the facilities that pay the fee.

In Fiscal Year 2012, the collection of the ICF/IID provider fee was temporarily suspended due to concerns over whether the State was assessing the fee uniformly for all facilities, as required by federal regulations. Specifically, the provider fee had not been assessed for the one private provider in the state that is licensed as an ICF/IID. In addition, HCPF determined that fees had been collected from the regional centers in Fiscal Year 2010 in excess of 6 percent of their revenues, which is a limit imposed by federal regulations. In consultation with CMS, HCPF developed a corrective action plan that involved returning all excess fees that were collected between Fiscal Years 2004 and 2011 and changing the fee assessment process to ensure that all ICF/IID providers are assessed the fee using the same method. During the 2013 Legislative Session, the General Assembly implemented these changes by passing Senate Bill 13-167, which also appropriated funds for Fiscal Years 2013 and 2014 for the Wheat Ridge and Grand Junction Regional Centers to pay the provider fee. Because the provider fee had been suspended during Fiscal Year 2012, the regional centers' appropriation for Fiscal Year 2013 was increased to allow them to pay HCPF the fee for 2012 retrospectively during Fiscal Year 2013.

For its first collection of the ICF/IID provider fee under the new legislation for both Fiscal Years 2012 and 2013, HCPF developed a per-client daily fee rate, which it applied to all ICF/IID-licensed facilities on the basis of the total resident days each had reported for Fiscal Year 2011. HCPF calculated this per-client daily fee rate in such a way that, once applied to all the facilities, the total fees collected per annum would be about 5 percent of the facilities' aggregated total costs, which is the maximum amount statute allows HCPF to collect.

### **What audit work was performed and what was the purpose?**

The purpose of our audit work was to determine whether the Department paid the correct Medicaid provider fee amounts for each ICF/IID-licensed regional center for Fiscal Years 2012 and 2013. We compared records on COFRS for both the Department and HCPF that showed the ICF/IID provider fees that the Wheat Ridge and Grand Junction Regional Centers paid in Fiscal Year 2013 to documentation showing the provider fee amounts that HCPF had billed each regional center. We reviewed documentation of communications between HCPF and the Department regarding the provider fee amounts that each regional center was required to pay and interviewed Department and HCPF management and staff about how the fee amounts were calculated and paid.

### **How were the results of the audit work measured?**

**Uniform fee collection method.** As a condition for approving the State's plan to re-implement the provider fee during Fiscal Year 2013, CMS required that the fee collection be "broad-based and uniform" in accordance with federal regulations. According to federal regulations (Permissible Health Care-Related Taxes, 42 C.F.R., pt. 433.68), a state may collect a "health care-related tax," such as a provider fee, without incurring a reduction in federal Medicaid matching funds if the taxes are "broad-based" and "uniformly imposed throughout a jurisdiction." This regulation further specifies that a "broad-based" tax is one that is "imposed on at least all health care items or services in the class [e.g., all ICF/IID services] or providers of such items or services [e.g., all ICF/IID providers] furnished by all non-Federal, non-public providers in the State, and is imposed uniformly..." Federal regulations recognize several ways in which a health care-related tax, such as a provider fee, may be imposed uniformly. For example, one way is for the tax to be imposed "on the basis of the number of beds (licensed or otherwise) of the provider [such that] the amount of the tax is the same for each bed of each provider" [42 C.F.R., pt. 433.68(d)(1)(ii)].

As the State's Medicaid agency, HCPF is responsible for ensuring that the processes for assessing and collecting the Medicaid provider fee are uniform, in compliance with federal regulations and CMS requirements. Thus, once HCPF determines the provider fee amounts that each regional center should pay, the Department should pay the amounts charged by HCPF.

**Method for disputing fees charged or billing.** State Fiscal Rules outline procedures for state agencies to follow when disputing a fee or charge billed by another state agency. Specifically, Rule 2-6 states that the agency disputing the charge shall notify the agency providing the goods or services and attempt to resolve the dispute; the chief executive officers of these agencies shall assist in the resolution, if necessary; and if the agencies are unable to reach a resolution, then the agency disputing the charge shall petition the State Controller to resolve the dispute.

**What problem did the audit work identify?**

We found that the Department did not pay the exact Medicaid provider fee amounts that HCPF billed the Wheat Ridge and Grand Junction Regional Centers for Fiscal Years 2012 and 2013 and, therefore, HCPF’s provider fee collections did not comply with federal regulations. The following table shows the provider fee amounts that HCPF billed each regional center and the private ICF/IID provider compared with the fee amounts that each actually paid.

<b>Provider Fee Billed Amounts Compared with Fee Payments for The Regional Centers’ ICF/IID Facilities and the Private ICF/IID Provider Fiscal Years 2012 and 2013<sup>1</sup></b>			
	<b>Grand Junction (ICF/IID)</b>	<b>Wheat Ridge (ICF/IID)</b>	<b>Private Provider (ICF/IID)</b>
Provider Fee Rate that HCPF Applied	\$32.37/day	\$32.37/day	\$32.37/day
Resident Days Reported by the Facility for Fiscal Year 2011	13,801	43,880	7,073
Provider Fee Amount that HCPF Billed for Fiscal Years 2012 and 2013	\$893,476	\$2,840,792	\$457,906
Provider Fee Amount Actually Paid by the Facility for Fiscal Years 2012 and 2013	\$1,007,357	\$2,726,908	\$457,906
Difference	\$113,881	-\$113,884	\$0
<b>Average Provider Fee Rate Based on the Amount Paid</b>	<b>\$36.50/day</b>	<b>\$31.07/day</b>	<b>\$32.37/day</b>
<b>Source:</b> Office of the State Auditor’s analysis of data from the Colorado Financial Reporting System (COFRS) and documents provided by the Department and HCPF.			
<sup>1</sup> During Fiscal Year 2013, HCPF assessed 2 years of provider fees for the ICF/IID-licensed facilities to cover Fiscal Years 2012 and 2013.			

As shown in the table above, although the Department paid almost exactly the total amount in provider fees that HCPF billed for Wheat Ridge and Grand Junction, combined, for Fiscal Years 2012 and 2013, the provider fee amounts that the Department paid for each of the two regional centers individually differed from the amounts HCPF billed. Conversely, we found that the private provider

that is required to pay the ICF/IID provider fee paid the exact amount that HCPF billed for Fiscal Years 2012 and 2013. Therefore, the fees that HCPF collected from the private provider were based on that provider's bed utilization for Fiscal Year 2011, whereas the provider fees that HCPF collected from each regional center were not. In other words, the ICF/IID provider fees for Fiscal Years 2012 and 2013 were not applied uniformly as required by federal regulations.

### **Why did the problem occur?**

Overall, we found that the Department paid different amounts than what HCPF billed for the ICF/IID provider fee because it did not agree with HCPF's method for calculating the fee amounts. Rather than following the process outlined in State Fiscal Rules for disputing payments between state agencies, the Department applied alternative methods that it believed HCPF should have used. Department staff disagreed with HCPF's method of applying a per-client daily rate to the number of resident days that each public and private ICF/IID-licensed facility reported for Fiscal Year 2011. Therefore, shortly before the close of Fiscal Year 2013, when the Department paid HCPF the provider fees for the Wheat Ridge and Grand Junction regional centers, the Department paid amounts that equaled about 5 percent of each regional center's total costs for Fiscal Year 2012 because Department staff believed the provider fee should be calculated based on a flat percentage of each facility's Medicaid-reimbursable costs, and statute allows HCPF to collect up to 5 percent of all the providers' aggregated costs. Further, for the Fiscal Year 2013 provider fees, the Department applied an additional method because the fiscal year had not yet closed and the Department did not know the final total costs for each regional center. Specifically, for the Fiscal Year 2013 provider fees, the Department paid amounts for each regional center based on the number of resident days each facility had reported so far that year. HCPF management reported to us that federal regulations prevent it from assessing the provider fee according to the methods the Department used.

Senior Department managers reported that they approved the plan to pay the provider fee amounts differently than what was billed because, in the aggregate, the total amount that was ultimately paid was the same as what HCPF billed. From an accounting perspective, the total provider fees paid by the Department for the two regional centers essentially equaled the total amount in fees that HCPF assessed for the two centers for Fiscal Years 2012 and 2013. However, the Department's fee payments per facility did not follow a uniform assessment method, so the State cannot demonstrate compliance with federal Medicaid regulations.

In addition, according to Department documentation, the Department notified HCPF staff about its plan to use an alternative method to pay the provider fee for the regional centers. HCPF staff reported to us that they were not aware of the discrepancy in the provider fee payments until our audit. HCPF's regular process for reconciling its fee billings and collections had not identified that the

Department had paid incorrect provider fee amounts for each regional center because HCPF's reconciliations checked whether the total in fees paid by the Department (both regional centers combined) matched the total billed.

### **Why does this problem matter?**

The ICF/IID provider fee allowed the State to access about \$2.1 million in federal Medicaid matching funds in Fiscal Year 2013 that would not have been available without the fee. According to HCPF management, by applying an alternative method to its payments, which caused HCPF's fee collection in Fiscal Year 2013 to be non-uniform and, therefore, noncompliant with federal regulations, the Department may have jeopardized these federal matching funds. Specifically, CMS could require HCPF to pay back the federal matching funds that the State received as a result of the provider fee. Also, if the Department continues to apply alternative methods in its payments of the ICF/IID provider fees for Wheat Ridge and Grand Junction, future federal matching funds could be at risk.

(CFDA No. 93.778; Medical Assistance Program; Cash Management. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-73:**

The Department of Human Services should pay the Intermediate Care Facility for Individuals with Intellectual Disabilities provider service fees for each regional center as assessed by the Department of Health Care Policy and Financing and adjust its accounting records, as appropriate, to correct the incorrect provider service fee payments for Fiscal Years 2012 and 2013.

### **Department of Human Services Response:**

Agree. Implementation date: July 2014.

In September 2013, the Department of Human Services (Department) made accounting adjustments to ensure that the provider service fees paid for State Fiscal Years 2012 and 2013 are now accurate and reflective of appropriate accounting regulations. Going forward, the Department agrees that it will pay the Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) provider service fees for each regional center based on the amounts assessed by the Department of Health Care Policy and Financing on an annual basis.

---

**Department of Human Services****Prior Recommendation  
Significant Deficiency not  
Remediated by the Department  
As of June 30, 2013**

The following recommendation relating to a deficiency in internal control classified as a significant deficiency was communicated to the Department in the previous year and has not been remediated as of June 30, 2013, because the implementation date is in a subsequent fiscal year. This recommendation can be found in the original report and Section IV. Prior Recommendations of this report.

# Department of Labor and Employment

---

The Department of Labor and Employment (Department) is responsible for providing services to employers and job seekers, and enforcing laws concerning labor standards, unemployment insurance, workers' compensation, public safety, and consumer protection. Please refer to the introduction in the Department of Labor and Employment chapter in Section II. Financial Statement Findings of this report.

The results of our Fiscal Year 2013 audit did not identify errors which would result in recommendations to the Department. However, the following recommendation relating to a deficiency in internal control classified as a significant deficiency was communicated to the Department in the previous year and has not been remediated as of June 30, 2013, because the implementation dates are in a subsequent fiscal year. This recommendation can be found in the original report and Section IV. Prior Recommendations of this report.

<b>Current Rec. No.</b>	<b>Prior Single Audit Report and Rec. No.</b>	<b>Recommendation/ Classification</b>	<b>Implementation Date Provided by the Department</b>

# Department of Local Affairs

---

The Department of Local Affairs (Department or DOLA) is responsible for building community and local government capacity by providing training, and technical and financial assistance to localities. The Department is comprised of the following divisions: Executive Director's Office, Board of Assessment Appeals, Division of Housing, Division of Local Government, and Division of Property Taxation. Key responsibilities of the Department include:

- Administering state and federal low-income housing programs.
- Assisting local government in emergency preparedness and response, providing technical assistance and information to local governments on available federal and state programs, and acting as a liaison with other state agencies concerned with local governments.
- Supervising property tax collection and ensuring that property assessment and valuation procedures are consistent throughout the State.

During Fiscal Year 2013, the Department spent approximately \$79 million in federal funds. As part of our Fiscal Year 2013 audit, we tested the Department's compliance with federal grant requirements for the following program:

- Section 8 Housing Choice Vouchers

In Fiscal Year 2013, the Department's expenditures for this program was approximately \$41.0 million. The Department is responsible for ensuring that all expenditures for these programs are appropriate and that the State complies with the associated federal program requirements.

Our Fiscal Year 2013 audit identified a material instance of noncompliance for the Section 8 Housing Choice Vouchers program. The internal control and compliance matters identified, and audit recommendations for this program, are described in the following sections of this chapter.

The following comments were prepared by the public accounting firm of BKD, LLP, which performed Fiscal Year 2013 audit work at the Department of Local Affairs.

## Section 8 Housing Choice Vouchers

DOLA, in its capacity as a Public Housing Agency (PHA), receives federal funding from the U.S. Department of Housing and Urban Development (HUD)

for the Section 8 Housing Choice Voucher Program (Section 8). A PHA is an organization created by a government that administers HUD's Low-Income Public Housing and other HUD programs. The Section 8 program was established to assist very low-income families, the elderly, and the disabled in affording decent, safe, and sanitary housing in the private market. In Fiscal Year 2013, the Department incurred nearly \$41 million in expenditures for the Section 8 program.

Prior to Fiscal Year 2012, responsibility for administering the State's Section 8 program was split between the Department of Human Services (DHS) and DOLA. Effective at the beginning of Fiscal Year 2012, on July 1, 2011, DHS' Section 8 program was transferred to DOLA. The transfer was made primarily to gain efficiencies by maintaining the programs under one department. Financial activities for DHS's Section 8 program were tracked separately by DOLA during Fiscal Year 2012, and consolidated with DOLA's Section 8 activities within one fund for reporting purposes beginning with Fiscal Year 2013.

### **What was the purpose of the audit work?**

The purpose of the audit work was to review the Department's compliance with Section 8's reporting and special testing requirements.

### **What audit work was performed and how were results measured?**

The audit work consisted of inquiries of the Department and review of HUD's status report of financial reports submitted by the Department to determine compliance with the following requirements:

**Financial Reporting Requirement: Financial Reports (OMB No. 2535-0107) - Financial Assessment Sub-system, FASS-PH.** The Uniform Financial Reporting Standards (24 CFR section 5.801) require PHAs to submit timely Generally Accepted Accounting Principles based, or GAAP based, unaudited and audited financial information electronically to HUD. The FASS-PH system is one of HUD's main monitoring and oversight systems for Section 8. Per the Uniform Financial Reporting Standards (24 CFR section 5.801), unaudited financial statements are required to be submitted 60 days after the PHA's fiscal year end, and audited financial statements are required to be submitted no later than nine months after the PHA's fiscal year end.

**Special Test and Provision Requirement: Rolling Forward Equity Balances.** PHAs are required to maintain complete and accurate accounting records. In addition, PHAs are required to properly account for program activity. Proper accounting requires that (1) account balances are properly maintained, (2) records and accounting transactions support a proper roll-forward of equity, and (3) errors

are corrected and detected. Specifically, DOLA must ensure that the beginning equity accounts agree to the prior year ending equity amounts, and that the accumulation of accounting transactions, i.e. net income, are posted to the correct equity accounts as described below. Several federal HUD Office of the Inspector General (OIG) audit reports have noted that PHAs have not been accounting and reporting Housing Assistance Payments (HAP) and Administrative Fee equity accounts properly. This has resulted in several PHAs not being funded correctly and has resulted in OIG findings against HUD and PHAs. If audit testing, account analysis, or third-party (e.g., HUD) information provides evidence that the current HAP and Administrative Fee equity is not correctly stated, the PHA is required to correct the account balance.

### **What problem did the audit work identify?**

DOLA submitted timely, unaudited financial statements for the Section 8 program for both Fiscal Year 2012 and Fiscal Year 2013. However, as of the end of our Fiscal Year 2013 audit testwork, in November 2013, DOLA had not submitted audited financial statements for Fiscal Year 2012, 10 months after the audited information was due. We also found that, while the Department submitted its Fiscal Year 2011 audited financial statements as required, the submission was rejected due to an incorrect HUD line number and missing attachments. As of the end of our Fiscal Year 2013 testwork, DOLA had not corrected or resubmitted the Fiscal Year 2011 information. As a result of lacking audited financial statements for those fiscal years, DOLA has not been able to ensure that equity accounts are complete and accurate, as required.

### **Why did the problem occur?**

DOLA reports that it is working with DHS to correct and file the Fiscal Year 2011 submissions before proceeding with the subsequent filings. DOLA reports that it has experienced significant turnover within the accounting and finance staff which has not allowed sufficient capacity to address both the issues associated with the rejected submission, and the assistance required to be provided to DHS with the transfer of their program to DOLA. DOLA also reported that the transfer of the DHS program to DOLA significantly increased the complexity of the reporting to the extent that HUD reassigned DOLA's reporting to the HUD national headquarters. This resulted in the need to establish new lines of communication to address the reporting issues.

### **Why does this problem matter?**

HUD relies on the financial information required to be submitted in order to allocate funding and make programmatic decisions. Without timely and accurate financial information funding, such decisions could be delayed or inappropriate.

(CFDA No. 14.871; Section 8 Housing Choice Vouchers; Reporting. Classification of Finding: Material Weakness.)

---

### **Recommendation No. 2013-76:**

The Department of Local Affairs (DOLA) should ensure that it complies with federal Housing and Urban Development Section 8 Housing Choice Voucher Program reporting, and special testing requirements, by filing accurate reports in a timely manner, and completing timely roll forwards of equity. This should include submitting the corrected Fiscal Year 2011 and final Fiscal Years 2012 and 2013 audited financial statement submissions as soon as possible.

### **Department of Local Affairs Response:**

Agree. Implementation date: February 15, 2014.

DOLA agrees with the recommendation and plans to resubmit audited financial statements for Fiscal Year 2011 and submit audited financial statements for Fiscal Year 2012 by February 15, 2014. To help ensure future reports are timely, DOLA has enhanced its reporting mechanism to make report preparation less manual and easier to cross walk to HUD's accounting requirements. In addition, DOLA has recently filled all vacant positions. Once personnel are fully trained, DOLA should have sufficient coverage to prepare, review, and submit the reports.

---

---

# Department of Public Health and Environment

---

The Department of Public Health and Environment (Department) is responsible for protecting and improving the health of the people of Colorado, and protecting the quality of Colorado's environment.

During Fiscal Year 2013 the Department spent approximately \$291.3 million in federal funds, including approximately \$1.5 million in American Recovery and Reinvestment Act funds.

As part of our Fiscal Year 2013 audit, we tested the Department's compliance with federal grant requirements for the following programs:

- Investigations and Technical Assistance Program funded by the Centers for Disease Control
- Special Supplemental Nutrition Program for Women, Infants and Children
- Superfund Program
- HIV Care Formula Grants

The results of our Fiscal Year 2013 audit identified issues resulting in recommendations for two of the programs tested. We identified a total of two significant deficiencies related to federal awards. The errors identified and audit recommendations for these programs are described in the following sections of this chapter.

The following comments were prepared by the public accounting firm of KPMG, LLP, which performed Fiscal Year 2013 audit work at the Department.

## **HIV Care Formula Grants Controls over Eligibility Determinations**

The Department operates the HIV Care Formula Grant (HIV Care) program administered by the U.S. Department of Health and Human Services. This program is designed to help improve the quality, availability, and organization of health care and support services for individuals with Human Immunodeficiency Virus (HIV) disease, or HIV and Acquired Immune Deficiency Syndrome (AIDS) and their families. These objectives may be accomplished through provision of services by the State or HIV/AIDS care consortia in a home or community setting,

or by paying health insurance premiums that would not otherwise be available to ensure continuity of care.

The Department is responsible for ensuring that only eligible recipients receive public assistance benefits under the HIV Care program. Individuals apply to participate in the HIV Care program through the Department. The Department's HIV Care program staff collect the required documentation, and enter applicant data into the Pharmacy Benefit Manager (PBM) System. HIV Care program staff use the data to determine the applicants' eligibility for benefits. In addition, staff have to redetermine eligibility every six months. The eligibility determinations and redeterminations are input into the PBM system. Health providers and pharmacies submit patient claims through the PBM system, and the system approves or denies claims after performing an edit check against the person's eligibility status.

### **What was the purpose of the audit work?**

The purpose of the audit work was to test the Department's internal controls over the eligibility determination process for the federal HIV Care program and to ensure that the Department complied with the Program's requirements.

### **What audit work was performed and how were results measured?**

During our Fiscal Year 2013 audit, we tested a random sample of 40 HIV Care payments the Department made to providers on behalf of individuals determined eligible for the HIV Care program between July 1, 2012, and June 30, 2013. We also reviewed the case files and the PBM data fields related to the eligibility determination and redetermination of the patients associated with these payments. Our review sought to determine whether these individuals were eligible to receive benefits. We also inspected documentation to determine if benefits paid were calculated correctly and were in compliance with program requirements.

Additionally, we evaluated the Department's supervisory review controls over the eligibility determinations made by HIV Care staff. The program managers indicated that they review eligibility determinations made to ensure that staff are appropriately determining eligibility based on the documentation provided and are correctly entering the information into the PBM system. Supervisory reviews occur on a sample basis throughout the year.

Federal law (Provision of Treatments, 42 USC 300ff-26(b)) requires the Department to ensure that an eligible individual has a medical diagnosis of HIV/AIDS and is a low-income individual, as defined by the State. A low income individual for the HIV Care program is defined by the State as an individual with annual income at or below 400 percent of the federal poverty guidelines.

In accordance with OMB *Circular A-133*, §\_\_\_300 (b) Auditee Responsibilities, “the auditee shall maintain internal control over Federal programs that provides reasonable assurance that the auditee is managing Federal awards in compliance with laws, regulations, and the provisions of contracts or grant agreements that could have a material effect on each of its Federal programs.” A typical internal control over eligibility would be a supervisory review of eligibility determinations and redeterminations.

### **What problem did the audit work identify?**

Although we did not identify any errors in the eligibility determinations related to the 40 cases we tested, we noted that 40 of the 40 (100 percent) cases lacked evidence of a supervisory review. Department management stated that the reviews were performed throughout the fiscal year but were not documented.

### **Why did the problem occur?**

The Department does not have policies or procedures in place to require the maintenance of documentation for supervisory reviews of HIV Care eligibility determinations. Based on an unwritten policy, the Department will only maintain documentation if an error is identified.

### **Why does this problem matter?**

Without adequate documentation, we cannot determine if a supervisory review occurred and was operating effectively during the year. Failure to perform the review could result in inaccurate eligibility determinations that are undetected.

(CFDA No. 93.917; HIV Care Formula Grants; Activities Allowed or Unallowed, Eligibility. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-77:**

The Department of Public Health and Environment (Department) should ensure it determines eligibility for individuals correctly by requiring the maintenance of documentation for supervisory reviews performed over Human Immunodeficiency Virus Care Formula Grant Program (HIV Care) eligibility determinations. Documentation could include the samples selected for the HIV Care program managers’ re-performance of eligibility determinations and the results of this review.

## **Department of Public Health and Environment Response:**

Agree. Implementation date: December 2013.

The Department will develop a written procedure that requires documentation of supervisory reviews over eligibility determinations be created and maintained.

---

## **Suspension and Debarment Verification for the Superfund Program**

The Department operates the Superfund program (CFDA No. 66.802) administered by the U.S. Environmental Protection Agency. The objective of the Superfund program is to conduct assessments at potential or confirmed hazardous waste sites; undertake response planning and implementation actions at hazardous waste sites on the National Priorities List; and effectively implement the requirements for substantial and meaningful State involvement in remedial actions (Cleanup Standards—State Involvement, section 121(f) of the Comprehensive Environmental Response, Compensation, and Liability Act). During Fiscal Year 2013, the Department spent approximately \$10.6 million in federal funds for this program and approximately \$0.8 million in general funds.

The program is subject to federal procurement, suspension, and debarment requirements. Suspension and debarment actions protect the government from doing business with individuals, companies, or recipients who pose a business risk to the government. For example, a contractor may be suspended or debarred from doing business with government agencies because of fraud or poor performance.

### **What was the purpose of the audit work?**

The purpose of the audit work was to determine if the Department has adequate internal controls in place over, and is in compliance with, federal suspension and debarment regulations for the Superfund program.

### **What audit work was performed and how were results measured?**

To assess the Department's internal controls over, and compliance with, federal suspension and debarment requirements for the Superfund program, we tested the Department's internal controls in place over this area and reviewed the standard

contract used by the Superfund program to communicate terms, conditions, and applicable regulations for federal funds. We also inquired whether the Department verified that the entity and its principals were not suspended or debarred.

Federal suspension and debarment requirements apply to procurement contracts for goods and services that are expected to equal or exceed \$25,000. When the Department enters into such a transaction, federal regulations [OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement), 2 C.F.R. Section 180] require the Department to verify that the entity and its principals are not suspended, debarred, or otherwise excluded from performing work for government agencies. Principals are persons who have a significant influence over the handling of the federal funds, including owners, managers, and consultants.

States are allowed to use one of the following three methods of verification: checking the Excluded Parties List System maintained by the federal government to ensure the entity and its principals are not on the list; collecting a certification from the contractor that the contractor and its principals are not debarred or suspended; or adding a clause or condition to the contract or award document stating that the contractor certifies, by signing the contract, that neither it nor its principals are presently debarred, suspended, or otherwise excluded.

### **What problem did the audit work identify?**

The standard contract used by the Superfund program included suspension and debarment language related to the entity, but not to its principals. Further, the Department did not use any of the other acceptable methods of verification for the principals.

### **Why did the problem occur?**

The Department did not update the standard contract for federal funds used by the Superfund program to include the information related to principals. Additionally, it does not have a policy that requires the program to perform any of the alternative verification procedures related to the principals of an entity.

### **Why does this problem matter?**

Failure to perform required suspension and debarment verification procedures relating to the principals could result in the Department procuring goods or services from a principal that has been suspended or debarred, thereby exposing the State to increased business risk. In addition, the Department risks the loss of federal awards if it does not comply with federal requirements.

(CFDA No. 66.802; Superfund State, Political Subdivision, and Indian Tribe Site-Specific Cooperative Agreements; Procurement, Suspension and Debarment. Classification of Finding: Significant Deficiency.)

---

### **Recommendation No. 2013-78:**

The Department of Public Health and Environment should improve controls over compliance with federal suspension and debarment requirements for the Superfund program by including suspension and debarment language related to both the entities and its principals in all contracts that are covered by these rules. Alternatively, it should design and implement policies to use one of the other acceptable verification procedures for the principals.

### **Department of Public Health and Environment Response:**

Agree. Implementation date: November 2013.

The Department agrees with this finding and will update the language in all applicable contract and purchase order templates to include “the contractor and all principals”.

---

# Disposition of Prior Audit Recommendations

The following financial and single audit recommendations are summarized from the Statewide Audit for Fiscal Years 2007 through 2012 and include only the recommendations not implemented as of June 30, 2012. The disposition is the implementation status as of June 30, 2013.

The classification of findings described in Section I. Report Summary has been included throughout the dispositions, as needed. If the disposition is “Implemented” the classification is not applicable; if the disposition references a current year recommendation, the classification will be with the current year finding. All findings classified as significant deficiencies with a disposition of “Deferred” will be listed in Section II. Financial Statement Findings and Section III. Federal Awards Findings following each department’s current findings.

Single Audit Report and Rec. No.	Recommendation	Disposition
<b>Office of the Governor</b>		
2012-1	The Governor’s Office of Information Technology (OIT) should work with the other Executive Branch agencies to improve Information Technology service agreement controls by ensuring that existing and new Statewide Internet Portal Authority agreements comply with Colorado Information Security Policies, and include provisions required by OIT’s vendor management policy and other applicable legal and regulatory information security requirements.	Deferred. OIT plans to implement this recommendation by the December 2013 implementation date.  (Classification of Finding: Significant Deficiency.)
2012-2	OIT should work with the other Executive Branch agencies to establish clear roles and responsibilities related to its service provider operations by (a) developing service-level agreements (SLAs) that define the performance expectations for each required security control, describe measureable outcomes, and identify remedies for any identified instances of noncompliance, and ensuring that SLAs are kept current and (b) ensuring that OIT and Executive Branch agencies are clear about their respective responsibilities.	a. Partially implemented. OIT is currently revising service level agreements between OIT and executive branch agencies. OIT plans to fully implement this part of the recommendation by June 2014. b. Implemented.  (Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-3

OIT should identify, document, and implement an enterprise-wide firewall security strategy by (a) identifying and documenting procedures and schedules for patching or updating firewall operating systems; (b) defining rule sets that implement the State's firewall policy while supporting firewall performance and ensuring that all rule sets are reviewed on a periodic basis; (c) conducting regular scanning of critical firewalls; (d) logging, retaining, and regularly reviewing the logs to detect anomalous activities; and (e) managing firewall architectures, policies, software, and other components throughout the life of the firewall solutions.

Deferred. OIT plans to implement this recommendation by the December 2013 implementation date.

(Classification of Finding: Significant Deficiency.)

2012-4

OIT should ensure the completeness and accuracy of Colorado Information Security Policies by (a) revising existing policies to comply with statutes, (b) identifying gaps where the existing policies do not address relevant information technology areas and implementing new or revised policies and directives, and (c) strengthening communication and training to agencies regarding information security policies and its requirements.

Deferred. OIT plans to implement this part of the recommendation by the July 2013 implementation date.

(Classification of Finding: Deficiency in Internal Controls.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-5  
and  
2011-3

OIT should work with the Department of Personnel & Administration (Department) to improve KRONOS general computer controls by (a) implementing strong password policies that comply with password requirements listed within Colorado Cyber Security Policies; (b) modifying KRONOS security configurations to lock users out of the system after three failed login attempts and lock the users' sessions after 15 minutes of inactivity; (c) generating, reviewing, and retaining critical operating system-level and application activity logs (i.e., audit logs) to identify and investigate anomalous activity and successful and unsuccessful login attempts; (d) generating and implementing a login banner for KRONOS; (e) reviewing the current user listing to immediately remove terminated users and, on an ongoing basis, implementing regular reviews of user access to ensure that user access is appropriate and needed and that terminated users are removed in a timely manner; (f) ensuring each KRONOS ID is associated with an identified and documented owner and that IDs are not shared; (g) ensuring that users submit user access request forms that are authorized by the appropriate supervisor and retaining those forms, as required by policy; (h) hardening system configuration settings for KRONOS, as recommended under separate cover; (i) ensuring that all critical components of the KRONOS system are backed up according to Colorado Cyber Security Policies and industry best practices; (j) documenting and testing a disaster recovery plan that incorporates all components listed in Colorado Cyber Security Policies; and (k) providing direction to non-OIT administrators at user departments to ensure awareness of and compliance with Colorado Cyber Security Policies.

- a. Partially Implemented. See current year Recommendation No. 2013-2.
- b. Partially Implemented. See current year Recommendation No. 2013-2.
- c. Partially Implemented. See current year Recommendation No. 2013-2.
- d. Implemented in Fiscal Year 2012.
- e. Not implemented. See current year Recommendation No. 2013-2.
- f. Not implemented. See current year Recommendation No. 2013-2.
- g. Not implemented. See current year Recommendation No. 2013-2.
- h. Not implemented. See current year Recommendation No. 2013-2.
- i. Implemented.
- j. Not implemented. See current year Recommendation No. 2013-2.
- k. Not implemented. See current year Recommendation No. 2013-2.

(Classification of Finding: Significant Deficiency.)

2012-21

Implement policies and procedures to ensure that all Governors' Energy Office (GEO) nonpayroll costs are properly approved prior to being charged to the grant. In addition, the Office should develop and implement policies and procedures to ensure that GEO personnel costs charged to federal grants are properly applied and reviewed.

Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

2012-22	Ensure that GEO staff adhere to subrecipient monitoring requirements for the federal State Energy Program grant. This should specifically include implementing a process to ensure GEO receives all Office of Management and Budget <i>Circular A-133</i> audit reports from applicable subrecipients and following up on findings identified in those reports, as necessary.	Partially implemented. The State Energy Program grant ended in Fiscal Year 2012. The GEO monitored its subrecipients throughout the close of the grant through various mechanisms; however, the GEO did not obtain all OMB <i>Circular A-133</i> audits submitted by subrecipients for Fiscal Year 2012. The Department plans to fully implement this recommendation by January 1, 2014.  (Classification of Finding: Significant Deficiency.)
2012-23	Develop and implement internal controls over American Reinvestment and Recovery Act Section 1512 and the “Federal Financial Reporting” (SF-425) reporting for the Weatherization Assistance Program that include instituting a supervisory review process over the reports and maintaining evidence of that review.	Implemented.
2011-2	OIT should work with the Department of Revenue to improve RAS’ general computer controls by (a) immediately removing terminated administrative users and, on an ongoing basis, regularly reviewing listing of administrative users to ensure that access is commensurate with job responsibilities and that terminated users are removed in a timely manner; (b) recording, retaining, and reviewing system logs and other anomalous system activities to identify and investigate inappropriate access attempts to the system; (c) obtaining and enforcing the backup requirements, as defined by the RAS business owner (i.e., the Department of Revenue), and seeking the business owner’s feedback regarding disaster recovery testing decisions; and (d) enforcing the documented change management procedures currently in place to ensure that changes implemented are appropriate, approved by authorized personnel, and tested thoroughly.	No longer applicable. The Department retired the Revenue Accounting System (RAS) in October 2012 when it converted the related data to its current tax system.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2008-4

OIT should strengthen its controls over the State mainframe computer by (a) implementing audit recommendations related to network security and user access communicated to OIT in 2006 under separate cover, (b) periodically reviewing Top Secret security parameters to ensure compliance with best practices and OIT security policies, (c) ensuring password management controls are in compliance with State Cyber Security Policies, (d) setting Top Secret security parameters to ensure user IDs automatically suspend after 60 days of inactivity, (e) establishing policies and procedures for agency security administrators to follow when creating generic IDs, (f) restricting system administrator-level privileges to those who have a documented business need for such access, (g) ensuring all mainframe security administrators are properly trained and understand their roles and responsibilities, (h) overseeing the activities of agency security administrators to ensure compliance with established information system controls and security policies and procedures, and (i) researching instances identified during this audit where user IDs for terminated employees were used after the date of termination and taking action as appropriate.

- a. Not implemented. OIT plans to implement this part of the recommendation by June 2014.
- b. Implemented in Fiscal Year 2012.
- c. Implemented in Fiscal Year 2011.
- d. Implemented in Fiscal Year 2010.
- e. Implemented in Fiscal Year 2011.
- f. Implemented in Fiscal Year 2011.
- g. Implemented in Fiscal Year 2011.
- h. Implemented in Fiscal Year 2012.
- i. Implemented in Fiscal Year 2012.

(Classification of Finding: Deficiency in Internal Control.)

**Department of Health Care Policy and Financing**

2012-24

Continue to work with the counties, Medical Assistance sites, and the Governor's Office of Information Technology and third-party administrator to ensure the accuracy of eligibility determinations and redeterminations for the Medicaid program.

Implemented and ongoing. The Department has substantially implemented this recommendation by working with the counties, Medical Assistance sites, the Governor's Office of Information Technology, and the third party administrator to ensure the accuracy of eligibility determinations for the Medicaid program.

2012-25

Continue to work with the counties, Medical Assistance sites, and the Governor's Office of Information Technology and third-party administrator to ensure the accuracy of eligibility determinations and redeterminations for the Children's Basic Health Program.

Partially implemented. See current year Recommendation No. 2013-21.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

2012-26	Seek guidance from the federal oversight agency, the Centers for Medicare and Medicaid Services, regarding the appropriate manner for reclassifying payments between the Children’s Basic Health Plan and Medicaid programs. Additionally, the Department should develop and implement policies and procedures based on the guidance provided by the federal oversight agency.	Partially implemented. See current year Recommendation No. 2013-26.
2012-27	Improve its controls over eligibility determination of Medicaid providers to ensure that it complies with federal requirements. Specifically, it should (a) update the Medicaid provider application and provider agreement to include all information required by federal regulations; (b) start screening agents and managing employees of providers on enrollment to confirm their identity and to ensure that they are not excluded from participating in the Medicaid program; and (c) perform monthly matches with federal databases to determine if existing providers’ owners, agents, or managing employees have been excluded from participating in the program since the last verification.	a. Partially implemented. The Department made updates to the provider application and agreement in Fiscal Year 2013 that will be available for use in Fiscal Year 2014. The Department plans to fully implement this part of the recommendation by July 2013. b. - c. Deferred. The Department plans to implement these parts of the recommendation by the March 2016 implementation date.  (Classification of Finding: Significant Deficiency.)
2012-28	Develop and implement procedures to ensure that personnel costs charged to federal grant programs are supported with adequate documentation. These procedures should include requirements to maintain required certifications, personnel activity reports, quarterly comparisons between estimated and actual budgets, or other equivalent documentation.	Partially implemented. See current year Recommendation No. 2013-27.
2012-29	Improve controls related to its purchasing function by (a) maintaining documentation of an effective review process within the Purchasing and Contracting Section that will ensure contracting documents are in compliance with laws and regulations, (b) developing procedures to ensure compliance with the Office of the State Controller’s Contract Policies related to signatory authority delegations and the review and approval of state contracts, and (c) ensuring that it maintains documentation required by statute to justify all sole source procurements.	a. Implemented. b. Implemented. c. Implemented and ongoing. The Department has been in contact with the State Purchasing Director, who is currently developing a statewide sole source procurement policy. The Department plans to change its procedures, if necessary, to ensure documentation required under the new policy accompanies sole source selections.

<b>Single Audit Report and Rec. No.</b>	<b>Recommendation</b>	<b>Disposition</b>
2012-30	Develop a policy to maintain documentation of all reviews performed over the calculation of the Medicaid rates for inpatient hospital services.	Not applicable. The Department disagreed with this recommendation and did not implement it.
2012-31	Improve its interagency agreement process to ensure that interagency agreements are initiated and approved timely, the related funds are transferred timely and appropriately, and that interagency agreement activity is timely and accurately recorded on COFRS throughout the year.	Implemented.
2012-32	Ensure the Hospital Provider Fee Model is based on accurate, consistent, and reliable data by (a) establishing data collection methods to obtain hospital data for the Hospital Provider Fee Model that are based on existing, reliable data sources where possible. The Department should consider gathering data directly, whenever possible, from the most recently available Medicare cost reports rather than requiring hospitals to self-report data in the Hospital Provider Survey; (b) developing clear, consistent requirements for the data sources and methodologies hospitals must use to complete the Hospital Provider Survey; (c) requiring hospitals to maintain supporting documentation for the data points reported in the Hospital Provider Survey; and (d) developing and implementing policies and procedures for an annual, risk-based review, to determine the accuracy and reliability of the self-reported data in the Hospital Provider Survey. The Department should also establish and implement procedures to take follow-up action with hospitals on data points in question, including, but not limited to, adjustments to future fees and payments for errors.	Deferred. The Department plans to implement this recommendation by the December 2013 implementation date.  (Classification of Finding: Significant Deficiency.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-33

The Department of Health Care Policy and Financing (Department) and the Hospital Provider Fee Oversight and Advisory Board (Advisory Board) should improve the monitoring of the Hospital Provider Fee Program expansion population expenditures to ensure that the Department does not charge hospitals a hospital provider fee significantly greater than what is needed to cover the costs of the expansion population in the current model year. Specifically (a) the Department should provide quarterly updates to the Advisory Board comparing Model estimates for the expansion populations to the actual program expenditures for the expansion populations and (b) the Advisory Board should review the expansion population expenditures quarterly and, if necessary, make recommendations to the Department and the Medical Services Board about the need to revise the Hospital Provider Fee Model to ensure the amount collected for expansion populations more accurately reflects the expansion population costs, and if necessary consider mid-year adjustments to fees in the event it appears that the Department will significantly overcollect in a given year.

- a. Implemented and ongoing. The Department has substantially implemented this recommendation by providing quarterly updates to the Advisory Board.
- b. Implemented and ongoing. The Advisory Board continues to monitor hospital provider fee expansion population expenditures, as well as making necessary recommendations to revise the Hospital Provider Fee Model.

2012- 34

Improve the information security of the Provider Fee Model spreadsheet by (a) restricting access to the Provider Fee Model spreadsheet to only those users who have a business need to access it and (b) developing a method to track changes in the Provider Fee Model spreadsheet that allows the Department to document the history of changes made in the spreadsheet over time.

- a. Implemented.
- b. Deferred. The Department plans to implement this part of the recommendation by the October 2013 implementation date.

(Classification of Finding: Significant Deficiency.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-35

Develop controls to ensure that Medicaid does not pay any claims for Fort Logan or Pueblo Institute patients who fall under the federal institution for mental diseases (IMD) exclusion. Specifically, HCPF should (a) work with the Department of Human Services (CDHS) to develop a process for receiving data on the dates of admission and discharge for Medicaid-eligible clients, regardless of age, who are inpatients at the Fort Logan and Pueblo Institutes; (b) use the patient information obtained through part a to develop a process for identifying and denying, or flagging for further investigation, all Medicaid claims, including capitation payments, for IMD-excluded patients. Additionally, HCPF should pursue a long-term solution as part of the Medicaid Management Information System (MMIS) reprocurement; (c) use the patient information obtained through part a to develop a routine process for identifying and reviewing for appropriateness all claims paid for Medicaid clients, regardless of age, who were inpatients at the Fort Logan or Pueblo Institute on the date of service; and (d) investigate the claims questioned in this audit and recoup payments as appropriate.

- a. Implemented.
- b. Implemented and ongoing. The Department has implemented an interim process for identifying and investigating Medicaid claims paid for IMD-excluded patients until a more permanent solution is put in place with the new MMIS reprocurement.
- c. Implemented.
- d. Implemented.

2012-36  
and  
2011-26

Improve its controls over eligibility of Medicaid providers to ensure that it complies with federal regulations. In addition, it should develop, implement, and document a process for removing providers from the Medicaid Management Information System providers who are no longer in compliance with provider eligibility requirements.

Deferred. The Department plans to implement this recommendation by the March 2016 implementation date.  
  
(Classification of Finding: Material Weakness.)

2012-37  
and  
2011-29

Ensure that requirements for the Children's Basic Health Plan (CBHP) program related to determining whether an individual has creditable coverage are met. In addition, the Department should ensure that the Colorado Benefits Management System is properly programmed to deny CBHP eligibility for individuals who are receiving Medicaid or Children's Health Insurance Program benefits in other states.

Deferred. The Department plans to implement this recommendation by the June 2016 implementation date.  
  
(Classification of Finding: Material Weakness.)

<b>Single Audit Report and Rec. No.</b>	<b>Recommendation</b>	<b>Disposition</b>
2012-38 and 2011-32	Ensure the timely recovery of unallowable payments when Medicaid and Children’s Basic Health Plan benefits are terminated when individuals become ineligible, as appropriate.	Not applicable. The Department disagreed with the recommendation and did not implement it.
2012-39 and 2011-33	Improve its oversight of surveys and certifications required under the Medicaid program for nursing facilities, intermediate care facilities for the mentally retarded (ICF/MRs), and hospitals that provide nursing facility services by (a) providing appropriate procedural training to staff responsible for monitoring nursing facilities, ICF/MRs, and hospitals that provide nursing facility services; (b) ensuring that a supervisory review is in place that verifies staff follow the Department’s procedures for monitoring nursing facilities, ICF/MRs, and hospitals that provide nursing facility services; and (c) developing and implementing procedures to indicate the dates the Department will input into its database and use for monitoring the required timeframes for surveys conducted by the Department of Public Health and Environment.	Not implemented. See current year Recommendation No. 2013-24.
2012-40 and 2011-36	Improve its oversight of the Children’s Basic Health Plan (CBHP) program by (a) ensuring that beneficiaries who are no longer eligible for CBHP are properly disenrolled from the program and (b) ensuring that payments are recovered for the individuals identified during the audit testing as no longer being eligible for CBHP.	<p>a. Partially implemented. The Department submitted Colorado Benefits Management System (CBMS) changes during Fiscal Year 2013 to OIT and the third party contractor, Deloitte Consulting, to address the eligibility-related issues identified in the Fiscal Year 2011 audit. However, the changes will not be implemented until September 2013.</p> <p>b. Not applicable. The Department disagreed with this part of the recommendation and did not implement it.</p>
2011-4	Improve its controls over the preparation and submission of fiscal year-end exhibits to the Office of the State Controller by (a) instituting an effective supervisory review of exhibits that includes in-depth, detailed reviews of all supporting documentation used to prepare the exhibits and (b) ensuring exhibits are submitted within specified due dates to meet financial reporting time frames.	Implemented.

(Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

2011-27	Ensure that Income, Eligibility, and Verification System (IEVS) data discrepancies for the Medicaid and Children's Basic Health Plan (CBHP) programs are resolved. In addition, the Department should ensure the method of resolving IEVS data discrepancies is incorporated into the State Plans and Department rules.	Implemented.
2011-35	Improve controls over the processing of medical claims for the Medicaid program by (a) seeking approval from the State Medical Board on State rules on the establishment of the pricing method for equipment repairs; (b) modifying the Medicaid State Plan and Department rules, as necessary, to include the exemptions from Lower of Pricing and submitting the State Plan modifications to the federal government for approval; and (c) denying claims that are not in accordance with state regulations on timely filing requirements. In addition, clarifying provider guidance when claims extend beyond timely filing deadlines.	a. Implemented in Fiscal Year 2012. b. Partially implemented. See current year Recommendation No. 2013-25. c. Partially implemented. See current year Recommendation No. 2013-25.
2011-38 and 2010-57	Improve controls over payments to laboratory providers for the Medicaid program by (a) continuing to work to implement the Medicaid Management Information System (MMIS) edits necessary for accepting complete certification information from providers and verifying that the edits are working as intended to ensure compliance with the Clinical Laboratory Improvement Amendment (CLIA) requirements; (b) continuing to implement its alternative method to verify that only providers with CLIA certification are receiving payments through the Medicaid program until the MMIS edits have been implemented; (c) continuing to review laboratory payments to identify providers who are not certified and are receiving payments, including the completion of the review of 2008 through 2010 laboratory payments; and (d) identifying and recovering any payments made to providers that were not CLIA-certified, as appropriate.	a. Implemented in Fiscal Year 2012. b. No longer applicable. The Department implemented MMIS system edits that ensure a valid CLIA certification number is submitted and that the level of certification is appropriate for the types of procedures performed; as a result, implementing an alternative method for verification is no longer necessary. c. Implemented in Fiscal Year 2012. d. Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2010-68

Improve its monitoring of the nursing facility rate-setting process by (a) using the options available under state rules for enforcing requirements for the submission of cost reports by the nursing facilities in cases where facilities are delinquent in submitting the reports and (b) working with the State Medical Services Board to incorporate into state rules the process for establishing interim rates for nursing facilities under the Medicaid program to ensure that state rules align with the practices used by the Department.

- a. Implemented.
- b. No longer applicable in Fiscal Year 2012.

2009-53

Improve controls over documentation in Medicaid case files to support eligibility by (a) continuing to monitor counties and Medical Assistance (MA) sites to ensure that they are obtaining and maintaining the required case file documentation to support eligibility determinations, (b) requiring that counties and MA sites review case files to ensure consistency of information between the case file and the Colorado Benefits Management System (CBMS), and (c) working with the Department of Human Services to identify and implement revisions to policies and procedures for documenting and monitoring Medicaid eligibility determination/redetermination for the Title IV-E population.

Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2009-59

Reduce eligibility determination errors for the Children’s Basic Health Plan (CBHP) by improving oversight and training of eligibility sites by (a) continuing to provide eligibility sites with CBHP training and technical assistance on eligibility and documentation requirements; (b) enforcing eligibility sites’ supervisory review processes and corrective action plans by following up on problems identified through the Department’s monitoring program and this audit; (c) investigating the causes of the CBMS errors identified in the audit and modify CBMS as needed to correct them; and (d) recovering payments made after a beneficiary’s eligibility has ended, as appropriate.

- a. Partially implemented. See current year Recommendation No. 2013-21.
- b. Partially implemented. See current year Recommendation No. 2013-21.
- c. Partially implemented. The Department submitted CBMS changes to OIT and the third party contractor, Deloitte Consulting, to address the eligibility-related issues identified in the Fiscal Year 2009 audit. However, the changes will not be implemented until September 2013.
- d. Implemented in Fiscal Year 2010.

(Classification of Finding: Deficiency in Internal Control.)

2009-73

Improve the Medicaid Management Information System (MMIS) user access controls by immediately implementing our prior year recommendation and strengthening MMIS’s operating system, including (a) evaluating MMIS user access profiles and identifying those profiles, or combinations of profiles, that are appropriate for different system users. This information should be shared with the supervisors of MMIS users; (b) establishing a written procedure that HCPF IT security staff follow when MMIS access is requested; (c) ensuring that profiles or profile combinations that provide escalated system privileges are identified and tightly controlled, including the establishment of compensating controls; (d) periodically reviewing MMIS user access levels for appropriateness and promptly removing access for terminated users, including comparing active MMIS users to termination information contained in the Colorado Personnel Payroll System and requiring business managers to annually verify the accuracy and relevance of access levels belonging to the MMIS users they supervise; and (e) strengthening the configuration of the MMIS operating system by implementing the recommendations made under separate cover.

- a. Not Implemented. See current year Recommendation No. 2013-28.
- b. Implemented in Fiscal Year 2012.
- c. Not Implemented. See current year Recommendation No. 2013-28.
- d. Not Implemented. See current year Recommendation No. 2013-28.
- e. Implemented in Fiscal Year 2012.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

2009-75	Review its policy that excludes certain procedures from the Medicare lower of pricing logic to assess the appropriateness of these exclusions, particularly related to cost-control strategies for the Medicaid Program.	Partially implemented. See current year Recommendation No. 2013-25.
2009-76	Improve controls to prevent Medicaid payments for services to deceased individuals by (a) periodically evaluating the effectiveness of methods used to identify payments made for services provided after a client's death and implementing changes to these methods, as necessary; (b) working with its contractor, Health Management Systems, to expand data matches and recoveries for claims paid after a client's death to include oxygen services and other rental supplies; (c) continuing to investigate the claims identified by this audit that were paid for services provided after the date of death recorded in the Department of Public Health and Environment's (CDPHE) or the Department's files for Medicaid clients; and (d) enhancing its efforts in educating providers on claims payment issues surrounding clients' date of death, including proper death notification and billing for services provided during the month of death.	<p>a. Partially Implemented. Due to cost barriers in obtaining vital statistics data from CDPHE, the Department is researching other options for leveraging data to prevent payments to deceased individuals and plans to fully implement this part of the recommendation by February 2015.</p> <p>b. Implemented in Fiscal Year 2012.</p> <p>c. Implemented in Fiscal Year 2010.</p> <p>d. Implemented in Fiscal Year 2010.</p> <p>(Classification of Finding: Deficiency in Internal Control.)</p>
2009-79	Strengthen contract provisions and its monitoring of contractors responsible for performing prior authorization reviews of durable medical equipment and supplies requested for Medicaid clients by (a) standardizing the requirements in its contracts related to prior authorization and medical necessity activities for durable medical equipment and supplies; (b) strengthening the contracts by defining the qualifications of staff performing prior authorization and medical necessity functions; (c) implementing a formal oversight program for each of its prior authorization contractors, including on-site visits; (d) requiring its prior authorization contractors to standardize how providers submit prior authorization requests, including the use of electronic processing and interfaces; and (e) assessing whether consolidating prior authorization functions under one contract would be cost-effective.	<p>a. Implemented in Fiscal Year 2012.</p> <p>b. Implemented in Fiscal Year 2012.</p> <p>c. Partially implemented. The Department has conducted oversight activities with its prior authorization contractor and plans to implement a formal oversight program with site visits by June 2014.</p> <p>d. Implemented in Fiscal Year 2012.</p> <p>e. Implemented in Fiscal Year 2012.</p> <p>(Classification of Finding: Deficiency in Internal Control.)</p>

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

2009-81

Ensure a comprehensive and uniform assessment process for determining functional eligibility and the services necessary to address the needs of individuals seeking long-term care services by (a) improving written guidance to direct Single Entry Point (SEP) agencies on all aspects of the intake, functional assessment, and service planning processes, including how case managers should document information in the Benefits Utilization System; (b) modifying State Medicaid Rules to more clearly define how to score functioning when the individual uses an assistive device, and making appropriate corresponding changes to the Department's functional assessment instrument; (c) strengthening its state-sponsored training by making standard core training courses available to all SEP agencies; and (d) setting minimum standards for SEP agencies' quality assurance and case file review practices. Standards should include steps for measuring inter-rater reliability of functional assessment scoring and for systematically compiling, reporting, and addressing systematically compiling, reporting, and addressing the results of the case file reviews.

- a. Implemented in Fiscal Year 2012.
- b. Implemented and ongoing. The Department issued guidance to case managers to assist them in determining appropriate scoring for individuals who use assistive devices. The Department did not determine it necessary to make changes to State Medicaid Rules or to the assessment tool.
- c. Implemented in Fiscal Year 2011.
- d. Implemented in Fiscal Year 2012.

**Department of Higher Education**

**Colorado Historical Society**

2012-6

Improve its controls over financial reporting by (a) instituting a process for effective supervisory review of manual journal entries and year-end exhibits. This process should include proper segregation of duties and a detailed review, by someone knowledgeable in accounting, of all supporting documentation used to prepare entries and exhibits; (b) performing bank account reconciliations on a monthly basis to ensure amounts reported in the Colorado Financial Reporting System, the State's accounting system, agree to balances in accounts held by the Society's trustee; and (c) ensuring that it provides adequate training for accounting staff who prepare accounting entries and year-end exhibits.

Not implemented. See current year Recommendation No. 2013-5.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

**University of Colorado**

2012-41	Use tracking mechanisms available in the Integrated Student Information System to help ensure returns of Title IV funds are completed on a timely basis.	Partially implemented. See current year Recommendation No. 2013-36.
---------	--	---

**Colorado State University System**

2012-42	Colorado State University – Global Campus (CSU-Global) should implement an internal control procedure which ensures that a supervisory review of the Title IV return of funds calculations is conducted by someone other than the preparer of such calculations. CSU-Global should also implement adequate oversight processes to ensure that all applicable funds are returned to the U.S. Department of Education within the required time frames.	Implemented.
---------	--	--------------

2012-43	Implement a thorough review process of reports from the subaward database to identify awards that meet the Federal Funding Accountability and Transparency Act reporting requirements on a timely basis and ensure that all the required recipient reporting elements are submitted to the Federal Subaward Reporting System within the required time frames.	Implemented.
---------	---	--------------

**Community College System**

2012-44	Trinidad State Junior College, Colorado Northwestern Community College, Lamar Community College, and Community College of Aurora should implement controls to ensure that Title IV funds are returned to the federal government in the required time frame and that the return of Title IV calculations are properly reviewed to ensure accuracy.	Partially implemented. See current year Recommendation No. 2013-41.
---------	---	---

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

**Department of Human Services**

2012-7	Ensure that the financial data recorded on the Colorado Financial Reporting System (COFRS), the State's accounting system, related to counties' administration of public assistance programs are accurate and complete by (a) developing a procedure by which to reconcile County Financial Management System (CFMS) and COFRS data each month. The reconciliation procedure should include investigating and resolving all discrepancies and making adjustments as appropriate; (b) assigning responsibility to specific employees for conducting the monthly reconciliation process and a supervisory review of the process; and (c) reconciling the approximately \$500,000 discrepancy between CFMS and COFRS for amounts owed to the counties as of the end of Fiscal Year 2012 and making adjustments, as appropriate.	a. Implemented. b. Implemented. c. Partially implemented. See current year Recommendation No. 2013-6.
2012-8	Improve its controls over the preparation and submission of fiscal year-end exhibits to the Office of the State Controller (OSC) by ensuring its supervisory review process over exhibits includes in-depth, detailed reviews of all supporting documentation used to prepare exhibits. In addition, the Department should coordinate and train Facilities Management staff to ensure Facilities Management staff properly communicate to accounting staff about construction projects and obtain proper approval when opening a new bank account.	Partially implemented. The Department obtained proper approvals for the new bank accounts opened during Fiscal Year 2013. However, we identified issues with the Department's methodology for determining operating and capital leases reported to the OSC on the Schedules of Capital and Operating Leases exhibits. The Department plans to fully implement this recommendation by June 2014.  (Classification of Finding: Deficiency in Internal Control.)
2012-9	Ensure that it processes and deposits cash receipts for the Division of Youth Corrections in a timely manner and in accordance with State Fiscal Rules. Additionally, the Department should follow generally accepted accounting principles by recording revenue in the correct fiscal year.	Partially implemented. The Department created a policy related to cash receipts processing but has not fully implemented the policy. Specifically, we identified issues with cash deposits not being properly recorded at fiscal year-end. The Department plans to fully implement this recommendation by September 30, 2013.  (Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-10

The Department of Human Services (Department) and the Governor's Office of Information Technology (OIT) should improve the general IT controls over AVATAR by (a) generating, reviewing, and retaining activity logs at the operating level to identify and investigate anomalous activity, including successful and unsuccessful login attempts, and controlling access to activity logs to ensure that logs cannot be altered; (b) requiring supervisors to periodically verify the accuracy and relevance of user access for the employees they supervise; (c) implementing an ongoing procedure to ensure that all users are authorized based on roles, and evidence of role-based authorization is retained prior to the users' gaining access to the system; (d) generating and implementing logon banners for AVATAR, including Health Insurance Portability and Accountability Act (HIPAA) banners where required; (e) reviewing and updating user access management and desktop management policies and procedures; (f) ensuring that a system security assessment is performed on a periodic basis and identified security gaps are mitigated; (g) hardening system configuration settings for AVATAR, as identified in the system review; (h) conducting a review of all data transmissions related to AVATAR and ensuring that sensitive data are encrypted during transmission; (i) performing network scans on a periodic basis to identify and mitigate vulnerabilities; (j) ensuring that all desktop computers are vendor supported and have a firewall in place. Also, documenting the policies and procedures pertaining to desktop security management; (k) updating the AVATAR disaster recovery plan and business continuity plan that incorporate all components listed in Colorado Information Security Policies; (l) ensuring that the disaster recovery plan is tested and the required infrastructure components needed to restore the system are in place; (m) ensuring that application, system, and data backups are performed in accordance with an established schedule that complies with Colorado Information Security Policies; and (n) revising existing contracts to ensure that vendors must comply with Colorado Information Security Policies.

- a. - f. Implemented.
- g. Partially implemented. The Department worked with OIT to scan the AVATAR system during Fiscal Year 2013 to look for parts of the system that should be hardened. However, the system was not hardened during Fiscal Year 2013. The Department and OIT anticipate that this part of the recommendation will be fully implemented by September 2013.
- h. - i. Implemented.
- j. Not implemented. The Department and OIT indicate that this part of the recommendation should be implemented when the vendor-supported firewall is fully operational. The Department and OIT anticipate that this will occur by June 2014.
- k. - l. Implemented.
- m. Partially implemented. The Department and OIT worked during Fiscal Year 2013 to develop electronic backups that could be sent to an off-site location. The digital backups were in place by fiscal year-end, but they were not yet being sent off-site at that time pending hardware installation. The Department and OIT anticipate that this part of the recommendation will be implemented by September 2013.
- n. Partially implemented. The Department was in contract negotiations with the vendor at the end of Fiscal Year 2013. However, the contract with revised contract language requiring the vendor to comply with State Information Security Policies had not been signed. The Department anticipates that this part of the recommendation will be fully implemented by September 2013.

(Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-11

The Department of Human Services and the Governor's Office of Information Technology (OIT) should improve the general IT controls over the County Financial Management System (CFMS) by (a) promptly reviewing and implementing procedures to ensure that access to the "root" or "super-user" account can be traced to an individual user and user access to the "root" account is monitored on a regular basis for appropriateness; (b) modifying configuration settings to ensure that changes made to system logs are recorded and audited; (c) implementing strong password parameters at the application, database, and operating system levels that comply with Colorado Information Security Policies; (d) generating, reviewing, and retaining system activity logs to identify and investigate anomalous activity and successful and unsuccessful login attempts. The Department and OIT should also control access to activity logs to ensure that logs cannot be altered and review the existing audit log rules to ascertain if current logging is sufficient; (e) requiring supervisors to periodically verify the accuracy and relevance of user access for the employees they supervise; (f) implementing a procedure to ensure that all users are authorized, evidence of authorization (e.g., system access request forms) is retained, and a signed statement of compliance is obtained prior to granting access to the system; (g) reviewing and updating user access management and desktop management policies and procedures; (h) implementing malware detection and prevention tools on the CFMS server as well as a patch management process for the operating system, database, and application to ensure that software patches are reviewed, implemented, and kept current; (i) encrypting sensitive data transmitted between CFMS and other systems and computers, including user credentials; (j) performing network scans on a periodic basis to identify and mitigate vulnerabilities; (k) ensuring that all desktop computers are vendor-supported and have a firewall in place; (l) ensuring that the disaster recovery plan and business continuity plans for CFMS are updated and tested and the required infrastructure components needed to restore the system and business operations are in place; (m) updating existing contracts with CFMS vendors to ensure that the contracts require compliance with Colorado Information Security Policies; and (n) monitoring vendors and holding them accountable for deliverables listed in the contracts.

- a. - b. Implemented.
- c. Not implemented. During Fiscal Year 2013 the Department and OIT made changes to the CFMS password configuration file, which controls access at the application, database, and operating system level. However, the password configuration file was incorrectly configured, and failed to meet Colorado Information Security Policies. The Department and OIT anticipate that this part of the recommendation will be fully implemented by October 2013.
- d. - g. Implemented.
- h. Partially implemented. The Department and OIT have identified a solution for monitoring the entire CFMS environment, including implementing malware detection and prevention tools; monitoring access attempts by unauthorized users; as well as implementing operating system, database, and application level patch management. While this was in place at the end of Fiscal Year 2013, it was not operational during Fiscal Year 2013. The Department and OIT plan to fully implement this part of the recommendation by October 2013.
- i. Implemented.
- j. Implemented.
- k. Partially implemented. During Fiscal Year 2013 only some desktop computers had a firewall in place and were vendor supported. The Department and OIT are in the process of deploying updated desktops to staff who have not yet received new machines. The Department and OIT plan to implement this part of the recommendation by October 2013.
- l. - n. Implemented.

---

2012-45	Strengthen controls over the Vocational Rehabilitation Program to ensure compliance with federal and state eligibility requirements. In addition, the Department should update the Vocational Rehabilitation Policy Manual to ensure it properly reflects the requirements for case file management associated with the implementation of the AWARE system.	Not implemented. See current year Recommendation Nos. 2013-50, 2013-52, 2013-53, 2013-54, 2013-56, 2013-62, and 2013-67.
2012-46	Ensure county departments of human/social services comply with eligibility requirements for the Temporary Assistance for Needy Families program.	Not implemented. See current year Recommendation No 2013-46.
2012-47	Ensure that Supplemental Nutrition Assistance Program restoration payments are paid appropriately and provide training to county caseworkers to ensure that they input accurate information into the Colorado Benefits Management System and timely process changes in beneficiaries' circumstances.	Deferred. The Department plans to implement this recommendation by the September 2013 implementation date.  (Classification of Finding: Significant Deficiency.)
2012-48	Work with its fiscal agent to strengthen controls over the Colorado Electronic Benefits Transfer (EBT) system by (a) ensuring that the Statement on Standards for Attestation Engagements (SSAE) 16 report is made available within the 90-day requirement, (b) requiring that the fiscal agent resolve the exceptions listed in the Fiscal Year 2012 SSAE 16 report immediately, and (c) instituting monitoring processes over the EBT fiscal agent to ensure that the fiscal agent is held accountable for information system controls over the EBT system.	a. Implemented and ongoing. The Department has substantially implemented this recommendation by working with the fiscal agent and the fiscal agent's auditor to improve the timeliness of the SSAE 16 report submission. The Department reports that it will continue to monitor the timing of the report to ensure that future reports are received in a timely manner. b. - c. Implemented.

and  
2011-49

Improve controls over its flexplace program by (a) ensuring the Department consistently follows the Department of Personnel & Administration's (DPA) flexplace policy, including the proper use of DPA flexplace application and agreement forms and (b) training approving officials at the division and program levels on their responsibilities for implementing flexplace policies and monitoring staff who participate in flexplace. The training should include requirements for approving and signing of flexplace applications and arrangements, the types of expenses to be covered, what state property will be used off site, and how protected and confidential data are to be safeguarded.

- a. Partially implemented. During our testing, we found that the Department did not consistently use the flexplace application and flexplace agreement forms during Fiscal Year 2013; however, the Department ensured that personnel costs charged to federal grant programs are supported with adequate documentation. The Department plans to fully implement this part of the recommendation by July 2014.
- b. Partially implemented. The Department performed flexplace training during Fiscal Year 2013. However, the training attendance forms that we reviewed did not include signatures and/or approvals as required on the flexplace form.

In addition, the Department did not ensure in all cases that appropriate individuals attended the training. The Department plans to fully implement this part of the recommendation by July 2014.

(Classification of Finding: Deficiency in Internal Control.)

2011-45

Develop and implement procedures to ensure personnel costs charged to federal grant programs are supported with adequate documentation. These procedures should include requirements to maintain required certifications, personnel activity reports, quarterly comparisons between estimated and actual budgets, or other equivalent documentation.

Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

---

2011-47	Continue to strengthen controls over the Child Support Enforcement program by (a) ensuring that counties enforce medical support obligations when appropriate, provide all required services, provide services within the required time frames, and conduct all required communication with interested parties and (b) incorporating a review of a sample of hard copy case files as part of the Department's county monitoring process for the program.	a. Implemented in Fiscal Year 2012. b. Implemented and ongoing. The Department has substantially implemented this recommendation by implementing a required review of a sample of hard copy case files in its county monitoring process.
2010-15	Improve controls over financial reporting for Medicare Part D revenue and receivables at the Fort Logan and Pueblo Mental Health Institutes by ensuring that monthly and fiscal year-end reconciliations are performed between the Part D revenue and related accounts receivable balances in COFRS and billings from the pharmacy subsystem in AVATAR, and making adjustments as appropriate.	Implemented and ongoing. The Department has substantially implemented this recommendation by completing monthly and year-end reconciliations between COFRS, Medicare Part D revenue and the billings from its pharmacy subsystem, AVATAR for Fiscal Year 2013.
2010-21	Ensure that financial information is accurately and completely recorded for the cash programs by (a) working with the eligibility systems administrators and JP Morgan Chase to obtain the needed reports to perform comprehensive reconciliations among the eligibility systems, County Financial Management System, and the State's electronic benefits transfer service provider to ensure that financial information is accurately and completely recorded and (b) investigating and resolving any discrepancies identified during the reconciliations.	Partially implemented. The Department completed Colorado Benefits Management System (CBMS) reconciliations for the Food Assistance program, the Low-Income Energy Assistance Program (LEAP) system, and the Child Care Automated Tracking System (CHATS) for Fiscal Year 2013. However, the Department did not complete reconciliations for the CBMS cash programs and the Child Welfare Statewide Automated Tracking System (Trails) for Fiscal Year 2013. The Department plans to fully implement this recommendation by June 2014.

(Classification of Finding: Deficiency in Internal Control.)

**Single Audit

Rec. No.**

**Recommendation**

**Disposition**

---

2010-91	Strengthen controls over the Low Income Energy Assistance Program, through improved training, county monitoring, and supervisory review processes, to ensure that eligibility is determined in a timely manner, that benefit amounts are calculated correctly, and that complete and accurate documentation is maintained in the case files.	Partially implemented. See current year Recommendation No. 2013-48.
2010-94	Work with the Governor's Office of Information Technology to improve the Low-Income Energy Assistance Program (LEAP) system's general computer controls by (a) generating, reviewing, and retaining application and system activity logs (i.e., audit logs) to identify and investigate anomalous activity at the application level and monitoring successful and unsuccessful log-in attempts at the Top Secret level; (b) requiring supervisors to periodically verify the accuracy and relevance of user access for the employees they supervise; (c) identifying and documenting LEAP user profiles that, when combined, provide incompatible system privileges; (d) identifying and updating the IT policies and procedures that are outdated; (e) ensuring that all users, prior to gaining access to the LEAP system, receive introductory system level training and have read and acknowledged the Department's statement of compliance; (f) encrypting all data transmissions containing sensitive data, including user credentials; and (g) documenting a business continuity plan.	Implemented.
2009-101	Continue to work with the counties to ensure that applications for SNAP/Food Assistance benefits are processed within federal and state requirements.	Implemented and ongoing. The Department has substantially implemented this recommendation by ensuring that the number of applications processed from year to year have continued to increase and that processing timelines are substantially within federal and state requirements for SNAP/Food Assistance benefits.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2008-16

Strengthen controls over the Colorado Electronic Benefits Transfer (EBT) system by (a) developing a plan with established project milestones for implementing all User Control Considerations contained in the SAS 70 Report of JP Morgan's EBT transaction processing; (b) working with JP Morgan to ensure EBT system password parameters comply with State Cyber Security Policies and Department requirements; (c) ensuring that only authorized EBT security administrators have the ability to add new users and that EBT users are only added after receipt of an authorized access request form; (d) updating Department procedures to require counties to immediately notify the EBT security administration group of all terminations and transfers; (e) performing periodic reviews of EBT users, in conjunction with the counties, to ensure terminated users are identified and access levels for current employees remain appropriate; (f) working with JP Morgan to identify and correct problems with its automated control for suspending inactive user accounts; and (g) working with JP Morgan to segregate the recipient eligibility and EBT card authorization and issuance functions at the 25 counties identified in the report.

Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2007-95

Improve its oversight of the foster parent certification process by (a) requiring county departments of human/social services and child placement agencies to conduct periodic (e.g., annual) desk audits of their certified foster parents to ensure that the parents meet all applicable requirements and that their qualifications are documented in their files, (b) developing and applying sanctions when the Department finds discrepancies between county and child placement agency (CPA) attestations and actual foster parent qualifications, (c) requiring that county departments of human/social services provide Family Service Plan information to child placement agencies with which they have placed children and ensuring that county-certified foster parents also receive Family Service Plan information, and (d) working with county departments of human/social services to develop a solution for providing relevant child information to foster parents without violating confidentiality requirements.

Implemented.

**Department of Labor and Employment**

2012-12

Institute a reconciliation process of expected-to-actual interest expense incurred throughout the year and at fiscal year-end to ensure that interest expense is properly stated within the financial statements.

Not implemented. See current year Recommendation No. 2013-10.

(Classification of Finding: Significant Deficiency.)

2012-51

Improve the level of documentation that is maintained to demonstrate that required cross-checks of Unemployment Insurance claimant data are performed against the National Database of New Hires.

Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-52

The Department of Labor and Employment (Department) and the Governor's Office of Information Technology (OIT) should improve the general information technology (IT) controls over the Colorado Unemployment Benefits System (CUBS) and Colorado Automated Tax System (CATS) by (a) developing, documenting, and implementing a user access management process, including procedures for periodically producing and reviewing a list of current system users; (b) developing and implementing a written procedure for granting user access to CUBS and CATS according to pre-established rules around segregation of duties; (c) generating and reviewing application activity logs (i.e., audit logs) to identify and investigate anomalous activity; (d) increasing the activities of the internal fraud staff by having them regularly review CUBS and CATS transactions for anomalous activity. Anomalous activity reports should be shared with IT and business staff (i.e., Division of Employment and Training program staff) and fully investigated and documented; and (e) developing written configuration management and change control policies and procedures, including procedures for handling emergency changes. The policies and procedures should define the joint roles and responsibilities of IT and Division of Employment and Training program staff.

- a. - b. Implemented.
- c. - d. Deferred. The Department of Labor and Employment and the Governor's Office of Information Technology plan to implement this part of the recommendation by the December 2016 implementation date.
- e. Implemented.

(Classification of Finding: Significant Deficiency.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-53  
and  
2011-55

Ensure that unemployment insurance (UI) claimants meet the requirements of House Bill 06S-1023 and federal law for affirming their lawful presence in the United States by (a) requiring all claimants to provide the number of their valid Colorado driver's license or Colorado identification card, or a copy of other documents acceptable under House Bill 06S-1023, before paying benefits. In addition, the Department should establish a process to collect acceptable forms of identification other than a Colorado driver's license or identification card and provide claimants with instructions on the application for submitting this documentation and (b) establishing procedures to verify that the person applying for UI benefits is the same person depicted by the identification number or document that the person provides on his or her application. These procedures could include verifying all Colorado driver's license and identification numbers provided by claimants using Department of Revenue records. If necessary, the Department should seek legal counsel from the Office of the Attorney General to clarify the procedures that the Unemployment Insurance Program must follow to satisfy House Bill 06S-1023 while complying with federal requirements.

Implemented.

---

**Department of Natural Resources**

2012-13

The State Board of Land Commissioners (Board) should ensure that the State's financial information is accurate and complete by (a) establishing and implementing procedures for identification of values associated with donated land and other assets; (b) recording the proper asset value of all the land it owns in the Colorado Financial Reporting System (COFRS), the State's accounting system, timely; and (c) once donated land and other assets are valued, implementing a process to reconcile the Board's asset information with COFRS.

- a. Deferred. The Department plans to implement this part of the recommendation by the December 2013 implementation date.
- b. Partially implemented. The Department recorded land purchases made by the Department during Fiscal Year 2013. However, the Department continues to evaluate historical cost information for past land acquisitions made by the Department. The Department plans to fully implement this part of the recommendation by December 2013.
- c. Deferred. The Department plans to implement this part of the recommendation by the December 2013 implementation date.

(Classification of Finding: Significant Deficiency.)

2012-14

The State Board of Land Commissioners should improve its controls over the management company's activity by (a) assigning accounting staff the responsibility of reviewing the management company's financial reports and recording all financial activity in the Colorado Financial Reporting System (COFRS) on a monthly basis; (b) establishing and implementing policies and procedures to record gross revenue and expenditure amounts, including revenue earned and expenditures incurred, related to its commercial properties; (c) communicating with the Department of Natural Resources Controller to obtain guidance on the appropriate contract type for its current and future contracts, and to ensure that it follows the State's contract review and approval processes; and (d) obtaining approval for all bank accounts that its management company utilizes and obtaining prior approval on all types of bank accounts it opens in the future.

- a. - b. Implemented.
- c. Deferred. The Department plans to implement this part of the recommendation by December 2013.
- d. Implemented.

(Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2011-58

The Division of Wildlife (the Division) should improve controls over the federal Fish and Wildlife Cluster Program to ensure compliance with federal suspension and debarment requirements by (a) verifying all counterparties from which goods or services are purchased against the Excluded Parties List System (EPLS) when federal funding is being utilized, and (b) maintaining documentation to support that verification procedures were performed to ensure proper monitoring.

Implemented.

**Department of Personnel & Administration**

2012-15

Ensure that the Office of the State Controller (OSC) works with the State's higher education institutions to ensure that all information necessary for the OSC to compile the budget-to-actual schedules within the State's Comprehensive Annual Financial Report in accordance with Governmental Accounting Standards Board standards and state regulations is obtained and incorporated into the schedules.

Deferred. The OSC plans to implement this recommendation by December 2015, after the State's new accounting system is implemented. The OSC believes that the new accounting system will allow for the automated compiling of higher education tuition and fee funding amounts.

(Classification of Finding: Significant Deficiency.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

2012-16

The Department of Personnel & Administration (Department) and the Governor's Office of Information Technology (OIT) should improve the Colorado Personnel Payroll System's (CPPS) general computer controls by (a) implementing encryption controls over passwords and the file where passwords are stored; (b) implementing periodic user access reviews, requiring supervisors to verify the accuracy and relevance of user access for the employees they supervise, and ensuring that users who do not need access are removed in a timely manner; (c) generating and implementing logon banners for CPPS; (d) conducting a review of all data transmissions related to CPPS and ensuring that sensitive data are encrypted during internal and external transmissions; (e) conducting a review of all interfaces related to CPPS and ensuring that interfaces are identified, documented, and reviewed on a periodic basis, and ensuring that security controls are enforced and that personnel are identified and held accountable for managing these interfaces; (f) updating the CPPS disaster recovery plan so that it incorporates all critical components associated with CPPS and meets the requirements listed in Colorado Cyber Security Policies; (g) ensuring that the disaster recovery plan is tested, gaps identified are mitigated, and the required infrastructure components to restore the system are in place; (h) ensuring that backup documentation is complete and procedures are in place to back up all critical components of the CPPS environment, such as interfaces; and (i) developing a succession plan for key IT positions responsible for maintaining CPPS.

- a. Deferred. The Department and OIT plan to implement this part of the recommendation by the June 2014 implementation date.
- b. Partially implemented. The Department implemented a process for staff within Central Payroll Services to conduct quarterly reviews of CPPS users in late Fiscal Year 2013. However, staff did not fully complete one of these reviews by the end of Fiscal Year 2013. The Department and OIT plan to fully implement this part of the recommendation by the June 2014 implementation date.
- c. Deferred. The Department and OIT plan to implement this part of the recommendation by the June 2014 implementation date.
- d. Deferred. The Department and OIT plan to implement these parts of the recommendation by the December 2014 implementation date.
- e. Deferred. The Department and OIT plan to implement these parts of the recommendation by the December 2014 implementation date.
- f. Deferred. The Department and OIT plan to implement these parts of the recommendation by the December 2014 implementation date.
- g. Deferred. The Department and OIT plan to implement these parts of the recommendation by the December 2014 implementation date.
- h. Deferred. The Department and OIT plan to implement this part of the recommendation by the December 2013 implementation date.
- i. Implemented.

(Classification of Finding: Significant Deficiency.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-17  
and  
2011-14

Improve payroll controls by (a) working with the Department's Central Payroll division and the Governor's Office of Information Technology, to determine if changes can be made to the Colorado Personnel and Payroll System (CPPS) to ensure the methods used by CPPS to calculate payroll adjustments are consistent with State Personnel Rules; (b) if changes cannot be made to CPPS, based on the results of part (a), calculating future unpaid leave adjustments in accordance with State Personnel Rule 5-21 using the annualized hourly rate; and (c) developing and documenting procedures to ensure Human Resources Unit staff identify and enter unpaid leave hours on a timely basis.

- a. - b. Partially implemented. The Department determined that it was not economically feasible to make changes to the CPPS system. Therefore, the Department plans to request a change to the State Personnel Rules to use the monthly hourly rate for the calculation to be consistent with the calculations done by CPPS. The Department anticipates that the rule change will be effective as of January 1, 2014.
- c. Implemented in Fiscal Year 2012.

(Classification of Finding: Significant Deficiency.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2010-31

Work with the Governor's Office of Information Technology to improve the Columbia Ultimate Business System (CUBS) general computer controls by (a) promptly implementing a strong password that complies with State Cyber Security Policies; (b) reviewing all CUBS' users IDs and ensuring that each ID is associated with an identified and documented owner; (c) modifying CUBS' security configurations to lock users out of the system after three failed log-in attempts and lock the user's session after 15 minutes of inactivity; (d) ensuring that users submit user access request forms that are authorized by the appropriate supervisor; (e) requiring supervisors to periodically verify the accuracy and relevance of user access for the employees they supervise; (f) generating, reviewing, and retaining application activity logs (i.e., audit logs) to identify and investigate anomalous activity and successful and unsuccessful log-in attempts; (g) generating and implementing a log-in banner for CUBS; (h) documenting a disaster recovery plan that incorporates all components as listed in State Cyber Security Policies; (i) ensuring that the hardware required to restore CUBS is in place or can be provided through a contractor within the recovery time period specified by CUBS' business owner; (j) hardening system configuration settings for CUBS, as recommended under separate cover; and (k) reviewing and updating the existing contract with the Columbia Ultimate Solutions company, the owners of CUBS, to require the company's compliance with State Cyber Security Policies.

- a. - d. Implemented in Fiscal Year 2011.
- e. Implemented.
- f. Partially implemented. The Department did not fully implement this part of the recommendation due to system limitations. The Department and OIT have implemented a monthly review of daily activity logs for the CUBS system. However, the information in the daily activity logs is very limited and cannot completely fulfill the requirements of this recommendation. The Department indicates that it will pursue technological solutions to fully implement this part of the recommendation by May 2014.
- g. Implemented in Fiscal Year 2011.
- h. Implemented in Fiscal Year 2012.
- i. Implemented in Fiscal Year 2012.
- j. - k. Implemented.

**Department of Public Health and Environment**

2012-54	The Department of Public Health and Environment (Department) and the Governor's Office of Information Technology (OIT) should remediate system issues and improve system security to improve the Compass system's general computer controls by (a) conducting regular Compass system security reviews at least bi-annually. These system security reviews should include, but not be limited to, conducting port scans of the system and reviewing operating system patches; (b) aligning the Department's disaster recovery plan with USDA and state cyber security policies; (c) developing a written policy that addresses maintaining an inventory of all WIC and Compass assets, conducting and retaining the results of bi-annual inventory reviews, and creating a service-level agreement that meets USDA requirements; (d) creating a mechanism to periodically validate user access at clinics; and (e) ensuring adequate segregation of duties at the clinic level, according to USDA requirements.	a. Implemented. b. Deferred. The Department and OIT plan to implement this part of the recommendation by the July 2013 implementation date. c. - e. Implemented.  (Classification of Finding: Deficiency in Internal Control.)
2012-55	Improve controls over compliance with federal Procurement, Suspension, and Debarment requirements for the Superfund program by including suspension and debarment language in all contracts that are covered by these rules, or by maintaining documentation to support that it performed other acceptable verification procedures.	Partially implemented. See current year Recommendation No. 2013-78.
2012-56	Ensure it complies with federal requirements by developing and implementing a supervisory review process over all federally required Transparency Act reports for the Special Supplemental Nutrition Program for Women, Infants, and Children.	Partially implemented. The Department developed a new policy/procedure for the supervisory reviews over all federally required reports the Department prepares and submits for its federal grants in Fiscal Year 2013 that will be implemented in Fiscal Year 2014. The Department plans to fully implement this recommendation by July 2013.  (Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-57

Develop a policy to perform a supervisory review over all progress reports submitted for the Centers for Disease Control and Prevention's Investigations and Technical Assistance Program, and to maintain documentation of all supervisory reviews performed.

Partially implemented. The Department developed a new policy/procedure for the supervisory review over all federally required reports the Department prepares and submits for its federal grants in Fiscal Year 2013 that will be implemented in Fiscal Year 2014. The Department plans to fully implement this recommendation by July 2013.

(Classification of Finding: Deficiency in Internal Control.)

**Department of Revenue**

2012-18

Ensure that the Medical Marijuana Enforcement Division establishes and adopts written internal control policies and procedures for its various business processes. These policies and procedures should ensure that (a) reconciliations over cash and revenue collections are properly performed and documented and that all discrepancies are investigated timely, (b) revenue is recognized when earned, (c) there is adequate segregation of duties among the various functions involved with receiving and recording cash, and (d) assets are properly tagged and tracked.

a. - c. Implemented.  
d. Partially implemented. The Department ensured that the Division prepared a tracking list of its fixed assets during Fiscal Year 2013. However, we found three instances in which fixed assets were not updated with their current location on the tracking sheet. In addition, the division plans to hire a technical writer to draft internal policies and procedures for non fixed assets by October 1, 2013. The Department plans to fully implement this part of the recommendation by October 2013.

(Classification of Finding: Deficiency in Internal Control.)

2012-19

Improve its internal controls over expenditures made using procurement cards by (a) ensuring that staff members consistently follow the Department-wide procurement card guidelines as well as ensuring that the Medical Marijuana Enforcement Division's staff follow its procurement card procedures, including documenting approved Purchase Request Forms and (b) ensuring that staff members conduct reviews and sign off within the required timeframes and send the statements to the Accounting and Financial Services Section timely.

Implemented.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2012-20  
and  
2011-18

Improve its identification of first-time severance taxpayers by accessing and using oil and gas production and permitting data available through the Department of Natural Resources to verify that those subject to severance taxation have filed a tax.

Implemented.

2010-36

Work with the Governor's Office of Information Technology (OIT) to improve the Revenue Accounting System system's general computer controls by (a) requiring supervisors to periodically verify the accuracy and relevance of user access for the employees they supervise and by linking the human resources and user access management functions to ensure that access for terminated users is removed in a timely manner; (b) reviewing and retaining application activity logs (i.e., audit logs) to identify and investigate anomalous activity and inappropriate attempts to access the system; and (c) implementing consistent user access management procedures to ensure that, prior to gaining access to the relevant information systems, a user's access request forms are authorized, users sign the Department's statement of compliance forms, and the access request forms are retained for the time frame required by State Cyber Security Policies.

- a. Implemented in Fiscal Year 2012.
- b. No longer applicable. The Department retired the Revenue Accounting System (RAS) in October 2012 when it converted the related data to its current tax system.
- c. Implemented in Fiscal Year 2011.

2010-38

Work with OIT to improve GenTax's general computer controls by (a) reviewing audit rules on a periodic basis to ensure that logging meets federal and state requirements; (b) hardening system configuration settings for GenTax, as recommended under separate cover; and (c) documenting a disaster recovery plan that incorporates all components listed in State Cyber Security Policies and testing the plan on a regular basis.

- a. Implemented.
- b. Implemented in Fiscal Year 2012.
- c. Partially implemented. The Department has developed a disaster recovery plan, but has not tested the plan. The Department plans to fully implement this part of the recommendation by July 2014.

(Classification of Finding: Deficiency in Internal Control.)

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2010-39

Work with OIT to improve the Colorado State Titling and Registration System's (CSTARS) general computer controls by (a) implementing strong password parameters at the application level that comply with State Cyber Security Policies; (b) reviewing user access management procedures to ensure that access is commensurate with users' job responsibilities and user access request forms are maintained for the time period specified by State Cyber Security Policies; (c) establishing policies and procedures to provide guidance to county users regarding their roles and responsibilities pertaining to CSTARS. Specifically, the Department should establish a procedure to ensure that terminated users are removed in a timely manner, users' access reflects their job responsibilities, and users are required to acknowledge the Department's policies and procedures prior to gaining access to CSTARS; (d) generating, reviewing, and retaining system activity logs to identify and investigate anomalous activity, successful and unsuccessful log-in attempts, and attempts to access the system by unauthorized users; (e) generating and implementing a log-in banner for the CSTARS application; and (f) hardening system configuration settings for CSTARS.

- a. Partially Implemented. See current year Recommendation No. 2013-17
- b. Partially implemented. See current year Recommendation No. 2013-17
- c. Not implemented. See current year Recommendation No. 2013-17.
- d. Not implemented. See current year Recommendation No. 2013-17.
- e. Implemented in Fiscal Year 2011.
- f. Partially implemented. See current year Recommendation No. 2013-17.

**Single Audit  
Report and  
Rec. No.**

**Recommendation**

**Disposition**

2008-44

Strengthen its information systems controls over the Income Tax, Revenue Accounting, and Severance Tax Systems related to network configuration and management, application development and change management, and user access management by (a) immediately addressing the network and configuration management issues we identified in the audit and provided to the Department under separate cover; (b) developing and implementing a formalized application development and change management process for its mainframe-based applications; (c) performing regression and user acceptance testing on changes to source code prior to moving the code into production; (d) identifying the production libraries containing the source code for the mainframe-based applications and ensuring access to those libraries is limited; (e) requiring management to perform a periodic review of source code changes to ensure that only authorized and appropriate changes are implemented into production; and (f) developing and implementing a formalized user access management program, including periodically producing and reviewing a list of current system users and linking the human resources and user access management functions.

- a. Implemented in Fiscal Year 2009.
- b. Implemented in Fiscal Year 2011.
- c. No longer applicable. The Department retired the Revenue Accounting System (RAS) in October 2012 when it converted the related data to its current tax system.
- d. Implemented in Fiscal Year 2011.
- e. - f. No longer applicable. The Department retired the Revenue Accounting System (RAS) in October 2012 when it converted the related data to its current tax system.

**Department of State**

2010-44

Ensure that monthly payroll reconciliations are accurate and complete by (a) ensuring that payroll adjustments have adequate supporting documentation and are mathematically accurate and (b) strengthening its existing supervisory review process to ensure that calculation errors and instances in which supporting documentation is lacking are identified and corrected prior to payment.

Implemented.

**This page intentionally left blank**

December 13, 2013

**Report on Internal Control over Financial Reporting and on  
Compliance and Other Matters Based on an Audit of Financial Statements  
Performed in Accordance with *Government Auditing Standards***

Members of the Legislative Audit Committee:

We have audited, in accordance with the auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Colorado (the State), as of and for the year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise the State's basic financial statements, and have issued our report thereon dated December 13, 2013.

Our report includes a reference to other auditors who audited the financial statements of the discretely presented component units and University Physicians Inc., a blended component unit, as described in our report on the State of Colorado's financial statements. This report includes our consideration of the results of the other auditor's testing of internal control over financial reporting and compliance, and other matters that are reported on separately by those other auditors. However, this report, insofar as it relates to the results of the other auditors, is based solely on the reports of the other auditors. The financial statements of the University of Colorado Foundation, Colorado State University Foundation, Colorado School of Mines Foundation, discretely presented component units, and University Physicians Inc., a blended component unit, were audited in accordance with auditing standards generally accepted in the United States but were not audited in accordance with *Government Auditing Standards*, and accordingly this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with the University of Colorado Foundation, Colorado State University Foundation, Colorado School of Mines Foundation, discretely presented component units, and University Physicians Inc., a blended component unit.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the State's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate

We Set the Standard for Good Government

in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the State of Colorado's internal control. Accordingly, we do not express an opinion on the effectiveness of the State of Colorado's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies; therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the Schedule of Findings and Questioned Costs, as listed in the table of contents, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies as Recommendation Nos.: 2013-1 through 11, 13 through 18, and 28.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the following deficiency described in the Schedule of Findings and Questioned Costs to be a material weakness Recommendation No. 2013-5.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the following deficiencies described in the Schedule of Findings and Questioned Costs to be significant deficiencies: Recommendation Nos. 2013-1 through 4, 6 through 11, 13 through 18, and 28.

### Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State of Colorado's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

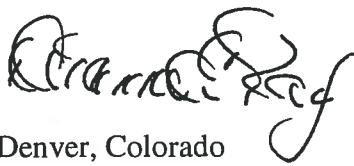

### State of Colorado's Response to Findings

The State of Colorado's response to the findings identified in our audit is described in the Schedule of Findings and Questioned Costs. The State of Colorado's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance, and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

This report is intended solely for the information and use of the Legislative Audit Committee, management, specified legislative or regulatory bodies, federal awarding agencies, and pass through entities and is not intended to be and should not be used by anyone other than these specified parties. However, upon release by the Legislative Audit Committee this report is a public document.

**Report on Compliance for each Major Program;  
Report on Internal Control over Compliance; and  
Report on Schedule of Expenditures of Federal Awards  
Required by OMB *Circular A-133***

Members of the Legislative Audit Committee:

State of Colorado

**Report on Compliance for Each Major Federal Program**

We have audited the State of Colorado's compliance with the types of compliance requirements described in the Office of Management and Budget's (OMB) *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the State of Colorado's major federal programs for the year ended June 30, 2013. The State of Colorado's major federal programs are identified in the Summary of Auditor's Results within Section I. Report Summary, of this report.

*Management's Responsibility*

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

*Auditor's Responsibility*

Our responsibility is to express an opinion on compliance for each of the State of Colorado's major federal programs based on our audit of the types of compliance requirements described in OMB *Circular A-133 Compliance Supplement*. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and OMB *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB *Circular A-133* require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the State of Colorado's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

**We Set the Standard for Good Government**

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the State of Colorado's compliance.

*Basis for Qualified Opinion on the Major Programs*

As described in the Schedule of Findings and Questioned Costs, the State of Colorado did not comply with requirements regarding

- CFDA Nos. 10.551, 10.561; Supplemental Nutrition Assistance Program (SNAP), State Administrative Matching Grants for the Supplemental Nutrition Assistance Program (SNAP Cluster); Activities Allowed or Unallowed, Allowable Cost/Cost Principles, Subrecipient Monitoring; Recommendation No. 2013-45.
- CFDA No. 14.871; Section 8 Housing Choice Vouchers (Housing Voucher Cluster); Reporting; Recommendation No. 2013-76.
- CFDA Nos. 84.063, 84.268; Federal Pell Grant Program (PELL), Federal Direct Student Loans (DIRECT Loan) (Student Financial Aid Cluster); Special Tests and Provisions; Recommendation No. 2013-37.
- CFDA No. 84.126; Rehabilitation Services - Vocational Rehabilitation Grants to States;
  - Activities Allowed or Unallowed; Recommendation Nos.: 2013-50 through 52, 54, 55, 57, and 59 through 62.
  - Allowable Costs/Cost Principles; Recommendation Nos.: 2013-50 through 52, 57, and 59 through 62.
  - Eligibility; Recommendation Nos.: 2013-50 through 55, 57 through 59, 61, and 62.
  - Procurement and Suspension and Debarment; Recommendation No. 2013-65.
- CFDA Nos. 84.377, 84.388; School Improvement Grants; School Improvement Grants, Recovery Act (School Improvement Grants Cluster); Reporting; Recommendation No. 2013-19.
- CFDA No. 93.558; Temporary Assistance for Needy Families (TANF Cluster); Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility, Subrecipient Monitoring; Recommendation No. 2013-46.
- CFDA No. 93.702; National Center for Research Resources, Recovery Act Construction Support (Research and Development Cluster); Davis-Bacon Act; Recommendation No. 2013-38.
- CFDA No. 93.778; Medical Assistance Program (Medicaid Cluster); Activities Allowed or Unallowed, Allowable Costs/Cost Principles, and Special Tests and Provisions; Recommendation No. 2013-34.

Compliance with such requirements is necessary, in our opinion, for the State of Colorado to comply with the requirements applicable to these programs.

*Qualified Opinion on the Major Programs*

In our opinion, except for the noncompliance described in the previous section, the State of Colorado complied, in all material respects with the types of compliance requirements described in the OMB *Circular A-133 Compliance Supplement* that could have a direct and material effect, for the year ended June 30, 2013, on the following programs:

- Supplemental Nutrition Assistance Program Cluster
- Housing Voucher Cluster
- Student Financial Aid Cluster
- Rehabilitation Services-Vocational Rehabilitation Grants to States
- School Improvement Grants Cluster
- Temporary Assistance for Needy Families Cluster
- Research and Development Cluster
- Medicaid Cluster

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the State of Colorado, complied, in all material respects, with the types of compliance requirements described in OMB *Circular A-133 Compliance Supplement* that could have a direct and material effect on each of its other major federal programs identified in the Summary of Auditor's Results section within Section I. Report Summary, of this report for the year ended June 30, 2013.

Other Matters

The results of our auditing procedures disclosed other instances of noncompliance, which are required to be reported in accordance with OMB *Circular A-133* and which are described in the Schedule of Findings and Questioned Costs as Recommendation Nos.: 2013-20, 21, 23 through 33, 35, 36, 39 through 42, 44, 47 through 49, 56, 63, 64, 66, 70 through 75, and 78. Our opinion on each major federal program is not modified with respect to these matters.

The State of Colorado's response to the noncompliance findings identified in our audit is described in the accompanying Schedule of Findings and Questioned Costs. The State of Colorado's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

**Report on Internal Control over Compliance**

Management of the State of Colorado is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the State of Colorado's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program, and to test and report on internal control over compliance in accordance with OMB *Circular A-133*, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the State of Colorado's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies; therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and other deficiencies that we consider to be significant deficiencies.

*A deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the Schedule of Findings and Questioned Costs as Recommendation Nos. 2013-19, 34, 35, 45, 46, 50 through 55, 59 through 62, and 76 to be material weaknesses.

*A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance described in the Schedule of Findings and Questioned Costs as Recommendation Nos. 2013-20 through 33, 36 through 44, 47 through 49, 56 through 58, 63 through 75, 77, and 78 to be significant deficiencies.

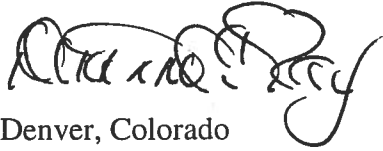

The State of Colorado's response to the internal control over compliance findings identified in our audit are described in the Schedule of Findings and Questioned Costs. The State of Colorado's response was not subjected to the auditing procedures applied in the audit of compliance, and accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance, and the results of that testing based on the requirements of OMB *Circular A-133*. Accordingly, this report is not suitable for any other purpose.

### **Report on Schedule of Expenditures of Federal Awards Required by OMB *Circular A-133***

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Colorado, as of and for the fiscal year ended June 30, 2013, and have issued our report thereon dated December 13, 2013. Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB *Circular A-133*, and is not a required part of the financial statements. Such information is the responsibility of management, and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditure of federal awards is fairly stated in all material respects in relation to the financial statements as a whole.

This report is intended solely for the information and use of the Legislative Audit Committee, management, specified legislative or regulatory bodies, federal awarding agencies, and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties. However, upon release by the Legislative Audit Committee this report is a public document.

A handwritten signature in black ink, appearing to read "Alexandria" followed by a stylized flourish.

*Note 1. Basis of Presentation*

The accompanying Schedule of Expenditures of Federal Awards includes the federal grant activity of the State of Colorado agencies and institutions of higher education. The information in this schedule is presented in accordance with the requirements of the Office of Management and Budget's *Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations*. Under *Circular A-133*, an award is considered expended when certain events related to the award occur. These include:

- Expenditure/expense transactions associated with grants, cost reimbursement contracts, cooperative agreements, and direct appropriations. The State of Colorado recognizes expenditures/expenses on the modified accrual or full accrual basis depending on the fund used. See note 5 of the Basic Financial Statements for additional information.
- Disbursement of amounts entitling the state to an interest subsidy
- Use of loan proceeds under loan and loan guarantee programs
- Distribution or consumption of food commodities
- Receipt of property or surplus property
- Disbursement of funds to subrecipients
- The period when insurance is in force
- Receipt or use of program income

As a result of these criteria, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the basic financial statements.

*Note 2. Report Organization - Federal Assistance as Reported by Colorado State Agencies*

The Report is organized first by cash assistance and then by noncash assistance. Within these subgroups, the information is sorted by agency indicator.

*Note 3. Other Assistance*

Most noncash assistance is reported on the final page of the Federal Assistance Reported by State Agencies. The following provides additional information about amounts shown in the report that federal agencies consider to be assistance.

- A. The State Department of Labor and Employment expended \$1,097,856,400 for grant 17.225 - Unemployment Insurance for Federal Employee Compensation Act (FECA) Reimbursable, Federal Extended Benefits, Temporary Extended Unemployment Compensation (TEUC) Benefit Payments and Emergency Unemployment Compensation 2008 (EUC08) Benefit Payments. The total expenditure amount includes the federal portion of the grants and the required state match in the amounts of \$522,940,711 and \$574,915,689, respectively. Included in the federal portion are American Recovery and Reinvestment Act (ARRA) funds in the amount of \$330,737,989.
- B. The State Department of Higher Education expended \$429,318,289 for grant 84.032 - Federal Family Education Loans. Of this amount, \$406,108,897 has been or will be received from the federal government related to incentive fees and reinsurance costs of student loan defaults paid to lenders. The remaining amount is made up of new loan issuances of \$23,209,392 which was guaranteed by other entities. The outstanding balance of the Federal Family Education Loan program since its inception was \$9,746,280,799 as of June 30, 2013.

C. The State Department of Human Services expended \$832,648,995 for grant 10.551 Supplemental Nutrition Assistance Program (SNAP). The reported expenditures for benefits under the Supplemental Nutrition Assistance Program (SNAP) (CFDA No. 10.551) are supported by both regularly appropriated funds and incremental funding made available under section 101 of the American Recovery and Reinvestment Act of 2009. The portion of total expenditures for SNAP benefits that is supported by Recovery Act funds varies according to fluctuations in the cost of the Thrifty Food Plan, and to changes in participating households' income, deductions, and assets. This condition prevents USDA from obtaining the regular and Recovery Act components of SNAP benefits expenditures through normal program reporting processes. As an alternative, USDA has computed a weighted average percentage to be applied to the national aggregate SNAP benefits provided to households in order to allocate an appropriate portion thereof to Recovery Act funds. This methodology generates valid results at the national aggregate level but not at the individual State level. Therefore, we cannot validly disaggregate the regular and Recovery Act components of our reported expenditures for SNAP benefits. At the national aggregate level, however, Recovery Act funds account for 10.95 percent of USDA's total expenditures for SNAP benefits in the Federal fiscal year ended September 30, 2012.

*Note 4. Subrecipients*

All amounts passed-through to subrecipients are identified in the Report under the column titled Passed to Subrecipients.

## Required Communications Letter

Members of the Legislative Audit Committee:

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Colorado for the year ended June 30, 2013, and have issued our report thereon dated December, 13, 2013. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards and the standards applicable to financial audits contained in the *Government Auditing Standards* issued by the Comptroller General of the United States, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you, dated August 12, 2013. Professional standards also require that we communicate to you the following information related to our audit.

### Significant Audit Findings

#### *Qualitative Aspects of Accounting Practices*

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the State are described in the Notes 1-7 to the financial statements contained in the Fiscal Year 2013 Comprehensive Annual Financial Report issued under separate cover. In Fiscal year 2013, the State of Colorado adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 60 – *Accounting and Financial Reporting for Service Concession Arrangements*, Statement No. 62 – *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*, and Statement No. 66 – *Technical Corrections – 2012 – an amendment of GASB Statements No. 10 and No. 62*. In addition to implementing these new provisions during Fiscal Year 2013, the State made a change to the reporting entity and no longer presented the University of Colorado Hospital Authority as a discretely presented component unit within the State's financial statements. Furthermore, we noted no transactions entered into by the governmental unit during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period. Our opinion is not modified with respect to these matters.

Accounting estimates are an integral part of the financial statements prepared by management, and are based on management's knowledge and experience about past and current events, and assumptions about future events. Certain accounting estimates are particularly sensitive because

We Set the Standard for Good Government

of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the State's financial statements were taxes receivable, allowance for doubtful accounts, depreciation of capital assets, deferred revenue, compensated absence liabilities, self-insurance liabilities, incurred but not reported medical assistance liabilities, unclaimed property liabilities, actuarial valuations of post employment benefits, pollution remediation obligation estimates, and unemployment benefits payable.

The financial statement disclosures are neutral, consistent, and clear.

#### Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

#### Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Section VII. Appendix B summarizes uncorrected misstatements of the financial statements. Management has determined and we agree that the effects of these uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements taken as a whole. Section VII. Appendix B also summarizes misstatements corrected by management that were detected as a result of audit procedures

#### Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

#### Management Representations

We have requested certain representations from management that are included in the management representation letter dated December 13, 2013.

#### Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

### *Other Audit Findings or Issues*

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year as the governmental unit's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

### Other Matters

With respect to the supplementary information accompanying the financial statements, we made certain inquiries of management, and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America. The method of preparation has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

### Independence

We hereby confirm that, as of December 13, 2013, we are independent with respect to the State of Colorado under all relevant professional and regulatory standards.

This information is intended solely for the use of the Legislative Audit Committee and management of the State and is not intended to be, and should not be, used by anyone other than these specified parties. However, upon release by the Legislative Audit Committee this report is a public document.

Denver, Colorado
